Mills declines to add name to 'Amethyst'

BY NAT HERZ ORIENT STAFF

President Barry Mills has declined to sign the Amethyst Initiative, a national petition of college and university presidents that aims to invigorate discussion about changing the legal drinking age.

In a statement released in late August, Mills said that he would not sign the petition because "the conversation and debate about an appropriate legal drinking age needs to be much broader."

According to Mills, this discussion "goes well beyond the gates of America's college and university campuses since many people who would be affected by a change in America's drinking laws are not earolled in college."

In an interview, Mills said that Bowdoin handles underage drinking as well as any school in the country.

"Students on this campus make good decisions [about drinking], and we need to understand that," he said.

Currently, 129 college and university presidents have signed the petition, including Leonard Tyler of Maine Maritime Academy, Ronald Llebowitz of Middlebury College, and James Wright of Dartmouth College.

The Amethyst Initiative was sparked by John McCardell, former president of Middlebury, as he prepared to give a talk about the drink-

Cars banned for future first-year classes

Zipcars and the Bowdoin Shuttle to offer alternative transportation options

BY CATI MITCHELL

First years who drive to campus next fall will have to send their cars

In a continued to effort to promote sustainability and environmental responsibility, first-year students beginning with the class of 2013 will no longer be allowed to bring cars to campus. The decision will help to eliminate approximately 100 cars from campus.

In a statement made in early August, President Mills said, "Having a car at Bowdoin Is mostly a luxury, and hardly ever a necessity. As we investigate steps the College can take to move responsibly and effectively to improve the environment and to serve as a role model for sustainability practices, the elimination of first-year cars just makes a whole lot of sense."

Dean of Student Affairs Tim Foster has received largely positive feedback from the announcement, noting that current students have not reacted negatively as the policy doesn't affect them, a deelsion by the College that was "very intentional."

"The real driver for this is the environmental push, and I think it's the right thing and the right time to do this," said Foster in an interview with the Orient.

Shain leaves admissions post in June

Scott Meiklejohn assumes interim dean of admissions

BY NICK DAY ORIENT STAFF

After two years at the helm of Bowdoin admissions, William Shain has left the College.

Shain's departure was announced in an e-mail on June 5 by President Barry Mills to faculty, staff, Trustees, and members of the Alumni Council. In the statement, Mills explained that Shain, who had admitted the Classes of 2011 and 2012 in his post as dean of admissions and financial aid, was leaving the College on June 30.

ing the College on June 30.
Shain, who declined to be interviewed, told the Orient in an e-mail on Tuesday that he was pleased with last year's admissions process. However, he said that the departure of Logan Powell—a former senior associate dean of admissions at Bowdoin who became director of admission at Princeton last December—put pressure on Shain and the admissions offeed

Thave never been prouder of an admissions year," Shain wrote, referring to last year's application cycle for the Class of 2012. "But it was an exhausting one, because Logan Powell was in charge of coordinating the admission process but took another job...This put a real burden on senior staff, since

After 10 years at museum, Kline will leave in October

BY MARY HELEN MILLER ORIENT STAFF

After serving as director of the Bowdoin College Museum of Art for almost exactly 10 years, Katy Kline will step down from the position in October.

sition in October.

According to Kline, when she took the job in 1998, her specific assignment was to "reinvigorate and enliven the museum." The museum reopened last fall after a \$20.8 million renovation, and Kline said she thought it would be important to stay for one more year, but no more.

"Everything is good. It is a good time to leave and let somebody else invent the next chapter," Kline said.

At Monday's faculty meeting, President Barry Mills said that there is national search underway for the next museum director.

"We are looking literally everywhere for a successor to her at the art museum," Mills said.

Until a new director is appointed, retired Professor of Art History Clif Olds will serve as an interim director.

Kline's decision to resign was announced in May in a campuswide e-mail from Mills.

"[Kline's] focus on maintaining a talented staff, providing program, and sustaining connections to the community during two years of closure and renovation was admirable," Mills wrote in the e-mail.

"[Kline] has guided the development of the collections through strategic purchases and cultivated important relationships with current and future donors," Mills

In an interview, Mills said that Kline "wanted to get the art museum up and running, and then stay and play the instrument for a

Class of 2012 bursts into Bowdoin bubble

BY CAITLIN BEACH ORIENT STAFF

The class banners hanging in Thorne Dining Hall have moved one spot to the right to make room for the newest addition to Bowdoin: the Class of 2012.

The class—489 students drawn from a pool of 6,033 candidates—constitutes one of the most diverse and selective classes in the history of the College.

Through early and regular decision programs, the Office of Admissions accepted 1,020 students out of the candidate pool—or approximately 18.6 percent of applicants for the Class of 2012.

Of the first-year class, Interim Dean of Admissions Scott Meiklejohn said, "I think they're fantastic. Everybody feels like the staff here in admissions did a great job bringing in a group of interesting and talented

The College also enrolled 159 students of color in the Class of 2012, a record high. Minority students make up approximately 33 percent of the Class of 2012, a 3 percent increase

CARS

In order to accommodate an increased need for shared modes of transportation, the College has introduced two new programs: Zip-cars and the Bowdoin Shuttle, which replaces the Safe Ride program.

Zipcar is a nationwide car-sharing service that allows members to rent cars for an hourly or daily fee. Membership requires an annual fee of \$25, and the hourly rate is \$7. Bowdoin has made two Zipcars available to students and employees. The cars, a Honda Civic Hybrid and a Honda CRV, are located in the Russwurm House parking lot on College Street.

In a letter to first-year students, Spe-cial Assistant to the Dean of Student Affairs Meadow Davis noted that many students at Bowdoin say their cars most ly sit in parking lots, and many others do

ly at in parking ioss, and many outers on on thave cars on campus.

"Zipcar provides the freedom to travel away from campus to attend interviews, volunteer in the communications." nity, run errands, or take a weekend trip," the letter read.

Davis also cited Zipcar's environmental impact. "[It] proves many environmental benefits such as preserving green space by using fewer parking spaces, lower fuel consump-tion," she wrote. "Each Zipcar eliminates the need for more than 15 privately owned vehicles. That could mean 30 fewer cars at Bowdoin

According to Davis, Zipcar has processed 104 applications from Bowdoin students, faculty, and staff. Though usage was slow in August, when students had not arrived on campus, they now make up the ma-

jority of the applications.

"We hope that usage will continue to increase as students, faculty, and staff use the cars and experience the convenience of Zipcars for them-selves," said Davis.

nity members can use the cars as well," Davis added. "While we do not track the number of members from the Brunswick community we see they are using the cars. It is really excellent to have a car sharing pro gram that literally brings sharing to both the campus and the town." Students without individual means

of transportation will also be able to utilize the College's new Bowdoin Shuttle, a hybrid that adopted the efficiency of a typical shuttle system with the flexibility of the former Safe Ride program.

The new system incorporates 10

fixed stops, including various campus apartments along with stops down-town such as Hannaford or Joshua's Tavern. In addition, the Shuttle will pick up students at their individual locations and take them anywhere within a one-mile radius

The new program, said Director of Safety and Security Randy Nichols, "gave us the flexibility of serving the more outlying places," such as off-campus housing on School Street or lar weekend destinations like

Sea Dog Brewery in Topsham.

However, the Shuttle will not provide rides outside of the hours of 6 p.m. to 2 a.m. (3 a.m. on Thursday, Friday, and Saturday). Nichols noted that Security has been "liberal" in the past about providing rides to students, which were particularly popular on days with inclement weather.

'It became more than we bargained for," he said, adding that there were many days when officers were spending more than half of their shifts giving students rides, which prevented them from attending to their regular campus patrols.

Rides are available, however, at any hour to students who feel unsafe or have a health issue. Said Nichols, "Anything that affects safety, we're all over that."

SHAIN **CONTINUED FROM PAGE 1**

[Powell's] position could not be re-placed mid-year."

Shain also cited family health issues

as a reason for his departure.
"We had six months of family health concerns, which were not proven groundless until the spring [of 2008],"

In his e-mail on June 5, Mills did not mention why Shain was stepping down, but Mills did praise him for increasing diversity at the College and

raising the profile of the school.

"During his tenure here, Bill has helped raise national awareness about the excellence of Bowdoin's academic and residential life programs, and has done much to advance ambitious efforts to increase diversity at the College," Mills wrote.

The e-mail was not sent to students

Mills said he did not think an e-mail over the summer informing the stu-dent body of Shain's departure was ap-

It was the summer." Mills explained. "We aren't in the business of sending out campus-wide e-mails in the summer."
Mills added that students living and

working on campus during the summer likely knew of Shain's departure.

There were over 200 students on this campus this summer working," Mills said. "Everybody knew [of Shain's departure] because everybody interacts with everybody over the summer. So it asn't like we kept this in the dark."

Shain said that he plans to pursue

nissions consulting work and establish a practice as an independent college cou inselor, but that he does not want to lead another admissions office

"It seemed like a good time to move to a more flexible work schedule, and to try something new while I am still young enough to do so," he said. "I actually declined a couple of weeks ago to be considered [for the position of dean of admissions] at a top national university."

Since Shain's departure on June 30, Scott Meiklejohn, who has worked at the College for 11 years—most recent-ly as vice president for planning and

institutional advancement-has taken over as interim dean of admissions.

According to Mills, Melklejohn will assume the post for two years while a national search for Shain's successor is conducted.

Scott has worked closely with students, faculty, and staff in many areas of the College during his 11 years at Bowdoin, and I believe he has the experience, energy, and understanding of the College to represent us effectively during this time of transition," Mills wrote in the June 5 e-mail.

Before arriving at Bowdoin in 1997, Meiklejohn served as headmaster at La Pietra School in Honolulu, Hawaii. Meiklejohn also worked in the admissions office at Hebron Academy, serving as assistant director of admissions from 1979 until 1981 before becoming admissions director for the 1981-82 school year

Though Meiklejohn's appointment as interim dean of admissions marks the first time he has officially worked in college admissions, he said his extensive experience at Bowdoin has eased

"My transition to admissions has been busy and enjoyable but not difficult," Meiklejohn, who started July 1, said of his first two months at the post. "Many of the important issues in admissions and financial aid are ones that I'm thoroughly familian with from 11 years at Bowdoin, my service as a trustee [at Colgate University], and my years as a school headmaster.

Shain said he does not think Meiklejohn's lack of college admissions experience will hinder his job performance, adding that he will also "have the benefit of a capable and experienced group of colleagues in the admissions office.

"I have always thought highly of Scott and wish him well," Shain added.

Meiklejohn said the only significant change in the admissions office since the departure of Shain had been the hiring of Senior Associate Dean of Admissions Whitney Soule.

Soule, who interviewed with Shain before she was officially hired at the end of May, said that he had not discussed

with her his imminent departure.

"His departure, I think, was unexpected, and it wasn't something he discussed with me," Soule said.

MARIEL REALIDOIN, THE ROWDOIN ORIENT

ZIP-A-DEE-DOO-DA: Over 100 students, faculty, and staff members from Bowdoin have applied to be Zipcar members. The two new Zipcars, parked in the Russwurm House parking lot, provide another transportation option for students on campus without cars

BOWDOIN BRIEFS

Massachusetts Hall treated for fleas

Last week, Massachusetts Hall was closed to students and faculty due to a flea infestation and subsequent treatment. When Housekeeping discovered the pests on Saturday, a local pest control service performed a treatment

later in the day.

Associate Director of Facilities Operations Jeff Tuttle said that the building was treated again on Mon-day because the life cycle of the flea makes it difficult to knock them all out at once

Pest control used a localized appliation of aerosol and foam to wipe out the fleas, as opposed to a highly intru-sive "bomb" that is sometimes used to

That's a last ditch effort," said Tuttle The substance used by pest control, though mild to humans, was strong enough to kill the fleas.

Even in its wet state, at its most it's an irritant," said Tuttle. By halting the reproduction of the fleas, it kills the fleas within a day or two. as within a day or two.

After inspections on Tuesday con-firmed that the building was free of fleas, Massachusetts Hall was reopened on Wednesday morning

Security breach investigation ends. 8,000 notified by letter

Over the summer, a College hired security firm concluded its investigation of a data breach first reported by the Orient in April.

According to a July 3 story posted on the Bowdoin Web site, "Following a thorough investigation, Bowdoin College has announced that there is no reason to believe that computer files left open on its network have been accessed or misused."

The College notified "approximately 8,000 people in nearly two dozen states" and compiled a site with frequently asked questions about the possible breach of Bowdoin's computer network (www. bowdoin.edu/it/securityfaq.shtml). In April, a folder in the name

of Caitlin Gutheil, the former student health program administrator who departed Bowdoin in March, was left open, exposing files that included student health insurance information and student Social Se-

Construction continues on new campus facilities

ADAMS HALL MAKEOVER: Demand for handicapped accessibility was one factor that prompted the renovation of Adams Hall, shown above with a newly installed wheelchair ramp and elevator

BY ADAM KOMME ORIENT STAFF

Dayton Arena will host one last Bowdoin-Colby hockey game before passing the torch to the new Sidney J. Watson Arena.

The new arena, adjacent to Farley Field House, will see its first games in January, according to Director of Capital Projects Don Borkowski.

The Fitness, Health, and Wellness Center, also under construction, is expected to be ready for use during the 2009 fall semester.

Watson Arena, named after the late Bowdoin hockey coach and director of athletics, has a seating capacity of 1,900, similar to that of Dayton Arena. When Watson Arena opens, Dayton Arena will be demolished, with the land converted into a parking lot.

Dayton Arena, constructed in 1956, has more than served its time, Borkowski said.

Dayton had exceeded its useful lifespan several years ago," said Borkowski. "The cost of renovating and replacing systems again was not a plausible option."

But as one Watson namesake rises, another one is scheduled to fall. The new Fitness Center is a re-

sponse to student demand. "The existing Watson Fitness Center [housed in Smith Union] lacks adequate capacity to meet the needs of the current Bowdoin community," Borkowski said. "When it was renovated in the '90s. I don't think anyone anticipated the cur-

rent wave of fitness popularity we are experiencing right now."

The new Fitness, Health, and Wellness Center will have four floors. The ground floor and first floor will house physical fitness facilities. The second floor will host the athletic department, including the athletic offices once located in the Morrell Gym complex.

Bowdoin's health and wellness

programs will share space on the third floor, with a new medical office being introduced alongside areas to accommodate yoga, tai chi, and other wellness-related classes.

The new Fitness Center will almost double the amount of cardio equipment available, as well as increase the amount of weight training equipment. Notably, the number of treadmills available will increase from eight in the old Watson Fitness Center, to 18 in the new Fitness Center and elliptical machines from

Both buildings aim to respect the environment, with LEED (Leaderin Energy Efficient Design) certifications expected after comple-

Green initiatives for Watson Arena include an energy-efficient refrigeration system and its stormwater management plan; the new Fitness Center aims to receive credits for efficient use of windows and

In addition to current construction projects, the College also finrenovations on Adams Hall over the summer.

New additions to the buildings include the addition of an elevat tower and an entrance on the building's west side. A state-of-the-art Heating, Ventililation, and Air Conditioning (HVAC) system has also been installed.

Senior Vice President for Finance and Administration & Treasurer Katy Longley was pleased with the results of the year-long construction

The interior renovations are fansaid Longley, who oversees the College's capital projects. "The elevator probably has one of the very best views on campus, if you go to

Borkowski said that no more construction projects are on the imm diate horizon.

"Currently we are only in the planning stages with nothing to announce yet," he said, but "there is a planning committee working on how to best utilize Sargent Gym once the current fitness center moves out in 2009."

AMETHYST

ing age at a gathering of liberal arts college presidents. After talking with many of them, McCardell and others realized that they were all interested in renewing this debate and discussion on a broader level.

According to the initiative's Web site, the current drinking age of 21 is "not working." The site suggests that rethinking this age could be a way to reduce binge drinking and encourage

Grace Kronenberg, assistant to the director at Choose Responsibility, the organization run by McCardell that oversees the Amethyst Initiative, said that the effort does not seek to ignore young people not enrolled in college.

Because the Amethyst Initiative is limited to college presidents for now doesn't mean we feel they're the only stakeholders in the debate, it just means they're the first ones to come on board," she said. "College is the most prevalent and common choice for someone after high school graduation-65 percent of high school students enroll full or part-time. We believe that starting with leaders in higher education...would send a "Because the Amethyst Initiative is limited to college presidents for now doesn't mean we feel they're the only stakeholders in the debate, it just means they're the first ones to come on board."

GRACE KRONENBERG ASSISTANT TO THE DIRECTOR AT **CHOOSE RESPONSIBILITY**

forceful message to the nation and to our elected officials"

Kronenberg said that her organization might extend the initiative to other groups or beyond higher edu-cation, though they are still focused on adding more college presidents to the list.

Geno Ring, a licensed drug and alcohol counselor who evaluates Bowdoin students, said that while he valued discussion on the issue, he needed to see hard evidence in support of any reduction in the drinking age.

"I'm always a firm believer in dia logue," he said. But, he added, "considering what the stakes are for it, which are lives, it seems like a potentially reckless gamble.

While Ring stressed that he did not know the details of the initiative, he did say that passing new laws was not the best way to solve the problem of

To a certain degree, we can't rely on legislation to change a culture where binge drinking is okay," he said. "If you want to change people's behaviors, you need to change how they think, and that's a lot of work."

Ring agreed with Mills that the College is already doing well with the issue of underage and binge drink-

ing.
"I think Bowdoin is dealing with it," he said. "Bowdoin has taken a number of steps to realistically reduce as much as possible unhealthy drinking.

No students or groups at Bowdoin have organized or lobbied for a change in the drinking age in the recent past. According to Lindsay Bruett '09, president of the Inter-House Council (IHC), the current law is not causing problems at the College.

"I don't think the fact that people under 21 aren't allowed to drink creates a dangerous environment at Bowdoin," she said, "I don't think it's a pressing issue, as far as we're

KLINE CONTINUED FROM PAGE 1

Kline said that during her first few years as director, it was dif-ficult to plan exhibitions far in advance because she did not ever know how much time she had before the museum would close for renovations

One of her favorite exhibitions to organize, "Pointed Pairings," was on display in 2002. The exhibition showed pairs of objects that were superficially similar but considered vastly different in value. Just by looking, viewers would guess which object of each pair was extremely valuable.

"I invited them to use their own eyes," Kline said.

Another one of Kline's favorite

exhibitions to organize, which was on display in 2004, was a traveling show of surrealist art on paper that included an element added by the Bowdoin Museum of Art. Kline arranged for regional artists to participate in a surrealist drawing game called "the exquisite corpse." Twenty artists received instructions that told them to draw the first quarter of a figure on a piece of paper, fold the paper over to make their drawing invisible, and

pass the drawing to another artist. When finished, the 20 original pieces of paper were returned as 20 drawings of fantastical creatures, each divided into four very different segments. The drawings were hung as part of the surrealist show.

"It was a way of taking a travel-ling show and adding something to it to make it more specific to this place," Kline said

During her first summer on the job, Kline organized an exhibition that showcased one artist's response to the Maine landscape. Since then, there has been a Maine landscape exhibition every summer that the museum has been opened, each time featuring a different artist.

After she leaves her position at Bowdoin, Kline does not plan to work as a director at another museum.

"First, I need to take a trip, then I'm going to catch my breath," Kline said. "I have decided not to follow through on any invitation to be a director at other museums."

Instead, Kline plans to write, do research, organize exhibitions, and

"Its been an intense decade, but I can leave with the feeling that things are in good shape," Kline said.

Ryan McDonough '08 banned from campus after arrests

RY GEMMA LEGHORN

Former Bowdoin student Ryan McDonough '08 was arrested twice this summer and has been banned from Bowdoin property.

In an e-mail sent to students in early July, Director of Safety and Security Randy Nichols informed the Bowdoin community that Mc-Donough had been issued a criminal trespass warning, which prohibited him from stepping foot on

Before the trespass warning, McDonough was arrested in his hometown of Worcester, Massachusetts. On July 8, the Worcester Telegram & Gazette reported that McDonough had been charged with a violation of an abuse pre-

vention order.

McDonough was also arrested in Oakland, Maine, on the same charge a short time after the inci-dent in Worcester.

The security alert issued by the College stated that the abuse prevention order was filed against him by another Bowdoin student. In addition to allegedly harassing the student, McDonough behaved inappropriately toward staff

Though a restraining order is of-ten enough to deter individuals from making contact with the restricted person or location, this has not been the case with McDonough.

"He has shown a propensity to violate these orders in the past," said Nichols.

Given McDonough's recurring violations. Nichols stressed that watchfulness in the community is essential.

"We are very vigilant and alert about it and that's why we have asked the entire community to

"We are very vigilant and alert about it and that's why we have asked the entire community to help us out. It's a coordinated effort, and we need each other to keep this a safe community."

RANDY NICHOLS **DIRECTOR OF SAFETY AND SECURITY**

help us out," said Nichols. "It's a coordinated effort, and we need each other to keep this a safe com-

Though trying to locate a single individual on campus with two or three officers at night can be like trying to find "a needle in a hay-Nichols said that having the eyes of all students makes a significant difference.

If a student sees McDonough or his vehicle-a blue 2005 Ford F-350 pickup truck-on or around campus, he or she is asked to call Security immediately.

According to Nichols, Security has been working closely with the Brunswick Police Department (BPD) in recent weeks to enforce McDonough's ban on campus. If McDonough were to come in contact with the student who filed the restraining order or step onto campus, both Sectirity and the BPD would become involved.

"He would be arrested for a criminal trespass and also for violating the protection abuse order," said Nichols

In addition, any form of contact with the student who issued the abuse prevention order, whether by phone, e-mail, or in person, is

2012 CONTINUED FROM PAGE 1

flip-flopped a bit. Overall, these statistics are still keeping in line with a 50-50 gender balance here." Fifty-seven and one-tenth percent

of students from the Class of 2012 attended public high schools, while 10.2 percent and 32.7 percent come from parochial and independent schools, respectively.

We also saw an interesting change in geographic and international diversity," said Micklejohn.

The number of international students nearly doubled from last year's admissions cycle, with 22 countries represented in the Class of 2012. Forty-one of the 50 states are represented, as opposed to 39 in the Class of 2011. The Eastern seaboard is well represented in the Class of 2012, with 39.4 percent hailing from New land and 21.2 percent from the Mid-Atlantic States. The College also saw a sizeable increase in students from the West Coast, bringing in 13.1 per-cent compared with last year's 9.9

Three hundred and twenty students—roughly 65 percent of the Class of 2012—arrived at Bowdoin on August 26 to embark on Pre-Orientation (Pre-O) trips led by the Bowdoin Outing Club (BOC). Thirty additional students participated in community immersion Pre-O trips organized by the McKeen Center for the Common Good.

"The Pre-O trips this year were as tooth as eyer," said Outing Club Assistant Director Bree Simmons. "First years came back beaming, groups hugged in tight circles, and the leaders shared a look and a smile that had success written all over it."

Students returned from Pre-O trips on August 30 to join the remaining members of the Class of 2012 for five days of orientation activities. Resiential halls also opened officially for move-in at this time.

Residential Life made several

changes in dorm configurations this year, most notably with the elimi-nation of the "quiet dorm" and the

addition of two chem-free floors in Coleman Hall. In addition to the sement and first floors of Coleman, Hyde Hall has also been designated

chem-free housing for first-years.

Normally, ResLife designates
one dorm to be chem-free, but there was a higher demand for [chem-free housing] this year without the quiet dorm option," said first floor Coleman proctor Shalmai Rivera '10. Whether the two chem-free floors

of Coleman is something Rivera is anxious about.

"There hasn't been a ton of floor mixing, but it is just the beginning of the year," she said.

year," she said.

The other proctors and I are trying to make the top three floors not isolated from the bottom two, but it is not always the easiest thing to do," she added.

Despite a busy orientation sched-ule, first years found ample time to enjoy their first week on campus.

"I think orientation and the first "I think orientation and the first few days of school have been a lot of fun," said Anitra Sprauten 12. "We're still in that stage when we are in that first part of college without all the stress of classes and busy schedules." One complaint raised by several first years was a lack of activities out-side of their proctor group.

side of their proctor group.
"I found that we got to know our floor really well, but that we did not have many opportunities to meet anyone else," commented first year

Jordan Lalor.

Elizabeth Maybank '12 agreed. "I wished there had been more random groupings amongst our class during orientation," she said.

But the Class of 2012 seems to have acclimated well to life on campus.

"Meeting people has been the easiest part of adjusting to college," said Sydney Miller '12. It was a pleasant surprise to see how everyone is so friendly here."

CAMPING OUT: First-year students enjoy a well-deserved break while on their pre-orientation trip, Katahdin G. Three hundred and twenty students participated in the Outing Club led trips.

· A student with an injured toe was transported from the Health Center to Parkview Hospital.

Tuesday, September 2
- Several students walking in a from Osher Hall to Farley Field House were stung after they walked into a nest of bees near a ooded pathway between South and Longfellow Streets.

Wednesday, September 3

· Security officers dispersed an

unregistered event taking place in a room in Winthrop Hall. · Damage was reported in the

kitchen at Baxter House and in the basement of Ladd House.

Thursday, September 4

 A housekeeper reported a oom box missing from a closet in Sargent Gymnasium.

A Bowdoin Shuttle van was ear-ended at the intersection of Maine Street and Bath Road. The van was not transporting students.

A fire alarm at Thorne Dining Hall was activated by a kitchen

A fire alarm sounded at Brunswick Apartments H. There was no problem and the system was reset.

An unregistered event in the Ladd House basement was dispersed. The house was held responsible for the policy violation.

· Brunswick Police issued a summons to a student for Possession of Alcohol by a Minor on Sills Drive. This charge carries a minimum \$200 fine in district court.

Friday, September 5

· Another false fire alarm was received from Brunswick Apartments H. An electrician was called replace a faulty detector.

· A student with an ankle injury was transported from the Health center to Parkview Hospital.

Security cited a senior with an alcohol policy violation for fur-

nishing a 30-rack of beer to a firstyear student in Winthrop Hall. The first-year student was also cited for a policy violation.

· An officer transported a student with a rugby related eye injury to Parkview Hospital.

 Security confiscated a bong nd a bag of marijuana from a Maine Hall student on South Campus Drive. The matter was referred to the dean of student affairs.

· A Baxter House resident received head and groin injuries when he tried to scale a wooden fence on South Street. Security transported the student to Parkview Hospital for treatment.

Saturday, September 6

· An officer checked on the wellbeing of an intoxicated West Hall

· An ill Howell House student

was taken to Parkview Hospital. · There was an alcohol policy vi-

olation at Harpswell Apartments.

• A series of false fire alarms at Howell House Saturday night and Sunday morning was resolved with a repair to the system.

Sunday, September 7

• A Howard Hall student having difficulty breathing was examined by rescue personnel. The student was not transported.

· A student with an eye injury was transported from Appleton Hall to Parkview Hospital. Monday, September 8

· A student reported a lost iPod at Sargent Gymnasium. The item was found by a housekeeper.

· A male rugby player with an injured ankle was taken to Parkview

Tuesday, September 9

 Security and Brunswick Rescue responded to a report of a man passed out in the Sargent Gym locker room. A staff member who had been working out became faint. He was examined on site and released

Wednesday, September 10

· An ill Howard Hall student was taken to Parkview Hospital for ob

· An ill Chamberlain Hall student was transported to Mid Coast Hospital.

Help prevent bicycle theft and get your recovered stolen bike faster by registering your bike online at www. bowdoin.edu/security. There is no charge for registering. A blue regis-tration sticker will be sent to your Bowdoin mailbox. For more information, contact Jen at the Safety & Security Office, 725-3458.

New faces on campus represent new and growing disciplines

ORIENT STAFF

This fall, there are 46 new faculty members, several of whom hold newly created leadership positions. Recently added positions include a director of the Africana Studies Program, a director of the Environmental Studies Program, and a fulltime director of the Bowdoin Scientific Station on Kent Island. There is also a lecturer in Arabic for the first time and a new chair for the Theater and Dance Department.

OLUPÉMITYAUGHAN : DIRECTOR OF AFRICANA STUDIES

Olufemi Vaughan comes to Bowdoin as the new director of Africana Studies and the first Geofrey Canada Professor of Africana Studies and History. He has spent the last 18 years in various teaching and administrative positions at the State University of New York (SUNY), Stony Brook. He characterized his position's main objective as exploring ways "of extending and deepening" the interdisciplinary pursuits of Africana, African American, and African

Diaspora Studi

Vaughan said that while he was visiting the campus during the hiring process, his discussions with faculty members and students centered on ways in which they could work together to create a "coherent and cohesive" Africana Studies department. He explained that his own approach to the complex, interdisciplinary nature of Africana Studies aligned with the sort of department the College was looking to create.

"[It is] essential to find ways to make connections [between departments] and to find faculty colleagues to be a part of [an] interdisciplinary dialogue," Vaughan said

PHILIP CAMILL
DIRECTOR OF
ENVIRONMENTAL STUDIES

Philip Camill arrives on campus as the new director of Environmental Studies and the Rusack Associate Professor of Biology and Environmental Studies after nine years of teaching at Carleton College. In explaining the role of his new position, Camill said he "will be involved with sustaining and building on the successes of the ES program and helping to develop synergies among other affiliated programs on campus, such as Arctic Studies and Coastal Studies."

This semester, Camill is teaching "Global Change Ecology," a course that shares the same name as his field study. He described the discipline as an examination of "how humans impact ecosystems," and his specific area of research as looking at "how rising global temperatures affect things like permafrost thaw and carbon cycling in boreal and Arctic ecosystems in northern Canada."

DAMON GANNON

DIRECTOR OF BOWDOIN SCIENTIFIC STATION ON KENT ISLAND

Damon Gannon began his work as the first full-time Director of the Bowdoin Scientific Station on Kent Island May 1, 2008, and he is now also serving as an adjunct assistant professor in the Biology Department. Previously, he was employed as a staff scientisf at the Mote Marine Laboratory in Saraso-

ta, Florida. This semester, Gannon brings together his work on Kent Island and his expertise as a marine ecologist through the course he is teaching, "Ecology of the Gulf of Maine and Bay of Fundy."

Although he will spend his summer at the scientific station, Gannon will work during the academic year fundraising for the facilities and programs on Kent Island and planning the type of research he would like the station to conduct during its next summer session.

RUSSEL HOPLEY
POST DOCTORAL FELLOW AND
LECTURER IN ARABIC

Resulting largely from studentled efforts during the past two years, Bowdoin is offering instruction in Arabic for the first time. Russel Hopley, who is working toward a Ph.D. in Near Eastern Studies at Princeton University, is teaching "Elementary Arabic" as a post-doctoral fellow in the Religion Department.

Hopley called the desire of colleges to have programs in Arabic and Islamic studies a "countrywide phenomenon." While on campus, he also plans to finish his dissertation, as well as write and present two articles exploring different aspects of his studies on 12th-Century Islamic Spain.

ROGER BECHTEL
CHAIR OF THEATER AND DANCE

Roger Bechtel is the new chair of the Theater and Dance Department and an associate professor in the department. He arrives after holding comparable positions at Miami University in Ohio, where he worked with graduate students.

This semester, Bechtel is teaching two courses: a senior theater seminar and "Performance in the 21st Century."

In his personal work, Bechtel said his interests as an artist can be characterized as an "amalgam of traditional and experimental." In his scholarly pursuits, he said that he "work[s] with a certain amount of political and cultural critique."

Summer brings opportunity for service and exploration

BY CAITLIN BEACH AND
CAMERON WELLER
ORIENT STAFF

Samantha Scully '09

Samantha Scully '09 had no idea that a student digest post could change her life. Sandwiched between posts about lost ID cards and student activities was information about applying to the Japan America Student Conference (JASC), a prestigious cultural exchange program.

JASC was founded in 1934 and is one of the longest-running student exchange programs.

"The program was started by university students from Japan and America who knew relations between the two countries were strained, and hoped that a program would help," said Scully. Scully, a history and Asian studies major at Bowdoin, saw the program as a "great step" in furthering her studies in Japanese history.

This summer, Scully was elected to the Executive Committee of JASC after participating as a delegate the previous year. As a part of the Executive Committee, Scully worked to set up forums and book events and speeches for the conference's Japanese and American candidates. She collaborated with 31 other Japanese and American students to run this summer's conference that focused on the theme, "Students Redefining Their Role Through Insight and Action."

"What we wanted was for students to really talk to each other through different forums on subjects like corporate responsibility and ethics," said Scully. "The big point is to try to hit these themes home and make sure students really understand and work with them."

"Sometimes you struggle because you have stereotypes about the other country that you have to grow from. The program is nothing like a regular classroom experience. It's a study in and of itself," she added.

Pete Wadden '09

Pete Wadden '09 spent several days of his summer on board a 48foot yacht in the Newport Bermuda Race 2008. The historic ocean race is a 635-mile trek starting in Newport, Rhode Island, traversing through the Gulf Stream, and ending in Bermuda.

Wadden participated in the race with several Bowdoin alumni, and his crew of nine completed the race in less than four and a half days.

"I was primarily a helmsman for the race and also worked the mast when we were doing sail changes and other maneuvers," he said.

"Some of the highlights included flying fish jumping onto our boat and hitting crew members, and a whale surfacing about two boatlengths off our bow when I was on the helm," said Wadden. "The whale came close enough that I had to steer around it, and it then proceeded to follow us for over an hour."

Despite windy conditions and sailing for twenty-four hours a day, Wadden found the race to be "an absolute blast."

"I have done a lot of sloop sailing on the Great Lakes but no other offshore racing like this. It's really an experience," he said. "There is no wilderness that can compare to the open ocean."

Charles Warren '10

Few people can say that they have truly explored the wild outdoors the way Charlie Warren '10 can. A veteran Bowdoin Outing Club (BOC) member, Warren spent 42 days this summer leading a group of six, 14-16-year-old boys on a canoe trip through the remote 'Little North' region of Northwestern Ontario.

Camp Keewaydin, a summer

COURTESY OF PETER WADDEN

camp for boys that was started in Maine in 1893 and moved to northern Ontario in 1901, is known for adhering to tradition in wilderness expeditions. Warren has attended the camp for nine summers and led trips during three.

"It was really exciting to be able to lead this sort of trip," said Warren, who co-led the adventure with a 42-year-old historian. "My co-leader and I had to decide on everything from what food to bring to what routes we were taking. I spent most of last semester with my head buried in about 32 maps."

The trip, which began on June 27 and lasted until August 9, was arranged not only as a wilderness exhibition for a group of experienced canoeists, but also as an opportunity for campers to explore the remote Arctic regions around the Otoskoin river and discover new canoe routes and land for an additional campsite.

"We found some potential locations for a campsite and were able to lay out new routes, but we were

COURTESY OF SAMANTHA SCULLY

TOP: Pete Wadden mans the helm aboard a 48-foot yacht during the Newport Bermuda Race. **BOTTOM:** Samantha Scully poses with other Executive Committee members of the JASC.

also successful in that we charted territories that could not be traveled. It was really an adventure," said Warren.

Along the way the group encountered wildlife such as moose and bald eagles, went fishing, cooked all of its own food, visited an Anishinabe First Nation reserve, and learned a good deal about life in the wild.

"We tried to let the guys do a lot of things themselves because ultimately the trip is about learning something, but it was also about having an enjoyable summer," said Warren. "I'm certain we achieved that."

Charlie will present a slideshow of his trip at the Bowdoin Outing Club on Tuesday, September 16 at 7 pm.

Connie Chi'11

Connie Chi '11 was so moved by her experience participating in a mission trip to the Ukraine last year that she returned this summer with 13 college students from her church's youth group. The trip lasted a week and took place at a youth camp in the town of Odessa, which is located in southern Ukraine.

"The camp is called the 'light & salt' Camp based on the Bible verses Matthew 5:13-16," said Chi. "Churches from all over Ukraine gather together for five days to get to know each other and God."

Chi said her youth group's main mission was to support the missionaries who are already there, and serve the Ukrainians in any way that they could.

"We were really there to serve them, which was a great experience," said Chi. "For instance, the most memorable moment of the trip for me was the last night when the staff washed the feet of 300 campers based on the model that Jesus provides in John 13. I was absolutely overwhelmed by the power of serving others."

power of serving others."

Chi said that the language barrier was a challenge, but it forced the group to communicate in other ways.

ways.
"We learned to communicate using smiles and hugs, and by the end we were like family. The people are the reason I came back this summer and why I'm going back next summer."

Final 'Great State of Maine Air Show' takes flight

BY EMILY GUERIN STAFF WRITER

While many Bowdoin students covered their ears and complained about the fighter jets flying overhead, 16-year-old Tim Landry was standing in line for a flight simulator at his first air show. He had only one word to describe the air show; "Awesome."

Landry had traveled with his father from Poland, Maine to attend the last "Great State of Maine Air show", held at the Brunswick Naval Air Station (BNAS) this past weekend. Landry came to watch the Blue Angels, the well-known aerobatic fighter jets, and "to see what the Navy is all about" since Landry is interested in enlisting when he is older.

Landry may not know it but he and young people like him are the target audience for the Navy air show. According to Nathan Anderson and Roger S. Duncan, Navy Petty Officers, one of the top priorities of the air show is recruiting, along with presenting a positive image of the Navy to civilians.

"The air show increases public confidence in the military," said Anderson. "It's all about image."

Anderson's comment was echoed by Army recruiter Sgt. First Class Bethanie Mazzaro, who said that while the air show is a recruitment tool, with an average of three to five people enlisting per show, there are other far more effective recruitment methods. Mazzaro, who worked in marketing and sales before joining the military, said that the air show is mostly about "branding, public presence, and awareness."

The most-publicized act of the

air, show and the highlight for most spectators is the U.S. Navy Blue Angels. *a group of six F/A-18 Hornet jets that fly in formation and showcase the skills all Navy pilots possess. According to the air show brochure received by the Orient, the air show also "enhances Navy recruiting and credibly represents the United States Navy, Marine Corps aviation and Armed forces as international ambassadors of goodwill."

national ambassadors of goodwill."
John James, the public affairs director for BNAS, stressed that although the Blue Angels are putting on a show, the aerobatic flying is within operational capacities. "There are no stunts," he said, "they are all real moves."

Bob Lezer attended the air show but viewed the aerobatic flying from a picket line outside the front gate of BNAS. As former president and a current member of the Maine Veterans for Peace, Lezer participated in a protest march from the Brunswick gazebo to the Navy base early Saturday morning. Lezer takes issue with the air show's "glorification of war and the military." He cites allocation of resources such as "spending tax payers" money on war machines instead of to meet human needs" as a reason why he protests not only the air show but the military in general.

Lezer's anti-military position does not immunize him from being awe-struck by the Blue Angels. "They are absolutely impressive," he said, "but they are trying to recruit young people into the military." According to Lezer, the jets are "built to destroy. They are war machines, and besides being entertaining, they get people to join the war machine."

For many spectators who traveled to Brunswick this weekend, the Great State of Maine Airshow neither increased their confidence in the armed forces, inspired them to enlist, nor repulsed them by its glorification of the military and war. Laura and Kim Roy of Anson represented many spectators when they said they came only to see the planes and were disappointed by the fog on Saturday that grounded most of the acts. Lisa and Sean Seeley of Poland, Maine said that for them the show is more entertainment than a military event.

Some of the spectators replied positively when asked if the air show boosted their confidence in the military. James and Lucille Roberge of Waterville, Maine, whose son is a Navy pilot, strongly agreed that the show increased their confidence in the armed forces.

One spectator noted that she believed the war in Iraq should stop, but did not let her views interfere with her enjoyment of the air show, especially the flight simulators. "I respect what they do, but I wouldn't join in," said Tania Kitchin of Skowheghan, Maine.

On the Bowdoin campus, the most commonly heard impression of the air show was that it was loud. None of the students the Orient spoke with had ever attended the air show and knew it only by the sound of the Blue Angels flying low over the campus. Many students complained that the timing of the air show, during the first week of classes, was disruptive. Andrew Maloney '10, who has seen the Blue Angels in other shows, said that he likes watching them but finds them irritating while in class.

Charlie Meyer '11 agreed.
"They're cool to watch but annoying as hell the rest of the time," he said.

Some students shared the views of the Veterans for Peace and objected to the show. McKay Belk '11 said that the show was wasteful, especially during an energy crisis. He objected to using the air show as a recruitment tool, saying the show helped to "recruit people for a war I think is ridiculous."

Nick Stone '10 cited the consumption of jet fuel as a misuse of resources and objected to the "overt militarism" of the show, but disagreed with the Veterans for Peace protest of the air show. He argued that there are better ways to protest the same problems that the air show embodies and argued that "if you're going to protest the air show you might as well protest the entire military industrial complex."

Other students agreed with the mission of the air show. Meyer and Alex Yates '11 'had no objections to using the air show as a recruitment tool. Yates said that the show was "obviously militaristic," but was not sure to what extent that was a problem. Archie Abrams '09, who said that he "absolutely hates hearing the air show," said that he thinks that the recruitment aspect of the air show "keeps the Navy allvolunteer, which is preferable to a draft."

Alex Yates is not bothered by the noise of the low-flying jets. "The planes are loud but not significantly more loud than college students."

Flirty or Friendly: The delicate line between romance and friendship

MATTERS CONTRIBUTOR

Going to school at a small, liberal arts college like Bowdoin means that friends are always close by. It's almost impossible not to run into them on your way to class, at the gym, or in the dining hall. But while close friendships are fantastic when you don't have a brunch date on Sunday morning, they can feel less ideal when you realize that your friend loves you for more than just your wonderful advice. What do you do when a good friend decides that tonight, instead of leaving Super Snack with a bagel, he or she would rather leave with you?

Telling a friend that you love them but you don't like them is the definition of "letting someone down easy." When rejecting a persistent non-friend, the message we hear is oftentimes blunt and honest. "I do certainly appreciate your taste in movies, Joe, but honestly I'd rather wake up in prison than in your bed." But with friends—those with whom you share your most precious and honest secrets-it is probably not the best idea to be too blunt. Yes, they may know all about your issues with your parents, but do you really want them to know that you can't imagine being less attracted to anyone than you are to them? Not if you'd still like them to be in your life after all is said and

As tempting as it might be, say ing that you "aren't ready for a rela-tionship just now" is probably not the best way to go. This might lead to a lot of friendly inquiries into your love life for the next couple of months, trying to gauge at what exact moment you will become ready

to re-enter the relationship arena And, of course, should you meet Mr. or Ms. Right, all hell just might break loose. Equally negative are any sort of evasion tactics. Pre tending you thought your friend said, "In lab my peelings were blue" instead of "I have feelings for you" is not a good solution. It takes courage to ask someone out, and such a risk deserves respect and

The best strategy is honesty with a twist. Focusing your rejection on the positivity of your friendship, instead of the absence romantic feelings, may make the let down easier for your friends. Lines like "I don't want to ruin our friendship" or "I feel more comfortable with you as my good friend," may feel like a cop-out, but they are a good way to emphasize that you have a great friendship, and will hopefully continue to have one even though you don't want to start dating. This can also help the person feel appreci-ated and valued, even while being rejected. If he or she isn't getting the message, you may have to start being a bit more blunt and say something like, "I just don't feel that way about you" or "I don't feel that spark." But usually your wholehearted endorsement of your friendship should sufficiently get the point across

The actual rejection process requires some delicate tiptoeing, but o does maintaining your friendship afterwards. It is ok to give your friend some space after you let them down easy. Don't feel the need to bring it up every time you see each other. Having one open, honest talk in which you emp size the value of your friendship should be enough. Then hopefully the two of you can put it behind you and resume your fun-filled platonic activities. A word to the wise, however: Actions speak louder than words. Make sure that don't send mixed signals after you tell them how you feel (or how you

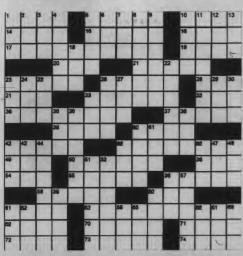

If you are the friend who is having feelings for a chum, think seriously about what you want. As "middle school" as it sounds, it may not be a bad idea to do some reconnaissance. Does your friend have a romantic interest that is

not you? Did your friend just go through a brutal breakup? Does your friend think that the idea of dating you is laughable? If the answer to any of these questions is yes, think about keeping your feelings to yourself, as painful as that may seem right now. Truth be told, springing something like this on a friend, especially when he or she is in a bad place emotionally or romantically, can ruin even the

most solid of friendships. Think long and hard about whether this is a friendship that you would be willing to risk losing in the pursuit of love. If so, then go for it. But if not, then it's best to bide your time and enjoy this person as a friend for now. Keep yourself open to other romantic possibilities-but don't forget to make friendly inquiries into their love life, once in

ARTS & ENTERTAINMENT

Artists build animals with dump material

The latest exhibit in the Coleman Burke Gallery in Fort Andross is turn ing one person's trash into another's art-

There's No Such Thing As Panthers," is comprised of sculptures that were constructed using found and recycled materials from the Brunswick town dump.

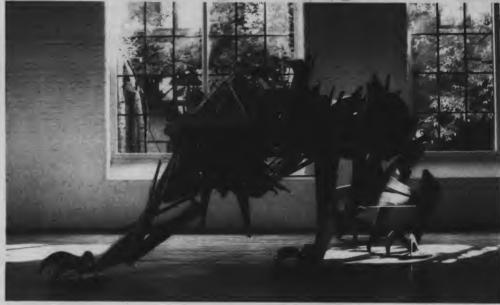

Luke O'Sullivan, Colin Dreisch Andrew Meers, and Dom Casserty are the artists and creators behind !ND!V!DUALS. They became involved with the Coleman Burke Gallery because of their connection to Lecturer of Art John Bisbee, the founder and director of the gallery. Several of the artists met Bisbee at the Art Institute of Boston and later participated in a similar sculp ture project at Bonaroo, a music festival

Although all four artists have disparate careers, they found common ground on this project which incorporated sculpanimals, and unique materials.

With !ND!V!DUALS, the four artists gathered pieces from the Brunswick dump and brought them into the gallery space to create large anthropomorphic

"Because they come from used materials, they have the story of age and of a history. They are richer and weathered," Mark Wethli, professor of art and co-director of the gallery, said about the ex-pressive nature of the animals as a result of the creative pieces from which they were sculpted.

The process with which the artists created th se sculptures is evocative because they did not arbitrarily use material from the dump but rather capitalized on the

MARGOT D. MILLER, THE BOWDOIN ORIENT

RECYCLABLE ART: Four Boston artists traveled to Brunswick to work in the Coleman Burke Gallery in Fort Andross, Collaborating with Lecturer of Art John Bisbee, they searched the Brunswick dump for materials to create different animals in the gallery

intricacies and characteristics of the individual materials.

"For that reason, the sculptures have two identities: that of the material pieces and that of the animal that the pieces create. It's a type of metaphor," Wethli said

Although the artists embarked on a similar endeavor at Bonaroo,

!ND!V!DUALS is a show that represen only Brunswick because it is completely comprised of materials used, discarded, and found within the town.

This inherent "Brunswick-ness" coincides with the mission of the gallery, which "is to produce art that is unique to Brunswick," according to Wethli.

The gallery room is an active partner in all the projects that it hosts because all shows are made within it.

"Thus the connection to the conporaneous and to Brunswick in !ND!V!DUALS and to all Coleman Burke Gallery's exhibits are not incidental." Wethli added.

OnWednesday, September 16, at 9 a.m., the four artists will be present in the gallery to explain their pieces and pro-cesses. O'Sullivan, Dreisch, Meers and Casserly will also speak about their own individual and highly distinct artistic careers and projects. The gallery talk is free

Portrait gallery in Quinby basement confronts Bowdoin's social scene

BY CAROLYN WILLIAMS **ORIENT STAFF**

The graffiti that adorns the basement walls of Quinby House isn't the only art that partygoers will encounter this year.

"European Portrait Gallery", de signed by students Sara Griffin '09 and " Cami Osorno '10, is an eye-catching piece of public art that now decorates the basement stairwell in the social house. It is a result of several months of collaboration with Associate Profess of Art Mark Wethli and his spring 2008, public art class.

"The whole class gets credit for making this happen," Osorno said.
"Without Mark Wethli and [Visual

Arts Technician] Kyle Downs this would not have happened," Griffin added. "We owe this to a lot of people."

Out this to a lot of people."

Quinby House approached the class last spring about redesigning the space where the infamous "pee wall" is located. House members thought the stairwell, where many drunken students have relieved themselves during parties, needed a new purpose.

"They had tried to do things with the space but what they tried didn't accomplish what they were looking for," Osorno said.

Several students in the class submitted proposals for the space but Osorno and Griffin's was cho

"Initially, I wanted to play up the pee wall," Osorno said. "But we grew tired of that idea because it didn't say enough."

Wethli and the rest of the public art class, created a portrait gallery with purple walls and gold wainscoting. The portrait prints in the gallery are elegant and formal.

However, the gallery does have some humorous references to peeing that link it to the wall. Although gold and purple are both regal colors, lavender essential oils are thought to stimulate urine pro-duction and ancient alchemists believed that gold could be extracted from urine, according to Griffin and Osorno.

"It's meant to be over-the-top elegance," Griffin said.

The result is a work of art that doesn't directly reference the wall but confronts students about how they behave in certain settings, according to

tentatious gallery and the heavily graffitied walls of the main part of Quinby's basement highlights the stark contrast between the way students act at social parties compared to how they normally

"Creating a formal portrait gallery raises the question of how you behave in the basement of your social house compared to how you would behave in a space like an art museum," Osorno said. People love their social houses but they don't always treat them with the same respect they would if they were sober." To emphasize this discrepancy Grif-fin and Osorno installed a mirror after

MARGOT D. MILLER THE ROWDOIN ORIEN

SOCIAL GRACES: The "European Portrait Gallery" makes a social statement in Quinby House's basement stairwell.

the last portrait in the room.

"The people in the paintings were projecting an image of who they wanted others to think they were," Griffin said. "When people look at themselves in the mirror, they'll see the image they project

Griffin hopes that the images of "students at their worst" will make them question the decisions they're making. "As someone who's lived in a social

house and as a woman on camp has changed and grown since I lived in one, it's important for me that this room, maybe not overtly, but implicitly ques-tions why students make the decisions we do," she said.

"Only time will tell if people really like this," Osorno said. "But hopefully it will make them think."

Viewers travel through "Passages"

If there is one thing which most Bowdoin students can agree on, it's the significance of the landscape that sur-

The Polar Bears of Brunswick, Maine are not haunted by melting ice caps, but rather spoiled by the natural majesty of Penobscot, Popham, and the Bowdoin Pines. Professor Mullen's new exhibit in the Becker Gallery capitalizes on this appreciation. Titled "Passages," it features powerful depictions of emotive landscapes from across the globe.

Some of these pieces speak directly to the Maine enthusiast, Hudson River School artist William Stanley Haseltine's oil painting, "Coast of New England," depicts a jagged cliff along the water's edge - an image indeed reminiscent of Popham's shores. "The Mountain Pool," an oil work by landscape painter Albert Bierstadt, shows the classic water hole tucked away into rocky corners of Acadia and Sugarloaf.

Together, these two iconic represen-

together, these two facinite representations of New England visually complement one of Mullen's explanatory plaques accompanying them: "With its geological wonders, the New World could be interpreted as a modern 'Garden of Eden' that eclipsed the waning civilizations and man-made monuments of Europe."

But the contents of the "Passages" exhibit are far from limited to illus of New England and the New World.

Eighteenth-century English artist John Ruskin's, "Bellinzona" and an untitled, anonymous Chinese dam wood piece adorn the same wall as "Coast of New England." In the former, Ruskin uses watercolor and goblache over graphite to share the scene of a rustic river valley town through a break in the overlooking cliffs. The Chinese wood art is engraved with a scene in which the ature is actually background to a more

MARGOT D. MILLER, THE BOWDOIN ORIENT

BACK TO NATURE: Professor Mullen's exhibit "Passages" includes different representations of nature through several mediums in the Becker Gallery

A second of Mullen's plaques on this same wall reads, "The natural world functions more as a verb than a noun... its unique combination of elements, and their disposition, changes from minute to minute, so that it never truly possesses a single static identity."

Like the Chinese wood artwork. other pieces in the exhibit draw from both natural and man-made sources. Pop artist Edward Ruscha's arresting "Double Standard," a graphic silkscreen of a 1969 Standard Oil station, becomes an "operational lighthouse assisting in the navigation of the great interior seas of the United States landscape," according to Mullen.

"Running Fence," environmental installation artist Christo uses graphite, pastel, charcoal, and a fabric collage to follow the landscaping of a definitively an-made fence.

From a reconsideration of our preconceptions about the landscape, to the desire to understand our own sense of

place in the world, landscape can plumb our understanding of our surroundings, as well as our impact upon it," Mullen noted. The landscapes in "Passages," like those of Ruscha and Christo, explore not only nature but also man's cultivation of the natural world.

In keeping with these exploratory angles from natural to man-made and from national to international, "Pas sages" also includes more technological approaches to landscape. One of these, erial Soil Conservation Photographs' consists of gelatin silver prints from 1943 that together look like a black and white version of Google Earth.

The overall exhibit aligns with Mullen's Visual Art Landscape Painting

"It focuses on the generation of a visual language for landscape and the environment through the medium of painting and drawing," Mullen said.

"Passages" will be in the Becker Gal-lery through October 5.

Coldplay fails to heat up

THIS WEEKS REVIEW

Every community has its own universal icebreakers. You know, rhetori cal questions or passing comments that one awkward partygoer can remark to another, silently hoping that the response will be "no hablo ingles." Nobody really cares about how good the local tomatoes are, or the finicky properties of the week's weather. However, this summer I witnessed one phenomenal addition to the icebreaker lexicon: "Have you heard the new Coldplay album?

"Don't Panic" off 2000's "Parachutes" to "Kingdom Come' off 2005's "X&Y," I have been a Coldplay fan. Contained in those gems are Coldplay's chronicles of the sincere passion of a good guy. On "Parachutes," we listened to the good guy pine for the girl from a distance and X&Y" was the last logical step: the good guy ends up with the girl and lead singer, Chris Martin, presents to the world his glorious lovechild, just as Simba was presented to the ar kingdom ("AAAAH SA VEYNYA BADA FIX YOUU"). "Viva La Vida," owever, is an album out of sync with the band's central ideology. In an attempt to break out of its power ballad box, Coldplay's latest album is a disjointed, confusing, and disappointing collection of songs.

Don't get me wrong. Every band should have its opportunity to do something new. I would like nothing more than to hear a "new" Coldplay, but despite the narrative, multiple-tracked and reprised songs of "Viva la Vida," Coldplay fails to deliver. Songs like "Cemeteries of London,"
"Yes," and "Strawberry Swing" show that the band is moving in a new direction but that they are getting lost

along the way.

The band employs a host of tricks to try and rid itself of its emotionalpop status. One of them is the oldest in the book: throw money at it. The songs of "Viva la Vida" pale in com-parison to the parison to their production. World famous producer, Brian Eno, dips the listener head-first into a pool of sound such that he or she can't even hear Martin singing over the wall of synthesizers. However, when he isn't drowning, you may actually hear what he's singing.

Enter trick number two. "Viva la Vida" marks the advent of Coldplay's first set of story songs, or, music that is not about unrequited love. Instead, Martin tries to tell the listener stories of ghosts in a cemetery, medieval England and dethroned kings. However melodramatic the subject matter, the lyrics are not maudlin and are rendered quite well. The songs fail, though, because the instrumentation of these story songs is the same as that of the power-ballads. Playing music that sounds like "Square One" while singing about ghosts is disorienting. Story songs are only successful when the music and lyrics create a setting together. The only song that achieves its goal is the title track, "Viva la Vida," with its full-piece

My hope is not lost for Coldplay. There are moments of brilliance hidden within this album. "Life in Technicolor" is a gorgeous marriage of Eno's production genius and Coldplay's knack for tugging at your heartstrings while "Viva La Vida" is one of Coldplay's best songs

Though "Viva la Vida" marks a definitive change in Coldplay's sound, I will be waiting with anticipation to see how it fits in with future alburns. My guess is we will look back on this album and see it as the growing pangs of our favorite guilty pleasure. But for now, I will tell Coldplay what my ex-girlfriend told me: "I love you, but I don't like you."

Tragedy of 9/11 events inspires restorative "Netherland"

BY FRANCES MILLIKEN COLUMNIST THE BOOK NOOK

The literature that has emerged from the events of 9/11 is astounding. For bet-ter or worse things of beauty are born from ashes, and in this post 9/11 era, many of the literary phoenizes are su-perb. Experienced writers, first-timers, and comedic scribes excavate the lives of those left behind and those involved in

"Netherland" is Joseph O'Neill's third work of fiction. The protagonist in the novel, Hans van den Broek, is an equities analyst who moves to New York from London with his wife and son not long before September 11. Hans's life is thrown askew by the fear, paranoia, and disaffection that pervade the city after the collapse of the twin towers. Rachel, his wife, is suddenly elusive

to him; they can no longer connect. The impact of the tragedy damages them in entirely different ways and they are unable to reach out for each other. Before long, Rachel moves back to London with their son. Hans makes the transatlantic trek every two weeks, trying to make a place for himself in their lives while liv-

ing in a city clinging to the edge.

Away from his family, Hans finds an unexpected distraction: Cricket. The novel proceeds to reveal a sport—and a

livelihood-foreign to Americans.

The cricket tutorial is fun, and my nderstanding of the game increased understanding of the game increased (slightly) after reading the book. But describing the book as a work about cricket undermines the complex nuanc-es of solidarity, race, and friendship with which O'Neill has filled "Netherland". The game and its importance in the up-heaval of the moment is substantial. For Hans, the game takes him back to his childhood in the Netherlands and opens up a world beyond his isolated existence in the office, at the hotel, and half way across the Atlantic between two islands. And, of course, there is his introduction to Chuck Ramkissoon.

Chuck has a tremendous affection for, and dedication to cricket. As an immigrant from Trinidad, he sees cricket as the most American of games (baseball fans beware). America is still an emblem of freedom and possibility for Chuck, and he has a strange plan to construct a magnificent cricket pitch in Queens. In his fantasy, America will be become the center of worldwide cricket competition. Chuck is the talker, with Hans often the incredulous audience.

Chuck's remains are found floating in the Gowanus Canal within the first three pages of the novel. The odd place that he held in Hans's life is evident in Rachel's ignorance of his existence. Part of the forward movement of the novel is a curiosity about the circumstances and reasons for Chuck's death. But the ine friendship between two for-

eigners in the wake of 9/11 is the hinge on which the strength and beauty of the novel rests. The narrative weaves back and forth between the time before, after, and during Hans's stay in New York. It results in a graceful exchange, an accurate translation of the fluidity of human areness and memory.

O'Neill writes incredibly well with few flourishes. His humorous moments are dry but effective. "We courted in the eferred by the English: alcoholically," Hans says by way of describing his romance with Rachel. His scenes are so vividly constructed that the characters appear as real reflections of people we now in our own lives. There is a dampened, pensive quality to the narrative voice of Hans that echoes the trauma of 9/11. He sees things clearly but seems burdened rather than bolstered by the beauty he is struck by

The turns that Hans's life takes in New York are too complex, interesting, universal, and numerous to include in a single review. The passion that Chuck lends to his life is only a fragment of the narrative layers that include driver's licenses, the bond between mothers and their sons, fidelity, and the diversity of experience and characters contained in the small space of

"Netherland" is not run of the mill. It pairs people and events in surpris-ing ways and reminds its audience of the possibilities and tragedies that

Buddha inflates art debate

BY LYDIA DEUTSCH CONTRIBUTOR

Every day in the Bowdoin College Museum of Art rotunda, visitors hear a dull, roar-like snoring sound. It is the sound of the machine maintaining the air pressure of an inflatable Buddha.

The Buddha, on loan from the Mu seum of Contemporary Art in San Di-ego, is twenty-six feet long and nearly six feet tall. It was created by Lewis DeSoto, an installation artist and educator at San Francisco State University.

The work is titled "Paranirvana/Self-Portrait." The bare-footed Buddha rests on his right side upon a pillow with his head on his hand

The material is the same nylon of hot air balloons. The face superimposed pon the fabric is the artist's own, which adds to the piece's controversial nature. Though he is known as something of a maverick, this piece is unlike DeSoto's other work.

"Paranirvana/Self-Portrait" was inspired by the death of DeSoto's father and the artist's ensuing ruminations on transcendence and passage of life. The image that DeSoto digitally superimposed upon the material is based on a 12th century Sri Lankan sculpture of Buddha on his deathbed. DeSoto's piece alludes to the moment between death pursuits are shed for ultimate bliss

We found this artist and work and decided we were interested. Essentia the piece introduces innovations in the contemporary art world. It brings the urban art scene to lovely Brunswick, Maine," said Curatorial Assistant Kacy Karlen.

The museum is working to expand its collection of contemporary art while maintaining a base in classical art, according to Karlen.

"This artwork melds ancient conditions with contemporary conventions," she said. "This is the balance the curatorial staff wishes to strike in the Sophia Walker Gallery because, as the piece taneously moves the muser collection forward into the innovations in the contemporary art world, it also returns the space to a sculpture hall."

The curatorial staff appreciates the controversial—as well as the interdisciplinary nature of-DeSoto's art.

The material is in the vein of inflatable balloons that hang out at car dealerships but with a highly religious image," explained Karlen. "The result is a merging of classical concepts with pop We are excited to have cutting edge installation work....In relation to our mission, it is our hope this will be utilized by various departments to relate to a broader spectrum of disciplines. As this is a college museum, we are fortudepartments," said Karlen.

The staff hopes to use DeSoto's piece to bridge boundaries and bring various interests together. This artwork can cross disciplines because of its "controversial nature in relation to the sanctity of images and history," according to

DeSoto will speak at Bowdoin on December 6 at 7 p.m. in Kresge

Afghani portraits 'go beyond'

BY ERIN McAULIFFE STAFF WRITER

While many Bowdoin students have grown up in an age where Osama Bin Laden and Al Qaeda are household names, the new photography exhibit at Frontier Cafe will paint a much different picture of a war-torn country.

Tonight at 7 p.m., internationallyacclaimed photojournalist Paula Lerner will unveil a media exhibit featuring her recent study of Afghanistan. A brilliant departure from the war-torn photographs of recent years, Lerner instead focuses on the normality of family life in the Middle East.

The clear intention of her work is to take a step back from politics, conflict, and strife, and to glimpse into the many ways Afghanistan mirrors the western world.

"These sets of stories are important stories to tell. They're different than the other ones coming from Afghanistan right now," said Michael Gilroy, owner of the Frontier Cafe. "They're not about the bloodshed but about the people behind the scenes."

With beautiful colors, patterns, and symmetry. Lerner photographed children sleeping under a heavy blanket at a day care center, women laughing at a private joke shared between them, a local merchant inspecting his bird cages—all of these images reflecting everyday life in Kabul, the capitol of Afghanistan. One of Lerner's most striking photos is of children's hands, decorated with inticate henna, raised palm up toward an afternoon sun. The photographs strive to inspire peace in lieu of war.

The message of the show ties in well with Frontier's "go beyond" mentality.

"Our real interest is in connecting people to the world and going out and bringing stories closer to home," Gilroy said. "We're challenging people to think beyond their own daily lives."

She first traveled to Afghanistan as part of the Business Council for Peace, which strives to help women in wartorn nations start their own businesses. Lerner documented their work and, through that, was able to capture the people of urban and rural Afghanistan.

"She's a very passionate and motivated person to take on a project like this by herself. She's got great stories," Gilroy

Some of Lerner's other studies include a stirring collection of portraits of cancer patients at Beth Deaconess Medical Center in Boston juxtaposed with captains of industry such as the CEO's of Hasbro Inc. and Unica. Another study deals with abstract subjects such as ballerinas in the vein of a Degas painting. Her work is not all serious, however.

Lerner showcases her sense of humor with her work titled "Funny" which features a series of strange faces, hairdos and static electricity.

and static electricity.

Lerner first made her mark in the world of photojournalism in 1985 when she began contributing editorials to publications such as Smithsonian, Time and Newsweck. Her international work includes publications in Asia and Europpe.

Not confined in subject, Lerner is known for her wide variety of composition and focus. A resident of Massachusetts, Lerner has close ties to Maine, since her photographs are published and distributed by Aurora Photography based out of Portland.

Admission to the premier of Paula Lerner's Afghanistan Study is \$8 and the exhibit begins at 7 p.m. at Frontier Café tonight

Over time, Mainers brew up innovative beers

BY MAC EVANS
CONTRIBUTOR
SIX PACK
WITH MAC

Searching "microbreweries" on Wikipedia reveals that Maine has over 20 craft breweries per million people. Seven of these breweries can be found in Portland alone, including Shipyard, DL Geary Brewing, Gritty McDuff's, Allagash, Sebago, Casco Bay, and the late Stone Coast Portland branch. How did each of these breweries start? The story begins right before the time Bowdoin's seniors came into the world.

In 1982, a little bar opened in Portland called Three Dollar Deweys. The idea of the owner, Alan Earnes, was to carry only imported craft beers. Earnes introduced a friend of his, David Geary, to Peter Maxwell Stewart of the Traquair House Brewery in Scotland, where Geary soon got an apprenticeship.

Before returning to the U.S. and his homestate of Maine, he studied with Peter Austin in England and met up with British brewmaster Alan Pugsley. In November of 1986, the two of them opened DL Geary Brewing, the first craft brewery in New-England. The following January, Catamount and Harpoon breweries opened their doors to the public.

Gritty McDuff's Portland Brewpub opened in 1988, becoming the first brewpub in Maine since Prohibition. It was designed by Peter Austin and his partners from Hampshire, England, and run with the assistance of Ed Stebbins, the man shown triumphantly holding a beer on most of the pub's bottles.

Shipyard Brewing Company was officially founded by Alan Pugs-ley in 1994, and initially sourced some production of its beer to Kennebunk Brewing Company. When Shipyard beer turned out to be quite popular, more brewing facilities were built, and it has since grown to be the largest brewery in Portland. Shipyard Brewing Company is now partnered with Casco Bay Company and Sea Dog Brewing Company.

ing Company.

In addition to helping open several Portland breweries, Peter Austin supplied hops from his hometown of Ringwood, England. This gave the breweries he consulted for a more traditional English flavor.

Casco Bay Brewing was founded in 1994 as the brewers of "Katahadin Beers." In 1995, a part time bottler, Bryan Smith, worked his way up to brewer in less than five months and in time studied the science of beer at the American Brewers Guild brewing school, located at UC Davis-California. After finishing school, he bought the company from its original owners, and took over all brewing operations.

In 1995, Stone Coast Brewing Company found their way down to Portland from Sunday River, where they had previously been popular with ski bums. Though Casco Bay initially bottled for them, in 2003 they purchased their own bottling equipment and a unique canning machine, becoming one of the first microbreweries in the country to can their beer. Unfortunately, the Portland branch has since been shut down, with its head brewer Kevin Watson moving to work down the street.

Allagash Brewing, Kevin Watson's new home, has since its
founding aimed to produce high
quality Belgian-style beers and experimental ales. Founded in 1995
as a one-man operation, Allagash
Brewing sought to bring a new
style of beer to the area. Hoping to
make an impact on the beer industry, owner Rob Tod experimented
with Belgian brewing styles and
studied centuries of Belgian beer
history. Allagash has almost annually had to expand its brewery to
keep up with brisk demand for its
Belgian-style beer.

The newcomer to Maine is Sebago, originally a brewpub that opened at the Maine Mall. In time its popularity grew enough to open two more restaurants—one in Portland's Old Port and one in Gorham. Only in 2005 did Sebago open their own production brewery in Gorham industrial park, which expanded their operations beyond the three brewpub locations. They celebrated their 10th anniversary this past summer and hope to open a new restaurant in Scarborough to replace the original one.

There is clearly as much history in beer as there are brewers in Maine. There are plenty of bars and stores to sell every hand-crafted beer available, and there will likely be much more good beer to come in the state of Maine.

Field hockey posts shutouts

With jets buzzing over Ryan Field this weekend and the relentless onslaught of the Bowdoin field hockey team, the Wheaton College Lyons and the Wellesley College Blue Tide must have felt like they had stumbled into a war zone. The Polar Bears kicked off their 2008 season with two shutout victories and two record performances from co-captains Julia King '09 and Lindsay McNamara '09.

Nearly 200 fans and the Blue Tide waited anxiously for their first glimpse of the 2007 NCAA Division III National Champions. After letting the anticipation build, the Polar Bears rounded the corner of Farley Field House in intimidating fashion, U2's "Sunday Bloody Sunday" blaring over the sound system.

McNamara wasted no time scoring the first goal of the 2008 season off a pass from Kara Kelley '10 in the opening five minutes of the contest.

While Emily Hewitt, the goaltender for the Blue Tide, was able to weather the storm for the remainder of the first half, Ingrid Oelschlager '11 got it started for the Bears in the second period. Oelschlager netted her first goal of the season 12 minutes into the second half off an assist from King. King's assist set the Bowdoin field hockey career assist record with 33.

"I don't think Julia even knew about the record when she broke it," Shannon Malloy '11 said. "That just shows her humility, it's why she got the assist

McNamara would score two more goals before the day was over to complete her hat trick and bring the game to a 4-0 close for of the Polar Bears

On Sunday, the Polar Bears cruised to another shutout victory, against Wheaton, bringing their record for the season to 2-0. Again, McNamara began the assault for Bowdoin, posting a hat trick in a three-minute span in the first half.

Three more goals came in the sec-ond half, two off the stick of McNamara. Her five-goal game tied Bowdoin's 35-year-old single game scoring

"We have a great senior class...they have accomplished so much and have just done everything the past four years for this program," Malloy said.

The firepower of the Polar Bear offense could not overshadow the consistent and intelligent play of the Bowdoin defense. Led by Leah Ferenc '09 and captain Kristen Veiga '09,-Wellesley and Wheaton were held to a combined two shots over the week-

On Wednesday, the Bears traveled to Husson for their first road match-up, and returned victorious. Bowdoin outshot the Braves 26-1, and we match 5-0. McNamara started off the scoring four minutes into the game, ending the match with two goals Madeleine McQueeney, Kate Gormley, and Tamlyn Frederick also managed to get themselves on the scoresheet during the game.

"We definitely had a good start to the season," Jessie Small '11 said, "but we have a lot to work on."

The Polar Bears next game is also on the road, as they travel to Middletown, Conn. to face off against the Weslevan Cardinals.

JOSTLING FOR POSITION: Junior Megan McCullough fights with a Wellesley player looking for a pass during the Bears' 4-0 win over the Blue Tide.

BREAKING AWAY: Junior Kit Hamley evades her defender during Bowdoin's 4-0 win vs. Bridgewater State

Women's soccer commands opener, but fails to convert chances vs. Babson

Polar Bear attackers combine

for four goals against **Bridgewater State**

BY AILEEN TSCHIDERER CONTRIBUTOR

The Bowdoin women's soccer team got off to a strong start last weekend, going 1-0-1 in its first two games of the season.

Coming off an historical 2007 season, which culminated in their first-ever NESCAC championship game, Saturday's game against Bridgewater State left little doubt as to whether this year's squad was up to last year's caliber.

The Polar Bears began their 4-0 route of the Bridgewater Bears ear-ly in the match. In the 15th minute, first year Ellery Gould netted a pass from sophomore Katherine Farrar.

The Bears continued to pelt the Bridgewater goalie with shots throughout the first half, as Bowdoin's well-crafted passes and superior ball play resulted in opportunity after opportunity.

The squad continued their domi-

ance in the second half, flexing its offensive muscle.

The first goal of the second half came rocketing off the foot of Alex von Gerichten '09 from 20 yards out, landing into the left corner of

The Bowdoin women kept pounding shot after shot with several good opportunities from Gould, who had a skilful flick that just missed in the 74th minute

Rebecca Silva '11 and Christina Aceto '11 also delivered several strong volleys that nearly resulted

The third goal came unassisted from Dana Riker '10, and the fourth was put in by first year Celeste Swain with 13 minutes remaining in the game.

"We possessed the ball really well, had a high speed of play," Aceto said. "We did a good job of attacking [Bridgewater's] weak nesses, and we finished, something we could not do against Babson.

Despite a four-goal lead in the closing minutes of the game, the Polar Bears continued to attack. launching shot after shot at the Bridgewater goalie.

Sunday proved to be a more difficult contest for the Polar Bears, as the squad took on the Babson College Beavers.

The first half ended scoreless, an apparent stalemate.

"During the first half, we were really disconnected, we couldn't complete passes and our shape as a team wasn't there," Tiernan Cutler '11 said. "Our fire wasn't there.

Maren gave us a talk at half-time, she reminded us we wanted to send people a message in the NESCAC."

The beginning of the second half, however, unsettled the Polar Bears as Babson came out strong, slotting a ball into the corner of the goal in the 60th minute

Facing a 1-0 deficit, Bowdoin continued to fight until Silva exploited a scramble at the top of the 18-yard box and whipped off a quick shot that screamed past the Babson keeper with only 12 min-

utes to play.

Shortly after Silva's goal, Molly Duffy '11 broke away in a two-onone situation against the Babson goalie, but the ball was scooped up by the Beaver's goalie and Duffy could not get a shot off.

The Beavers and Bears contin ued their struggle through double overtime, but the score remained tied as the clock expired.

"I don't think anyone felt content with the tie, we had a lot of prime opportunities in the second half nd overtime, and we felt like we should have put one away." Aceto

On Saturday, the team will begin NESCAC play in Connecticut against Wesleyan University.

"We're pretty happy so far and we're excited for Wesleyan this weekend," said Cutler.

Curing post-Brady blues

BERNING

BY JEREMY BERNFELD

The Mafia assassinated Kennedy. I've seen Bigfoot myself on three separate occasions.

And I'm positive Tom Brady will be on the field this Sunday for his 129th consecutive start at quarterback for the New England Patriots. At this point, I'm close to hysterics, and I'll believe anything but the

Come Sunday, there is no way Matt Cassel will be under center for his first meaningful start since high school. I've convinced myself that Barry Bonds is innocent and Marion Jones is a saint. I know for a fact that

Rosie Ruiz is just really fast.
I'm sure this "Tom Brady—ACL" nonsense is just another power play by a crafty Bill Belichick seeking to get into his opponents' heads.

Just as I wasn't meant to live

among the Romans in the Year 1 B.C., I'm not meant to live in Week 1 W.T. (Without Tom). I don't think I can handle it

All it took was eight minutes. The time it takes for me to run a mile and a half. (Ok, maybe just a mile.) The time it takes me to try to hang up the phone when my mom calls with "just one quick question."

The time it takes to make maca-

roni and cheese. Just a bowl of mac and cheese into the Patriots season, I saw that the entire NFL season was changed.

A living, breathing, playing-foot-ball legend who will eventually retire to the Hall of Fame won't grace a playing field again at any time this season. The reigning MVP, who just last season obliterated the record for most touchdowns in a single year, may never be the same again.

Tom Brady's most important achievement with the Patriots has nothing to do with touchdowns or Super Bowls. It's hope. Like many others, I thought Brady's day was over the second I saw his knee buck-

But I never gave up hope that he would quietly emerge from the tun-nel, while all of New England roared, to lead the team to victory. He's that kind of athlete. With Belichick and Brady, you can never count the Pats out, no matter the odds. And so we waited and we hoped, in vain and

Outside of New England, fans from across the NFL are celebrating the Golden Boy's injury. "They had it coming to them," they all say, not knowing "they" is me and "it" is devastation. Brady's injury is quietly being seen by many as payback for the recent "Spygate" scandal and the Pahow the karmic equivalent of a lost first-round draft pick. But all tastelessness over celebrating the injury of another human aside, should NFL fans still be happy Brady is (gulp) out for the season? Sure, if they're fans of mediocrity.

A Tom Brady-less NFL season is like an episode of The Office without Steve Carrell or a Beatles concert without John Lennon.

Thanks to the supporting cast, it'll be OK, but it certainly won't be great; no one will be reaching new eights of comedic/musical/athletic achievement.

I plan on making no effort to wrest myself from my deluded state. Sunday at one o' clock I'll be watching the Brunswick Plutos Football m (starring Tom Brady at quarterback, Tupac at running back, and Nessie the Loch Ness Monster at left tackle) on the television of my mind But what will you see during the rest of the NFL season? Without further ado, five predictions for the upcoming NFL season that I would bet your life on:

1. Thanks to better-than-average quarterback play and a resurgent de-fensive line, the Cleveland Browns will make the playoffs for the first time since 2002. But Derek Ander-son won't be the hero of the Dawg Pound; it'll be sophomore quarterback Brady Quinn.

2. Both Mannings will miss the playoffs, but they'll make over 11,000 combined television ads. Young Eli will combat the Super Bowl hangover, while Peyton must overcome an off-season knee injury and an aging Marvin Harrison. Plus,

3. A leprechaun will bring the 49ers their long-awaited pot of gold and lead San Francisco to the playoffs. After finishing 5-11 last year, they have already been counted out, but quarterback J.T. O'Sullivan has won the starting job and will do enough to get them into the playoffs-and even make a run for the top of the weakest division in foot-

Two moustaches, and the coaches they are attached to, will be out of work when Andy Reid of the Eagles and Mike Holmgren of the Seahawks quit after the season. And it will be a shame, because frostedover moustaches on the sidelines in December make me laugh. But it is time for them both to go, and anyone can grow a mustache.

5. Your AFC playoff teams: Jacksonville, Pittsburgh, San Diego, New York, New England, and Cleveland. And in the NFC you'll see: Dallas, New Orleans, Chicago, San Francisco. Philadelphia, and Carolina.

But it just won't be the same, Week

MARGOT D. MILLER, THE BOWDOIN ORIEN

SEARCHING FOR A TARGET: Junior midfielder Brendan Mooney attempts to cross the ball into the box while avoiding a UMaine-Farmington opponent

Men's soccer dominates in opener

STAFF WRITER

The men's soccer team opened its 2008 campaign with a strong and balanced performance against the University of Maine-Farmington, winning 2-0.

The Bears piled on the pressure and it seemed certain they would score early. Hugh Fleming '10 was able to power one away in the 44th minute for the half-time advantage.

The Bears did not_relent, and sophomore Greg Frechette was able to slot one home in the second half. The team put together a number of other failed scoring chances, including a rocket by Ben Denton-Schneider '11 that hit the post.

Bowdoin controlled the game's tempo for the full 90 minutes of play, and outshot the Beavers 23-1.

Critics may point out that only two of those 23 shots found the back of the net. But, the problem is probably little more than early season jitters, especially considering that the Polar Bears have employed brand new, offensively oriented 4-3-3 formation this season under Coach Fran O'Leary.

More aggressive than the 4-4-2 formation used during most of last season, the 4-3-3 is just one more reason to keep an eye on the men's soccer team this year.

Co-captain Harry Ashforth '09 is excited about the new formation.

"From an attacking standpoint, you can really spread the ball around and then take advantage of the wide guys up front," he said.

The Polar Bears have the luxury of trying out the new offensive sys tem because of the rock solid play of returning midfielders Den Schneider '11 and Tom Wakefield 10. These two central midfielders "raise the quality of everybody else on the field," Ashforth said.

The one risk of the 4-3-3 formation is that it leaves a lot of open space in the midfield.

Players have less time to recover from their mistakes, and it is essen tial that players limit turnovers and make strong decisions with the ball

Fortunately, the Polar Bears have the ultimate eraser of mistakes in co-captain Dominic Fitzpatrick '09, a solid central defender. Fitzpatrick and Ashforth will lead a new backline featuring a host of fresh faces, including center-back Sean Bishop '12 and new goalkeeper Dan Hicks

The first real test of the new system will be this Saturday, when the men travel to Connecticut to face NESCAC rival Wesleyan.

Fitzpatrick believes that the Polar Bears have developed a rivalry with the Cardinals since his first year

He may be on to something. Since the 2005 season when Wesleyan knocked Bowdoin out of the opening round of the NESCAC playoffs, the two teams are 2-2 against one another in four hard-fought games.

At their last meeting, Bowdoin was victorious, knocking the Cardinals out in the NESCAC quarterfinals.

The Polar Bears will be looking to notch a victory in its first con ference matchup in Middletown at

Volleyball preps for CBB

STAFF WRITER

With four season wins and only one loss, the women's volleyball team is back with a bang this fall, rebounding from their rocky 2007 season.

With the team's home court in Morrell Gym under construction, the Farley Field House courts could be the trick to this season's success. On Wednesday, the Polar Bears (4-1) cruised to a 3-0 sweep over the University of New England (1-6) in non-conference match hosted at

But the new location was hardly the only ingredient for victory. The UNE match witnessed a teamhigh 10 kills from Kristin Hanczor '12. Hanczor built off of an already strong offensive and defensive base, led by Jenna Diggs '10 with 22 assists and Anna Noucas '11 with 13 digs The final set scores of 25-10, 25-22, and 25-12 marked Bowdoin's sixthstraight volleyball win over of the UNE Nor'easters.

"Hanczor has proven herself as an essential attacker in our game," Diggs said.

But as a young, essential player, Hanczor does not stand alone. For the second season in a row, the members of the volleyball team are remarkably young. The team consists of five first-years, four sophomores,

five juniors, and no seniors.

"The five new first-years all really contribute the team and are really enthusiastic about the season," Skye Lawrence '10 said.

These new players include first

years Hanczor as well as Gina Lona ti, Jillian Berkman, Ellen Rogoz, and Lucy Evans.

Rogoz attributed the team's early success to teamwork.

"[We have] strong players in every single position; we play so well together, she said.

On Sunday against Swarthmore (1-5) at Farley, the team exemplified this strong play. After a tight 20-25 loss in the first set, the Polar Bears came back with solid 25-16, 25-16, and 25-17 scores to finish off the match. Hanczor and Diggs were again effective: Hanczor had a teamhigh 21 kills and Diggs had 43 assists and 26 digs. Stephanie Drumright '11 contributed an additional 13 kills.

ence triumphs over Swarthmore and UNE built off of the successful preseason Endicott Invitational, hosted by Endicott College on September 5

"[We] all got a chance to work out the beginning-of-season jitters and really figure out what we need to focus on in practice," Lawrence said.

Beginning-of-the-season jitters, however, did not stand in the way of Bowdoin's first two Endicott matches against Keene State and Salve Regi-

The Polar Bears opened the tourament on that Friday by downing Keene 3-1 with game scores of 25-14, 25-20, 22-25, and 25-23. In their next match on Saturday they quickly rode to a similar victory against Salve Regina, sweeping them 25-14, 25-19, and 25-17, the two victories secured a position in the final match against

OPINION

The Amethyst Initiative

Cince it was drafted in July, more than 120 college and university presidents have signed the Amethyst Initiative, a statement that calls for a public discussion about the 21-year-old drinking age. College presidents who have signed the statement are not asking for a specific change in policy; instead, they hope to stimulate "an informed and dispassionate debate over the effects of the 21-year-old drinking age." The signatories represent schools ranging from Ohio State University to Hamilton College—but Bowdoin is absent from the list

President Mills has chosen not to sign, reasoning that lowering the drinking age would affect all young Americans, not just those enrolled in college. Even so, a college campus is an appropriate and important setting to discuss the

merits of the 21-year-old drinking age.

We are constantly reminded, by the College and by our own experiences that Bowdoin is a diverse campus. People from many locations, cultures, and backgrounds are gathered here. Living in an academic, residential community, we should feel prepared—perhaps even obligated—to talk about an issue so important and relevant to our lives.

The Amethyst Initiative emphasizes the importance of discussing the current drinking age, but does not limit these discussions to college campuses, In a statement released in August by Mills, he said that he believed "that the conversation and debate about an appropriate legal drinking age needs to be much broader." But what could be broader than the "public debate" that the initiative calls for?

In the past, Bowdoin has been engaged in conversations about important social issues, from carbon neutrality to Darfur divestment. Through the Amethyst Initiative, institutions of higher learning are stimulating public discourse about the drinking age. But the signatories do not wish to limit the discussion to the confines of their campuses. The college and university presidents who have signed the initiative have been willing to publically acknowledge that the 21-year-old drinking age does not work on their campuses in order to encourage a widespread national conversation.

Twenty-one is not working at Bowdoin. The mere existence of "chem-free first-year housing sets underage drinking as the norm. College houses frequently host large parties with kegs, even though most of the house residents and party-goers are younger than 21. Many students use fake I.Ds to purchase alcohol, and Security prioritizes alcohol safety over strict enforcement of the

Mills said that he welcomes "the important discussions on this issue that will certainly now follow." But we urge him to step up and push Bowdoin into the national debate about the legal drinking age. The colleges and universities represented on the Amethyst Initiative cannot speak for all young Americans, b they are courageously inviting all Americans to enter an important dialogue.

BOWDOIN ORIENT | What's wrong with Palin's nomination

BY ASPEN GAVENUS

"What do you think about Sarah

I first heard this question a week and a half ago after returning from a pre orientation backpacking trip. Having missed John McCain's announcement arah Palin as his running mate, I was utterly baffled as to why anyone would care about my governor

ince then, conversations about Sarah Palin have been unavoidable. While I am getting used to my friends and acquaintances soliciting my opinion on this mat-ter, it amazes me how many times I have been at the bank, buying alcohol, or do-ing something else that involves showing my Alaska driver's license, only to have complete stranger ask me: "So...what do you think about your governor?"

I understand that most people know very little about Sarah Palin. This is understandable. Up until two weeks ago, her biggest claim to fame was serving for two years as the governor of one of the most remote, least populated states in the union. (Or maybe it was winning Miss Congeniality in the Alaska Pageant years and years ago).

Many people assume that being from Alaska, I must know something about her and can enlighten them. The problem, however, is that Palin was elected governor long after I began spending the majority of my time at Bowdoin, and we all know about the Bowdoin Bubble.

In the first bleary hours after return ing from the pre-o trip, all I could think about was a hot shower, comfortable bed, and fresh food. Instead, people kept demanding that I make an intelligent political assessment of Palin. The only thing I could sincerely say was that I didn't agree with a lot of her political positions (I re-membered that I voted against her in the last election), but that I did think it was cool that a small-town girl from Alaska could be a candidate for Vice President of the United States. Suddenly my state ered, which was pretty exciting.

I knew that she was socially conser-vative, but a little research revealed the extent of this. Palin supports abstinence only education and is against explicit sex education in schools. She opposes same-sex marriage and believes that spousal ainst explicit sex benefits are reserved for married citizens as defined in the Alaska state constitution. (To be fair, though, as governor Palin did uphold a state court that conflicted with her own beliefs or this issue; she earns points in my book

Palin is pro-life and supports abortion only in cases where the mother's life is in danger. She does not support exceptions for rape or incest, and has supported legislation to outlaw late-term abortions and require parental consent for abor-tions in Alaska.

Furthermore, Palin's stance on energy and environmental issues worries me. She supports drilling in the Alaska National Wildlife Refuge. She does not think that climate change can be linked to human activities, and has led the efforts in a lawsuit aiming to get the polar bear de-listed as a threatened species. Recently, Alaska has earned an enor-

mous surplus from oil royalties buoyed by high prices. At the same time, residents of the state are struggling to pay astronomical heating and transporta-tion costs. Rather than use the surplus to develop alternative energy sources or long-term plans to deal with heating and transportation costs, the Palin administration supported a plan to give every Alaskan a one-time check of \$1,200.

Most importantly, Palin seriously lacks experience. It is not that she's

a year and a half as governor of Alaska does absolutely nothing to prepare you for work in the federal government. Purfor work in the recent government. Fur-thermore, her tenure as governor has oc-curred during a time when the state has experienced huge windfalls from rising oil prices and faced few truly challeng-ing decisions. She was under-qualified when she ran for governor. Her election pretty much amounted to being in the right place at the right time; she was a vibrant personality running against an im-mensely unpopular incumbent. Before that she was mayor of Wasilla, which is smaller than Brunswick. In Wasilla the city manager actually makes most of the executive decisions, not the mayor. This all adds up to very little experience in government at all, and pretty much no foreign policy experience (unless you count her involvement in talks about an Alaska-Canada natural gas pipeline). I

I do have respect for Sarah Palin. She was elected governor of Alaska on a platform of cleaning up our good-old-boy system of politics. For the most part, she has done an excellent job of reforming a political system rife with nepotism, cronyism, and expensive "gifts" from oil companies. She also has done a pretty good job of getting around the state and talking with her constituents. This is why Alaska is a good place for her. The White House? I don't think so. It is easy to get caught up in the Cinderella story of a small-town girl from Alaska making it to the White House, We all should remember, though, that the story doesn't end on Inauguration Day.

do think that Washington needs fresh perspectives, but the idea that Sarah

Palin could be next in line to govern our

country terrifies me.

Gavenus is a resident of Homer, Alaska and a member of the Class of 2009.

My last first column of my last first semester

CIVILIZED LIFE

BY ANNIE MONJAR COLLIMBIST

A couple weeks ago, I pressed my nose up against the small square of Plexiglas next to my seat as JetBlue Flight 606 hovered over Portland.

I've made the same descent countless times during my time at Bowdoin, but I still can't help feeling a little awe-inspired by the scattered lakes and bewildering forests of Maine's landscape. Born and raised in the Midwest, New England still has an exotic draw for me; the curious charm of lobster boats, in fact, eliminated any need I ever felt to study overseas. Land's End would suffice.

As the plane inched closer and closer to its landing, though, I experienced the first of what I think will be many this year: a "this is my last [fill in typical college activity here!" moment.

This is the last time I'll ever arrive at Bowdoin for a new school year," I thought, wrapping my headphone cords around my iPod and tossing it into the L.L. Bean tote bag I bought the first weekend of my freshman year.

When I got to campus, dragging heavy bags of clothes to my room, I recalled the sheer terror of arriving freshman year and introducing mys to my roommate, whom, from legends I had heard, could become either the I remembered greeting my blockmates sophomore year in our Chamberlain doubles, all of us reassured by the pres-ence of familiar faces. And the strange sense of being a junior, suddenly on the downhill slope, feeling the absence of friends both graduated and abroad.

And here I was, setting up a dorm room for perhaps the last time in my life. Tacking to crumbling walls posters and postcards that I'll probably have to throw away at the end of the year. Do real, live adults duct tape the covers of Vogue magazines to their walls? Since, Vogue magazines to their waist? since, thus far, it seems like my only job title after graduating will be "Impoverished Person," maybe I'll hang on to them. This eerie sense of finality has fol-

me around uncomfortably closely for the past couple of weeks. It's made me want to cling to and savor each "Last," want to collect souvenirs from each closure. I battled with the urge to tuck into my bag a claw from my last Lobster Bake, to make copies of my last NCAA athletic clearance forms, embrace Jeff Ward after his opening meet-ing with student athletes, and to remind my senior comrades this past Monday that there were only 30 or so Mondays

left at college.

I'm also finding myself slipping into the strange role of "seniorhood" I've made the first steps toward looking for a job, writing e-mails describing my interest in position X, attending meetings intended to light a fire under students (like myself) contented to, indefinitely,

of my last opportunities to study closely under the guidance of a professional, a great book. I momentarily stepped out of body when, this past Tuesday, a friend asked if I was going to Joshua's that night. And though the delightful absurdity of Tuesday night drinking baffled me, I realized that what had always seemed to me one of the Bowdoin al scene's privileged holy grails was

But to attach profound significance to each passing moment of my senior year would be to let it pass by entirely, without any real significance. So for the next few months, I'll do my best to ignore the approach of May 23, when I'll say my final farewells to Bowdoin. Barring, of course, the unlikely but certainly not demic mishap or social indiscretion.

I promise, in fact, to eliminate the Cheez-Whiz factor from future columns this year, approaching the campus's hard news and pertinent concerns—lost ID cards, gym anxiety, etc.—with only the journalistic balance and gravity that

have become my trademarks.

For though I'm slightly crushed when ever I think that the columns I write this year might be my last, I want to have as much fun with them as I have in the past. And just as I aim to take on my se year activities without the intense nostal-gia that blurs actual, unadulterated experience, so I hope to treat "A Sojourn" with unattached enjoyment. Just like the red claw at the bottom of my bag.

College presidents should support the Amethyst Initiative

BY JOSE CESPEDES

Shortly after Kansas became the first state in the union to outlaw alcoholic beverages in 1881, a woman by the name of Carrie Nation set about personally enforcing the new state law. Considering herself "a bulldog running along at the feet of Jesus, barking at what He doesn't like." Nationally of the part of the property of the part of the property of the property of the property of the part of the part of the property of the part of the part

In the following years, public attitude towards liquor only grew increasingly hostile. The Woman's Christian Temperance Union blamed family Instability and Godlessness on alcohol, while the Anti-Saloon League used anti-German rhetoric to associate beer with treason in the midst of the First World War. By 1920, Congress had overridden a presidential veto and passed both the Volstead Act and the 18th Amendment, both of which made the manufacture, sale, and transportation of alcohol illegal in the United States. The consequences of national prohibition proved to be disastrous.

Tax-paying, law-abiding citizens were turned into criminals overnight and driven into speakeasies that employed elaborate schemes designed to evade law enforcement. Gangsters like Al Capone and Bugs Moran built criminal empires off of illegal alcohol sales, while many government agents charged with enforcing prohibition laws took bribes and looked the other way. By 1933, the failure of prohibition combined with the effects of the Great Depression, brought about prohibition repeal by way of the 20th Amendment.

Despite prohibitions obvious lack of success in creating an alcohol-free society, Americans once again rallied around a mini-prohibition in 1984 when Congress passed the National Minimum Drinking Age Act. By imposing a 10 percent penalty on a state's federal highway appropriations if they had a drinking age lower than 21, the federal government created a de facto legal age to buy, sell, or consume alcohol. The consequences, much like the prohibition enacted 64 years prior, have become painfully obvious.

Because the bulk of students on college campuses are less than 21-yearsold, underage drinking has become a prevalent issue for those who work at, tive on, and run universities and colleges. The current drinking age has forced students into hiding or binge drinking off campus at many schools and led many to create fake I.D.s that teach students early on about evading the law.

Whether or not raising the drinking age has been an effective deterrent to underage drinking is questionable. According to a 2007 National Survey on Drug Use and Health, half of those questioned 20 years old or younger admitted to drinking within the past month, and 35 percent engaged in binee drinking.

In an effort to address the ineffectiveness of the 21 minimum drinking age, an attempt to begin a dialogue about lowering the drinking age was launched in July. Called the "Amethyst Initiative," named after the gemstone believed to counter the effects of intoxication, 129 college and university presidents have signed the statement since it was drafted a few months ago.

Acknowledging that the current minimum drinking age needs to be reconsidered, the signatories are embracing an open exchange of ideas and a national dialogue that is long overdue. Just some of those to sign thus far include the presidents and chancellors of Dartmouth, Colgate, Hamilton, Johns Hopkins, Middlebury, Mount Holyoke, Pomona, and Smith.

Conspicuously absent from the list is Barry Mills, president of Bowdoin College. In a statement released in mid-August, President Mills wrote, "I understand the arguments and am in agreement with many of the points raised about under age drinking...but it [discussion about the appropriate legal drinking age] goes well beyond the gates of America's college and university campuses since many young people who would be affected...are not enrolled in college."

Although it is true that lowering the national minimum drinking age would allow all Americans, not just college students, under the age of 21 to buy and consume alcohol, the question remains as to why that is a reason to not sign the statement put forth in the Amethyst Initiative. It is precisely because changing the drinking age is such a complex, far-reaching issue that it deserves to be talked about more thoroughly in public. More college presidents need to support the initiative, however, for the issue to gain enough clout to receive notice on the national stage. This is an issue Bowdoin must be a pioneer on, not a follower.

Cespedes is a member of the Class of 2012.

Cast your ballot for national and local change on November 4

BY MAX CONOVER AND CLAIRE COOPER

After one full week of classes and over two weeks to settle into Bowdoin this fall, many of us may already feel our absorption into the Bowdoin buble. And while our inboxes are flooded with reminders of meetings and parties, we are possibly forgetting to consider what is easily one of the largest events of this fall worldwide: the election taking place on November 4.

There have been "change" candidates as long as there have been bad presidents, and this election is no different. George W. Bush's spectacular failure as a president has encouraged candidates from both parties to battle over who the true "agent of change," is. Just recently, Senator John McCain began to use the language of change, not because he believes that the Bush presidency took America down a dangerous road, but because he sees change resonates with voters. Yet he has only altered his language, and not his positions. On reproductive rights,

he is anti-choice and has stated his administration would reflect this viewpoint.

On foreign policy and the War in Iraq, McCain shares with President Bush the same bellicose worldview which led the United States into a misguided war. On health care, at a time when 47 million Americans go without health insurance, McCain's proposals make it more difficult for Americans to buy health insurance, as he proposes to tax work-related health care benefits.

Americans are not looking for a candidate who says 'change' when he really does nothing to stimulate our broken economy, upgrade our inadequate health care system, release us from dependence on foreign oil, or secure a woman's right to choose what happens to her body. Voting with the Bush administration 90 percent of the time is not change. And his rhetoric is transparent once one investigates his record and his rlans.

record and his plans.

For Senator Barack Obama and the many people tired of red vs. blue poli-

tics, "change" means fundamentally shifting not only the policies that have been coming out of Washington for the past eight years, but also changing how the conversation is conducted. Obama understands that the foundation of this change lies in embracing the idea of an America that works for people instead of special interests.

people instead of special interests.

Obama's rejection of Washington lobbyists and their influence on policy exemplifies his message of working for the citizenry. He fought for and succeeded in passing dramatic Congressional ethics reforms.

At a time of economic uncertainty, Obama plans to cut taxes for 95 percent of all American working families. On energy, Obama knows that the same failed policies we have been trying for decades are not sustainable. He offers both short term relief to families, in the form of a \$1,000 rebate, and long term shifts in how we acquire and use energy, through changes such as a \$7,000 tax credit for the purchase of advanced, fuel efficient vehicles and investing heavily in private-sec-

tor efforts to create renewable energy, and consequently, more jobs. He is pro-choice and believes that women should have equal pay for equal work. This is a positive change for America.

This is a positive change for America. In order to do justice to Obama's message of change, as voters we also have a responsibility to familiarize ourselves with the rest of the candidates on the ballot. Congressman Tom Allen, a Bowdoin alumnus and Congressman for Maine's first Congressional district, is the perfect representative to protect Maine families and values in the Senate. Allen has never had a problem voting against the po-litical pressures of the time in order to do what is right, such as when he voted against the war in Iraq in 2002. The first district has long enjoyed his performance in the House of Representatives, and Maine deserves a co parable effort in the Senate. Maine cannot afford six more years of capitulation to the special interests.

As Bowdoin students, we are taught to fight for and protect the common good, and so much of what

we value at Bowdoin corresponds directly to what is at stake in the election. This is probably the first Presidential election most of us have been able to vote in, so let's use it to prove wrong the pundits who doubt our influence on the election and to prove right the Obama campaign's view that this election is about us, our futures, our country, and our belief that our nation's ideals need to be fought for every single day. The Bowdoin College Democrats will spend this fall registering voters and helping students familiarize themselves with all the candidates and issues they can expect to see on the November ballot in Maine. This is an all-hands-on-deck operation, with meaningful work to be done both at Bowdoin and in the Brunswick community for local and national candidates. In this way, we're not just voting for change, but we are an integral part of the change that really can take place on November 4.

Conover '09 and Cooper '09 are co-presidents of the Bowdoin College Democrats.

Senator Mitchell'54 delivers address

ORIENT STAFF

Senator George Mitchell '54 will speak to a sold-out Common Hour audience today, kicking off a week's worth of events celebrating service and the common good. Senator Mitchell's visit serves as

Senator Mitchell's visit serves as the opening ceremony for Saturday's Common Good Day, to be followed next Friday by the official opening of the Joseph McKeen Center for the Common Good.

"It's the start of a week-long series of events related to the opening of the center," said Susie Dorn, director of the McKeen Center. "It's so timely and perfect because [Mitchell] represents the breadth of public engagement that the McKeen Center seeks to encourage and support for all members of the Bowdoin community."

Senator Mitchell's career has been

focused on a commitment to peace and legislation. Mitchell served as a U.S. Senator from 1980 to 1995, becoming Majority Leader in 1989. In 1995, he also chaired the peace negotiations which led to the Northern Ireland Peace Accord in 1998. Most recently, he served as chair of Major League Baseball's investigation into illegal steroid use.

Hundreds volunteer for Common Good

BY ZOE LESCAZ

More than 500 students, faculty, staff, and alumni will embark on more than 60 community service projects on Saturday in celebration of Bowdoin's 10th Annual Common Good Day.

The work, which will be performed in conjunction with a variety of local organizations, ranges from trail maintenance to visiting the elderly. The event is a core part of the week marked by the opening of the Joseph McKeen Center for the Common Good.

The McKeen Center is the direct product of a spike in student interest in service in recent years. Its predecessor, the Community Service Resource Center (CSRC), was created through student initiative in the 2001-2002 academic year.

Student participation swelled, and faculty also became involved, expressing interest in connecting their courses with local community issues.

The recent years of growth led to the creation of the McKeen Center, which, according to Director Susie Dorn, will absorb the programs of the CSRC as well as offer new ones.

The increase in community involvement is reflected in the history **COMMON GOOD DAY 2008**

 More than 500 people have signed up to participate more than 60 projects in and around the Brunswick area.
 Common Good Day, which celebrates its 10th anniversary this year, has grown significantly in size since it began.
 The Joseph McKeen Center for the Common Good, located in Banister Hall, will be

formally dedicated on Friday

of Common Good Day, which had 260 participants in 2002 and has had a surplus of applications for the 500 spots since 2006.

Assistant Director of Community Service Programs Sarah Seames and Common Good Day Fellow Jamie Nadeau '10 are largely responsible for the planning of this year's event. They worked out the complicated logistics involved, from transportation and registration to advertisement and scheduling.

Nadeau became involved with the McKeen Center over the summer, largely as a result of his experience with last year's Common Good Day, which he spent working at a local farm.

"I had such an amazing time last year. I'm just honored to be a part of

Bowdoin dining, quality of life earn praise in Princeton Review

BY CATI MITCHELL ORIENT STAFF

Last spring, the New York Times profiled the Bowdoin Dining Service as one of the best in the nation. This high-profile attention was far from undue: this summer the College retained its No. 2 spot on the Princeton Review's list of Best Campus Food. Wheaton College in Illinois was ranked No. 1.

Though the College has dropped a place on the list since being first place rankings in 2005 and 2006, Director of Dining Services Mary Lou Kennedy said, "We are proud to have been in the top 10 list in Princeton Review and recognized for excellence for many years."

The rankings, however, are not the most important criteria to Kennedy.

"While we are thrilled to receive

"While we are thrilled to receive national recognition, our primary goal has always been to be No. 1 in the eyes of the Bowdoin students," she said.

Kennedy cited Bowdoin dining's staff—exceptionally well-trained, creative, and professional employees—as a major factor to the College's topranked food.

Bowdoin also ranked well in the Princeton Review for overall quality of life, dorms, and smoothness of administration

Well-fed Bowdoin students also have something to look forward to after they leave. The Wall Street Journal recently named Bowdoin one of the top liberal arts colleges that produce graduates with high paying jobs. Bowdoin graduates averaged \$48,100 a year, coming in above Bates and Colby graduates, who earned an average of \$47,300 and \$46,400, respectively.

Director of the Career Planning Center Tim Diehl was not surprised that Bowdoin students ranked near the top.

top.
"Employers across a wide array of industries recognize the value of a Bowdoin liberal arts education. Bowdoin students offer strong communication and problem solving skills and work well as members and leaders of teams," Diehl sald. "These core qualities, plus an eagerness to embrace new endeavors, give Bowdoin students a competitive edge that translates into higher than pages at strains alaries."

higher than average starting salaries."
Over the summer, Bowdoin could be found in a number of other rankings. The college was recognized as one of Kaplans top 25 green colleges, and Forbes ranked Bowdoin at No. 15 of Best American Colleges—finishing ahead of Stanford and Dartmouth.

MITCHELL CONTINUED FROM PAGE 1

According to Vice President for Communications and Student Affairs Scott Hood, Mitchell's history of serving others makes him the ideal person to kick off the events surrounding Common Good Day.

"I think Senator Mitchell really epitomizes what President McKeen was talking about," he said. "He epitomizes the call to serve the common good."

"He has been somebody who is called upon all the time to investigate situations that call for somebody with integrity and wisdom and a sense of fairness," added Hood.

When Senator Mitchell was initially issued the invitation to speak in April of 2008, the College purposefully scheduled his visit for this weekend.

"It was very intentional—we knew this week would be a week of celebration and recognition for the center," said Hood.

"He is the perfect person in every way to start us off," added Dorn.

Mitchell's politics have not only celebrated peace, but also education, especially in his home state of Maine. The Mitchell Institute, which he founded in 1995, awards scholarships to one senior from every high school in Maine.

Kyle Dempsey '11, a Mitchell

scholar at Bowdoin and the first in his immediate family to attend college, spoke of the program's goals.

lege, spoke of the program's goals.

"It's really geared toward first-generation college students with financial aid," he said." The goal of the Mitchell Institute in general is to look at the obstacles students face when going to college in Maine."

Dempsey also praised Mitchell's altruism.

"It goes back to his vision to break down these barriers that so many have coming to college," he said.

As evidenced by these programs and by his own personal attachment to the College, Mitchells connection to Bowdoin still runs deep. This is not the first time the Class of 1954 graduate has been asked back to his alma mater. Mitchell spoke on campus in 2002 when the George J. Mitchell Department of Special Collections and Archives was dedicated in his name. Mitchell donated his personal papers to the department. According to Hood, these papers include documents from his years of service in the Senate. Mitchell also spoke at his 50th reunion in 2004.

"He believes that his life would have been very different had it not been for his experience here," Hood said.

Mitchell's lecture will take place at 12:30 p.m. in Pickard Theater. Though the event requires a ticket, a live feed will be projected into the Wish Theater for those not able to find seats in Pickard.

MARGOT D. MILLER, THE BOWDOIN ORIENT

T-SHIRTS FOR A CAUSE: Jamie Nadeau '10 shows off a Common Good Day t-shirt. The shirts will be distributed to over 500 paticipants before they depart campus on Saturday to head towards one of more than 60 service projects.

planning it," Nadeau said.

Nadeau said that he hears some criticism that Common Good Day allows people to feel good about volunteering for just four hours without having to make a larger commitment.

"I hear this a lot—that the service isn't that important, that it's just one day, " Nadeau said.

Nadeau said that the actual work done is very important, but that Common Good Day is "not just about the service, it's more about the entire community coming together."

Dorn echoed this sentiment, explaining the significance of the event in the context of the recent increase in Bowdoin students' interest in service.

"Common Good Day used to be one of the biggest service events on campus, it used to define service here," she said. "Now it's more about tradition and connecting to the community because so much more is happening because of student initiative and faculty involvement."

It is this opportunity for engagement with other Bowdoin students that made sophomore Joshua Magno's first Common Good Day a good experience.

"It was amazing spending time with people on my floor," he said.

Magno, who is a proctor on the first floor of Hyde Hall, will serve as a team leader on Saturday, bringing his proctees to the Brunswick branch of Sweetser, an organization that offers support and treatment services to people of all ages with mental and behavioral health conditions.

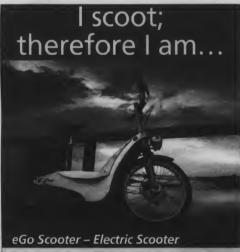

Magno said that he wonders why Common Good Day only happens once a year. "I really would like it to be more of a once-a-month thing," he said.

Seames said that she often hears requests for another Common Good Day in the spring, or multiple ones throughout the year. One of the goals of the event, however, is not to imply that one day is enough, but to kick off a full year of community service.

Each year Bowdoin students complete more than 40,000 hours of service work, a figure that reflects that the spirit of Common Good Day extends well, beyond the four-hour fall event.

According to its organizers, the fact that Common Good Day happens only once a year does not diminish its practical accomplishments.

"The amount of work that can get done in just three hours is amazing," Seames said.

"I commute with my eGo bike 30 miles a day... great gas savings... and I recharge my bike with solar power, it's a great way for me to commute!"

Ambassador Pickering '53 speaks on foreign policy

BY NICK DANIELS STAFF WRITER

Ambassador States Thomas Pickering, Class of 1953, presented a lecture entitled "Priorities for the Next President of the United States in Foreign and Security Policy," to a packed Kresge Auditorium on Tuesday. Ambassador Pickering served in the U.S. Foreign Service for over four decades in a career that culminated with his appointment as Under-Secretary of State for Political Affairs, the third-ranking position in the State Department. He retired from the position in 2001.

In his lecture, Pickering addressed a variety of issues facing the next U.S. president, including relations with China, Russia, and especially the Middle East, which he described as "the nexus of our problems."

Pickering urged a return to diplomacy backed by a strong military that would strive to solve the pressing problems of global warming, nuclear proliferation, the HIV/AIDS epidemic, and the growing worldwide shortage of water. His core argument focused on America's need to develop "a positive agenda" with countries "with which we have many problems" if we want to "gain ground on issues with which there is disagreement."

Deriding the use of military force under the Bush administration, he said, "I think we have moved beyond our flirtation with unilateralism...and the myth that all issues can be dealt with boots on the ground."

Regarding the Iraq War, Pickering said that "we shouldn't have started it...and have made a huge mess of it."

He proposed a "diplomatic ending to the conflict," explaining that a stronger Iraqi constitution must be drafted and that a peace agreement between the three major ethnic groups—the Sunni, the Shitte, and the Kurds—must be created since the country is "ethnically and politically divided."

Furthermore, he insisted that the bordering states of Iran, Saudi Arabia, Syria, and Turkey be included in negotiating the future of the country. Since Iraq's neighbors all have attachments to parties inside the country, if the U.S. does not "incorporate them into the process...we will fail."

"Neither the U.S. nor the regional countries [of the Middle East] can solve this problem alone," he added. "The five permanent members of the U.N. Security Council must be brought in to create a team that supports a reasonable solution. We need to find serious negotiators...who can help provide the creative solutions that have so far

"Neither the U.S. nor the regional countries [of the Middle East] can solve this problem alone. The five permanent members of the U.N. Security Council must be brought in to create a team that supports a reasonable solution."

> THOMAS PICKERING FORMER U.S. AMBASSADOR

escaped us."

When asked how the future of policy towards Iran might look, Pickering urged an ideologically similar mission of diplomacy, aimed at preventing Iran from further improving the quality of its centrifuges. Currently, the Bush administration maintains that it will partake in direct talks with Iran only if Tehran suspends its nuclear enrichment program and grants International Atomic Energy Agency (IAEA) inspectors unfettered access to nuclear research facilities. Iranian officials have refused to make these concessions, thus severely limiting U.S. involvement in multilateral talks and preventing any direct negotiation.

Pickering argued that "we ought to drop our preconditions for talking [since we have] found no way to get Iran to stop enriching uranium."

"If we are going to get anywhere with Iran, we have to use diplomacy," he said. "If they joined a consortium to own and operate nuclear facilities" to benefit their civilian infrastructure, then monitoring and verifying their facilities could "be done by an international body," he said.

Pickering indicated that our European and U.N. Security allies would be encouraged to help us deal with Iran if "we give on civil development [in order] to allow for inspection."

Stances on policies concerning Iraq and Iran are crucial issues in

the upcoming presidential election.
Professor of Government Allen
Springer commented that willingness to negotiate "depends on your
view of whether you believe talks
with Iran will be productive."

"We need to work multilaterally with other states and the U.N. within the diplomatic frameworks that exits," said Springer. He also advocated caution when practicing diplomacy, saying "if we appear too soft on Iran, then we may appear not strong enough to engage Iran in constructive dialogue."

Pickering's lecture acknowledged that the issues of foreign policy facing the next U.S. President are both complex and immense. Citing the difficulties that lie ahead, he declared, "why anybody would want to be [the next] president is beyond me."

Career Planning Center revamps office, strives to work closely with students

COURTESY OF MARK BELL

WELCOME TO THE REAL WORLD: New and returning members of the Career Planning Center (CPC) seek to connect students to careers through a system that emphasizes exploring opportunities, experiencing internships and programs, and pursuing post-graduate goals.

BY ANYA COHEN

Students who walk into Bowdoin's Career Planning Center (CPC) this fall will encounter new faces as well as a new model for advising.

The driving force behind the CPC's revamped program and staff is the new three-phased advising approach aimed to help students explore, experience, and pursue a goal, whether it be full-time employment, an internship, or graduate school.

Three new Career Advisors with real-world experience in the fields on which they advise comprise the "explore" stage of the process.

explore' stage of the process.

Associate Professor of Education Emerita Penny Martin, who
taught at Bowdoin for 17 years,
will advise students interested in
non-profit, education, and international careers. Former sailing
coach Sherry Mason, a law school
graduate and former lawyer, has
taken on the role of Assistant Director of Career Planning and prelaw and government advisor. Sarah
Paul will focus on early-stage career exploration and will advise
students interested in sciences and
environmental areas.

"I think students will respond positively to the real-world connection of these advisors," said Director of the CPC Timothy Diehl, who advises students in consulting and finance.

Associate Director of Career Planning Dighton Spooner, who started in August 2007, makes up the "experience" phase by overseeing internship and experiential learning programs and services. Additionally, he advises students interested in media, communications, and the arts, and supervises the advising staff.

Carrying out the "pursue" phase

"I think students will respond positively to the real-world connection of these advisors."

TIMOTHY DIEHL
DIRECTOR OF CAREER PLANNING

are two new staffers: Associate Director of Employment Relations Chad Mills '95, who specializes in technology and sales and marketing, and Employer Relations Coordinator Kate Bathras '04, a former program advisor from the Student Activities Office, who will focus on building employer and-alumni connections for students after Bowdoin.

"Our goal is not just to assist students in getting to that first position or graduate school experience for the first two to three years, but to assist them with skills that they can use for the next 20 to 30 years of their career," said Diehl.

Spooner said the new advising approach arose from a general feeling that "we needed to move the Career Planning Center to a higher level of service to students and greater sophistication of how we interacted with them."

Specific changes were largely based on student feedback. In January 2007, the CPC conducted a survey of the entire Bowdoin student body about what it needed from career planning and led focus groups to discuss new programming and service idea.

"The nature of student requirements for career planning has evolved over the past few decades so the model had to evolve as well," said Diehl.

CPC has also responded to requests for the enhancement of around-the-clock resources. Two weeks ago, the CPC launched Ca-

reerBeam, an online program which Diehl said "provides dynamic, interactive, self-paced framework for students to do everything from career exploration to career preparation," including résumébuilding, company research, and interview preparation.

Spooner says that students have been impressed with the ease of using CareerBeam thus far.

CPC's future plans include a major online program that will be launched next summer. "Our goal is to create an online career planning experience at Bowdoin that is as seamless as possible and allows students to connect with information and people that can help them as easily as possible," said Spooner.

Another priority of the office is to develop outreach programs for underclassmen, particularly sophomores, to engage them earlier in the exploration process. The CPC has already collaborated with the Office of Residential Life to speak with first-year students in their dorms later this month.

Diehl hopes to extend the CPC "beyond the physical space on the first floor of Moulton Union to become a presence across campus in spirit." The CPC plans to work with student clubs, teams, and other affiliations to find programs that meet their shared needs and interests.

Rotating staff members will man the new "Ask Career Planning" table at Smith Union one day a week as part of an effort to be, as Diehl put it, "where students are."

"Bowdoin is in a unique place in recognizing Career Planning's importance to its students," said Diehl. "We've received cross-campus support from President Mills to Dean Foster to members of the Board of Trustees, so we're yery excited about taking this operation to the next level."

on sexual assault issues

ter with not one, but two new posi-tions: Special Assistant to the Dean of Student Affairs and Advisor to the Student Sexual Assault and Misconduct Board (SSAMR).

For the past year and a half, Davis served as Director of Bowdoin's Woman's Resource Center

As advisor to SSAMB, Davis will attend to issues of sexual assault and misconduct brought to the attention

of the College.
Last year, Mary Pat McMahon worked in an equivalent role while also serving as the dean of first-year students. Davis explained that the immense responsibilities of working as the dean of first-year students could be compromised if and when a case regarding sexual assault or mis-conduct was brought forward.

As a result, the Office of the Dean of Student Affairs found it necessary to appoint an advisor to SSAMB who could focus on working with the sexual assault and misconduct cases, as well as support campus organizations and groups in their efforts toward prevention, awareness, and support.
"The process [of sexual assault and

misconduct cases] is involved, sensitive, [and a large] time commitment,"

Davis noted that McMahon was instrumental in leading the initiative to outline the College's policies regarding sexual assault and misconduct. which were put into effect January 2007 and can be found in the Student Handbook. As part of her new posi-tion, Davis will work to make these policies known and understood on

In addition to advising the Board, Davis said that she will "be developing and implementing a training for all SSAMB board members as well as for supporters."

"Currently, there [is] a corps of staff from across the Division [of Student Affairs] who have received formal training on the SSAMB process," she said. "We will be both expanding the training curriculum as well as reaching a larger number of staff with the training this year."

In her new role as the Special Assistant to the Dean of Student Affairs, Davis said that she works "with Dean Foster on the development and implementation of projects that are seen as strategic priorities for the entire division of Student Affairs."

Some of the priorities for this year that I will be working on include a strategic plan for alcohol programming at Bowdoin, the wellness component of the new fitness/health/ wellness center, and departmental strategic plans," she added.

Meadow Davis advises | RIAA continues effort to end illegal downloads

The Recording Industry Association of America (RIAA) made its presence known on campus last spring when it dealt out 11 pre litigation letters to members of the Bowdoin community.

But since then, according to Chief Information Officer Mitch Davis, the association has only ratcheted up its efforts to curb students' illegal downloading at the College.

"The RIAA every year has gotten more and more aggressive," Davis said, "and this year, I don't think it's going to change."

On September 10, Davis sent a campus-wide e-mail to students warning them of the repercussions of illegal downloading.

"Please don't think you can illegally upload through peer-to-peer sharing or download music, movies, or software and get away with it for very long," Davis wrote in the

"The RIAA will probably find you, and if they prosecute it is an unpleasant and expensive process," he added.

According to Davis, it's not just students sharing thousands of files who are targeted.

"They could pursue you on one [file]," he said.

Under the Digital Millennium Copyright Act (DMCA) of 1998, the RIAA will notify the College of detected infringement and request to remove the content. The IP address provided by the RIAA is then traced by Network Operations, and the student is issued a warning

"The RIAA every year has gotten more and more aggressive, and this year, I don't think it's going to change."

MITCH DAVIS CHIEF INFORMATION OFFICER

from the Office of the Dean of Student Affairs

Under the guidelines, if the student does not cooperate, his or her name is then given to the RIAA, which may pursue litigation. Initial settlements hover around \$750, while settling later can cost more than \$3,000

Tommy Cabrera '12, said that illegal downloading is "not fair to the artist," but he is disappointed that there aren't more alternatives to the \$1-per-song iTunes payment scheme, such as free, ad-supported streaming.

Davis, who estimates he receives six or seven "takedown" notices a month from the RIAA, is quick to point out the myriad of legal music services available today.

For instance, students at the College can share their iTunes libraries within dorms. Additionally, some artists—including the popular band Radiohead-have released whole albums for free download (though an optional donation is available)

Other bands and musicians go even further by licensing their work under Creative Commons, a site founded by Davis's former coworker Lawrence Lessig, which encourages free distribution

the most visible in its legal efforts, Davis noted that the DMCA also covers videos, games, and other

The Motion Picture Association of America (MPAA) is now at least as active as the RIAA.

"Because they've seen what happened when the RIAA didn't take a hard line on it, they're taking a very hard line on it right away," said Da-

Davis said that students have "downloaded all the music they can," and now they are download ing movies.

"For the life of me I can't see why

people download TV shows," Davis

Many shows are now available for free on TV network Web sites, and others are available from distributors like Hulu.

Netflix, founded by Bowdoin alumnus Reed Hastings '83, offers subscribers more than 12,000 movies and TV shows via its online "Watch Instantly" service.

Considering the alternatives, Davis's bottom line is that illegal downloading is wrong and com-promises the rights of artists—all at great risk to the user.

"I was trying to get a message out there to the students to be careful and start a conversation about what's safe and what isn't safe," Davis said of the e-mail he sent out to students.

"By going after people, [the RIAA] is trying to make people afraid to do anything," he said. "And in a sense, I kind of recommend that they be afraid."

"Currently, there [is] a corps of staff from across the Division [of Student Affairs] who have received formal training on the SSAMB process," she said. "We will be both expanding the training curriculum as well as reaching a larger number of staff with the training this year."

In her new role as the Special Assistant to the Dean of Student Affairs, Davis said that she works "with Dean Foster on the development and implementation of projects that are seen as strategic priorities for the entire divi-sion of Student Affairs."

"Some of the priorities for this year that I will be working on include a strategic plan for alcohol programming at Bowdoin, the wellness component of the new fitness/health/ wellness center, and departmental strategic plans," she added.

Meadow Davis advises | RIAA continues effort to end illegal downloads

The Recording Industry Association of America (RIAA) made its presence known on campus last spring when it dealt out 11 pre litigation letters to members of the Bowdoin community.

But since then, according to Chief Information Officer Mitch Davis, the association has only ratcheted up its efforts to curb students' illegal downloading at the College.

"The RIAA every year has gotten more and more aggressive," Davis said, "and this year, I don't think it's going to change."

On September 10, Davis sent a campus-wide e-mail to students warning them of the repercussions of illegal downloading.

"Please don't think you can illegally upload through peer-to-peer sharing or download music, movies, or software and get away with it for very long," Davis wrote in the

"The RIAA will probably find you, and if they prosecute it is an unpleasant and expensive process," he added.

According to Davis, it's not just students sharing thousands of files who are targeted.

"They could pursue you on one [file]," he said.

Under the Digital Millennium Copyright Act (DMCA) of 1998, the RIAA will notify the College of detected infringement and request to remove the content. The IP add dress provided by the RIAA is then traced by Network Operations, and the student is issued a warning

"The RIAA every year has gotten more and more aggressive, and this year, I don't think it's going to change."

MITCH DAVIS CHIEF INFORMATION OFFICER

from the Office of the Dean of Student Affairs

Under the guidelines, if the student does not cooperate, his or her name is then given to the RIAA, which may pursue litigation. Initial settlements hover around \$750, while settling later can cost more than \$3,000

Tommy Cabrera '12, said that illegal downloading is "not fair to the artist," but he is disappointed that there aren't more alternatives to the \$1-per-song iTunes payment scheme, such as free, ad-supported streaming.

Davis, who estimates he receives six or seven "takedown" notices a month from the RIAA, is quick to point out the myriad of legal music services available today.

For instance, students at the College can share their iTunes libraries within dorms. Additionally, some artists-including the popular band Radiohead-have released whole albums for free download (though an optional donation is available)

Other bands and musicians go even further by licensing their work under Creative Commons, a site founded by Davis's former coworker Lawrence Lessig, which encourages free distribution

Although the RIAA has been the most visible in its legal efforts, Davis noted that the DMCA also covers videos, games, and other

The Motion Picture Association of America (MPAA) is now at least as active as the RIAA.

"Because they've seen what happened when the RIAA didn't take a hard line on it, they're taking a very hard line on it right away," said Da-

Davis said that students have "downloaded all the music they can," and now they are download ing movies.

"For the life of me I can't see why

people download TV shows," Davis

Many shows are now available for free on TV network Web sites, and others are available from distributors like Hulu.

Netflix, founded by Bowdoin alumnus Reed Hastings '83, offers subscribers more than 12,000 movies and TV shows via its online Watch Instantly" service.

Considering the alternatives, Davis's bottom line is that illegal downloading is wrong and com-promises the rights of artists—all at great risk to the user.

"I was trying to get a message out there to the students to be careful and start a conversation about what's safe and what isn't safe," Davis said of the e-mail he sent out to students.

"By going after people, [the RIAA] is trying to make people afraid to do anything," he said. "And in a sense, I kind of recommend that they be afraid."

SECURITY REPORT: 9/11 to 9/18

Thursday, September 11

was transported from Farley Field House to Parkview Hospital.

Friday, September 12 A student with leg injury was transported from Kanbar Hall to

Parkview Hospital. · A staff member's dog was attacked by a woman's unleashed dog at the Pickard athletic fields. College policy requires dog owner's to

keep their dogs leashed or under immediate voice control. · A first-year student who had been consuming alcohol was ob-

served urinating on the north side porch of Baxter House. A report was filed with the dean's office Saturday, September 13

· Security checked on the wellbeing of an intoxicated West Hall student. The student was evaluated

and not transported.

· A male student standing on the side of College Street near Baxter House was approached by a group on non-students in a vehicle, pos-sibly a white SUV. The vehicle occupants were inquiring about the location of a campus party. The student refused to provide the information. Words were exchanged and the student was assaulted by two men, described as black males in their mid-20s. The suspects then fled in the vehicle, headed east on College Street. Security and BPD immediately responded and searched the area. The student was taken to Parkview Hospital where he was treated and released.

• Two students at 10 Cleaveland Street were awoken by the sound of someone ripping through a screen window in their bedroom at 3 a.m.,

apparently trying to gain entry. The unknown person fled the area.

· A Maine Hall student accidentally cut her finger while using a small knife. A security officer pro-vided first aid.

Sunday, September 14

A student's car that was parked in the Coffin Street lot was vandalized when the spoiler was ripped off the trunk. A security officer searching the area located the spoiler in nearby woods and returned it to the student. Security has identified a vehicle that is believed to be involved in this incident and a second incident involving the theft of a spare tire and jack from another student vehicle.

· A keg tap was confiscated after a tapped keg that was assigned to a registered event on Friday night was found in a second-floor restroom at Baxter House.

· Security conducted a well-being check on a student who reporthaving trouble breathing after eating. The student's condition improved, and no medical treatment

Tuesday, September 16

• A 20" Toshiba TV/DVD/VCR combo and an A/V cart have been reported missing from next to the main stairway at Moulton Union. Anyone with information on the location of this unit is asked to contact senior audio-visual specialist Don King at 725-3613.

· There was evidence of drinking games taking place in the basement of Burnett House, including damage to walls. The matter was referred to the Office of Residential

· A student reported that her

vehicle that was parked in the Coffin Street lot was broken into. An unlocked truck and the glove compartment were opened. A tire, jack, tarp, and paperwork were stolen. Officers found most of the stolen property in nearby woods, with the

exception of the jack and tarp.
• A fire alarm at Coles Tower was triggered by smoke from microwave popcorn.
Wednesday, September 17

Garbage piled outside several Harpswell Apartments is attracting varmints. A student reported that a skunk got its head stuck in a glass jar and was going around in circles bumping into things. Brunswick animal control officer responded and removed the jar. Students are advised to place their garbage in the dumpster. Thursday, September 18

· Copper wire and copper pipe was stolen overnight from the new fitness center construction site at Morrell Gymnasium. While officers were investigating at 8 a.m., a facilities employee reported see-ing a man walking through the Bowdoin Pines dragging spools of copper wire. The suspect ran away as the employee called Security on his cell phone. The suspect was last seen running through the Pine Street cemetery and headed into woods east of Pine Street. Brunswick and Topsham PD responded and conducted a K-9 track, losing the scent near Jordan Avenue. Some stolen cooper cable was recovered. A good description of the suspect was obtained. The case remains under investigation.

Cheerleading squad plans to 'bring it on' this year

Bowdoin's cheerleading squad plans to kick up its intensity this year while increasing its visibility on campus.

Now in its third year as a club sport, the squad is practicing more often in order to show how much school spirit they truly possess.

Although past squads at Bowdoin have dissolved after only a few years, members of this year's squad say they want to reverse this trend.

Our main goal is to be sustainable and to pull in enough members every year," said Yuna Oh '10, the team's co-captain.

"We want to ensure that there is a squad next year, even if the founders graduate," she added.

The team, led by Oh and Emily Andrade '10, consists of nine returning members and six new members. Andrade said that while past squads set flexible practice schedules, this year's team plans to work more rig-

"In the past, it was really relaxed, with two hours of practice a week, Andrade said.

"This year, we have at least five hours of mandatory practice a week with an additional workout schedule created by the football coach. We will also have two hours of additional rookie practice this year,"

While both Andrade and Oh cheered at their high schools, many members of the squad had never cheered before Bowdoin.

"We've gotten a lot of criticism for not being as spirited as some people would like, but many of our girls have never cheered before," Oh said. "We stress that it's about confidence, because if you're really shy you'll have a harder time pumping up the crowd.

Danielle Drew '12 joined Bowdoin's squad after visiting its table at the Student Activities Fair. The cheerleading culture of Drew's hometown in Alabama provides a stark contrast to her new home in

"I lived 20 minutes from the town where MTV's 'Two a Days' was filmed," she said. "Cheerleading isn't big here because hockey is so big, whereas in the South it's all about football and race cars."

Oh said she would like the squad to cheer at hockey games, but concedes that Dayton Arena may not be able to accommodate a cheerleading squad for its games.

"We wanted to do hockey games but it's not plausible, since we can't be out on the rink," she said.

"We haven't seen the new arena yet, so that might be a possibility, but we're really focusing on strengthening what we have right We want our football and basketball appearances to be really solid," Oh said.

Still without a coach after three years as a club sport, the squad is hoping student leadership can help keep the organization viable this

"We would love a coach, but we understand that it's really expensive and that providing a coach for every club team is not a main priority of the school right now," Oh said. "In later years hopefully we can prove that we are serious enough to deserve a coach.

Despite all of their struggles, Oh

said the team remains close-knit.
"We're definitely close," she said. "We all call each other, we have cheer lunches, and we have an annual retreat that is a lot of fun and a good way to bond."

The team prides itself on being, in their eyes, the most diverse group at Bowdoin. Oh said she hopes the squad's increased presence on cams will combat the negativity she believes surrounds the team and cheerleading in general.

"We're not all size two, tall blondes with blue eyes like your stereotypical cheerleader," said Oh. "But I think that all in all we do a pretty good job."

ON THE WAY TO THE TOP: Bowdoin's cheerleading squad practiced stunts on Wednesday

Wake up and stare your sexual wreckage in the face

BY ALANNA BEROIZA CONTRIBUTOR

Take a deep breath. Hold it. Do you smell what I smell? That's right, it's the crisp aroma of September in Maine. It's the soft fragrance of clean hed sheets and new underwear. It's the reassuring scent of a CLEAN

No matter what your past sins have been, now is your opportunity to make a fresh start. Sounds nice, doesn't it? Then again, taking that strapping young man from your Sculpture class home over Ivies sounded nice too. That is, until you realized that you'd contracted a par-ticularly virulent strand of the "kissing disease" from said gentleman, leaving you bedridden all summer.
Undoubtedly, some of you will be

skeptical of my point of view-and understandably so. For, though I'm sure you've heard the old, reassuring adage, "what happens at Ivies, stays at Ivies," I think most of us would rather put our money on "Saturday night's pleasure is Sunday morning's painful reality."

It's more than just pnemonia that spreads like wildfire on this campus. Ever-present is the fear of infection with a bad case of ridicule, judgment, or lack of eye contact from a fair-weather friend you once con-sidered your "main wingman." But, just hear me out. I have an idea of what you're going through, so trust me, it's not as bad as you think. Plus, mono was, like, the best diet

First of all, stop obsessing about the last totally embarrassing thing

you did at Bowdoin. You're probably the only person who remembers it, and you're definitely the only one who cares. Everyone else spent their summer so wrapped up in their own sexual confusion, they couldn't possibly have had the time to think about your problems. That cute chick on the field hockey team has been freaking out about how she kissed a girl and she liked it, not about how you forgot to call her because you were too busy watching the game with your boys. Embarrassment is a subjective feeling which depends on your standards, not the standards of others. While you may think that hooking up with multiple people in one night is dirty, remember that there's probably a whole crew of poly-amorous swingers sitting in the basement of Mac House wishing they were in your shoes. The point is with every action, there is an equal and opposite reaction, and you need to be prepared for this when you engage in any type of sexual activity. Be aware of what you're doing, and you probably won't end up searching for your dignity on the steps of the Art Museum the next morning. Secondly, have some integrity.

Now, perhaps you did, in fact, do something last semester that earned you a lifetime spot on the Bowdoin "wall of shame." It's possible that all the judgmental glances you seem to be getting in line at Thorne are, in-deed, coming from people who recall your epic performance at Super Snack last spring—dressed as Tom Cruise in "Risky Business," standing on the table, and belting out a cacophonous rendition of Alanis Morrisette's "You Oughta Know," dedicated to your ex. Even still, all is not lost. You are only the object of

ridicule if you allow yourself to be. So maybe you ran barefoot through ow desperately pleading with your object of desire, "Stay! Stay! You'll love it, I promise!" Well, now's the time to hold your head up high and, in the bright and conspicuous light of day, march up to that person and say hello. The most effective way to relieve yourself of the shame that you feel over what may not have been the most savory sexual experience is not to act as if you're ashamed. The past is gone and if you're still living there, then people probably have good reason to treat you like the person you used to be. Get up and look your sexual wreckage straight in the face-acknowledge its presence. This is the first step in the dignity restoration process. Seems scary? Believe me, it's worth it. They won't know what hit them. The last time you spoke they glared in disgust at the puddle of spilt beer collecting on your dingy tshirt. And now, here you are, clean, happy, sporting a healthy summer tan, and-gasp-looking them in the eye and engaging in conversa-tion. They might think you're crazy, but at least they'll be intrigued.

In closing, a note to those students who have yet to fully experience the magnificent awkwardness that is the Bowdoin hook-up scene. While these first weeks of college will by no means define your experience at this fine institution of learning, they are definitely moments you will never forget. So please, before you head out into the perilous wilderness of the college social scene, keep a few things in mind:

Costume parties are not an excuse for public nudity (this is par-ticularly true of Epicurea).

- Having people write on your face at the Baxter graffiti party might sound like fun on Saturday night, but you'll be getting a very different reaction at Sunday brunch.

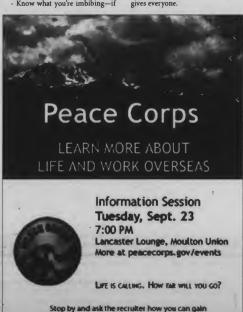

Cups are provided at social house parties for a reason. Filling up a camelbak with beer is probably not a good idea-if only because your hydration device will never be the same afterwards.

Know what you're imbibing-if

anyone offers you something called "monkey piss," just say no.

- Just because you're dancing in a vat of foam (or jelly), it doesn't mean people can't see you sucking face, or whatever else you might be doing in

Keeping all of this in mind, I want you to take another deep breath. Hold it. You can do this That's the smell of fall, and fall for-

experience now to become more competitive

CHILE **CONTINUED FROM PAGE 1**

Silva was first offered the opportunity to play in Chile by the coach of an American club team while at a soccer tournament in Iowa. The American club team was traveling to Chile to play exhibition games against Chilean women's teams. including the under-20 national

While in Chile, Silva was approached by the coach of the national team, and a year later, was invited to try out for the squad in Florida. She and two other Chilean-Americans made the cut and traveled to Santiago to play for the women's team full-time. Silva's commitments to the national team meant that she did not return for the second semester of her freshman year at Bowdoin.

Because Silva lived on an allmale floor of the hotel, her first friends were wrestlers, boys who often complained that their sport received little recognition in the soccer-dominated Chilean sports

The other athletes were furious that soccer was the only real sport in Chile," she said.

Silva said she did not interact with the athletes on the men's soccer team because they lived in apartments paid for by the government. All other athletes stayed in the hotel, hounded by maids to keep their rooms clean.

Silva said her team did not attract the same degree of attention as the men, but added that they were still treated like celebrities a times. Silva received even more attention for her foreign appearance and heritage. She recalls being confronted on the street by cheering high school boys and recognized by cab drivers from her spots on Chilean news networks. She was often asked to sign autographs.

Although soccer is extremely popular in Chile, its fans and athletes consist almost entirely of men. The few youth soccer programs for "Coming back was all very surreal. I didn't know how I would connect to people when I got back, but I feel like my friendships are stronger this year."

REBECCA SILVA'11

girls have sprung up within the past decade, and the women's professional soccer league started in May 2008. Silva said Chile has recently directed more resources to women's soccer because the country is hosting the 2008 Under-20 Women's World Cup in November, as well as the adult women's World Cup in 2015.

Because Chile only recently began to encourage women's involvement in the sport, many younger girls are unaware that "Las Rojitas" exists. As a result, the majority of the team's fans are boys and men who discovered the team through their interest in men's soccer. Indeed, one of the team's games with the largest turnout was played immediately before a men's game.

According to Silva, Marta Tejedor, the Spanish coach of "Las Rojitas," is in the "tough position" of trying to legitimize women's involvement in a historically maledominated sport in a country where machismo is still a commonaccepted term. Tejedor stressed "looking coordinated, professional and athletic" to the women on the squad, Silva said.

The team spent over an hour and a half a day juggling in order to develop skills that would impress other teams with their technical skills. Silva doubted the usefulness of the drill, saying that oftentimes the other teams did not pay attention as the Chileans showed off their tricks.

Silva also mentioned that all the female soccer players were put on weight-loss diets despite practicing for seven hours every day. "I lasted

KICKIN' IT: Rebecca Silva '11 smiles from the back row with teammates from the U-20 Chilean women's national soccer team.

one day on the salad diet before I complained," she said.

Because she is taller and more muscular than the smaller Chilean players, Silva was spared from taking creatine, a muscle-mass enhancing drug that is highly controversial in the United States. Silva said she thought the drug supplements were "an image thing," and not necessarily to improve performance. Silva, who quit the team dur-

ing the early summer, explained her decision as "a culmination of smaller details," but not having to do with any specific incident. The demanding practice regimen, the strictness of the sports hotel and competition between the other women on the team combined to create what Silva referred to as "a rotten environment.

"I found myself losing all joy in playing soccer," she said. Additionally, Silva decided she had met her non-athletic goals of getting to know her Chilean family better and improving her Spanish.

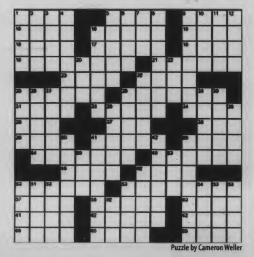

Silva said she was not willing to forgo another semester at Bowdoin the chance to play for Chile in the Under-20 Women's World Cup. " I wasn't ready to play soccer all day every day in Chile for another semester when I could be at Bowdoin."

Coming back was all very surreal," said Silva. "I didn't know how I would connect to people when I got back, but I feel like my friendships are stronger this year," she reflected. Silva said the most challenging part of returning to college has been the workload. "I'm still adjusting to homework," she said.

Despite having quit "Las Rojitas," Silva said that she has a lot of good memories from the team. Some of her favorite memories include beating the under-20 women's teams from France and England, and tying Norway. She now plays for the Polar Bears and said that this fall, she has been able to "keep soccer fun.'

ARTS & ENTERTAINMENT

Sandoval '10 pieces together McKeen Center theme

BY PETER GRIESMER
CONTRIBUTOR

Carina Sandoval '10 spent her summer creating a new look for the Joseph McKeen Center for the Common Good.

Sandoval set to work after A. Le-Roy Gleason Professor of Art Mark Wethli challenged students in his public art class to submit designs for the Quinby House basement or the McKeen Center. Sandoval's proposal was selected, and Wethli informed her of the decision shortly after Spring Break last year.

"Professor Wethli announced to our whole class one day—almost as a side note—that my design was the one chosen for the Center," Sandoval said. "It was 'very exciting." The first time Sandoval visited

The first time Sandoval visited the center, Director of the McKeen Center, Susie Dorn, suggested hanging a large quilt on the main wall.

After doing some research, Sandoval decided that a quilt-like design would be well-suited to the mission of the center, which, according to Dorn, is to "[help] students discover the ways in which their talents, passions and academic pursuits can be used for the benefit of society through public engagement."

From her own research, Sandoval discovered that quilt-making is traditionally a communal activity in which women gather together, after designing their own individual quilt squares to sew together a larger product.

According to Dorn, finished quilts were then of service to the

MARGOT D. MILLER, THE BOWDOIN ORIENT

FOR THE COMMON GOOD: Carina Sandoval '10 spent the summer installing this artwork in the McKeen Center for the Common Good. Sandoval designed the work to reflect the center's fundamental values: learning, service, and leading. The tiles represent quilt squares; like pieces of a quilt, they come together to create an innovative pattern on the McKeen Center wall.

community

In her original proposal, Sandoval introduced the idea of hanging tiles representing quilt squares in a grid-like pattern on three walls of the McKeen Center. Inspiration from the early 20th century Dutch painter Piet Mondrian and collaboration with Wethli and Dorn, however, led Sandoval to revise her design to include a number of different shaped and multi-colored fabric squares laid out in a wavelike pattern.

The finished piece includes squares of five different sizes while five different warmly-colored fabrics cover each one. Sandoval began work on the project in the spring and worked through the summer until completion. The process she undertook

Kellar to discuss spacial dimensions in Tuesday lecture

BY LYDIA DEUSTCH CONTRIBUTOR

Artist Jeff Kellar will expand art enthusiasts' horizons—literally—with his latest exhibit at Bowdoin.

Kellar will present a lecture titled "Drawing Space" on Tuesday, September 23, at the College. The Bowdoin Museum of Art hosted Kellar in 1982 for its Maine Artists Invitational. Currently, he has an art show on exhibit at Icon Contemporary Art on Mason Street for the sixth time since 2002.

"His show was the real catalyst for the talk," A. LeRoy Gleason Professor of Art Mark Wethli said. "Kellar is one of Maine's most respected artists, and we were overdue to introduce him to our students,"

An artist's work in a lecture often depends upon sildes and reproductions. Kellar's show is "a great opportunity because his actual work is available," Wethi said. "Many artists prefer their actual work to reproductions, but with Kellar's work it's especially important to see it in person. There is a certain physicality that you only appreciate in front of the real

Kellar is attributed with innovative techniques that make art viewers

aware of space.

"The works are all about space,"
Kellar said.

Concentration on space has been a

MARGOT D. MILLER, THE BOWDOIN ORIEN

FILLING THE VOID: Artist Jeff Kellar's exhibit at the Icon Contemporary Art gallery draws viewers into the spaces represented in his works.

constant throughout his career.

The meticulous nature of each piece seems almost mathematical or architectural. This comes as a natural segue for an artist who has worked predominantly as a sculptor. If specific attention were not paid to the "canvas," Kellar's art would be akin to other paintings. However, all but one

of the canvases are thin aluminum panels. The three-dimensional object subtly affects the viewing of the twodimensional image.

"I started out as a filmmaker, working in animated film," Kellar said. "In a way, whether you are in a darkened theater, a gallery, or a home, a two-dimensional screen becomes three-

dimensional. My interest in that has stayed constant my whole career."

Moving around the works is an essential part of viewing Kellar's art.

"You have to move around the space to the front and sides and back of the room because the paintings are physical objects more than representations" Wethli said.

"I love museums for the huge spaces you go into," Kellar said. "Dotted about there are objects. I love that there's this space with objects dotted around. Go over to them and suddenly you're in that world."

"If the viewer feels more conscious of his own two feet then I feel successful," he added. "I want the viewer slipping back and forth between two meanings that can come with being farther from the painting as opposed to close to the painting. I want the viewer to key into their own self conscious perception and the feeling of being and being in space."

"Works of art generally begin at the frame and carry into the space inside," Wethli said. "feff's pieces begin at the frame and draw attention outward. This is a hallmark of minimalism and something that Jeff does very well. His pieces even incorporate receding planes, suggesting architectural imagery, but just hinting at them rather than taking them too far."

According to Wethli, a hallmark of modernism is that contemporary work talks to the whole room rather than to itself. Rather than moving inwards, it moves forward and out.

"So, why do I do it? The pleasure it gives me. I hope it gives this to the viewer, too," Kellar said.

Kellar's lecture is "Drawing Space," held in Beam Classroom at 7 p.m. on Tuesday, September 23. The lecture is free and open to the public.

Newcastle a suitable go-to in many situations

BYSIMON LEE CONTRIBUTOR QUEST FOR THE QUENCH

After spending the better part of the last seven months traveling the world, and occasionally stopping during my excursions to sample the local brews, I am delighted to be back at Bowdoin for my senior year.

Being back in Brunswick, I feel the need to find a reliable beer— and one that doesn't stoop to the levels of the keg beer offered at social house parties. Heeding the suggestion of my brother, I recently tried a certain English brown ale called Newcastle. Though the flavor was initially off-putting, my second swig of the beer intrigued and refreshed my taste buds. I drank on.

Newcastle is a smooth beer—so smooth, in fact, it could easily be mistaken for a beer several shades lighter. And like many brown ales, the beer wasn't heavily carbonated, so it didn't fill me up. (a quality that is often referred to by other, lesser beers as "drinkability.") Newcastle's taste hardly overpowers like an Indian Pale Ale which tastes bitter from the first sip. Nor does it possess the backlash of a traditionally heavy, dark beer like Guinness—brewed from roasted

A CLASSIC STAND BY: Newcastle brown ale, with its smooth taste will complement any social occasion.

MARGOT D. MILLER, THE BOWDOIN ORIENT

malt. Although Newcastle maintains some mild bitterness, it tends to feature a smooth, delicate fla-

It was only when I cracked my second (note: Newcastle bottles are NOT twist-off) that I realized I was drinking the beer too cold. The label told me to "drink cool," but my initial bottle was ice cold—in retrospect, probably a mistake. This is not an ale I would recommend pulling out the frosted mugs for. Instead, Newcastle works well as a Saturday night "social enabler" or a Sunday afternoon "watching

the game, having a drink" drink. Plus, it tastes great with pizza.

If you're like me and are returning to campus of age, you've probably realized by now that it's time to ditch the cost-effective 30-rack of Natty for something more pleasurable and tasty. I highly recommend spending the extra couple of bucks for a six or twelve pack of Newcastle. On Saturday night or Sunday afternoon, with that someone special or all by yourself, Newcastle is a versatile beer that will never steer

New Coen brothers film 'burns' up the screen

BY LAUREN XENAKIS

Until last week, I must confess that the only other Coen brothers' film I had seen was "The Big Lebowski." I am not a Coen brothers' groupie, or even a modest fan of their films. But I liked the look of their most recent work, "Burn After Reading," so I decided to trek down to the Eveningstar Cinema. I was not disappointed.

The movie opens at CIA headquarters in Langley, Virginia, where Osborne Cox—played by a drunken and enraged John Malkovich—has just been "demoted" because of his drinking problem (or so his Mormon colleague tells him). As Cox cleverly puts it, everyone has an alcohol problem compared to his more sober colleague, and with the excuse of his demotion, Cox decides to leave the agency completely.

The next shot in the film shows that Cox does indeed have a drinking problem; he prepares what appears to be one of too many whiskeys. His irate and cold wife—played by ice queen Tilda Swinton—walks in and demands to know if he picked up the cheese for the dinner party tonight. Before Cox can explain to her about his awful day, she's out the door to get the cheese since her idiot of a husband couldn't remember to pick it up. Somewhat surprisingly, Swinton plays a pediatrician in the film.

At the dinner party we meet Harry Pfarrer, a paranoid sex addict played by George Clooney who is cheating on his own wife with Cox's. Both women think the other is cold and demanding but Harry doesn't mind as long as they're both at his beck and call. Harry is convinced, however, that Cox knows

about his escapades with Cox's wife on Cox's own boat, and the successive shorts of Harry being tailed convince both Harry and the viewer that the CIA (or Cox) is having Harry followed.

Harry has a bigger sexual appetite than two women, and so enters Linda Litzke, an image-obsessed woman who works at HardBodies Gym and wants the perfect body in order to "reinvent" herself—and to find a man on an Internet dating site that is not a "loser." Linda meets Harry through this dating Web site and is delighted to find an attractive man who has a sense of humor and is interested in her.

Linda gets herself and her co-worker Chad (played by a foolish and effervescent Brad Pitt) into trouble when
her desire to have plastic surgery leads
her into blackmail and treachery. She
and Chad find a CD with supposedly
top-secret CIA information on it in
the women's locker room of the gym;
Linda decides to use that CD to get the
money she so desperately needs to pay
for her surgeries. She and Chad try to
blackmail Osborne Cox (the owner of
the CD) into giving them a reward for
the CD but when Cox doesn't play ball,
Linda gets frustrated and her greed
triggers a string of events that leads to
death and destruction.

From the twisted plot line comes a story that ends up tight, clear, and humorous. The most endearing character in the movie is Pitt's Chad, since in his naivete, he tries to play the spy (like a ten-year-old boy infatuated with James Bond) but instead gets caught up in a grand game of blackmail and deceit. Interestingly enough, these "games" seem serious not to the people involved, but to the black-suited white men sitting in the concrete Langley Headquarters; it's no big deal—not at all.

'Gardens' rife with cultural conflict

BY FRANCES MILLIKEN COLUMNIST THE BOOK NOOK

Epigraphs are a somewhat less superficial way to judge a book than by its cover. The inscription usually hints at the essence of what is to follow or is the work of a favorite author

I was sold on Alan Drew's "Gardens of Water" at the sight of the page after the epigraph. There I found a key to the Turkish pronunciation of certain letters. I was about to read a story and learn a new language—it was a done deal.

The reader is brought into the life of Sinan on the eve of his son Ismail's ceremonial entry into adulthood. Sinan is Kurdish and a devout Muslim. He and his family live just outside the bounds of Istanbul because the political and religious turmoil pushed him from his home.

Sinan is one of many people in Turkey struggling to make ends meet. He tends a corner store, dotes on his son, and makes every effort to build a proper life for his family.

But the presence of an American family living in the same building as Sinan and his family unsettles him. He is wary and suspicious of Americans; they meddle in other people's affairs and supply weapons aid to serve their own ends.

Unbeknownst to Sinan, his daughter Irem and the American

boy Dylan have been speaking to each other from the respective windows of their rooms. The flirtation is tame by Western standards, but charged with all the emotion of any teenage relationship plus a hefty dollop of the forbidden. Irem is attuned to, and hurt by, her father's adoration of her brother. Dylan is a link to the outside world and a salve for the wounds inflicted by her father's distance, a breach that occurs as she develops into a young

Once all of this sets the stage, every dynamic is disrupted or intensi fied by an earthquake that destroys the village. Ismail is buried beneath the rubble of the buildings and only survives because Dylan's mother keeps him alive with drips of water she sacrifices her life for his.

To Sinan's great dismay, he finds himself increasingly indebted to his American neighbor, Marcus. Not only did his wife die for Sinan's son, but Marcus works with a relief force that is caring for those displaced and injured by the quake: meanwhile the Turkish government is too tied up in bureaucracy to be of any use.

Sinan is forced to depend on the connections and provisions of Marcus. An uneasy friendship forms between them that is always on the brink of being torn apart.

Sinan begins to lose control of his family quickly under the new living conditions. Ismail continues to relive the days he spent beneath the rubble and spends days crouched over a notebook, sketch

velops into kisses—kisses which confound and elate her and serve to fill part of the void in Dylan left by his mother's death.

There are aspects of the relationship between Irem and Dylan that echo the plights of Romeo and Juliet. Irem is attempting to loosen the restraints placed on her by religion, custom, and her family, but her struggles lead her so far out of her depth that the imminent possibility of tragedy is a constant shadow. As with Romeo and Juliet, Dylan and Irem are hardly more than children. The sorrows of their lives have not yet prepared them for any reality beyond their own.

Drew lived in Turkey and arrived there only days before the earthquake that throws the lives of his characters into turmoil. His descriptions of the country are fully realized and beautiful. My curiosity about the country and the culture was largely affected by his prose. It is evident in Drew's sensitive and evocative depictions of the people in his novel that he is entranced by his subject.

The novel looks closely at the conflicts between east and west, tradition in the midst of modernization, and the cost and benefits of faith. The characters are animate on the page. Their lives are teeming with the hope for happiness, com-fort and adventure. The beauty and fantastic realization of Drew's but novel far exceed the tantalizing promise of his linguistic key.

Maine quartet strings classics in Studzinski

The Portland String Quartet will embellish the Bowdoin fall concert series with a performance of mu-sic by Felix Mendelssohn, Joseph Haydn, and Ernest Bloch in Studzinski Recital Hall this weekend.

The event will open the Quartet's Fortieth Anniversary Season. A longtime participant in Maine's usic scene, the quartet has specialized in playing the works of composers from Maine and the United States, along with the traditional string quartet repertoire.

Saturday's program features works from three musical eras. The first half will open with Mendelssohn's Capriccio in E minor, Op.

One of four works for string quartet that Mendelssohn (1809-1847) wrote in the last years of his life, the Capriccio is a short, dramatic expression of the composer's brilliant developmental technique and romantic sensibilities.

The performance will then re treat chronologically by about half a century with Haydn's Quartet in D major, Op. 76, No. 5.

This work by Joseph Haydn (1732-1809), known as the "father of the string quartet," is a turbulent ties are captured in its massive Largo-a gradual, elegant progression of Haydn's emotional palette.

In the second half of the pro-

gram, the ensemble will perform Ernest Bloch's Second String Quar-

Bloch, born in Switzerland in 1809, studied as a violinist and composer in Europe until moving to the United States in 1916.

Bloch's language is one of tight ambiguity, and the Second String Quartet begins in a masterfully free, sensitive tonality. In the second movement, Presto, distinct themes take root and the piece finds direction.

The Portland String Quartet has

been working with the music of Ernest Bloch for several decades; in 1983, they recorded his five string quartets (written from 1919-1956).

The seemingly competing forces in Bloch's Second Quartet (aspects of traditional and tonal language) form a fascinating picture of the composer's place in time.

Overall, it is a passionate piece of music, and the Portland ensemble, revered in particular for its per-formances of Bloch's quartet, will provide a serious rendition of the

The concert by the Portland String Quartet will take place on Saturday, September 20 at 3 p.m. in the Kanbar auditorium at Studzinski Recital Hall. It is free and open

Art festival for all ages colors Brunswick green

The town of Brunswick will provide an alternative, hands-on experience for Bowdoin students not participating in Common Good Day on Saturday: the Family Arts Festival.

The project, which will take place on the Brunswick Green, is aimed at attracting art aficionados of all ages.

The festival will feature perfor mances and exhibits, though the majority of activities are interactive.

For those who missed out on finger-painting in kindergarten, there will be a tent dedicated to children's art projects.

Similarly, Bowdoin students who find themselves squinting into the autumn sun every time they leave Moulton can attend a hat-making workshop.

Another exciting highlight of the children's tent is the Creative Kings & Queens session in which participants will be encouraged to create their own battle armor (which could come in handy during Phase II).

Those looking for a more grownup foray into the arts can meander over to the adult tent which offers weaving, knitting, book-making, and painting exhibitions and work-

During the activities, a series of live musical acts is also slated to perform. A Beatles cover band, a

Dixieland Jazz Combo, a Cuban soul group and many more will perform in the town gazebo.

In between the children and adult tents, the lawn will also host a myriad of performers, including karate, hip-hop dancing and a drumming circle, in which all are encouraged to participate.

"We thought it would be just a wonderful event for the town, and it's free, which is a really important aspect of the event," coordinator Charlotte Agell '81 said of the festi-

"It's about people connecting; it's a community connection event," she

Agell, who graduated Bowdoin with a visual arts degree, brings an innovative philosophy to the hands-on nature of this Saturday's activities

"Art shouldn't be reserved for just looking at," she said. "Art should be made daily, like bread."

A middle school teacher in Yarmouth and an author and illustrator of children's books, Agell will create
"Lightening Portraits" from 12-2 p.m. on the green this Saturday.

The project, sponsored by the Maine Arts Commission and the Five River Arts Alliance, runs from 10 a.m. to 4 p.m.

More information and a full schedule of events can be found at www.fiveriversartsalliance.org

Bowdoin hip-hop artist produces album

BY RACHEL GOLDMAN

While browsing iTunes during nightly procrastination sessions wdoin students may be surprised to find the beats of a fellow student just one click away.

This summer, Alex Healy '09 produced and released his first hip-hop album titled "Illuminati the Prequel." Although the project began as a simple four-song mix e, the Brooklyn native worked tirelessly and turned the project into an album. He sold thousands of hard copies, released the CD on the Internet and made it available

Not only did Healy rap on the al-

bum, he produced it by himself.
"I was really a part of the creation process," he said. "I didn't just send it out. I work for myself and really get involved with the sounds."

Healy also organized the collaboration of the many hip hop artists who are featured on the album.

These artists are really legends," He cited L. Maze, Kool G Rap and

Godfather as some of the many talented features on the CD.

According to Healy, the album "draws from what hip-hop producers were doing in the early '90s and infuses it with sounds of the con temporary hip hop world." Healy said. "Lyrically, the album focuses on what is going on today. Specifically, the album is centered on city life in New York, what is actually ng on. It shows all the bad things that nobody talks about and nobody gives time and focus to. That's why we call it the 'Illuminati," Healy

MARGOT D. MILLER, THE BOWDOIN ORIENT

BACKUP BEATS: Alex Healy'09 collaborated with several artists to produce his album, "Illuminati."

"Illuminati the Prequel" is the first album of a three-part series The second and third albums are already in the works.

"By the third album we will really have told a story," Healy said.

Although Healy, an Africana studies major, does not study music at Bowdoin, living in Maine has giv-

en him an interesting perspective.
"Being in Maine has allowed me to have my mind more open," he said. "Even though my music is about the city, being in the city often makes it hard to make music. Here, this separated environment is so conducive to my work."

In addition to making his own music, Healy has began helping oth-

er artists too. He has been collaborating with California hip-hop artist Steven King for his new albu-

"It's coming together in insane ways. It is crazy stuff, stuff you've never seen before," Healy said about the project.

Healy and King are also in the process of creating their own cloth-ing line called "Heroic Villain." The clothes are not yet in mass produc-tion, but Healy says they will be in

the near future.

The Steven King album will be available in 2009 and the next Illuminati album, "Illuminati: The Round Table presented by ATG & L. Maze," will be available in Januage.

Boston band to rock out at Mac

BY CAROLYN WILLIAMS ORIENT STAFF

They're musicians, not aliens, but the band "Project Blue Book" promises to shake up Bowdoin's nightlife nonetheless.

The group, which identifies it-self as "Unidentified funky orchestras" on its MySpace page, is bringing its music and sense of hum to Bowdoin tonight at MacMillan House.

The band took its name from the government-sponsored UFO research conducted in the 1960s known as "Project Blue Book.

"Back when we were in high school our bass player wrote all his songs in a big blue book so we decided to tie the name of the government records to the book," guitarist Rob O'Block said. "Plus, when you Google Project Blue Book a bunch of alien stuff shows

up which is pretty cool."

Project Blue Book consists of O'Block, guitarist and vocalist Cam Goodrich, bassist and vocalist Greg Croak, drummer Matt Cambria, keyboardist and vocalist Dan Perkens, and occasional pedal steel guitarist Tony Susen.

Although certain members of the band have been playing together since high school, the current group has been playing together since 2006 in venues across the Boston area. They also frequent college campuses, but this will be their first appearance at Bowdoin.

The band is versatile and does not shy way from playing music

ALL ABOUT THE MUSIC: Members of Project Blue Book improvise on classic tunes as well as write

from any genre.

"We started out as the house band for the Broken Crab in Boston. We played a lot of classic rock covers, and it evolved from there," O'Block said. "We started jamming out to covers more and it became a kind of funk, jazz, jam band, blues type of thing. We do a little bit of everything.

"We just have fun with it," Max Hendren, band manager, said

"It's jam, punk, all over the place at this point," he added.

The band also plays traditional blues songs as well as Grateful Dead and Phish covers. They per-

form country on occasion, too.
"We've changed some of the cov-

ers so much that they're almost like our songs," O'Block noted.

Project Blue Book plays most of its shows during the summer and succeeds at packing venues with its eclectic numbers.

"We blow people away," Hen-dren said. "We've never had a disappointed audience. People come one time, and then they just keep coming to other shows.

While most of the band members are not music majors at their respective colleges, technical vir-

tuoisity binds the group together.
"The core of the band is the guitar, drummer, and bassist. They hold the band together, and it sounds great," Hendren added.

"We blow people away. We've never had a disapointed audience. People come one time, and then they just keep coming to other shows."

MAX HENDREN, BLUE BOOK MANAGER

Although most of its members are still in college, the band aver-40 shows each summer and looks forward to them all.

"I really like to play music, it's my favorite thing to do. It's great to have people watch, but I think ultimately you have to really like to play and play with each other to keep it going," O'Block said.

In addition to performing at MacMillan House, before the show the band will host a workshop at the college house.

'We'll tell people about the music and open it up for questions," O'Block said. "I'll talk about some of the stuff that I think about in an improvisational section. A lot of the band is improvisational so I'll try to explain what to listen for in the music.

The band looks forward to discussing music with Bowdoin stu-

"People can ask whatever they want and hopefully we can give them some good answers," O'Block

The workshop will begin tonight at 6 p.m. Project Blue Book will perform at 10 p.m.

For more information about Project Blue Book, visit www myspace.com/theprojectbluebook.

SANDOVA

included finding Homasote (a type of wallboard) for the square bases, selecting high-quality upholstered fabrics to cover them, and buying lumber pieces for foundation and mounting.

After Wethli showed her how to

use a power saw, Sandoval cut the lumber into squares herself. This was one of the most exciting parts of the project, according to Sandoval. In addition, Sandoval cut and stretched the fabrics over the Homasote pieces; the work was almost entirely her own.

Although the process took more than six months to complete, Facilities was able to mount the tiles in a single afternoon. Sandoval named the finished product "Quilt Squares."

The McKeen Center also asked Sandoval to produce a logo for its department. In its final design, the logo features the rustic signature of Joseph McKeen above the words "Center for the Common Good" typed out in a modern font. This text appears above three squares, reminiscent of Sandoval's installation, meant to represent the three pillars of the center's mission:

learning, service, and leading.
Sandoval is a visual arts major. She said that she hopes to pursue an additional art degree in graduate school and would like to work in an art-related profession.

"It's a learning experience in being flexible with your design and working with your client to find some common ground for both of you to be happy and satisfied with the result," Sandoval said. "This project really helped me develop as an artist and a designer."

We're looking for extraordinary graduates.

Women's soccer ties, to face rival Williams

RY ALLEEN TSCHIDERER

After a scoreless draw with conference opponent Wesleyan, the women's soccer team maintains its unbeaten record.

While the Bowdoin women remain undefeated in both conference and non-conference play, posting a 1-0-2 record, sophomore Rebecca Silva was not pleased with the result in the contest against the Cardinals.

We were all very disappointed because the game was very winnable,"

The Bowdoin attack posted 20 on the Wesleyan keeper, yet most flew wide or high of the goalmouth. The team came closest to scoring when Katherine Farrar '11 launched a serve that hit the left post late in the first half.

Luck was not with the Polar Bears, however, and the ball bounced clear

As the game went on, the heartbreaks continued: Although the Polar Bears created a variety of good chances for themselves, they could not find the back of the net.

The high shot count implies that the Bowdoin women are on the right track though. Silva mentioned Head Coach Maren Rojas's early-season emphasis on getting the offense to create chances for each other at the

The defense proved to be solid, allowing Wesleyan only 12 shots, with keeper Kelly Thomas '09 recording five saves. The Bowdoin women have not lost to Wesleyan in 14 years when they fell 1-0 in 1994.

The team will face conference opponent Williams, whom they lost to in last year's NESCAC final, on the road tomorrow. Silva is optimistic despite any frustration left over from the "winnable tie."

"Williams and Wesleyan play different styles of soccer, so our approach will be very different. Maren is a great coach and structures practices throughout the week to prepare for the [upcoming opponent's] style of play. As long as we practice hard this week and master the co nceptsand maybe have a little more luck finishing, we will be fine," she said.

RY ANNIE MONIAR STAFF WRITER

In the seconds after the gun went off at the lumbo Invitational last Saturday, spectators may not have been optimistic for the Polar Bears' finish. As runners climbed the first hill of the 5K race that sultry afternoon, Bowdoin's varsity runners loitered between the 30th and 40th place runners.

By the end of the rolling, muddy course, however, Bowdoin had successfully worked its way up in the field, with Annie Monjar '09 taking second, Christina Argueta '11 in fifth, and Courtney Martin '09 in 10th.

The conservative start proved a smart strategy for the Bears, who placed 4th overall, edged out by the meet's host, Tufts University, along with Connecticut College and Stonehill College.

Though the Polar Bears won the Jumbo Invitational last year, the team's captains, Martin and Monjar, remain positive about the direction the direction the season is

We had a lot of our varsity runners missing for various reasons on Saturday," said Martin. "We'd only had a week of training behind us, and I think we showed that we have a solid base to be running our fastest in late October and Novem-

Peaking at the right time is a top priority for the Bears this year, who look to defend the State Championship title they earned last year, as well as a top-five finish at the NESCAC Championship and in the NCAA New England Regional

Championship.

The Polar Bears graduated four of their top seven varsity runners last year, including Laura Onderko '08 and Sarah Podmaniczky of whom earned All-New England honors at the regional

"Every year it's a good challenge and a great education to replace graduated seniors," said Head Coach Peter Slovenski. "We graduated an exceptional class, and we're doing our best to rise up to the standard they set for the team.

As they look ahead to future races, the team will rely heavily on the return of varsity runners Lindsey Schickner '09, Lindsay Hodge '10, and Grace Kerr '09, whose running will add a lot of depth to the line-up.

"Our top runners will be very competitive with the top runners of other NESCAC schools," said Slovenski on areas to improve the teams' overall performance. "But we need to gain more confidence and speed in our fourth, fifth, and sixth runners. That's where we're vulnerable right now."

The Bears have another opportunity to race against the Jumbo Invitational's top three teams again next weekend at Connecticut College. There, they'll compete in a 6K race at Harkness Memorial Park with 16 other teams. The meet will nity to race with their full varsity lineup and to see what some of the competition will look like as they move toward the approaching major championship meets.

Hatton '10 leads men's XC to victory

BY KEATON LORA CONTRIBUTOR

Navigating the most difficult course of the season during last week's Tufts University invitational, the men's cross-country team proved its mettle over the rough 8K course, finishing first overall in the field of 10 schools. The competition, which took place last Saturday in Medford, also featured NESCAC rivals Bates, Connecticut College, and host Tufts.

In this first meet of the season, impressive showings by Coleman Hatton '10 (second place overall), Thompson Ogilvie '10 (third place), and Stan Berkow '11 (eighth place) led the Polar Bears to an strong victory.

Fellow top-20 finishers included Colin Ogilvie '12, Jonas Crimm '10, and Scot McFarlane '09.

Coach Peter Slovenski had particular praise for top first year Colin Ogilvie for his showing.

It's very difficult for a freshman to make the top five of a college varsity team, but Colin is an exceptional athlete," he said. "This first race was a great start to his college career."

A year after the Polar Bears lost All-American Nate Krah '08, newcomers like Colin may play a key role in Bowdoin's success this season. Last year, the Polar Bears ran their way to third in the NESCAC, fifth in the New England region, and 20th in NCAA Division III.

Despite the departure of several veteran runners, Coach Slovenski maintains a positive outlook for this year's group.
"We graduated a strong class that

included five of our top-eight run-

ners last year," he said. "But I've been impressed with the strength of the upperclassmen so far this season We might surprise a few teams that thought we would have to rebuild this year."

10 in the New England region the U.S. Track & Field and Cross-Country Coaches Association preseason

The team's next challenge lies ahead with the September 27 Con-necticut College Invitational, to be held at Harkness Memorial State Park, in Waterford, Connecticut.

Bowdoin will look to best current NCAA Men's cross-country national champion, the New York University Violets, and second-seeded Trinity College Bantams within a more chal-

Men's soccer falters with loss to USM

BY EREN MUNIR STAFF WRITER

In the world of athletics, it is almost impossible for any team or player to find the path to success without taking a few knocks along the way. For the men's soccer team, it must hope that the first few games have been just a few slip-ups and not an indication of the rest of

The first loss came in Connecticut at the hands of a tough Wes-leyan team who, in the final minute, scored the game's only goal.

The loss was especially disap-pointing considering the rivalry that has emerged between the two

teams over the past few seasons.

Bowdoin looked strong throughout the game, but they could do

nothing more than find the post, twice, in the 1-0 loss.

As hard as last Saturday's loss was to deal with, things only got harder Wednesday night after the Polar Bears suffered a humiliating 3-1 defeat to Southern Maine.
"We need to work harder and

match our opponents physically," co-captain Dominic Fitzpatrick '09

"We need to find tough, hardnosed players to come in and give us a lift because so far this season we're lacking determination and de-sire," he added.

The loss to the Southern Maine Huskies was particularly frustrating because it seemed like a winnable game.

Unfortunately the team could not convert its chances into goals, a factor which has been alarmingly recurrent this early in the year.

Fitzpatrick is not worried about the lack of goals.
"If we work harder the goals will

come," he said. "They always do."

The Polar Bears will have the

daunting task of trying to redeem themselves against a perennial NE-SCAC powerhouse, Williams, this weekend.

Once again, the Ephs are amongst the favorites in the conference and will be looking to come out strong in their first home game of the sea-

"[We can win if] we regain fo-cus," Fitzpatrick said. "We need to learn from the loss but forget about it at the same time, All we can do is look forward and take it one game

RACING DOWN THE WING: Junior defender Kara Kelley dribbles the ball up the sideline looking for a cross into the center of the field.

McNamara scores three against Bates, field hockey squad remains undefeated

BY KATHERINE POKRASS
CONTRIBUTOR

Even the crisp Maine air could not help the Bates Bobcats temper the dynamic Bowdoin Field Hockey Team last Wednesday night as the Polar Bears cruised to a 6-0 victory.

Continuing with their dominating trend, the Polar Bears held a 32-3 shot advantage and controlled the ball for most of the 70-minute contest.

Netting the first goal for Bowdoin was forward Lindsay McNamara '09. Charging up the right side of the field, McNamara followed the rocket she sent in on Bobcat goalkeeper Katie McEnroe and knocked the rebound home at 8:34 in the first half.

The unsung hero of the second Polar Bears goal was right-winger Madeleine McQueeney '09.

After making a solid stop off a Bates free hit, McQueeney maneuvered the ball into the striking semi-circle, creating the opportunity for McNamara to blast her second tally of the night into the back of the cage.

A penalty corner conversion by Leah Ferenc'09 deflated any lingering Bobcat confidence.

Ingrid Oelschlager '11 pushed the

ball out to Ferenc for a quick shot, and McEnroe could only watch as the third Bowdoin goal sailed past her left knee at 27:55.

Before the night was over, McNamara would bag another goal, Oel-schlager would put away a rebound off a shot from Jessie Small '11 as well as another goal, and first year Ella Curren would land her name on the score sheet for the first time in her college career by assisting the final Polar Bear goal of the evening.

"We had a lot of intensity throughout the game which really showed up in our one-on-one battles and passing connections. I think that's why we were successful," said sweeper Ferenc. The fourth-straight shutout win

The fourth-straight shutout win for the field hockey team caused high nerves for the Polar Bear faithful when Bowdoin almost tied with the unranked Wesleyan University Cardinals last Saturday in Middletown, Connecticut.

With each second that ticked off the game clock, the anxiety grew for the Bowdoin players, coaches, and fans until McNamara provided a reprieve by scoring in the final 13 seconds of the game off a pass from midfielder Kate Gormley '09 to give the Bears a 10----

"Obviously Wesleyan played very well defensively, but we need to work on our finishing and executing our penalty corners," said Coach Nicky Pearson after the excitement of the game had settled.

Despite holding the clear advantage in shots on goal (36-0) and penalty corner opportunities (25-0), the Polar Bears were held to their lowest goal total of the 2008 season.

The thorn in Bowdoin's side all night was the spectacular individual efforts from Wesleyan netminder Breen McDonald '10, who made a career high 18 saves, and midfielder Alexa David '10 who had three defensive saves in the game.

sive saves in the game.
"The 'pack-it-in' style of defense
that Wesleyan used made it very challenging for our team to find the space
we needed when we had the ball inside the circle," said forward Shavonne
Lord '10.

The field hockey team faces its next NESCAC test on Saturday when they head to Williamstown, Mass., to take on the purple and gold Ephs of Williams, followed by a stop in Portland to battle the University of Southern Maine Huskies on Tuesday...

Men's tennis crushes Colby and Brandeis

BY EMMA POWERS STAFF WRITER

The men's tennis team was unstoppable in its very own Bowdoin Invitational last weekend.

The Polar Bears competed against Colby and Brandeis, going a remarkable 32-1 over the weekend and making it to the finals fo their flights.

Co-captain Alex Caughron '09 noted that the victory was a perfect way to start the season.

"[The Invitational was] a great confidence booster for a young team with big expectations," he said.

Stephen Sullivan '11, an All-American last year, said that this win will serve the team well in the future.

"This victory shows that teams that used to contend with us are no longer able to," Sullivan said. "Not only that, but Bowdoin tennis is beginning to compete at a top national level."

Playing A-flight singles and doubles, Sullivan dominated the court.

"Stephen Sullivan was untouchable," Caughron said.

Sullivan finished undefeated, winning three singles matches and three doubles matches, and earning the Aflight title.

"I was happy with how I did this

weekend," Sullivan said. "For the first time, I really concentrated on my fitness this summer and it's nice to see that it is paying off."

First years Nicholas Fenichell and Kent Winingham both made it to the finals in the B-flight singles.

"The incoming freshman are very good singles players and will have a huge impact on the team," Sullivan said.

Michael Power '11, Josh Roer '11, and Andrew Won '12 were also successful in the C-flight singles as Won beat Power in the finals for the victory.

The men's team will play in the Middlebury Invitational this weekend, where the competition is expected to be more rigorous. The Polar Bears, however, remain confident.

"The team should expect to take down most of the flights this weekend even though the level of play is going to be much more difficult," Sullivan said.

As they look to the future, the men's tennis team is focused on improving their doubles play, gaining more match experience, and competing to their potential.

"I think we can go very deep into the season if everyone gets focused like we were at times this weekend," Caughron said

Women's tennis wins open

STAFF WRITER

The women's tennis team kicked off the season on a high note, winning the ECAC Women's Tennis Open Championship at Trinity last weekend. The Bears had players in all of the championship matches and won four of the five flights to down Brandeis, Trinity, Connecticut College, and RPI.

"It was a great note to start our season and year on," said senior captain Sarah D'Elia. "It was a way for everyone to gain match play experience and build their confidence"

Rachel Waldman '09 expressed her excitement about the victory.

"Winning the ECAC was a great start to our season," Waldman said. "It gave us the confidence we need looking ahead to the upcoming tournaments in the fall, and showed us some fundamental things that we need to work on to obtain our ultimate goal, a "shot at a national championship in the spring."

championship in the spring."
Emily Lombardi '12; Brett Davis '10, and Stephanie Langer '11 all came out

on top in the singles flights. Playing doubles, Rachel Waldman and Charlotte Hitch '09 claimed the first-place title.

The Bears are also looking forward to watching their new young talent.

"It was fun to watch one of our freshmen, Emily Lombard, play a match for the first time." Waldman said. "We were able to see that she is going to play a big part of our team this season and be a very solid player in match competition." Overall, the women's tennis team hopes to gain momentum from this victory as they look to the future.

"In the fall our goal is to build our confidence and work on different parts of our game for the spring season," D'Elia said. The team will focus on taking risks and building confidence in future matches.

Following their success last spring, the Polar Bears intend to go even further this season.

"Last year we made it to the NCAA Elite 8 for the first time in college history. This year, we would like to meet and hopefully surpass that level come May 2009," Waldman said.

Sailing competes at Yale, MIT, Tufts

BY CAITLIN BEACH STAFF WRITER

The sailing team, under a new coach this year, opened its season participating in six different regattas.

Viktor Bolmgren '11, Coco Sprague '11, Pete Wadden '09, and Meredith Steck '09 competed in 420s at the Harry Anderson Trophy Intersectional at Yale University on Saturday and Sunday. Due to prevailing light conditions, a full rotation of races could not be finished. At the end of the five completed races, the A team of Bolmgren and Sprague came in 16th place out of 20, while the B team finished 18th out of 20.

"At Yale we had the top 20 teams in the country competing in very difficult conditions," said Head Coach Frank Pizzo. "Both pairs were sailing in a higher position on the team than they have in the past and learned a great deal sailing against the nation's best this past weekend."

Doria Cole '09, Laura Heyl '10, Charlotte Williams '10, and Erin Taylor '09 traveled to the Boston area for the weekend, where they sailed in the Women's Man Lab Trophy at MIT on Saturday and the Captain's Cup Trophy at Tufts on Sunday.

The A-division team of Cole and Heyl posted an impressive sixth place finish at Tufts on Sunday. Together, the four women "demonstrated to the rest of the conference that the are a force to be reckoned with," said Pizzo.

"After a three-year hiatus, Bowdoin

once again has a women's team," added the coach. The team had been unable to send anyone to all-female regattas during that time. First year skipper Alex Takata, ac-

First year skipper Alex Takata, accompanied by crew Bill Rohmann '11, also put up several top-five finishes for a strong showing at the Penobscot Bay Open, held at Maine Maritime Academy in Castine.

Rounding out the weekend's lineup of competition were Bowdoin sailors participating in the Central Series 1 regatta at Tufts and the MIT Invita-

This weekend, the sailing team will compete in a number of regattas, including the Hatch Brown Trophy at MIT and the Lake Champlain Open at the University of Vermont.

Sports Shorts

McNamara, Welch named in Sports Illustrated

Two Bowdoin athletes recently made headlines—but this time, in one of the most prominent sports publications in the country. Sports Illustrated featured both Lindsay McNamara '09 and Tim Welch '12 in recent segments for the weekly sports magazine.

McNamara, a senior field hockey standout who holds the all-time scoring record at Bowdoin, was recently featured in the "SI: On Campus" segment on SI.com. The article praises her for her nine-goal performance in the D-III NCAA field hockey tournament—which culminated in Bowdoin's first NCAA championship in any sport. The article adds that Bowdoin remains undefeated through 24 games, a streak dating back to last season. Welch, a first year, was profiled in the

Welch, a first year, was profiled in the "Faces of the Crowd" segment of the September 15 print edition of Sports IIlustrated. A left-handed pitcher, Welch had a stellar season for Portsmouth (N.H.) High School, not allowing a run in 52 innings while scattering a meager 16 hits over the course of the season. Welch's team captured the Class I New Hampshire state title, and he plans to play baseball for the Polar Bears this spring.

The Bowdoin Football Team hopes that long months of hard work will pay off with a win against defending NE-SCAC champion Middlebury tomor-

"Our off-season training program began the week after Thanksgiving, so we have been working hard for about 10 months now," said quad-captain Gus Spaulding '09. "We only get to play eight games, so we're eager to show that our hard work will earn us good

The Polar Bears will square off against a tough Middlebury squad and look to start the season on the right foot. Defending NESCAC Rookie of quarterback Donald McKillop will challenge the Bowdoin defense.

"The key to containing any good player is to make him uncomfortable," Spaulding said. "Our defense will do everything in their power to try and get pressure on him and hopefully force him into making bad decisions. If we do that, we have a good chance to win.

The Polar Bears jumped out to a 1-0 start last season by stunning Williams in their first game and will look to duplicate their early success this season.

"Every win is important, but starting the season on a positive note is a big confidence booster," Spaulding said. Beating Middlebury will give us momentum going into week two, and as long as we stay focused and play with

enthusiasm, we have a good chance of making it happen.

After the win over Williams last son, however, the team faltered in the ensuing weeks and lost its next five

"Our lack of experience showed last year when we had a letdown in the middle of the year," Spaulding said. The key this year will be to keep our emotions in check and bring the same level of enthusiasm and effort into ev-

If experience was in short supply last vear, this year it will be one of the team's

"We have a good group of seniors returning for one final year," said se-nior quad-captain Tim Kelleher, "but we also have some juniors and sophomores who played in a couple of games

Kelleher believes that a veteran offensive line will pace the team this season behind returning senior starters Spaulding, Ray Wang, and quad-captain Ben Larkins. The offensive line helped the team rush for an average of 96.9 yards per game last season.

"I am looking at our offensive line to make huge contributions this year," said Kelleher. "We want to throw the ball this year, so if the offensive line is looking great and giving our quarterbacks enough time to throw the ball it will be a great year.

After ending last season with wins against Bates and Colby, and a second straight CBB championship, the Pola Bears hope to run their winning streak This year, the team feels that it can con pete for the conference championship.

In a conference as competitive as the NESCAC, the biggest thing a team needs to be able to do is limit mistakes," Spaulding said. "If we can avoid turn-overs, and make the other team turn the ball over, then we will be success-

"Last year we opened at Williams, who were the defending NESCAC champions, and beat them by making the plays we had to make," said Coach David Caputi. "Anything can happen any week, last season proved that

The Only Thing Better Than a Skype Date

COLUMN LIKE I SEE 'EM

So here I am. Aquí estoy. In Spain for an entire semester combating culture shock, the seven-hour waiting period between meals, and a severe dearth of American sports. I have discovered rather quickly, though, that there are few things more rewarding in life than my post-lunch siesta every day, serving as my chief panacea here in Granada, the beautiful, Islamic-influenced Andalusian city that was once inhabited by the Moors...or was it the Moops? All that aside, I have still managed to keep pace somewhat with baseball's pennant races and football's introductory couple of weeks, and I've got to be honest: I still think the Yankees will make the playoffs and the Jets go undefeated.

I cannot think of a more perfect time to be abroad. Being six hours ahead of Bowdoin, it is a relief to know that I won't have to sacrifice an entire night's worth of sleep just to watch the \$275 Million Man ground into inning-ending double plays in crucial situa e sure, I'm not at all happy about New York's failure to reach the postseason for the first time since K'Nex engineering was on my career list, but if I could have chosen any season in which the Bronx Bombers were left out in October, it

would have easily been this one.

As far as Gang Green goes, while I may not have unlimited access to ESPN over here, let's just say that we all felt the

aftershock of Tom Brady's serendip mean, unfortunate injury. And while I knew the Bretts should have knocked off the Patriots this past Sunday without the best quarterback of my generation in the lineup, Matt Cassel did his best Trent Dilfer impression and played well enough to beat New York. Like the Joker "It's all part of the plan." The Pats were supposed to win anyway.

The Jets still have a much better chance of making the playoffs now than before Brady's downfall, and once Eric Mangini realizes that Favre is one of the best quarterbacks of all time, that Ocho Nueve is a premier receiving weapon, and that Thomas Jones is perhaps most average running back in NFL history, he will learn how to play-call for this team, and seal at least a wild card spot. So until I return in December at the end of the regular season, Hakuna Matata. Nothing could have distracted me from what I experienced on Sunday

Our study abroad group had the privilege of going on an excursion to the neighboring cities of Ronda and Sevilla last weekend to soak in some more vibrant Spanish culture.

We spent a few hours in Ronda absorbing the spectacular bucolic scenery atop a bridge that overlooked the entire countryside, and then made our way to Sevilla where we would spend the next two nights. After an evening stroll along the river Guadalquivir, a visit to the Alcázar of Sevilla gardens the next day, as well as our first flamenco show, we were just getting started.
On Saturday night, the vast majority

of our 81-person group rushed out of the flamenco hall and into the bustling streets of southern Spain. Our desti tion? El Estadio Ramón Sánchez Pizjuán to watch a European soccer game. Sevilla FC, Andalusia's most storied

club, was to square off against newly promoted Sporting de Gijón, and we were to be a part of it. Finishing fifth in La Liga—Spain's first division—last year, as well as advancing to the knockout stages of the Champions League, where they crashed out at home on penalties, Sevilla had the opportunity to leapfrog domestic foes Real Madrid and Barcelona into first place. And believe me, I

The clamor of fans eager to get inside grew exponentially with each step towards El Estadio. It was nearing 10 o'clock-kick-off time, believe it or not even World Series games start later than 9:20 ET. The fans were chanting their songs and belting their cheers as we moved closer, and we couldn't even yet see the stadium. As Paul Simon once wrote, "It was late in the evening, and all the music's seeping through."

Suddenly, we turned a corner, and the majestic structure stood before us like a ssal oasis, beckoning us to enter its portal and have a taste of real fittbol. Thinking like any average American sports fan, we knew that ice cold beer sports ian, we knew that ice coud over had to be part of our equation for an epic night at the stadium. So we all took part in one of the fastest botellon experi-ences on record to get the blood flow-ing a little bit (I could probably dedicate an entire article to the art of the botellon here in Spain, but for this article's sake, you'll just have to use your imagina-tion). We figured everyone else around us must have been doing it, so why not us? This was supposed to be an indulgent cultural experience, right?

After the numerous burps that would temporarily settle our stomachs, we began the march toward our gate. The streets were packed now, and from insidthe walls the chants could be heard loud and clear. We flashed our tickets at the ushers, and climbed the stairs in rapid anticipation. On my way up the cement levels in front of me, I caught a glimpse inside: lights shimmering, fans stirring, pitch gleaming. I ran to the summit and made a beeline for the balcony entrance, and finally stepped out into the arena where an indescribable sensation captivated me for the rest of the evenis

I remember my first visits to Fenway Park and Yankee Stadium. To Madison Square Garden and even the TD Banknorth Garden. I remember feeling overwhelmed, struggling to register the almost ethereal (well, maybe not at TD Banknorth; you go on the Finals though, guys. Relax.) scenery before me, while at the same time trying helplessly to pro-cess the emotions they evoked. Maybe it was because I was much younger when I made the first historic visits. Maybe it was because there is something magical about being inside a European stadium. Heck, it might have been the botellón. Whatever it was though, this moment was special. Different. Quite simply, it

was unparalleled.

The rest of the night went by more quickly than any of us would have liked.

We found our seats that, contrary to

popular belief, were not in fact in the upper deck but front row on the bottom deck. We made friends with the native diehard fans behind us.

We joined in the cheers with the fans behind the net to our right who never once ceased standing or waving their gi-ant flags, even when Sevilla fell behind early 2-0, only to watch them orches trate a comeback with a couple goals from reigning African Football Player of the Year, Freddie Kanouté. Six goals in the first half; seven total, as Sevilla eventually took it 4-3. There was a successful penalty kick taken by Sporting de Gijón. A yellow card was given. A goal was scored from outside the box. This match had it all. When we wanted to refill our ftime, we quickly discovered that the stadium only sold non-alcoholic beer But it didn't matter. We didn't need it. Neither did everyorfe else around us. was pure fanhood to the max; something I wonder if I'll ever see again.

And there we were: the Americans, coming from all over our great country, congregating for what seemed like a mere instant in sporting bliss. We were with the crowd, and we were in the monent, taking part in something fantastically beautiful

Next week I will head even further south of Granada to embark on a five-day excursion through the North Afri-can country of Morocco, and I can only pray that my journey turns out a little better than Cate Blanchett's in Babel. But even if it doesn't, I can be forever grateful knowing that I had the opportunity of witnessing what is perhaps the greathow on Earth.

MULE BASHING: Stephanie Drumright'11 hits the ball over the net in the Bears'3-1 win over Colby.

Volleyball wins CBB

STAFF WRITER

Under the watchful eye of a crowded Farley Field House audience, the women's volleyball team had a successful sweep of this year's Colby, Bates, and Bowdoin tournament. The Polar Bears' victories over Bates and Colby on Saturday not only awarded them the title of CBB Champion, but also led them to a season record of 6-1 This marks their most successful start to a season since 2003.

The current season has started off strong," said Head Coach Karen

The tournament kicked off with an 11 a.m. match against Bates. scores of 25-20, 25-12, and 25-17, excitement was seen in both the crowd and in its players.

"[We have a] competitive, hardworking, and enthusiastic attitude," Gina Lonati '12 said.

Throughout the sets, first yea Kristin Hanczor posted 12 kills while Gillian Page '10 contributed an additional nine kills. On the defensive side, Anna Noucas '11 added a match-high 13 digs. Jenna Diggs '10 bridged offense and defense with 35 assists.

"The Bates victory was pretty defiant," Lonati said. "But our match against Colby brought out a lot of character in the team, including perseverance and mental

The game against Colby began on a note similar to the Bates match with first and second set scores of 25-18 and 28-26. However, in a tight third set the Polar Bears fell to the Mules 23-25. After their first defeat of the day, the Polar Bears rallied back together for a victori-

"When a team gets down by six, seven, or even eight points, it is easy in volleyball to give up and get the match out of the way to start over with a new one," Lonati said. "Even though this happened to us in two of the four sets against Colby, we battled back.'

Noucas, Diggs, and Hanczor were again influential in this battle. While Noucas led the defensive front with 23 digs, Diggs supported the offensive cause with 43 assists, 16 of which Hanczor finished

Hanczor's contributions to both the Colby and Bates games builds on her already successful start to a college volleyball career. For Hanczor was honored as NESCAC Player of the Week, along with senior Tufts player Kate

"While we were champions of the CBB tournament, our matches against Bates and Colby were not NESCAC matches," Diggs said. "We will play them again in far more important conference matches."

The Polar Bears' attention to overcoming the weaknesses of their opponents will be essential in their upcoming games against Tufts and Amherst, who currently stand in first and second places, respectively. The two matches will have a huge effect on Bowdoin's overall standing in the NESCAC. referred to them as the team's biggest challenges yet, but she is confident heading into the

"Our team is ready and looking to upset both programs," she said. Both games will be held at Bates on Saturday afternoon: Tufts at 12 p.m., followed by Amherst at 3:30 p.m.

Women's rugby wins 3 in tourney

BY CHARLOTTE RYAN CONTRIBUTOR

The women's rugby team opened its season at the Beantown Collegiate Women's Rugby Tournament.

Its first game on Saturday, was a drubbing Plymouth State University, whom they beat 48-0.

"[Plymouth State University] clearly had a young team and didn't have sophisticated or physical enough defense to stop our offense," captain Alivia Moore '09 said.

Women's rugby coach MaryBeth Mathews said the game served as a good first match for the season.

Loryn Fridie '11 scored three tries in the match and Moore scored twice. After then Plymouth State University, the women took on Amherst.

"[Amherst] was an evenly matched team," Mathews said.

The Polar Bears prevailed, winning the game 3-0, sending them to the semi-finals against Bates.

"Amherst was a much more physical team and forced us to have good tackles and good rucking, but sopho-more Becky Stevens's foot put us on the scoreboard with a penalty kick," Moore said.

Mathews said the team played a good match defensively and referees dealt Bates several penalties, which gave Bowdoin the opportunity to get ahead. The team won the match 6-0.

"Our defense was impenetrable and we played with heart," Moore said. 'We made our tackles, communicated with one another, supported each other, and refused to let Bates get the

OPINION

BOWDOIN ORIENT

The Common Good

aturday marks the 10th anniversary of Common Good Day, a day when hundreds of Bowdoin students, employees, and alumni gather to participate in a few hours of service projects in the local community. The event, which has grown enormously since its inception, symbolizes the Bowdoin community's dedication-and eagerness-to promote the common good.

The "common good" at the College has strong historical roots, beginning with Bowdoin's first president, Joseph McKeen. In his inaugural address, McKeen declared, "Literary institutions are founded and endowed for the common good and not for the private advantage of those who resort to them for education.

In recent years, the College has renewed this pledge; though Common Good Day only lasts for a few hours on a Saturday afternoon once a year, the extensive planning and construction of the Joseph McKeen Center for the Common Good-which formally opens next week-reaffirms the value of service at the College. With the McKeen Center located in the heart of campus, students will be reminded daily of the importance that our community places on service. In its new home, the Center for the Common Good will continue to provide students with opportunities to volunteer, lead a group, or take a service-learning course. The strong and vibrant network of staff and students at the Center will also help to provide students with possibilities to engage locally, nationally, or even internationally.

According to the McKeen Center, Bowdoin students devote 40,000 hours a year to volunteering—an astounding statistic. But our time at Bowdoin is only four years. And our commitment to the common good should last far beyond our time at the College.

From today's Common Hour speaker George Mitchell, Class of 1954, to Harlem Children's Zone president Geoffrey Canada '74, to the five Fulbright Fellows of the Class of 2008, alumni of the College continue to demonstrate that a Bowdoin education is valuable, not necessarily because of what we learn in our classes or on the athletic fields, but rather the ways in which we are inspired to build other communities once we leave Brunswick.

McKeen's oft-repeated words-the foundation of the work at the Center for the Common Good-hold true more than 200 years later. Although we often talk about what Bowdoin can do for us, the College's commitment to service should encourage us to ask how we can use the resources here to promote the common good.

To the Editors:

Oscar Wilde once wrote, "Experience is one thing you can't get for nothing." For critics of Sarah Palin, like Aspen Gavenus ("What's wrong with Palin's nomination", September 12) governing the state of Alaska, home to the permanently active 49th Missile Defense Battalion which protects the nation against ballistic missile attacks, counts for nothing. Regardless of the fact that Alaska is the nation's second-largest producer of oil and adjacent to neighboring Russia, critics still attest that Palin lacks experience Few realize the impact her governorship has had.

As governor, Palin authored a bipartisan ethics reform bill, as well as exposed state government corruption. She not only created a sub-cal net group of advisers designed to address climate change and greenhouse gas emissions in Alaska, but chaired the Alaska Oil and Gas Conservation

Short of forming a committee promoting inner city recycling, Barack Obama has done little for mental policy. Palin didn't break through so many glass ceilings and earn a bipartisan 90 percent approval rating by being a community orga-nizer. Her experience as the Mayor of Wasilla brought her closer to the peo ple, and her governorship has given her far more executive responsibility than Barack Obama himself. She is real change we can believe in.

Sincerely, Jose Cespedes '12 Kylie Huff '11 Katie Gordon '12

Amethyst editorial misplaces criticism

President Mills does not deserve the criticism he received in last week's edito rial for his decision not to sign the Amethyst Initiative. The initiative "dispassionate debate" about the drinking age, but then goes a step further to argue against the current law, making it clear that it has already chosen a side in

Mills to "push Bowdoin" into this "dis-passionate debate" by signing the initiative, even while acknowledging that the initiative does entail a specific bias on the issue: "Twenty-one is not working at Bowdoin." The editorial manages to copy the manipulative logic of the initiative by implying that "dispassionate," objective thinking on the drinking age can lead to only one viable conclusion: that the current law doesn't work.

The editors should be careful not to confuse President Mills's justified refusal to sign on to the disingenuous logic of the Amethyst Initiative with a refusal to enter into the drinking age debate at all.

Isaac Cowell '09

Sex column should be pertinent and fun

To the Editors

When I was 12, my friends and I read Seventeen Magazine out loud at slumber parties, acquiring informa-tion on our changing bodies and spec-ulating on the whether the cute boy in science class was Mr. Right. Just in ca all of my worldly pre-college experi-ence hadn't prepared me for the sexual battleground that follows adolescence, Bowdoin College forced me to attend Sex Signals and discuss my feelings about it with my entire first-year floor.

What we want and expect from a sex column in a college newspaper ("Flirty or Friendly," September 12) isn't a rundown of the standard advice we've been hearing since we hit puberty (advice that, by the way, isn't timely—whose "brunch buddy" is unexpectedly proposing marriage the first week of school?). If a sex column aims to address issues pertinent to our age group, the columnist needs to meet us at our own level—commiserate about those embarrassing things we leave out of accounts of last night to even our best friends. We need someone to help us to laugh at our mistakes and remind us that we can pull through. After all, just like sex, a sex column should be fun and engaging, not predictable or

Common Good Day is 'more than just three hours'

As the 2008 Common Good Day Fellow, I have grown accustomed to the occasional cynical comments: "You can't get important service done in one day," or, "people only do it to feel good about themselves," or, better yet, "what about themselves," or, better yet, with is the common good anyway?" This includes Bowdoin's Tenth Annual Common Good Day on the 20th and the official dedication of the McKeen Center for the Common Good a week later, seems to be the perfect time to address these important questions. After a decade, it is only fair to explore the meaning behind what has become one of Bowdoin's most treasured annual traditions.

While some have points worth con-

sidering, what the skeptics often miss is this simple fact: Common Good Day represents much more than just three urs of service on a Saturday afternoon. Yes, the service is important, and one should never underestimate how much work can get done in such a seemingly short period of time. Dozens of local organizations, which are often strapped for resources, have the chance to tackle projects that often get over-looked. An elderly home gets the opportunity to provide entertainment for its residents. A trail gets built, a garden touched up, a beach cleaned. Nonprofits are always eternally grateful to have Bowdoin volunteers-yes, even if for three hours. That is why organizations keep participating, why workers go on and on over the phone about how motivated, hardworking, and inspiring Bowdoin volunteers are, and why each year more and more organizate eager to participate in the day.

mon Good Day is its amazing ability to bring together the Bowdoin and local nity on a day dedicated to fostering volunteerism and encouraging a sense of common responsibility. unteers have the opportunity to learn about various community needs, how they are being addressed, and how they can get involved in the future Organizations and local government agencies get to share their successes and challenges with community mem bers, spreading awareness while simultaneously getting important work done. The day is service-oriented, but what it represents is so much greater. Common Good Day is a celebration of service, a fusion of all assets of the Midcoast Maine community, and most importantly, a call to make service an integral part of our lives. And service comes in a wide variety of forms; one must look no further than the incredibly diverse project options that Com-mon Good Day offers to truly understand this

A more frequent complaint about the day is the simple fact that not everyone who wants to participate can. "How," some people demand, "can people get turned away from volun-teering?" While this is a legitimate question, one must look deeper to unquestion, one must sook deeper to un-derstand why this apparent weakness actually speaks to the stunning dedica-tion of the Bowdoin community to the greater good. The fact that more than 500 spaces fill up in days shows how incredibly eager Bowdoin students, faculty, staff, and alumni are to volunteer. Ten years ago, the first Common Good Day included close to 300 volunteers and around 30 projects. A decade

500 volunteers and more than 60 projects. There is no question that the event will continue to grow and expand.

For many, participating in Common Good Day symbolizes a reaffirmation of the important principles that guide their lives. For others, the day opens doors; it entices them with the possibility that they can make a difference and convinces them to continue to volunteer, to incorporate service into their lives. In a recent issue, Time Magazine editor Richard Stengel describes a "service movement" that is "uniting the two largest generations in American history." "National service," he writes, "is part of our DNA." It is becoming increasingly clear that the success of events like Common Good Day, which include important local service and enunteerism and commu cohesion, is part of a national tide that shows no sign of slowing down.
On Common Good Day and a week

when the McKeen Center is dedicated, Bowdoin will reaffirm its com mitment to the common good, celebrating decades of service and vowing to continue onward. Critics sometimes argue that the "common good" is an arbitrary concept with no true definition. What they are missing is that the common good is elastic; it has many interpretations and manifests itself in many ways. It pushes us to volunteer, to learn about our community, to help our neighbors and fellow citizens, and our neighbors and neuow critzens, and to participate in causes greater than ourselves. While some may continue to criticize, it seems they will soon realize that they are quickly being left behind. Jamie Nadeau is a member of the

Class of 2010.

Statements of Candidacy 2009 Class Council Elections

V

Class of 2009 President

Christian Adams

Its been four years since everyone who went on a pre-o trip heard those fireworks go off in Farley, but, in the blink of the eye here we are: Senior Year, last call. Throughout our time here each of us has tried our hand at different activities. Some of us have spent hours in lab, some of us have spent hours on sports fields, and some of us have simply spent hours hung-over. But to be sure, all of us have made our own paths and discovered our own interests as we have moved through Bowdoin.

The most important "interest" that I have held while at Bowdoin has been Student Government. Every year I have been at Bowdoin, I have been involved in Student Government in some capacity. Whether was freshman year on the Dining and Facilities advisory boards, sophomore year when I had the honor of being your class president, or junior year where, when I was unable to run for president as I was going abroad, I worked at the position of BSG (Bowdoin Student Government) Representative for our class. While a member of the BSG assembly junior year I was chosen to serve on the Academic Committee, the Student Affairs Committee, and the Student Organizations Oversight Committee. As a senior, in addition to running for class president I am also presently serving on the recording committee. Through my experience with these various appointments and positions I have gained an extensive understanding of the capabilities of Student Government at Bowdoin. I know how and from where to get additional money, who to talk to in order to plan parties and reserve spaces for student events. I know which deans to talk to when students have complaints about academic policies, parties, or simply living conditions. If chosen as your president I look forward to putting this experience to use in order to bring you unfettered access to everything you enjoy at Bowdoin, whether it be a course Bowdoin does not offer or simply an incredible Senior Week.

Sophomore year our class officer team brought you sweatpants and sunglasses, and we even touched the heart of one boy in our class with "head accessories", but this is only the beginning. I look forward to making a difference in all of your lives in your final year at Bowdoin in whatever capacity I can, and like the offer of the college says, all I want to do is ensure "...the best four years of your life."

William Wilder

Hi everyone, I'm Willy Wilder and I'm running for president for the class of 2009. My Bowdoin experience was shaped and highlighted by my interactions with all of you all over campus from the sports fields to parties and the classroom. You each played a role in how I and every other proud polar bear lived and grew during the last few years on and around campus. I strongly feel that the hard work I will put in as class president will play a large role in how you experience this your final year in Brunswick. I hope that all of you grant me the opportunity to work to ensure that our senior year is as amazing as we all hope.

As most of you know, the bulk of the work of the Senior Class Council is devoted to planning Senior Week. During that period, I will strive to ensure that everyone has a fantastic time for their last few days as a Bowdoin student through extensive events both on and off campus. That being said, I want to emphasize that I will do whatever I can throughout the year to make the entirety of your senior year the best that it can be.

Thanks for your time and remember to vote!

Class of 2009 Vice President

Michael Julian

It is hard to imagine that already three years have passed since we were huddled together on the floor of Farley Field House, not really knowing much about each other, but ready to embark on a life-changing experience, together, as Bowdoin College's class of 2009. It is our senior year now, and we have already begun the process of doing things for the last time. The last convocation, the last lobster bake, and so on.

I'm Michael Julian, and I'm running to make our last year at Bowdoin the most special experience it can be, for everyone. Being abroad last semester made me realize what qualities I loved and missed about our home here at Bowdoin, and I am eager and excited at the possibility of representing our senior class as Vice

As Vice President, I hope to collaborate with other class council members in an effort to make this year the most fun and most memorable we have seen thus far. Some of the things I hope to work on include: Planning a diverse and inclusive series of senior week events, such as pub-crawls, rafting trips, cruises, etc. Another issue will be making sure our Ivies celebration has a top-tier performance headlining the show. I also want to work with Student Activities and the Pub to have longer hours, open up the balcony for seniors only, and even allow bottle service for champagne upstairs. These are just a few realistic, obtainable goals that I will work towards as Senior Vice President, and I thank you for your time and support.

Jeremy Kraushar

Hey friends and classmates, my name is Jeremy Kraushar '09 and I am running for class vice-president. It would be a great honor to serve this year as VP for what I believe to be the greatest class in the history of Bowdoin College.

I served on the class council on BSG last year as our Community Service Officer after returning from a great study abroad experience in the fall. I know how BSG works and will be committed to making every event our senior class puts on the best it can be. This year, the Vice-President acts as the class liaison with the great people of the Campus Activities Board. I know I would be a great fit for this role because I have a great interest in the social aspect of our class and I know the importance of the activities and celebrations that will soon become the most memorable of our college years i.e. Concerts, IVIES, Senior Week. In addition, I will offer a friendly and easy-to-talk to personality that can connect the students of our class with the workings of our student government. I'm not going to make a million promises, but I will promise that I can voice any class concerns to our government and do my best to make sure all the members of our class have a

So in short, if you know me at all, help our class out and vote for me! If you don't know me personally, believe that I will do a great job in this position and be your voice in the BSG.

Class of 2009 Treasurer

Spencer Ho

I hate to admit it, but we are seniors. The "real world" seems closer and closer with every harassing email from the CPC. This is our last year at BoBo, and while the thought of leaving might be depressing, let's go out with a bang. We still have one more year at this glorious establishment and I want to cherish the short time that we have left together by doing everything in my ability to make sure that later down the road we will all remember how truly fine

Now imagine being out with your friends, and you just finished a fabulous meal. As you're ready to leave, the waiter comes by to drop off the bill and panic sets in. Nobody wants to deal with the mathematical mystery known as "the check." You know that guy who always ends up doing it? I am that guy. Now, Class Treasurer is definitely not the same

role, but I feel that I am good at managing money and dealing with people about money-related issues.

So, why do I have this uncanny ability to solve monetary issues? It could be the fact that I am an econ/math major at Bowdoin and have a solid background in finance. I am highly motivated and dependable, have clear communication skills, and work well in a team environment, all crucial skills for a good class treasurer.

I've also served as treasurer for the Men's Rugby team. This position has taught me how SAFC works, and given me experience in managing and stretching a budget. These attributes along with my positive and hard working attitude make me an excellent candidate for Senior Class Treasurer.

Let's have an unforgettable senior year. Make sure you vote for me next Tuesday, September 23rd, so that the good times will be well-funded. GO SENIORS!!!

Arden Klemmer

Seniors. I was your class treasurer freshman and sophomore year, and after a junior year abroad, I'd like to be your treasurer once again. I have a lot of ideas for events and swag to make our senior year our best year yet. It's time to get class sweatshirts, and I can assure you that if I'm elected, the sunglasses are coming back. I take party planning seriously, and will make sure that every event we do this year is done right, namely Junior/Senior Ball, Spring Gala, and Senior Week. It's important to note that I'm friends with people in many different social scenes at Bowdoin, so I'm committed to planning events that appeal to every student in our class. I have two years experience on the SAFC, and a good relationship with the staff in Student Activities. If you have any questions please stop me on campus or shoot me an e-mail (aklemmer). I would love to have your vote.

Class of 2009 BSG Representatives

Caroline Burns

My name is Caroline Burns and I love the class of 2009. As a senior going through the Bowdoin routine for the fourth and final time, I find myself constantly thinking of the memories I slid have yet to make. I think of the Racer X concerts, the excitement of the fall, homecoming, watching leaves change; I think of the winter with the holidays, snowball fights, and the junior-senior ball; I think about Ivies, Solar fest, and the dance performance on the museum steps. For the last four

years the only thing these essentially Bowdoin events have in common is the class of 2009.

As a senior I know how important all of these events are to all of us—what the essence of Bowdoin truly is and that is why I am running for BSG representative for the class of 2009. With such duties as planning Senior Week and representing our class on the BSG Board, I can put this knowledge and passion for Bowdoin into action. Although I have no previous experience on the BSG board I am genuinely interested in making our final year exciting, different, memorable and full of those quintessential Bowdoin moments.

I am eager to plan events that will unite the class of 2009 and offer something to everyone. I am interested in listening to your ideas and making sure they are heard at meetings. I promise to dedicate myself to making a special and unique senior week and serving as a liaison between the senior class council and the BSG. I want the class of 2009 to have no regrets and I am committed to creating many opportunities to show our school spirit. I am very excited at the prospect of being BSG representative for the class of 2009. I bleed black and white.

Diced Diack at

Ian Yaffe Fellow senio

I am running for BSG Representative for our class for two reasons: to help make sure that we have an incredible senior year (and of course, Senior Week) and to represent our interests on the BSG. I have a diverse event planning experience here at Bowdoin, including work in the Events Office, Food Forward's Taste for Change, and registering events. Additionally, I have run all-inclusive trips for large groups of people in the past. Most importantly, I can make sure all that money we've given Bowdoin to form our class budget really goes far and be a voice to make sure that we don't waste the little time we have left here.

On the BSG side of things, I have been involved in several efforts to reform BSG and encourage student participation in the process and have sat on numerous BSG-sponsored committees around the College. As a representative to the BSG, I'd seek to ensure that we continue to empower ourselves as students and take control of the issues that concern us most. While we will be leaving Bowdoin this spring, we can not only leave our mark to ensure Bowdoin's a better place than when we got here, but improve it in tangible ways to make our senior year more enjoyable.

If you have any questions, ask me when you see me on campus or stop by Pine Street. Thanks for reading.

Voting is open from 8:30 a.m. on Tuesday, Sept. 23 until 8:30 p.m. on Thursday, Sept. 25. All members of the Class of 2009 can vote online at bowdoin.edu/vote.

WEEKLY CALENDAR

SEPTEMBER 19 - SEPTEMBER 25

ROASTED AND TOASTED: The Dining Service roasted a suckling pig as part of Hispanic Heritage Month festivities, sponsored by the Latin American Student Organization

FRIDAY

Common Hour Lecture with Senator George Mitchell'54

Alumnus and former Senator George Mitchell will give the Common Hour lecture to kick off a week of celebration preceding the dedication of the Joseph McKeen Center for the Common Good.

Pickard Theater, Memorial Hall. 12:30 p.m.

Grab and Go in the Union

The Latin American Student Organization (LASO) will hand out a variety of snacks and beverages.

Smith Union. 1-3 p.m.

CELEBRATION

Recess on the Quad

Come play freeze tag, four square, dodgeball, and other childhood

Outside of the VAC and Art Museum. 2-4 p.m.

Squash Clinic

Students, faculty, and staff are invited to attend a squash clinic hosted by the Bowdoin women's and men's squash teams. Come learn the rules of the game, proper squash technique, and game strategy. \$15 per person.

Lubin Squash Center. 2-5 p.m.

Afro-Peruvian Dance Workshop

Marcos Napa will teach a workshop on traditional Afro-Peruvian music and dance.

Memorial Hall 601 (Dance Studio). 4 p.m.

Songwriting Session

Members of Project Bluebook, a funk-rock jam band hailing from Boston, will hold a songwriting workshop before performing a concert at 10 p.m.

MacMillan House. 6 p.m.

FILM

The Bowdoin Film Society will screen this 1980 comedy, an air disaster spoof, starring Robert Hays, Julie Hagerty, Peter Graves, and

Cornell du Houx '08 runs for state rep

BY NICK DAY

This fall, Bowdoin alum and Iraq War veteran Alex Cornell du Houx '08 has his sights on the Maine Legislature.

Cornell du Houx is running for state representative from District 66, a part of Brunswick that consists of approximately 300 Bowdoin students, including residents in Howell House, Helmreich House, Burnett House, and Stowe Inn. Running as a Democrat, Cornell du Houx will face two opponents on the ballot: Jonathan Crimmins, a Republican, and David Frans, a Green Independent candidate. Both Crimmins and Frans live in Brunswick.

The seat, formerly occupied by Stan Gerzofsky from 2000 until 2008, will be vacated since Gerzofsky cannot seek re-election because of term limits. Gerzofsky, a Dermocrat, is running this November for the Maine State Senate.

Cornell du Houx, 25, is no stranger to Maine politics. While at Bowdoin, he participated in the Bowdoin College Democrats and served as co-president of the Maine College Democrats.

"The activities and the classes I participated in at Bowdoin helped me tremendously in gaining the experience needed to run a campaign," Cornell du

College monitors economic turmoil

BY MARY HELEN MILLER

After two weeks of economic volatility, college administrators remain uncertain how events on Wall Street will affect Maine Street.

President Barry Mills said that he is most concerned about the pressure of college costs for families, the effect of increasing oil and gasoline prices for employees, and the diminishing retirement accounts of employees, particularly of faculty members.

"Like all of America, I think this is a time for us to be...thinking about what our priorities are," Mills said.

During the last fiscal year, which ended June 30, the endowment earned a 1.3 percent return—a figure that is substantially lower than last year's 24.4 percent return, but, according to Mills, "compares quite favorably to the market."

According to Director of Student Aid Stephen Joyce, 65 to 70 percent of the \$22 million that Bowdoin has awarded in grant aid this academic year comes from the endowment.

"The money is safe, it's secure," he said.

Joyce is confident that Bowdoin will remain affordable to families.

"It would be rather short-sighted of us to find ourselves in a situation where people couldn't afford Bowdoin," Joyce said. "Having a down economy is not new, we've gone through down economies before," he said.

Joyce said that every year his office examines whether families finances are keeping up with cost increases of attending Bowdoin. The assessment considers families cash and savings, investments, home equity, and employment.

"I'm not too worried about declines in home equity at this point," Joyce said, explaining that home values "have beeh falling for a couple of years now."

Asked what it would take for Bowdoin to discontinue its need-blind admissions practice, Joyce said, "Thered have to be a dramatic financial change."

"I don't think its anything that people are talking about right now," he added.

While Joyce is not concerned with Bowdoin's ability to meet students' financial needs, he did acknowledge that it is a "nervous time for families."

"We'll be able to ride this out with families for the next year, or whatever it takes," he said.

Bill Torrey, the senior vice president for planning and development and secretary of the College, said that there is "no question that what's going

McKeen Center celebrates official dedication today

BY PIPER GROSSWENDT ORIENT STAFF

Today marks the formal opening of the Joseph McKeen Center for the Common Good, Bowdoin's streamlined operation for perpetuating the "Common Good" beyond campus.

Located in Banister Hall, on the side of the Chapel, the McKeen Center builds upon the groundwork laid by the College's previous community service institution, the Community Service Resource Center (CSRC). The CSRC was formed seven years ago by Lydia Bell '00 in response to increased student interest in organizing initiatives to serve the community.

According to the center's recently launched web site, "The McKeen Center houses all former CSRC programming, including volunteer programs, annual events, leadership development programs, and support for service-learning courses. The McKeen Center strengthens these programs by providing a secure financial endowment. In addition, the new center provides cross-campus connections for community engage-

ment and opens new pathways to community-based research and community-based teaching."

Susie Dorn, the director of the McKeen Center, said that the need for an expanded campus resource became apparent as an increasing amount of faculty became interested in leading community initiatives. She cited Professor of Sociology Craig McEwen, now the Senior Faculty Fellow at the center, and former Dean of Student Affairs Craig Bradley as specific faculty members involved in bringing the vision of the McKeen Center to life.

According to Dorn, McEwen and Bradley thought that the center could increase community effectiveness while simultaneously effectiveness while structure to the communication of t

important part of the campus.

Dorn explained that funding for the McKeen Center has been provided by "a few key alumni who have supported [existing service-oriented] programs generously over the years, as well as [contributions] to the capital campaign to establish an

Endowment slows to 1.3 percent growth

Sustainable Endowment Institute gives Bowdoin a "B" in rankings

BY NAT HERZ AND MARY HELEN MILLER

Bowdoin's endowment has increased for the sixth-straight year though not by very much.

During the last fiscal year, which ended on June 30, the endowment earned a 1.3 percent return, raising its value to \$831 million, from \$827 million last year.

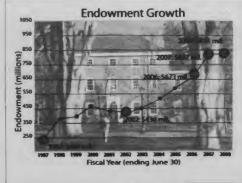

Although the endowment continues to grow, the figure represents a significant slowdown from the 2007 fiscal year, when the endowment brought in a 24.4 percent return.

In the face of a tumultuous economy, President Barry Mills said that Bowdoin is "very stable."

"The challenge, of course, is that we're not going to see, and haven't seen, the 20 percent return on our endowment," Mills said.

"With those kinds of returns, we'll have to be very careful so that we don't [become overextended]," he added.

Mills said that the "rapid change"

GRAPHIC BY MARGOT D. MILLER, THE BOWDOIN ORIENT

LEVELING OFF: This year's endowment earned a 1.3 percent return. Though the rate represents a \$4 million increase, the growth rate has slowed significantly from last year.

the College is experiencing—including new faculty positions, the replacement of loans with grants in financial aid, and the current construction projects—underscores the College's need to be careful with spending.

"My challenge is to be very prudent as to what we choose to do in the future as these markets work themselves out," Mills said. "This is a difficult time, and I'm very confident in the College and the leadership we have."

Senior Vice President for Investments Paula Volent said that the

STATE REP

Houx said.

With the election less than 40 days away, Cornell du Houx said that plans to continue door-to-door campaigning—a straightforward strategy he has adhered to since announcing his candidacy last March.

"For a local election, the strategy is primarily getting a lot of doors, and personally meeting your voters," Cornell du Houx said. "In a small district, like District 66, you have the ability to meet a sizable chunk of possible voters."

"In a local election, knocking on doors is far more important than ideology," echoed Professor of Government Christian Potholm, who specializes in Maine politics. "And knocking on doors and listening is far more important than knocking on doors and blabbing about what issues you care about."

Potholm also said that the position of state representative for District 66 has been held by Bowdoin alumni before, including Tommy Davidson '94, who served three terms in the Maine Legislature.

Though only a fraction of Bowdoin will actually be able to vote for Cornell du Houx (most of Bowdoin is represented by District 63, a seat currently held by Charlie Priest), the Bowdoin College Democrats have worked to encourage eligible students to vote for Cornell du Houx.

"What we're doing for Alex is basically trying to get all the students in his district to vote," said Eamonn Hart '09, co-communications director for the Bowdoin Democrats. "That's going to happen in a couple of ways, including literature drops, and getting students aware that there's a Bowdoin student running for state legislature that some have the opportunity to vote for." Claire Cooper '09, co-president of

Claire Cooper '09, co-president of the Bowdoin Democrats, said while volunteer efforts have been made on behalf of Cornell du Houx's candidacy, the organization is not devoting more resources to his campaign than the other local, statewide, or national races.

"We're not really focusing on Alex's campaign more than any other campaign," Cooper said.

Cornell du Houx said that his platform consists of several issues, including the redevelopment of the Brunswick Naval Air Station (BNAS) and veterans care.

If elected, he plans to introduce a bill to bring a community college to the air hase land

"I'll be introducing a bill to bring a community college to the BNAS redevelopment authority," Cornell du Houx said. "If we can bring the community college to the base, we can have teaching and the resources that will be available with that."

Cornell du Houx also said that he cares a great deal about veterans' health issues, particularly because of his own involvement with the military. Cornell du Houx served for nine months in 2006 as a Marine in Fallujah, Iraq.

"We can do a better job of taking care of the troops when veterans come home," Cornell du Houx said. "And I think it's our obligation to provide them with adequate resources... a third of all homeless men are veterans [nationwide] and that's unacceptable."

Though Cornell du Houx lacks a formal team of advisers, he often receives advice from friends and family. He said that his mother has helped him print campaign literature, which he then distributes to voters in the district. In addition, Andy Cashman '03, a friend of Cornell du Houx's from their time together with the Bowdoin Democrats, said that he and Cornell du Houx talk strategy on a weekly hasis.

Cashman said that Cornell du Houx decided early in the race to run as a clean elections candidate.

"That was one of the things that we had to decide early, whether he should run traditionally, in which case he would raise all of his own money privately, or whether he would register as a publicly funded candidate," said Cashman

Frans is also running as a clean elections candidate, while Crimmins has decided to forgo public funds and finance his campaign privately.

nance his campaign privately.

Cashman, now in his third year at the Maine Law School in Portland, said that it has been exciting to chart Cornell du Houx's political progression.

"He's really been a lot of fun to watch, from not being too involved when he was just starting as a freshman, and then seeing him get really caught up (in politics) and really enjoy it," Cashman said.

his platinclud-Bruns-TURMOIL CONTINUED FROM PAGE 1

on with Wall Street will make it more difficult to secure [annual giving.]" Torrey described the last fiscal year

Torrey described the last fiscal year as "an excellent year," but he said that he expects fundraising this year "will be tougher." The College acquired \$43 million in donations during the last fiscal year.

"We won't know until the end of the calendar year how [the economy] will really affect new commitment, because it's just too early in the fiscal year," Torrey said.

Despite the volatile economy, Torrey said that the capital campaign, which was launched in November 2006, "is currently on target to raise the \$250 million." So far, the College has received about \$236 million in commitments.

"We feel confident that we'll hit our goal by next June 30," Torrey said.

Don Borkowski, director of capital projects, said in an e-mail to the Orient that the current economy will not interfere with projects that are already underway because financial commitments and contracts are already in place.

"Regarding future projects, I imagine things will slow down, as the current uncertainty in the financial markets will force more people to become conservative with their assets. This would impact giving. Also, due to the current market, our future planning will most likely have to be adjusted along with the allocation of capital funding." Borkowski wrote.

Concern about the economy's effect at Bowdoin extends beyond the success of the endowment and fundraising.

According to a study done in 2007

by the Maine State Housing Authority, the median home price in Brunswick had increased 70.7 percent in the previous seven years, while the median income of homeowners had only increased 17.8 percent in that time. Similarly, the median rent for a two-bedroom home increased 33.1 percent since 2000, but the median income of renters only saw a 13.2 percent increase.

According to Craig McEwen, professor of sociology, "people with less income are pressed...to live further away [from the College,] which means that their commuting prices are higher."

Fuel prices also correlate with food costs. Associate Director of the Dining Service Ken Cardone said that food prices began to increase last year.

"Fuel really had a terrible effect on food," Cardone said.

Not only did food prices increase, as a result of transportation fees, but also, he explained that the crops that farmers chose to plant were related to fuel costs. Many farmers shifted from producing wheat and meat to growing corn for ethanol products. This change affected the prices of wheat and meat.

"Things went crazy, and we made a lot of adjustments," Cardone said. Cardone said that the Dining Ser-

Cardone said that the Dining Service is buying more local and seasonal products, and it is using more produce from Bowdoin's organic garden. A new freezer was recently added to Thorne Hall so that more food could be purchased in bulk or in advance to keep costs down. The Dining Service even noticed the increasing costs of stainless steel and copper when it was looking to buy new kitchen equipment recently.

In order to save money, Cardone said, "You just have to look at things

a little more creatively."

Professor of German Steven Cerf is concerned but optimistic about the

When asked if he thought he would have to retire later than he would like to, Cerf said, "I think it's too early to induc."

"I'm temporarily encouraged because the Republicans and Democrats are working together," Cerf said.

"Obviously I'm concerned [about the economy], but I think...if the financial first-aid is administered, we can go on," he said.

For junior Luke Potter, a Maine native, national economic turmoil has not yet hit home.

"It's not something that I'm entirely familiar with," Potter said. "I heard on the news that it was a crash of sorts, but I feel like they were trying to spark something."

Natelson '10 recently

Shana Natelson '10 recently changed her homepage on her computer to CNN.com in order to get more information about news outside Bowdoin. Even so, she said, "I don't really speak economics, so my knowledge of the situation is very basic."

"I think people understand that there's a huge problem with the economy right now, but I don't think people are taking it seriously...[because] the effects aren't palpable yet," Natelson said.

"It's not like a bottle of water costs \$10 yet," she added.

Sophomore Bryant Johnson said that his family is "one degree away from being nomads."

"I come from a line of hobos who rode the rails back in the '30s, and while I wouldn't be looking forward to it, I wouldn't consider it the end of the world to revert to such a lifestyle," Johnson said.

MCKEEN CONTINUED FROM PAGE 1

endowment for the Center."

Dorn said that for students not already active with community service projects through the college, "it's hard to understand how much is happening....[The center's staff is] excited about the [center's] opening, because it will communicate the breadth and depth," of the Center's offerings and "connect students to issues they find compelling."

The McKeen Center has nine student fellows who work with the staff members within the center and serve as leaders on campus, connecting students to the center's various programs.

Shelby Davies '10, who serves as one of two Common Good Grant fellows, said she hopes that "the McKeen Center will broaden the Bowdoin perspective of 'what is considered community service.' I think that [in] creating a center for the 'common good,' Bowdoin will bridge the gap between 'good' done on campus and 'good' done in the community."

Sayre McAuliffe '09, a co-president of the Community Service Council, said she hoped the center would create "a stronger presence [of service] on campus,... [and] that more students will be encouraged to get involved and give back to the community."

After a week of activities marking the dedication of the McKeen Center, including Senator George Mitchell's '54 Common Hour address dast Friday and Saturday's Common Good Day activities, there will be additional events on campus today and tomorrow marking the center's opening.

Today, from 3 to 5 p.m., there will be an open house and reception in Morrell Lounge highlighting the exhibition, "Bowdoin and the Common Good," which looks at the ways in which members of the college have carried out Joseph McKeen's vision for serving the common good over the years.

At 7:30 p.m., Adam Weinberg '87, the Executive Vice President for World Learning and Provost for the SIT Graduate Institute, will deliver a keynote address, "Educating for Democracy," in Kanbar Auditorium, Studzinski Recital Hall. On Saturday, the year-long series "Seeking the Common Good" will kick off with a reception for the exhibit, "Visions of Industrial Spaces: Photographs and Drawings by Cotton Estes '07" at the Fishbowl Gallery in the Visual Arts Center from 5 p.m. to 7 p.m. (See related article, page 10).

Dorn said that today and tomorrow's festivities were "in part dedicating this space, but more importantly, dedicating a mission."

The start of the private advantage of those who resort to them for education." Bowdoin

WRITING ON THE WALL: Bowdoin's long history of commitment to service has culminated in the Joseph McKeen Center for the Common Good, which will be formally dedicated today.

MARGOT D. MILLER, THE BOWDOIN ORIEN

ENDOWMENT CONTINUED FROM PAGE 1

current state of the economy will present both challenges, as well as opportunities.

"We're long-term investors, so we don't look at it day by day," Volent said. "In the long term, there will be some incredible investment opportunities."

BOWDOIN EARNS 'B' FROM SEI

In the latest "Sustainability Report Card" released by the Sustainable Endowments Institute (SEI), Bowdoin has upped its overall grade from a "B-" to a "B."

The College earned straight "A's" in the categories of administration, climate change and energy, food and recycling, and green building. For transportation the grade remained a "D"

Bowdoin did improve upon last year's grades in investing and the endowment. For "investment priorities," the mark rose from a "C" to a "B," and for "shareholder engagement," it increased from an "F" to a "D." However, the mark for "transparency" remained an "F".

According to SEI Executive Director Mark Orlowski, in 2007 Bowdoin did not return the portion of the survey pertaining to investment and the endowment, which resulted in the failing grades in those categories in last year's report.

Orlowski attributed the improved "investment priorities" grade to the fact that the College is exploring holdings in renewable energy funds. The "D" in "shareholder engagement" stems from guidelines Bowdoin gives to its fund managers that guide proxy voting, a form of shareholder activities.

Mills downplayed the ratings.

"I don't pay much attention to [the ratings]," he said. "If I spent my time worrying about every rating Bowdoin has—it's not the way we operate the College. I'm not really interested in the ranking. It's irrelevant to me," Mills said.

As for transparency, Mills said that the College is "appropriately transparent."

The report card's top-ranked schools include Middlebury and Carleton, which both received "A-'s." Maine peers Colby and Bates also received "Bs", with similar grades in "investment priorities" and "shareholder engagement."

Copper wire stolen from Morrell gym site | Health Center looks to fill

An unidentified intruder stole 250 feet of copper wire from the Morrell Gymnasium construction site last week, sparking a pursuit that culminated in a K-9 search conducted by the Topsham Police Department.

The copper wire was taken off its spools, broken down, then rolled and taped together. The destroyed wire was then stored in a hidden area alongside a pathway to the Pine Street Cemetery.

"Copper thefts are really common now because of its value," said Director of Safety and Security Randy

Nichols said that a College employ ee was instrumental in making this particular suspect was unable to escape with any stolen goods.

While Brunswick police and Bowdoin security were investigating the crime scene, a call was placed about a suspicious individual in the Pine Street area. The unidentified employee told police he saw a man fleeing the vicinity where the stolen copper was later recovered. He told police that the man acted uneasy when questioned about his presence in the area, and when the two of them came across the stolen metal, the suspect fled immediately.

Topsham police conducted a K-9 search, but lost the man's tracks near the Jordan Street area. The destroyed wire has been returned to contractors at Enterprise Electric.

Nichols isn't surprised by the botched theft and says Bowdoin has had problems with construction site crime in the past. "If there is money to be made, the criminal element is going to be there," said Nichols.

According to Nichols, Security patrols all construction areas, but the primary responsibility falls on contractors. In the past, companies have taken a variety of measures to keep construction sites safe. Some contractors have hired private secu-

COPPER CAPER: Thefts of copper from construction sites occur-frequently, given copper's high black market value. Two-hundred and fifty feet were stolen from the Morrell Gymnasium site last week

rity guards to protect sites from the time workers leave until the start of work the next morning. He added that properly lighting sites, installing motion detectors, and locking gates can reduce the threat of theft from construction areas

National research shows that stolen copper is now appearing on the black market. The high cost of the metal has sparked organized groups throughout the United States to steal the product and sell it to recycling companies and other buyers. Copper is often taken from power stations, airline towers, railroad tracks, and

water irrigation pumps.

Nichols said that although such theft is hard to combat, increased awareness can help the problem.

"Always be vigilant of any incidents on campus. If you see any movement around campus during the wee hours of the morning, report it immediately. No work is going on at these job sites after dark," said Nichols. "Our community is safer when we all are involved."

The suspect is described as a white male in his 20s, standing between 5 feet 7 inches and 5 feet 9 inches and weighing between 150 and 170 pounds. The suspect profile describes him as having black hair with hanging bangs covering his forehead and a scruffy beard. He was wearing a green pullover fleece without a hood.

medical assistant position

The Dudley Coe Health Center has filled one of the two vacant positions created by recent staff departures.

onya Justus has been hired this fall by the Dudley Coe Health Center to replace Karen Marlin as a physician's assistant.

According to Hayes, Marlin elected to transfer to a different job in order to accommodate personal needs. She will continue to work on a per diem basis as needed in the Health Center.

According to Director of the Health Center and Nurse Practitioner Sandra Hayes, Marlin "paid great attention to detail and did wonderful laboratory work and testing."

A replacement is still needed to fill the gap left behind by former Medical Assistant Judy McMaster, who retired at the end of last year after having worked in her position at the Health Center for four

I am anxious to have Ms. Mc-Master's position filled so we can be at full staffing levels," said Dean of Student Affairs Margaret Hazlett. "The current staff is doing a wonderful job filling the gaps but we need a full-time person in that role given the demand for servic-

Hazlett, who is currently in charge of stipulating contracts for staff members of the Health Center, said that the department has had a large amount of turnover in the past two years, including the loss of former college physician Jeff Benson in January 2007. In the absence of Benson, who was also the director of the department, Hayes was promoted to interim director and became the permanent director this year.

Also as a result of Benson's departure, school administrators decided to return to the old system of having two part-time doctors collaborating throughout the week. This was the system in place when the Health Center first opened 12 years ago.

According to Hazlett, Jeff Maher and Melanie Rand, two local physicians working in Family Health at Parkview Adventist Medical Center, were brought in for a total 20 hours a week (four hours per weekday) when this system was re-instituted last year. Although Maher worked three days a week last year and Rand worked two, Maher will be working four days a week this year and Rand will be working one, due to the demands of her current schedule at Parkview.

Although physician's assistants normally work under full-time doctors, Justus said that her position entails that she must be licensed under the Board of Medine to a supervising doctor who simply oversees her contract.

"Every area is a little bit different. Some states have laws where there has to be a doctor on site. Some states have laws where a doctor has to be within 200 miles or a telephone call away."

> SONYA JUSTUS MIDLEVEL PROVIDER I HEALTH SERVICES

"Every area is a little bit different. Some states have laws where there has to be a doctor on site Some states have laws where a doctor has to be within 200 miles or a telephone call away," said Justus. "[The medical staff at the Health Center] function in seeing patients of our own accord. If there's something we can't handle, we refer the patient to the physician...It's a col-laboration to make sure we're giving the best care possible."

Hazlett stated that the Health Center's main priority this year is to round off the staff. The next priority is to help the department prepare for a move to the Fitness, Health and Wellness Center, which is currently under construction.

According to Hazlett, the final priority of the center is to be undertaken by Counseling Health Clinician Fleur Hopper, who will be leading Peer Health Educators

Peer Health Educators, according to Haves, are a group of 16 students who have divided themselves up into four groups—alcohol aware-ness, safe sex, body image, and nutritious eating—that will each perform presentations throughout the year to spread awareness of these topics to Bowdoin students.

In addition to these initiatives, Hayes has stated that the Health Center is constantly looking for new birth control options. Since the Federal Deficit Reduction Act was signed by President Bush in February 2006, colleges across the country have had a much more difficult time providing their students with access to birth control since the spring of 2006

Bowdoin has felt the sting of the bill and has not been able to offer free birth control since.

We're always looking for pharmacies that might offer new deals," "There have been said Hayes. changes with American Health Association and reproductive clinics. There are prescriptions still available but the pills are not free of charge."

Bowdoin Student Government (BSG) President Sophia Seifert '09 said that BSG is working with the Health Center to improve its communication with students.

"Dudley Coe by and large does a great job, but there are urban myths that develop and deter people from seeking healthcare," said Seifert.

Finance job market tougher for seniors, grads

ORIENT STAFF

As the number of solvent banks seems to decrease on a daily basis, it is no wonder that Bowdoin students looking for finance jobs are prepar-ing for a very scaled-back recruiting

season this year.

Several financial companies have canceled expected on-campus recruiting events, including Morgan Stanley and Deutsche Bank.

The financial sector is certainly restricted this year, but there is still hiring occurring, if on a more limit-ed basis," said Tim Diehl, director of the Career Planning Center (CPC).

Diehl said that students must put in extra effort during this year's job

"I would encourage students to engage early in the process, meet with a career advisor, and develop a strategy for a range of options along a parallel path," he said.

path, he said. Junior Jessica Song, who is hoping for a summer internship in finance, said that planning ahead is key to finding a finance job.

"Most internship activity happens in the spring, so I am just trying to build networks for now," she said. When the companies come back to school in the spring they'll know I had been interested."

Diehl also stressed the importance of networking.

"Networking, the alumni network, family and friends, fellow Bowdoin students, are going to be increasingly important this year," he said.

According to Diehl, aside from the

financial sector, there has so far been no appreciable slowdown in employers wanting to hire Bowdoin students.

He said, however, that because many industries do not begin recruiting until later in the year, "it's too early to tell if other sectors have been affected."

At a Cowen and Company-sponsored investment banking workshop on Monday, Cowen recruiter Chip Rae explained to Bowdoin students why the current market is so alarming for students seeking employment in the financial industry.

'Why is this year so much harder?" ae asked the attendees, contrasting this year's slowdown with the early 2000s, when technology companies led the recession. "Because, basically, the financial institutions themselves are in question."

Senior Jasmine Qu acknowledged the difficulty of getting a job in bank-ing this year, but she pointed out that other financial firms are still hiring.

"It's definitely much harder to get a job this year," she said. "But people are looking at jobs in consulting, investment management, and insurance companies. It just means that we need to work harder.

However, current Bowdoin students are not the only ones affected by the economic slump

A recent Bowdoin graduate who works at a troubled investment bank told the Orient that he is definitely worried about his job security.

"We've only been there a month and a half, two months including training," said the alumnus, who requested anonymity because of his firm's delicate situation. "We're not necessarily very marketable, we don't really have a ton of experience, and all of Wall Street is pretty tight right now-nobody is really doing too

Senior Michael Julian interned at Merrill Lynch the past two summers and was planning on working full time in its private client division after graduation. But after Bank of America acquired Merrill on September 15, Merrill rescinded Julian's informal full-time offer and told him to reapply in the spring.

Julian said that he will work with the CPC and explore his network to find a new job.

"It makes things a little more difficult, puts a little more pressure on me," he added. "That said, it's not impossible. We'll see what happens

orient.bowdoin.edu orient.bowdoin.edu orient.bowdoin.edu

Admissions will not use Facebook to evaluate applicants

STAFF WRITER

Applicants to Bowdoin this fall need not worry: Interim Dean of Admissions Scott Meiklejohn hasn't noticed their latest relationship status change on Facebook.

Others are not so lucky. Kaplan announced last week that one in 10 admissions officers at some of the top schools in the country have been delving a little deeper into applicants' lives than some might expect.

The results were taken from a survey regarding the prevalence of college admissions officers' visits to applicants' pages on Facebook and similar social networking sites. The survey was conducted last summer, polling 320 officers from 500 of the nation's top schools.

Like most schools, Bowdoin has not instituted an official policy regarding admissions officers' use of Facebook. The issue, however, has been a recent agenda item in the Admissions Office.

"When I asked about [the use of Facebook] at the staff meeting, there were shrugs raised all around and absolutely zero interest in people saying, 'Yeah, I think we should do more with Facebook," said Meiklejohn.

Associate Dean of Admissions Anne Springer agreed. She referenced her relative lack of familiarity with Facebook itself, but said that "as long as [officers] conduct themselves professionally and are not releasing any business information, I think it's a private issue."

Springer, who has worked in admissions at Bowdoin for 19 years, mentioned the time constraints that officers face when getting to know their applicants. Facebook, she felt, may not be the most efficient route to

"If everyone on the staff had a Facebook profile, I can't imagine the kind of stuff that would happen. Ninety-nine percent of it would not be useful."

SCOTT MEIKLEJOHN
INTERIM DEAN OF ADMISSIONS

the heart of a student's application.

"You want to be as fair and thor-

"You want to be as fair and thorough as possible with the time that we have," she said.

Meiklejohn and Springer both said that Bowdoin's Admissions Office focuses on more traditional aspects of its applicants rather than seeking out students on Facebook.

"I haven't, and as far as I know, nobody on the staff has either," Springer said.

Meiklejohn mentioned the emphasis Bowdoin puts "see[ing] everyone's application in the most positive
light." In situations where unusual
questions arise, he turns to that student's college counselor rather than
to a networking Web site.

"If everyone on the staff had a Facebook profile, I can't imagine the kind of stuff that would happen," he said. "Ninety-nine percent of it would not be useful."

Senior interviewer Eric Harrison '09 agreed that there "are so many better ways of looking for the wellrounded aspects of a student than their Facebook."

"It's opening such a can of worms, opening up so many other ways of

looking at students," Harrison said.
"I think it's dangerous if schools start looking at [Facebook] pages during any part of the process. It changes the whole game."

But Facebook, which used to require a college e-mail address to register, is now open to everyone, and its membership continues to grow. Senior interviewer Samantha Jessup said that due to this seemingly constant rise in popularity, a policy may perhaps be in order "in the next couple of years."

Harrison noted that it would be difficult to ensure fairness if only certain officers were looking at applicants' profiles.

"Ideally, all these schools would be on the same page about what they can and cannot look at," he said.

Sam Dinning, also a senior interviewer, said that the results of the Kaplan study do not come as a shock.

"The fact that people use any possible way to find out about a candidate doesn't surprise me at all," said

High school senior Alex Hallenback of Waterville, Maine, who is applying to Bowdoin for admission into the Class of 2013, did not seemed fazed by the possibility of having his Facebook taken into consideration.

"Your Facebook is somewhat public and if people want to look at your Facebook I guess they should be able to if they want to," he said. "Students should know that people might be looking at it."

While admissions staffers at Bowdoin may not be using Facebook to scope out potential first-years, student interviewers cannot all say the same. Senior interviewer Patrick Costello mentioned that he and his colleagues have looked for certain applicants' profile pictures after an interview had been completed.

"Absolutely, for the very interesting kids. That stopped early in the summer, though, when we realized that it was really creepy. It was just one of those things." he said

one of those things, he said.
Costello said he made sure never
to look at this information until after he had completed his write-up
of the interview and was therefore
finished with his evaluation of that
student.

But Facebook can work in both directions: Costello said that he got "two or three" friend requests from applicants whom he interviewed over the summer.

"It was really weird. I did not accept. The other senior interviewers and I had a 'little conference' when [this happened] in the first month," he said.

Dinning said there is a "certain line in that relationship which is inappropriate to cross," a conclusion that was echoed by all.

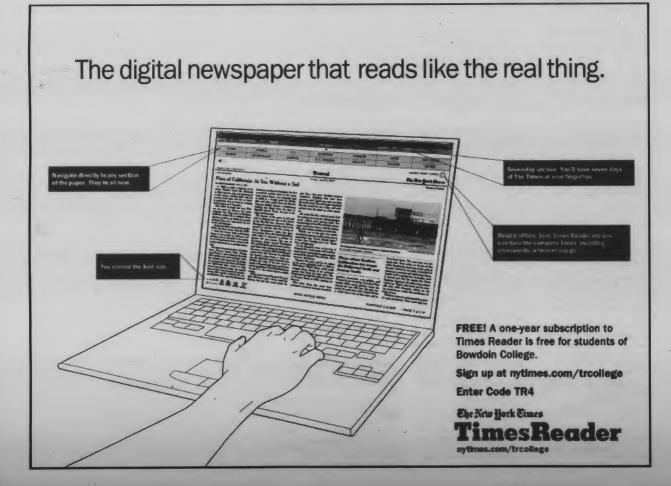

Meiklejohn said that he "doesn't think anyone on the staff has a Web page."

At least two of the associate deans have Facebook profiles that are viewable on varying degrees of privacy settings to anybody in the Bowdoin network.

One thing is very clear: Students should remember that what they post is public.

"Students need to know what to expect," said Dinning.

BSG elects new members

Christian Adams elected 2009 class president, BSG to convene on October 1

BY CATI MITCHELL

Though Bowdoin Student Gov ernment (BSG) will not officially convene until next Wednesday, the College was abuzz with activity as the senior class elected its officer team. The results were made available to the Orient after polls closed at 8:30 p.m.

on Thursday night.
Christian Adams prevailed over Willy Wilder for the presidency of the Class of 2009 with 163 votes. Jeremy Kraushar, with 165 votes, was elected vice president over Michael Julian. In a close race, 123 to 103 votes, Arden Klemmer defeated Spencer Ho for the position of treasurer. The BSG representatives for the senior class, in an uncontested race, are Caroline Burns and Ian Yaffe.

In addition, students also voted for

at-large representatives to BSG. Esther Sosa '11 and Nyle Usmani '12 were uncontested in that race.

In the upcoming week, campaigning and elections for the first-year class council will take place. First-year elec-tions were pushed back a week this year, according to BSG President Sophia Seifert '09, in an "effort to better support the first-year class council."

In the past, Seifert noted, first-year candidates and voters were not as informed as they could be.

"Hopefully we'll end up with a stron-

BSG Official El	ection Results
Class Officers (2009)	
President	Christian Adams: 163 William Wilder: 68
Vice President	Jeremy Krausher: 168 Michael Julien: 63
Treesurer	Arden Klemmer: 123 Spencer Ho: 103
BSG Representatives (2)	Carolina Burns: 194

ger class council and it will lead to a better year for everyone involved," Seifert said. "There's been unbelievable interest from first years. People have been asking smart questions and really trying to see themselves in the roles"

Though BSG has not yet met due to the academic school year starting a week later than usual, the Student Activities Funding Committee (SAFC) has been up and running for three weeks, providing student groups with funds for various activities.

New organizations, however, will have to wait until BSG meets next week in order to begin the chartering process. The committee that approves student organizations will not be formed until after the October 1 meeting.

The enthusiasm of first years aligns well with Seifert's goals for the upcoming year, the primary one of which is working on "a culture of engagement." Seifert noted that last spring, students were heavily engaged in BSG, with over 1000 people voting in the elections and "thinking of ways student government can be a resource to them.

"We're looking to continue that mo-mentum," said Seifert.

SECURITY REPORT: 9/19 to 9/25

Friday, September 19

 An ill student was transported from Chamberlain Hall to Parkview Hospital.

· A security officer found a transient woman living in a sleeping bag in the back lot of Ashby House. There were also indications that the woman may have gained access to Chase Barn by using a fire escape. The Brunswick Police were called to issue a trespass warning and escort

the woman from the property. Saturday, September 20

· Brunswick Police issued a cita tion for Possession of Alcohol by a Minor to a first-year student who was walking on Pine Street carrying a can of beer. A second student who was not in possession was warned for underage consumption of alcohol. Students are reminded not to possess or consume alcohol on public property. The local police strictly enforce this law and minimum fine for this violation is \$200.

· A student called Security to ask for a wellness check for an intoxicated student in Moore Hall. The officer assessed the student's condition and determined that the student did not need medical attention.

• A security officer reported prop-erty damage in Ladd House that had occurred the previous night. Damage was found in the kitchen, dining room, and basement common room. The matter was referred to the Office of Residential Life.

Monday, September 22

A student called Security to check on the well-being of an intox icated student in Appleton Hall. An officer assessed the student's condition and was then monitored by the RA and roommates.

• A student reported the theft of a bicycle from outside of Osher Hall. The bike is silver Marin with a black and red seat. The bike had been left unlocked overnight.

• The fire department responded to fire alarm at Chamberlain Hall. The alarm was triggered when students burned popcorn in a micro wave oven.

· A student was taken to Parkview Hospital to be checked out for ab dominal pains. The student reported being struck by a car on Park Row while riding his bicycle the previous day.

· A hallway and stairwell were obstructed in Ladd House in violation of fire code. The matter was referred to the Office of Residential

Wednesday, September 24

• A Howard Hall student with a general illness was transported to Parkview Hospital.

· Security officers spoke with a local resident about controlling her dogs when walking them on college property.

· Wire, lights, and duct tape around a sprinkler pipe in Quinby House presenting a safety hazard was corrected.

· Brunswick Police recovered a missing college laptop computer on Hennessey Street. The computer had been stolen from a staff member's car in Brunswick

Thursday, September 25

· A female student reported that a man was following her as she entered Smith Union. The man was described as being 25-30 years old with brown hair and a beard. Security officers responded and searched the area and a man fitting the description was spotted on a security camera acting suspiciously. Officers located the man near Banister Hall The man fled the campus in a dark green Ford Explorer. An officer obtained a plate number. The man will soon be identified and issued a criminal trespass order.

The Office of Safety and Security is offering to register your computer in an international database to help deter theft and aid in its recovery if it is stolen. For more information on STOP (Security Tracking of Office Property), go to www.stoptheft. com. Contact Jen Wienckowski at the Security Office, 725-3458, to receive your STOP security plates. Security provides this service at no cost to you

BOWDOIN BRIEFS

Maine Day attracts resident applicants

The Admissions Office welcomed 135 Maine high school juniors and seniors and their families to campu on Monday for Bowdoin's annual Maine Day.

Maine Day is used by the College's Admissions Office to "get Maine stu-dents to think about Bowdoin as a great option for their secondary education," said Admissions Officer Emily Parker, who was very involved in organizing the day.

"Fifty-nine students from Maine

matriculated with the class of 2012. and we'd like to work to keep Maine

students a significant portion of our student body," Parker added.

Upon arrival, students first heard a brief introduction from Dean for Academic Affairs Angus King about the top 10 reasons a Maine student should come to Bowdoin. They then had the option of going on tours, attending classes, or ng in on academic and admissions and financial aid panels

"We like having it during the week so the students can attend classes, but I think that in the future we will try to schedule it on a day when students and their families can visit the Art Museum," said Parker. "In all, though, the day went really smoothly due to the efforts of student volunteers and tour guides."

Demand for chem-free housing splits Coleman Hall

ORIENT STAFF

In addition to Hyde Hall, the bottom two floors of Coleman Hall have also been designated chem-free this year. According to Operations Manager for Residential Life Lisa Rendall, the change is an attempt on the part of the Residential Life Office to accommodate the 18 percent of the class of 2012 that requested chem-free housing for this year, up slightly from 17 percent last year

"Given the low demand for quiet housing and discussions with residents of Moore Hall last year, we did not offer quiet housing again this year." Rendall wrote in an email to the Orient. "We essentially had the same number of requests for chem-free again this year. Coleman Hall was chosen as an additional chem-free location due to its proximity to Hyde Hall."

According to Associate Director of Residential Life Erica Ostermann, the use of additional floors to house chem-free students in conjunction with Hyde has been done in the past and simply depends on the demand for chemfree housing in any given year.

One significant choice that Resi dential Life Office made was to have all of Coleman remain affiliated with MacMillan House, despite the fact that MacMillan is not a chemfree college house like Howell.

'We didn't want to take two fifths of Mac's affiliates away by affiliating them with Howell, because that could reduce attendance to Mac's events," said Ostermann. We have made it clear, however, that the chem-free students in Coleman can choose to become affiliated with Howell if they really want to, and a few students have already done so.'

President of MacMillan House Erin McAuliffe '11, has made a point of ensuring that her house recognizes that chem-free students in Coleman are still "very much Mac affiliates."

"We are not having any fewer non-chem-free events but we are adding more chem-free events," said McAuliffe. She also mentioned that affiliates have spent time cooking dinner in MacMillan's kitchen, watching TV in its common room and attending events such as BBQs and songwriting workshops host ed by the house. McAuliffe noted that the presence of non-chemfree students at Mac events makes the house "confident that the year will go smoothly" in terms of uniting non-chem-free and chem-free students within Coleman.

Coleman first floor Shalmai Rivera '10 said MacMillan and Howell have done an exceptional job including the bottom floors of Coleman in all of their events.

"Howell and Mac have gone out of their way to make sure the chem-free kids in Coleman are comfortable." Rivera said. "I know a few of the kids on my floor have been to both Mac and Howell events, and some of them went to Mac's affiliate-only party at the beginning of the year and felt

Although she agrees that the set-up has run well thus far, McAuliffe recommends that ResLife consider a different solution in the future.

'We are lucky that we have open-minded kids in Coleman who are willing to come to Mac's non-chem-free events and still have a good time, but I think that for the future ResLife might be better suited to either do away with chem-free living completeor to keep it all in one dorm," Mc Auliffe said

When asked about the implications of offering chem-free housing for first years, Ostermann responded that the College understands the statement it is making by providing the choice. According to Ostermann, Bowdoin has

VIEW FROM THE BOTTOM: Coleman Hall's basement and first floor are chem-free this year, a decision made by Residential Life to accommodate a 1 percent increase in demand for chem-free housing for the Class of 2012.

worked toward achieving the balance between safety and upholding college policy, a balance to which "the student body at large has been very responsive and responsible," in trying to uphold.

"We're not going to stick our head in the sand and pretend that there's not drinking on campus, even among the freshman," said Ostermann. "Instead, the administration is being very honest about the situation and giving as much support as possible to those stu-dents who really hope to adhere to chem-free lifestyle.

Coleman Head Proctor Tomm Wilcox '09 said he made a point of keeping the alcohol policy the same throughout the dorm so as not to ostracize the bottom two floors simply because they are chem-free."

Wilcox said the dorm-wide policy is that if alcohol is seen in the hallways, it will be poured out.

"We mostly draw a distinction within the individual rooms," Wilcox said. "If we find alcohol in a room on the chem-free floor we're going to be much stricter because their roommate contracts specifically say that there will be no alcohol in the living spaces, whereas the contracts do not specify that for the top three floors.

President of Howell House Rebecca Schouvieller '10 said that she felt the division within Coleman would be difficult for chemfree students living in a dorm with non-chem-free students.

"Chem-free dorms tend to form a very welcoming and close community, which was the best part for me about living in West my freshman year," Schouvieller said. "I don't know if that can be replicated in Coleman, because I feel like there is probably some discomfort on both sides

Second floor Coleman resident Jade Hopkins has not noticed any discomfort due to the set-up.

"My roommates hang out with a lot of kids on the first floor, so they're in our room a lot," Hopkins. "I don't think the chemfree set-up is affecting whether or not kids on lowers floors socialize with upper floors?

Third floor Coleman resident Hannah Cyrus said her room decided to be chem-free this year even though she and her roommates did not originally indicate that they desired chem-

We all agreed that we wanted our room to be chem-free, and it's been great so far," Cyrus said. "I think the only thing keeping up-per and lower floors from hanging ut is that they're so far apart!

Fit to be tied: Accessorize and make a statement with a classic

DAVID YEE CONTRIBUTOR

forefront of style. In fact, they are linked to a formal sensibility that allows them only to be worn with a suit jacket, to an interview, or a handful of other times per year. They're associated with the anxiety of formal events, made worse by the presence of a rope-like object located suffocatingly close to

It's no wonder the tie seems to be shrinking in societal significance. Ties are decreasingly used in the workplace while the era of business-casual is in. Even in the Career Planning Center's handout on interview and workplace fash-ion standards, the tie only appears under the "Conservative Formal"

umns encourage other aspects of formal dress-no jeans, minimal jewelry, suit jacket, overcoat-but next to the button-up shirt, it speci-fies "open collar," leaving the tie a casualty of modern casualness.

When I was a kid, I remembe watching an episode of "Rugrats" on Nickelodeon that explained why grown-ups wear ties. Tommy, the infant main character for those who don't remember, says that adults use ties to attach their heads to their necks; without ties, grown-ups' heads would simply roll away. He and his rugrat friends spend the rest of the episode trying to prove or disprove this the-ory—a child's contemplation of the significance of ties. Although I knew full well as a child that ties don't serve to keep heads attached to bodies, I was sure that ties were important. The significance of the tie was something I became consporting an important tie for his important job.

Though it faces extinction in the workplace, the tie can still be as important in modern dress as it has in the past. The tie needs to redefine its role in style. It needs to stake a claim in other realms of dress, and must do so for both males and females.

Formal ties are traditionally found in more muted colors and patterns that blend into the greater whole, but ties can be used as a mode of expression as well. What do a plain white collared shirt and slacks say as far as expression? Not much. Add a multi-colored, candy-striped tie? That stands out and says something. What do brightly colored pants with a paisbrighty cotore pants with a pass-ley shirt say about a person? This combination probably indicates a loud personality, while a calm, muted tie can help to balance an outfit and ground both the en-

Even slight deviation from the accepted use of ties can change the formal message entirely. Case in point: Early in the careers of Avril Lavigne and Britney Spears, both sported traditional schoolgirl outfits, but by loosening the tie and opening the collar, they conveyed an entirely different attitude (not that I'm advocating dressing like Avril Lavigne or Britney Spears).

The tie is not limited to its traditional purpose as an accessory to be wrapped around someone's neck. For women, the silk ribbon belt has been a popular trend. A few years ago, the idea became profitable enough for two Bow-doin students to produce these rib-bon belts in their dorm rooms and sell them in Smith Union. Really though, what more is a ribbon belt than a tie worn around the waist? Don't worry about the knot: Tie it in a bow, a square knot, or what-ever gets you the look you want

to achieve. What does the tie, the pattern on the tie, and the knot say about your style and how you do things? That's for you to decide.

There's not been a better time to get into wearing a tie. You can usually find ties at department or stores like J.Crew, Banana Republic, and Express, and because they are declining in popularity, ties with hugely different varieties of patterns, colors, and materials are also appearing in Goodwill, Salvation Army, and secondhand stores. Even all these ties are available on the cheap. You don't have to be as fearful about buying that crazy pattern that you may only wear three times in your lifetime. My "Peanuts" tie reflects as much about me as my pink paisley tie does.

So for this week I propose this: Try to wear a tie once a week. In the interest of pandering to the fine tradition of alliteration, let's make it Tie Tuesday.

ALUM PROFILE

Bart D'Alauro '95 cultivates love of film into DVD Explosion

ORIENT STAFF

Netflix CEO Reed Hastings '85 is not the only Bowdoin alumnus who has made a career in the DVD business. A little closer to campus is Bart D'Alauro '95, the co-owner of Bart & Greg's DVD Explosion in the Tontine Mall in downtown Brunswick.

Working alongside friend and business partner Greg Morris, D'Alauro has been running Bart & Greg's since the fall of 2002.

D'Alauro was an English major during his time at Bowdoin. Though Film Studies was a fledgling department at the College at this time, D'Alauro was able to take a number of courses on film with Associate Professor of Film Studies Tricia Welsch.

"I also was able to do an independent study on film noir with [Associate Professor of English] Ann Kibbie," he said. "Through that project I discovered all sorts of interesting and unusual things. My interest in film really sparked at Bowdoin."

Outside his coursework D'Alauro fed his film interest through participation in the Bowdoin Film Society and frequent trips to an independent video store in Brunswick: Matt & Dave's Video Adventure.

In addition to his passion for media arts and production, D' Alauro also has a deep interest in music. D'Alauro worked as station manager for Bowdoin's radio station, WBOR 91.1 FM, during his junior year, It was through WBOR that D'Alauro first met Morris, a local Brunswick resident.

"Greg was a fan of one of the shows I did. He would call in often and we had him on air as a guest a few times," said D'Alauro.

After graduating from Bowdoin in 1995, D'Alauro decided to stay in Brunswick. He worked alongside Morris at Matt & Dave's Video Adventure until 1997, when he moved to New York City to pursue a career in film production. However, after several years in New York, D'Alauro grew tired of the production industry.

production industry.
"I realized I liked watching films more than I liked making films," he said.

In early 2002, Morris contacted D'Alauro with the prospect of opening an independent DVD store in downtown Brunswick. Matt & Daves Video Adventure had closed in 1998, largely due to the opening of a chain rental store, Video Galaxy. As DVDs gained increasing popularity, Morris saw an opening for another independent movie rental business.

"Greg and I realized we could open a DVD rental store in Brunswick without a whole lot of capital," said D'Alauro. "We also knew that this town would welcome us."

In September 2002, Bart & Greg's DVD Explosion opened its doors with a collection of 1,000 DVDs. The new business was an instant success within its first year of business, D'Alauro and Morris expanded their space to include the downstairs level of the Tontine Mall. Since this expansion, Bart & Greg's has continued to grow

in size. The store now boasts over 15,000 DVDs.

An extensive independent and foreign film collection, along with a more personal atmosphere, has helped Bart & Greg's develop a cult following in the Midcoast area. A Topsham resident and regular customer of the store mentioned the store's quirky personality as one of the reasons he keeps coming back. The use of a regular e-mail newsletter and wooden DVD rental tokens helps differentiate Bart & Greg's from the mainstream movie chains like Blockbuster, he said.

Despite the recent proliferation of large movie rental chains, Internet services like Netflix, and downloadable media, Bart & Greg's has enjoyed "pretty steady" growth since its opening six years ago, according to D'Alauro. He says he has seen a spike in sales during the past fiscal year and attributes this jump to the 2007 closing of the nearby Movie Gallery.

Another important factor of the business has been the loyal patron-

age of local community members.
"A store like ours wouldn't work just anywhere. Fortunately for us, Brunswick residents are very inclined to support local businesses," said D'Alauro.

D'Alauro also cited the support of the Bowdoin community as another contributing factor to the store's success.

"About 15 percent of our sales can be attributed to Bowdoin-related people: students, faculty, and staff. The fact that [Brunswick] is a college town helps us a great deal."

CLOSE-UP: Bart D'Alauro '95 said his Bowdoin education encouraged his interest in film.

he said. "There are a number of classes that use movies where the professors will tell their students they can find certain films at Bart & Greg's for their coursework."

In the past, the Bowdoin Film Society also invited D'Alauro and Morris to judge the Bowdoin Film Festival.

"We have a great relationshp with the College," said D'Alauro of his alma mater. "There are certain students I see in here all the time."

Embracing our 'sexploits' and 'sexcapades'

MATTERS BY ILLI IA BOND

It's three weeks into school and things are finally getting underway. We all have our favorite seats in our classes, we know where we're eating dinner and when, and we're getting into the swing of the social aspect of Bowdoin. Before we get too far into our routines, however, I'd like to take a minute to address an idea that seems to permeate college culture. This is the idea that sex and sexual encounters don't mean anything more than the comical stories into which they are distilled the next day during brunch. Along with this, the idea that the mature people in our age group are all relating to sex in the same way. Sure, drunk and/or casual sex is something that happens at Bowdoin, but not everyone's doing it, and regardless of how casual it is, that certainly doesn't have to make it meaningless.

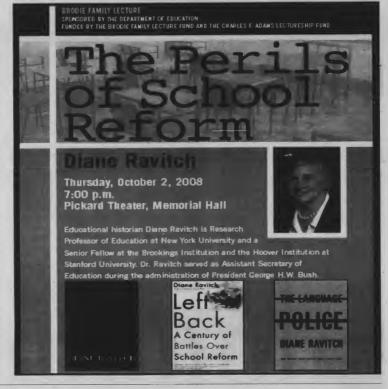

This is not to say that sex is an inherently serious thing. On the contrary, there is a lot to laugh about when you're talking about sex: People walking in, people walking out, unfortunately placed windows, surprising noises, and so much more. But to assert that sex and sexual acts can be mistakes in their entirety is to miss an opportunity for some self-discov-To laugh off every drunk or sober "sexscapade" as just another college extracurricular is to forgo the chance to reflect a little bit.

We are all, regardless of age, gender, orientation, physical ability or anything else, sexual creatures. This does not mean that we're all having sex. It merely means that we all have a relationship with sex that makes up a part of our personality; a "sexual identity," if you will. I might be a woman who loves history, running, and sex with many different partners. I might be a man who loves com puter science and football and believes that sex should be saved for marriage. I might be someone who, two years into Bowdoin, began to realize that I enjoy having Regardless of what this relationship is for you, identifying it and coming to terms with it, as well as allowing it to evolve and change, are important parts of discovering yourself during college.

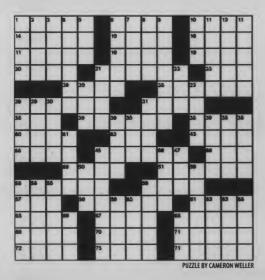

For me, this is what "hooking however you choose to define it, should be about. Yes, sexual activity is, hopefully, really fun, but so is masturbating, watching a movie, hanging out with friends, exercising, etc. When we choose to hook up, we are hopefully making a conscious decision to do so. and one that is not insignificant or irrelevant, just as it is not insignificant when people choose not to hook up. Sexual activity, or choosing to abstain, is a way for us to express an important part of ourselves. When they are reduced to mistakes or merely stories to tell friends, sexual experiments and adventures lose the power to help us learn about ourselves. Laughing at your own sexploits is wonderful, but there's more to be gained by reflecting a bit about how you feel about them. Do you getting drunk and making out? Having sex with people you don't really know? Flirting all night and then going home alone? Being in a serious relationship? Awesome-own it. Don't be afraid to examine who you are sexually and celebrate that as a part of yourself.

Reading the "Confessions" section in an issue of Cosmopolitan magazine is hilarious, but there is pus, than learning how to overcome embarrassment. Sex is about learning what you like, whether it pertains to your physical body, your emotional needs or your relation-ships. These issues, and not merely how awkward it can be when you

ognize and can't get your bra down from the overhead light, are issues I wish to tackle in my column. Because sex matters, whether or not we are always courageous enough to admit that to ourselves and our very best of friends.

ARTS & ENTERTAINMENT

McKee grant recipients given creative license

For two Bowdoin students, when it comes to making art, it's all about the process.

Eleanor West '10 and Tommy Wilcox '09, McKee Summer 2008 Photography Grant recipients, had their projects take unexpected turns as they worked on them this summer. Their projects are being displayed in the fishbowl gallery at the Visual Arts Center consecutively. West's show will be taken down today while Wilcox's show will go

1 424 ESS

their experiences on Monday night

The McKee Grant gave \$1000 to West and Wilcox for their proposals. West worked with Polaroids in triptychs and diptychs.

"I like the matching up of the square of the Polaroid with the rectangular panoramic view of the triptych. It breaks up the panoramic view," West explained. "In some cases, even objects in the photos are split. The format allows each Polaroid to stand alone and also be enhanced by the triptych."

MARGOT D. MILLER, THE BOWDOIN ORIENT

"Polaroids are nostalgic," West said of her choice of medium. They are also being discontinued, so this seemed the opportune mo ment to work with them. As of right now there are no more on the market, so I bought up a bunch with the grant." She has 29 triptychs and two diptychs on display in the VAC

West originally proposed a concentration on landscapes, cityscapes, and suburban-scapes, but ultimately moved in a different direction.

"The exteriors look postcard-y, and while I still like them, they're not hanging up. So I scrapped the exteriors in favor of the interiors," she said. "Once I narrowed it down to the interiors, it was much more cohesive in the final stages."

West endeavored to "give a value to the devalued."

"I wanted to make people look twice at the overlooked, the mundane," she said.

West focused on geometry and places that look untouched for subject matter.

"I gravitated towards that which you don't spend much time in. There is a museum or hotel feel, places you don't spend much time in and that seem to have been the same way forever," explains Eleanor, "Without any context, you can get this feel."

West executed the hanging in a formal portraiture style.

"I paid attention to setting up photos within formal restrictions

MARGOT D. MILLER, THE BOWDOIN ORIENT

LOCAL CELEBRITY: Tommy Wilcox '09 introduced a factor of randomness to his project by allowing his subjects to choose who he would photograph next.

I didn't want them to look like a scrapbook as Polaroids are often used for. I tried to use them in a more formal set-up keeping in mind how an observer would see them," West said.

While West photographed objects and places, Wilcox's project is a portrait survey of Brunswick's "most recognizable." He sought to answer questions about what makes people recognizable and what is recognizable to most people. So that he would remain unbiased throughout the project, Wilcox only picked his

first subject, Bob Morrell of Morrell Lounge and Morrell Gym. Morrell picked the next, and so on. This allowed the project to go in its own

Wilcox's project plays off the profusion of pictures available on the Internet. Part of his proposal explained that he was not fighting this profusion, but creating a foil for it "to return to a time when having a photo taken was a big deal and only famous people were in photo-

POLAROID PROWESS: Eleanor West '10 said she took Polaroids to "give a value to the devalued."

Cotton Estes '07 explores remodeled mills in Eastern Europe

What do Fort Andross and the vacant mills of eastern Europe have in common? Cotton Estes '07 spent the past year finding out.

After receiving a Watson fellowship at the end of her senior year at Bowdoin, Estes traveled to eight eastern European countries to find deserted factories and mills that were in the process of or had been converted for artistic and communal purposes.

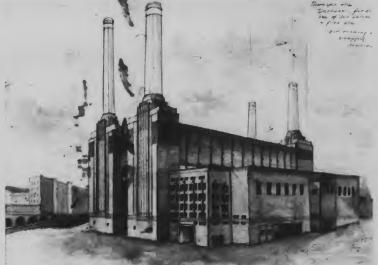

On Saturday, Estes will be back at Bowdoin to present the drawings she created as a result of her travels and research in a show titled, "Only That Endures Which Changes: Adaptive Reuse of Industrial Sites."

Estes, a Rhode Island native, knew of many converted mills in New England, including Fort Andross, which piqued her interest in how other industrializing or industrialized countries were using their abandoned fac-

"Finding a new use for these places is a pertinent question in New England but also a big question in all in dustrializing societies," Estes said. "In Europe especially there's a penchant to recycle space because they've been developing territories for centuries longer than other places.

'I was interested in how communities were conserving spaces to evolve rather than letting them become a static monument to a bygone era," she

Estes traveled to the United King-

RESTORATIVE BEAUTY: Cotton Estes '07 spent a year in eastern Europe researching what different countries have done with their abandoned factories and mills. She drew and photographed each mill she visited, and spoke with community members, architects, and current and former mill employees.

dom, Germany, Poland, Slovenia Croatia, Hungary, Romania and Estonia. In each place, she researched sites, collected their histories and interviewed former and current employees as well as the architects responsible for transforming each place. She drew and photographed each place.

Although Estes carefully planned where she would travel before she left the country, everything changed once

she landed in Europe.

"There are some sites you can only find once you're on the ground," she said. "There was a lot of opening and closing doors," she said. Two European art networks, Trans Europe Halles and Art Factories, d put Estes in touch with local coordinators in each place she went. She also received much of her information through word-of-mouth.

The ideas and conservation tactics of local people especially interested

Estes during her trip.
"Grassroots appropriations of these spaces could inform a more enduring form of reuse," she said.

Istanbul, Turkey, was one area Estes cited where successful conservation has taken place. A large site in the densely populated Roma gypsy area of Kadiköy had been abandoned for 15 years before a three-week-long art festival took place there earlier this

The festival was organized by East Berlin art groups in the community of Kreuzberg, in partnership with the local government in Kadiköy as part of a bigger connection between Berlin and Istanbul.

The festival involved local kids, children's art workshops, and was meant to strengthen the art relation-ship between the two communities,"

The local groups hope to turn the area into a community art center.

In Tallinn, Estonia, a theater group called Von Krahl has overtaken an abandoned mill. Local organizers also have plans to install wind turbines and other forms of green energy in the mill, although the local government is resistant to relinquishing the waterfront property.

Estes looks forward to coming back

to Bowdoin to share her work.

"To finally get to share these ideas is great," she said.

Estes will present her work from 5-7 p.m. on Saturday in the Visual Arts Center. Her art will continue to be in the VAC until October 11.

Muhammad'10 to showcase virtuosic jazz on Saturday

BY AKIVA ZAMCHECK CONTRIBUTOR

On an early morning last spring, a Bowdoin security guard was dispatched to attend to what seemed like a break-in at the Studzinski Recital Hall. Prepared for the worst, the brave officer burst into the Kanbar Auditorium only to find Hassan Muhammad '10 practicing the piano. Mid-note, Hassan quickly realized Security's presence, and knew his night in that wooden palace had come to an end.

"I had never played a more amazing piano in my entire life," Muhammad said. "Ever since the recital hall opened, I would check and see if by some unlikely chance, the auditorium had been left unlocked overnight."

When that dream came true, Hassan rushed to the stage.

"Before I knew it, hours had passed. It was three o'clock in the morning. Then Security abruptly interrupted my musical reverie, and it was time to move on to my homework," he said.

Muhammad is a jazz pianist and composer. Since that memorable night at Studzinski, his playing has graced the recital hall a number of times during concerts at normal hours; together with other students, he has tried to increase the visibility of jazz on campus. He will perform his first show of the year at the Sweet Leaves Tea House in Brunswick on Saturday night with The Ahmad Hassan Muhammad Trio. Drummer Tom Dell Rossi and bassist Duane Edwards, both graduates of the University of Maine at Augusta, round out the trio.

Hassan's musical exploits began when he was a child in Cincinnati, Ohio. He

MARIEL, BEAUDOIN, THE BOWDOIN ORIENT

TICKLING THE IVORIES: Hassan Muhammad '10, an accomplished jazz musician, will play Saturday night with his trio at Sweet Leaves Tea House.

studied music from a young age and attended a performing arts high school. However, his passion for jazz did not grow until his late teens.

"The pianist William Menefield came to play at my high school," Muhammad said. "It was the first time I had heard the piano used in such an expressive way. It was clear to me that this pianist was saying something through jazz piano that—at the time—I had not experienced in classical music."

Since then, Muhammad has focused his energy on performing and composing in jazz idioms. He is especially passionate about the history of jazz. "In order to create a current you have to be in the act of riding one. And in order to know where you can take the music you have to know where it's been," Muhammad said. "I have devoted myself to studying the great jazz pianists. This semester I am taking an independent study with Professor Jim McCalla in which I am studying the development

of the jazz piano style." Hassan has developed a considerable following at Bowdoin.

"Playing with Hassan is always a pleasure. He's not only an incredible musician in his own right, he elevates the musicians around him," percussionist Peter McLaughlin '10 said.

But Muhammad is aware that many students do not see jazz as a pressing modern style. He feels strohgly that students should look a bit deeper into what they seek in entertainment and art.

"Much of today's music lacks substance and musicianship, and it seems that the musicians of high artistic caliber have faded from the popular ear only to be replaced by less thoughtful, famedriven, one-hit wonders," he said.

"There was a time when jazz was at the forefront of the American mind. Swing was the popular music of the past. In the 1950s, bebop musicians made jazz a more sophisticated form of music. They no longer wanted jazz to be entertainment music, but art music," he added

Muhammad situates himself somewhere between the two types of jazz.

"I want to entertain my audience while preserving the high artistic ideals that bebop musicians once set down for jazz. That's a balance I strive to achieve," he said

Muhammad said that he hopes that many students who do not have prior experience with jazz will come to his concert.

"I believe that at its very core, jazz is a conversation. Although an inexperienced listener may not be familiar with some of the conventional terms of this conversation, seasoned musicians—like seasoned speakers—will be able to get through to any audience," he said.

"I wouldn't be surprised if a few people in the audience shout out during the concert Saturday night," he added. "For me, jazz shows are about letting loose and being comfortable. Audience members should leave all formality and rigidity at the door."

"I always enjoy playing with musicians that push me and themselves creatively yet never sacrifice the fun aspect of playing music," Muhammad said. —

The Ahmad Hassan Muhammad Trio will play a variety of original compositions and standards on Saturday night at 8:30 p.m. at the Sweet Leaves Teahouse, 22 Pleasant Street. The concert is free, with a five dollar suggested donation. Muhammad's music can be heard at www.myspace.com/AhmadHassanMuhammad and on his radio show, "Ingenious Jazz," which airs Sunday nights at 10 p.m. WBOR 91.1 FM.

Ancient Egyptian partiers provide recipe for modernized brews

BY MAC EVANS CONTRIBUTOR SIX PACK WITH MAC

An ancient burial chamber at Gordian in central Turkey supposedly houses the tomb of King Midas. Midas was not only a myth, but an actual king of the ancient kingdom of Phrygia around 700 B.C.E His intact tomb seems to have been the location of the final funeral party for its permanent resident, someone neglected to clean the 157 different drinking vessels left behind. Some of these vessels still had some residue on them. The University of Pennsylvania Museum of Archaeology and Anthropology used some new methods of nolecular archaeology and found that the residue was the remnant of an old drink with traces of barley, honey, and grapes; it was seemingly a mixture of beer, mead, and wine Assuming this wasn't a mixed drink gone wrong, Dogfish Head Brewing did the only thing it knew how-· made a beer from it

Midas Touch Golden Elixir is one of Dogfish. Head's year-round limited monthly releases and tries to best replicate the ancient cocktail in a modern beer. The ale is hand-crafted using the basic recipe discovered in the Turkish tomb with the primary ingredients of barley and honey in the mash. Muskrat grapes and saffron are added later in the brewing process. With a golden color (appropriate), it pours with little to no head.

Although distinctly an ale, it con-

MARGOT D. MILLER, THE BOWDOIN ORIENT

A NEW SPIN ON A GOLDEN OLDIE: Dogfish Head's Midas Touch is crafted from an ancient recipe discovered by the University of Pennsylvania.

tains hints of mead and wine which give it a dark, complex flavor. With each sip you can taste a little more of each ingredient, whether it be the honey mead-like characteristics, the grapey white-wine feel, or the 9 percent alcohol-by-volume.

With its limited release times, Midas Touch Golden Elixir is a bit hard to find and a little pricey, but is a surprisingly drinkable beer. It's great for a small gathering or over a Brunswick-Apartment-cooked dinner because even its name makes it feel classy. It also makes a great conversation starter, whether you're an expert in beer, mythology, history, or the guy behind the counter at Uncle Tom's Market.

Two years after the discovery of the ancient drink from Gordian, molecular archaeologists at the University of Pennsylvania Museum found a new recipe. Their first try brought us back 2,700 years, while the new beer brings us back 9,000 years. Chateau Jiahu is the creation of the new efforts, which are much greater this time around. This beer grinds pre-gelatinized rice flakes with barley malt; then, in the kettle, brewers add honey, grapes, hawthorn fruit and chrysanthemum flowers. The liquid is finally combined with Sake yeast and fermented for a month before being transported to other tanks and eventually to bottles.

According to the Dogfish Head Web site, "preserved pottery jars found in the Neolithic village of Jiahu, in Henan province, Northern China, has revealed that a mixed fermented beverage of rice, honey and fruit was being produced that long ago—right around the same time that barley beer and grape wine were beginning to be made in the Middle East!"

With all the hype, how does it taste? The mixture of different flavors makes it taste less like an actual beer and more like a soda or a juice. The wheaty aspect is not as defined and the aftertaste of spices like ginger or the fruits come out, making the beer even sweeter and funkier than Midas Touch. It's good to have in small doses, so I recommend it, along with Midas Touch, for smaller get-togethers. Because of the difficulty of making the beer, it is available on a limited basis but can be found in 750 ml bottles (which is a size I almost always recommend) in certain beer stores.

Both ales really embody Dogfish Head's slogan that they make "off-centered ales for off-centered people," and if you're feeling a little eccentric one weekend, it's worth a trip to Uncle Tom's to pick up some of these brews from long ago.

Krauss and Plant croon duets

BY LOUIS WEEKS COLLIMNIST THE WEEKS REVIEW

This may sting, so let's get it over with We'll do it fast, like a band-aid. Ready, set, go: celebrity duet. While each on vn possesses enough venom to kill a full-grown album, the two together have been known to maim even the artists themselves-just ask Willie Nelson. Duets have become a swan song for popular musicians. Like elephant graveyards, they are now the last stop for artists who are "on their way out," and you can pay your respects at every Starbucks in the world. While the duet seems to be an orange-mocha mistake, there is one upside to the genre: The record industry s, for the first time, saved you money. Like Hannah Montana, duets allow you to buy one disc and hate two artists. So with that extra 10 dollars that the suits have saved you, I recommend that you forget everything I have just said, haul ass to Bull Moose Records, and buy Robert Plant and Allison Krauss's "Rais ing Sand."

Raising Sand" has all of the proverbi al cards stacked against it. The thought of a legendary rock god and a folk prodigy tainting their careers on a duet album was enough to turn me off from the idea entirely. For a while, I was pretty pleased with myself. I had resisted temptation and preserved the memory of two epic musicians by avoiding this record. But soon, I began to feel left out, as if I was on the outside of a hilarious "that's what she said" joke. So I buckled, and went to find out what she said.

From the very beginning of "Rich Woman," the album's first track, you instantly know what "Raising Sand" about. It is a collection of simple blues and folk songs that feel right. There is a sincerity and familiarity to the melodies, a soul to the vocals, and a warmth to the instrumentation that rescues the listener from the cold precision of the digital

world. There is a fluidity and a unity to this album that invites you to sit and listen from the first song to the last.

Most duets fail miserably becau wo singers don't match vocally or stylistically. While the performers may be accomplished in their solo careers, duoperate under the principle that the whole is always greater than the sum of its parts. Robert Plant and Allison Krauss not appear to be a very good pairing. He has a normally raspy, abrasive, and sometimes incomprehensible voice, while hers is rich, clear, and almost too pretty. However, when the two sing together, they sync up perfectly. They sing in a relaxed, mumbling, "droopydog" manner, as if to say, "this is so friggin' easy for us, we can do this with marbles in our mouths." That's just how it sounds, and it's perfect.

When you are Robert Plant or Allison Krauss, intense pressure to constantly show off your virtuosic skills must exist. But this album is surprisingly devoid of any overly technical or difficult vocal lines. Instead, the two show their genius and musicianship in their subtlety. Listening to the album, you feel as if there is a lot that the two are intentionally not saying. This kind of withholding, like a whisper, only draws the listener in closer. A lot of artists cover up their insecurities with more: more synth, more guitar, more effects. To hear an artist keep a song intentionally naked not only adds to the intimacy of the drama, but also shows an incredible amount of confidence.

While all of the tracks on the album are phenomenal, there are a few that are especially memorable. "Killing the Blues" boasts the album's sweetest melody and its best vocal performance, "Gone, Gone, Gone" is a high-energy song with Plant's attitude, a Stones guitar riff, and a Beatles chorus. "Through the Morning, Through the Night" is a Gram Parsons throwback mixed with the poignant folk vocals (folkals) of Krauss.

If you've managed to miss this album, it's time to face the facts: Your friends don't love you. Friends don't let friends not buy good albums; it's that simple.

WROR 91 1 FM DJ OF THE WEEK

Peter McLaughlin '10

Top five desert island albums?

PM: Ask me in five minutes and it will change, but right now Jonny Greenwood's "Bodysong," axis' "Dog's of Great Indifference," D'Angelo's "Voo-doo," Grizzly Bear's "Yellow House," and Paul Jacobs' recording of the Debussy piano preludes would all be heavy in the rotation

Theme song on a Monday morning?

PM: Bjork's "Oooo boy, where did I put my keys?" and "Domestica."

Soundtrack on a Saturday night?

PM: J Dilla featuring Kanye West and Frank'n'Dank's "We F'd Up."

What's the first album you ever bought?

PM: The Space Jam soundtrack on cassette. And I still listen to it.

What's your guilty music pleasure?
PM: Personally, I don't think you should feel guilty about any music you legitimately enjoy. That said, I probably listen to Britney Spears' "Toxic" more than your average jazz DJ.

What's the best live show you've ever seen?

PM: It's a 7-way tie between Sigur Ros at Bonnaroo '08, Deerhoof at Space in Portland, Ornett Coleman at Bonnaroo '07, Radiohead last summer, Tyft at the Lily Pad in Cambridge, The Bad Plus at the Regattabar in '04, and the Roots at Bates my freshman year.

If you were the dictator of a small country, what would your national anthem be?

"Hello New World," by Clipse featuring

If you were going into battle, what song would be blasting on your iPod?

PM: Meshuggah's "New Millenium Christ."

Artist/band you banked on making it big and then

PM: The Abraham Lincoln Brigade. They could've been the next free jazz/avant-garde rock superstars! Ok, nevermind... just listen to my show.

"Jazz is a Spirit" with Peter airs Fridays from 3-4:30 p.m. on WBOR 91.1 FM or www.wbor.org.

Writer-in-residence weaves narratives in 'House'

RY FRANCES MILLIKEN COLUMNIST

NOOK

Margot Livesey's latest work of fiction, "The House on Fortune Street," is comprised of four sections marked with graceful titles that only hint at the poignant nature of the scenes they conta

Each is concerned with one of the four primary characters whom Livesey skillfully conveys through the use of both first and third person voices

Each section unabashedly constructs the landscape of the characters' lives. Livesey crafts their interiors and demonstrates how each person's complexities, private or otherwise, have a concentric effect on their surroundings and the people they love or are bound to.

It is appropriate to note, before div ing into the difficult lives of her characters, that Livesey is Bowdoin's John F. and Dorothy H. Magee Writer-in-Residence. Livesey, who is Scottish, went to university in England. "The House on Fortune Street" is located on the British Isles so students can only speculate as to whether the winters of Maine-gave her bound solitude she needed to write her strong novel.

"The House on Fortune Street" can seen as a novel that pivots on a central character, Dara. She is the daughter

of Cameron, to whom the second section is dedicated, and the good friend of Abigail. Sean, who is living with Abigail upstairs from Dara, is the one to discover the result of Dara's unhappiness.

Each of these people are given space for their interiors in Livesey's novel. She makes the isolation of self-hood candidly clear. Each person is a labyrinth teerning with his or her own concerns. The characters' pasts and presents affect those they are connected to in ways that are largely, but not entirely, beyond their control

Sean is the first character the reader is introduced to, and his introduction sets a dark stage. Sean is struggling with his work as a scholar; he is confronted with a block in his progress while Abigail succeeds at theater. Sean left his marriage for his romance with Abigail but finds himself distanced from her This gap is compounded by a letter that suggests she is having an affair.

Cameron, who tells his story in the first person, pulls the reader backward into Dara's childhood. He has a complicated fascination with Ingrid, his daughter's friend. Cameron takes beautiful photos of the child. His absorption has distinct Humbert Humbert under-tones, but he is depicted with sympathy. He is an almost harmless, ordinary man. He never technically does anything untoward, yet his interests dissolve his marriage, and his excision from his daughter's life has a weighty impact.

Dara, a tender character, bruises easily. She enters into a love affair with a married man while trying to find a niche of warmth for herself.

While such entanglements often have predictably tragic results, Abigail models a success story of rearranged affections and Dara tries to imitate her friend's success. The two girls draw together at university, but the entirety of their friendship is imbalanced: Dara is loving while Abigail is ambitious and self-interested. I found Abigail to be the least sympathetic character. She wraps herself more tightly in her desires at the mo her most.

Livesey makes clear the extent to which each of her characters is flawed. None of them seem able to reach beyond themselves, but Abigail's betrayal feels the most callous.

Livesey has a strong grip on our ef-fects on one another. Her illustration of a parent's impact on his or her child recalls the sentiment of Philip Larkin's poem "This Be the Verse": "They f-ck you up, your mum and dad. / They may not mean to, but they do." Livesey does not echo Larkin's dismissive tone, but she does excavate the rocky landscape of familial relationships and probes the

accountability of friendship.

Livesy returns to Bowdoin on Monday to read. The event will be held in Lancaster Lounge, Moulton Union, at

Film initiative opens eyes

BY RACHEL GOLDMAN

The borders of Brunswick will broaden this Wednesday with the kick-off of the Global Lens Series. This collection of international films is the product of the Global Film Initiative (GFI)'s annual effort to help produce movies made in developing countries and to distribute them to Western audiences.

For the second year in a row, Frontier Cafe and Cinema is hosting the Global Lens Series and showing 10 of the best films in cinema from around the, world. The films come from Argentina, China, Croatia, India, Indonesia, Iran, Lebanon, the Philippines and South Africa.

Although this is only the second year that Frontier has shown the Global Lens Series, it is the fifth year that the GFI has put on the event. Due to limited funding, the production of these films is often difficult, and part of the GFI's mission is to develop grants to bring the films to post-production. Though the films are often of lower production quality, the GFI is able to boost these projects financially and help appeal to a broader audience. The Initiative works in several ways to bring these films to an audience that is outside the host country level of dispersion that would be unattainable otherwise.

"These stories are all pertinent to our lives. In many ways, without projects like the Global Film Initiative, the western audience is deprived," founder of Frontier Michael Gilroy said.

The mission of the Global Film

Initiative also echoes that of Frontier Cafe.

"We are continuously trying to bring stories to the local community," Gilroy said. "And these are particularly important because they are the type of films that you'll never see in the commercial theaters."

"Silroy said opportunities like the "shared experience of seeing films like this in a theatre," are increasingly vital. "Especially when there are social and political components, it is important for an entire community to be involved," he added.

This year, the Global Lens 2008 Series will be a particularly formative experience for the Bowdoin and Brunswick communities. With the series, Gilroy is incorporating an educational component by involving Brunswick High School. He will work with students once a month to heighten accessibility and awareness about the films and the issues they explore.

"We're psyched to host these films," Gilroy said. "What's really amazing is their realness. It's great storytelling, even though it's not Scorsese. You know, it's not Hollywood, it's a story told by someone in their host country. It's real."

The schedule of Global Lens films is available on the Frontier website, www.explorefrontier.com.

The next film in the series is the Croatian film "All for Free," which begins Wednesday, October 8. Films will be shown on Wednesdays at both 5 and 7 p.m. Tickets are \$7 for the Brunswick community and \$6 with a Bowdoin ID. A package of tickets for the entire series is also available for \$45.

Wilson exhibit 'disconcerting'

BY ERIN McAULIFFE

While bright fall sunshine warmly lights the exterior of the Walker Art Building, a more sinister atmosphere grabs hold inside. The new media exhibit, "Errant Behaviors," by Chicagobased artist Anne Wilson, is a macabre personification of those forgotten bits of fabric at the bottom of a sewing kit.

Set to haunting sounds reminiscent of creaking wood and microphone feedback, Wilson uses stop-motion animation to give a haunting personality to otherwise mundane objects. The two screens that make up this exhibit loop through a myriad of interesting yet absurd motions. Wilson's main subjects are small pins, bits of lace, and black thread that are all choreographed to interact with one another in a way that reflects Wilson's dark sense of humor Cultish in their actions, these small objects are a messy meditation on Gothic themes. The stark lighting of the media reel highlights the intensity of the move ments and the jerky awkwardness that Wilson employs.

"It's very interesting. I keep viewing it in terms of human motion despite the fact that they are inanimate objects. It's very disconcerting," a museum patron

In one scene, an unraveling thread takes on the noise of a piece of wood straining under immense weight before it snaps. In another, thread is wound tightly around pins reaching out toward one another in a grotesque, grasping manner. Wilson continually comes back to the image of bits of tangled lace converging on one another in a seemingly random tower of black shapes. In the most disturbing image, hundreds of pins gather together at the center of the

screen in a teeming, pulsating mass that reminds the viewer of a hellish pin cushion. Many images also imitate scenes found in nature; one in particular fakes on the shape of a teeming jungle.

On her Web site, www.annewilsonartist.com, Wilson describes her work as "the props of both domestic culture and larger social systems. I join together the points where these systems overlap, and where issues of sexuality and decorum, vitality and death construct meaningful relationships, and find release."

A world-renowned media artist, Wilson has tenured exhibits at the Metropolitan Museum of Art, the Art Institute of Chicago and the 21st Century Muse_ um of Contemporary Art in Kanazawa, Japan. In addition to the sewing scraps in "Behaviors," Wilson also uses hair as a medium. In one of her most abstract' pieces, rotating human participants wound neon green thread through a weaving warp in a downtown Chicago gallery.

The Media Gallery, a unique portion of the Walker Art Museum, has hosted many modern artists and is highly regarded among museum staff.

"Media art has been so dependent on the technological innovations of the 20th century. It is really a very current genre and offers our visitors opportunities to explore the themes and concepts put forth by our artists in very interactive and relevant ways," Curatorial Assistant Kacy Karlan said.

"Media installations introduce some contemporary punch to the museum programming," she added

Wilson's work is an example of technology-ridden art, but one that also invokes thought and emotion. "Errant Behaviors" will be on display in the Media Gallery in the Walker Art Museum until January 18, 2009.

RECIPIENTS

wilcox's initial vision for his project changed throughout its execu-

"It went to the same place, but not in the same way. The idea was circuitous. I wasn't at all upset that it didn't get there sooner. It wasn't my project; I was just facilitating it," Wilcox said.

"I think that what makes you famous is when people that you don't know, know of you," Wilcox said. "I've always been interested in what makes people celebrities, the things that make someone memorable or recognizable. I originally was calling these recognizable local men and women 'celebrities,' which people found confusing. It's a redefining of 'celebrity."

Wilcox wanted a larger-thanlife feel for these faces and worked with a four-by-five-foot negative to print four-by-five photographs.

"These are the largest I've ever printed," Wilcox said. "It's almost like having another person in the house. It's pretty intimidating."

"I wanted to foster a campus and town connection," Wilcox said about his motivation for doing this project. The volunteer Brunswick celebrities were between the ages of 45 and 85 and from various socioeconomic backgrounds. Wilcox spent about 10 minutes with each person, taking four photos and paring those to two.

"In terms of getting to know the people, really all I have is a face. But that's representative of how a lot of other Brunswick residents view them: just a face," Wilcox said.

Wilcox and West will speak about their art at 7 p.m. on Monday, September 29, in the Beam classroom of the VAC.

SPORTS

in weekend tourney

The Bowdoin College Men's Golf earn secured the runner-up position behind Husson College last weekend after solid play on the links. The Bears battled six other Maine schools in the State tour nt on Friday morning at Natanis Golf Chub. Coming off of hot seasons last year, Captain Jeff Cutter '09 and Ryan Blossom '10 finished with All-State honors Cutter carded a 77-76 while Blossom

Two days later, Bowdoin traveled to Waterville to play in the Colby classic. Every six holes featured a different scoring format. At holes 1-6, scoring was decided by "best ball" where officials counted only the teams' best score at each hole. The next six holes featured a "scramble" in which pairs of golfers would shoot every stroke from the best spot among their team's previous shot. The final phase of the tournament involved "alternate shot" scoring where each pair took turns shooting the ball.

Bowdoin, Turner Kufe '11 and Max Bridges '11 carded a modified score of 80, Kevin Smith '11 and James Yoo '09 shot a 76, and Blossom and Cutter scored a 71. Though the team did not capture the tournament title shooting a 227, they beat CBB rivals Bates (229) and Colby (242).

Last Wednesday, Bowdoin faced off at the UMF Invitational at the Belgrade Lakes Golf Club, where they finished third overall (338) out of 11 teams. Individually, Cutter carded a 77, which was good enough for a third-place tie. On the September 12 and 13, the Bears hosted

posted a fourth-place finish out of 14 schools. Blossom finished 10th individually, scoring 77-78, for a two-day total score of 155. Kufe secured a 12th-place finish with a 84-74, 158, while Cutter and Yoo each finished one stroke behind.

Overall, the team feels happy with tits performance through the first four tour-

"So far, our team has been playing pretty well," Cutter said. "We've had several good scores in most of our tournaments that have left us in good posi-

However, there is still room for im provement.

"What we're working on now is consistency down the line," Cutter said. "We could easily turn those third and fourth place finishes into first-place honors if we can all come together and put in our best rounds on the day of the tournament. Right now, that is what we're trying to improve on, bringing our best performance for the weekends."

This year, 11 sophomores made the hich gives Bowdoin more to work with and forces everyone to be on

This year we have 11 sophomores which translates into a great deal of depth and competition for our No. 4 and No. 5 spots," Cutter said. "The increased team size puts a lot more pressure on the players trying to make the tournament cut. This I think will definitely help us down the line and come NESCACs.

The team will travel down to Middlebury to play in the NESCAC tournament, where tee-off time is still to be

Golf takes 2nd place | Sullivan '11 wins Middlebury Invite

STAFF WRITER

All-American Stephen Sullivan '11 continued to shine this past weekend, winning the Middlebury Invitational. Sullivan defeated players from Vassar, Colby, Williams, and Bates, ultimately overpowering Ben Stein of Bates 6-4, 6-2 to clinch

"I was thrilled to win this weekend because it gives me great confidence going into ITA's, which is the most important tournament of the fall," Sullivan said. "I was glad to play Ben Stein and Andy Peters in the later rounds because it gave me a chance to see some of the better players in the NESCAC that I hadn't played

"The highlight of the weekend was Stephen Sullivan winning his second straight A-Flight singles invitational," Andrew Won '12 said. "Now Stephen is the sure favorite for this weekend's ITA."

Won also proved strong, placing as runner-up in D-Flight singles. Although Won was encouraged by performance, the experience at Middlebury has given him more motivation.

"I was ecstatic to have gotten that far, but I would honestly have to say that getting to the finals was an overall bittersweet experience for me," Won said. "Although second place is an accomplishment in itself, I realized last weekend that I needed to work even harder on my game."

Watching players like our very own ace Stephen Sullivan in competition really humbled me," Won added. "I want to compete at that level and be a reliable player for my

Overall, the team performed well on the court.

"The team definitely showed why we were NESCAC champions last year with our solid play," Won said. All of the singles matches were close, and the losses ended in third-set su perbreakers.

"In singles, I wouldn't say there were any disappointments this weekend," Sullivan added. "We had a couple people in the finals and some

Rugby tackles Mules

BY CHARLOTTE RYAN

On Saturday the Polar Bears were able to solidly defeat rivals Colby on their home turf by an astounding score of 34-0.

The girls dominated from the beginning, and after the first half the score was 22-0 in the Bears' favor.

Becky Stevens'11 scored two tries and two conversions in the first half along with Alivia Moore '09, Hannah Wad-sworth '11, Anna Nicole '11, and Maria Koenigs '09, who each scored a try.

"Alivia [Moore] ran fantastic lines and angles, made offensive breaks through gaps in the defense, and linked up well with her team," Head Coach MaryBeth Mathews said.

The first three in the back line, Koenigs, Moore, and Stevens were instru ntal in setting up the team's defensive

and offensive plays.

"They launched offensive attacks with good decisions and execution and played crushing defense with wonderful tackles," Mathews said.

Mathews said Erica Camarena '10 played flanker and loose forward and did a good job covering the whole field

d impacting all the plays.

The girls slowed down a little bit in the second half.

"We got tired, but still played offensively, scored, and most importantly didn't let Colby score," Stevens said. Mathews said that the whole team

had to come together for the last 20 minutes and continue to fight.

"They used the clock knowing we didn't need to score anymore. They didn't rush things, they deliberately pro-tected the ball and controlled the tempo of the game," Mathews said

As a rookie to the team and sport, Nylea Bivins '12 started and played her

first full A-side game as a prop.
"Nylea is such a great tackler, really good at rucking, and is so willing to

any good at rucking, and is so willing to learn the game," Stevens said.

The B-side team, comprised entirely of first years, played a shortened game and won 19-0. The girls got significant playing time and Mathews said they played well as new players to the sport.

"Former basketball, volleyball, and

soccer players do really well at rugby,"

The rugby team is scheduled to play against University of Maine-Farming-

ton on Saturday on its home field.
"It should be better competition," Stevens said. "I just hope we keep improving like we have since the Beantown

Mathews' goal is to get more players experienced and "play together, trust each other, and be more vocal," she

Sailing struggles in weekend regattas

Despite shifty conditions, the Bowdoin A-division team of Viktor Bolmgren '11 and Coco Sprague 11 finished 10th out of 18 at the Hatch Brown Trophy Intersec-

The performance by Sprague and Bolmgren at their regatta, held at MIT, was the highlight of the weekend, during which Bowdoin Sailing competed in four different regattas, taking place in New Hampshire, Vermont, and Massa-

Overall, the combined divisions at the Hatch Brown Trophy came in 18th out of 20 at the event.

The women's team of Doria Cole '09, Erin Taylor '09, Charlotte Williams '10, and Laura Heyl '10 spent the weekend at Dartmouth competing in the Mrs. Hurst Bowl.

The Mrs. Hurst Bowl hosted 18 of the top teams around the country, according to Head Coach

The women placed 12th out of 18, finishing fewer than 10 points shy of the top 10 teams.

The women's team this fall has the potential to become nationally ranked very soon," Pizzo said.

A third co-ed team of Bowdoin sailors competed in FIs at the Lake Champlain Open hosted by the University of Vermont, where they fought through southerly breezes and choppy conditions to a 13th place finish in a fleet of 15 teams.

The team at Lake Champlain struggled a bit in the breeze and but was able to improve throughout the regatta," said Piz-

Bowdoin also sent a group of

first years to a freshman symposium at Tufts University.

The two-day conference was designed to introduce first years to the world of collegiate sailing.

"Tufts was really interesting be-cause we were sailing with people that we will be competing with for the next four years, and we got to see how some of the other schools' first years looked," said skipper Katherine McNeil '12.

"At the symposium, the longtime Tufts coach, Ken Legler, offered valuable speed and boat handling tips for all the different collegiate dinghies," said Pizzo. "Our firstyear squad was able to gain a great deal of experience from this week-

This weekend, the sailing team will compete at the Loder Trophy at UNH and the Hood Trophy at

McLain'11 rows to silver at kayaking nationals

When Alex McLain '11 competed in a national sea kayaking competition in San Francisco last weekend, she was the only female paddler who was not an Olympian.

She came home with a silver medal. McLain, who finished the 17-mile course in two hours and 47 minutes, was out-paddled only by Nikki Mocke of South Africa, a recent competitor at the Beijing Olympics. McLain said that until she crossed the finish line, she had no idea that she had placed in the medal

"After 17 miles you are so spaced she said. "Someone yelled to me right as I was crossing the finish line, and I was just so ecstatic."

The silver medalist's introduction to kayaking came from her parents, who were both serious canoe paddlers. "I started because both my parents have been huge competitive paddlers," she "They always wanted my brother and [me] to paddle when we were younger, but I kind of hated it."

A few years ago, however, McLain changed her mind and began training seriously. "When I turned about 15, I decided I really wanted to start racing, she said. "I got third at this little recre ational race, but it just got me fired up."

Most of the time, McLain paddles a

boat dubbed the "Surfski," which got its name from the way it moves through water when a kayaker is paddling with the waves. "You plow through the waves on the way out, but as soon as you turn around, you can just surf the w

In her race last weekend, McLain said it took her about an hour and 50 minutes to paddle out into the bay, but only about 50 minutes to return to shore after she had turned around. The athlete credits her strength in the sport to the rough-water training regime that she and her father, who is also her coach, have developed. Though West Coast paddling conditions are rougher than East Coast conditions, McLain, the only female East Coast paddler, in the competition, said she was well-pre-pared for the race last weekend. "My dad always makes me train in really tough conditions," she said. "You get out in the ocean swells in Maine, and it's really rough

Training in rough conditions pre-pares paddlers for waves that may try to knock them out of their boats.

boats more than once during Nationals, McLain said that the balance she learned from training kept her in her boat for the duration of the race. She added that the already difficult course was made even harder by race officials.

San Francisco Bay has some of the arshest conditions they can find," said McLain. "They normally try to start a race before the winds pick up, but this is the first time I've ever had them postpone a race for a few hours because they wanted winds to get rougher."

The tactic worked. While conditions in the protected part of the bay were manageable, both waves and wind picked up intensely around five miles "Truthfully, these were the toughest conditions I've ever seen," said McLain. You just get these huge swells until you get back into the bay."

McLain said that she entered the race thinking that it would provide her some good racing experience, and did not expect to compete as strongly as she did. Everyone had an awesome start, and I was still kind of getting used to the fact that I was at Nationals," she said. "It's like, Golden Gate Bridge right there."

"I had a terrible start which is very unlike me," she said. Though she was at the rear of the pack at the start, she was determined to stay mentally focused.

It paid off. When McLain reached the rougher waters in the bay, she began to fly by other paddlers. "As soon we went under the bridge for the first time, the waves just got out of control," she said. "I saw people falling out right and left."

Though paddlers who fall out of their sea kayaks are able to climb back in, McLain's rough water experience helped her remain in her boat and paddle toward the front of the pack. When she finished the women's race in second, McLain was more than half an hour ahead of the third place female finisher. In addition to being the only female paddler who had not competed in the Olympics, McLain said she was also the youngest competitor. Does she want to compete in a future Olympics?

"It's a huge shift," she said. "I'll really have to stop doing the ocean thing and get onto more rivers and flatwater, but

McLain said that when people find out that she is the second fastest female paddler in the nation, many ask her if she will attend the 2012 Olympics in London. "That's totally my top dream,"

EYES ON THE PRIZE: Junior forward Shavonne Lord races a Huskie player to the ball in the Bears' 2-0 win over University of Southern Maine.

Field hockey holds strong with 2 wins

BY KATHERINE POKRASS CONTRIBUTOR

Playing on a grass field notorifor unpredictable bounces, and a number of players sidelined with injuries, all the conditions seem aligned for a spoiler for the Bowdoin Field Hockey Team.

was certain that the team ould have to bring a focused and disciplined game plan to the University of Southern Maine (USM) Tuesday afternoon.

While there was a smell of upset in the air. Madeleine McOueeney '09 quickly calmed any nerves when she slammed a loose ball past Huskies goalkeeper Alison Hill at 10:45 into the game to give Bowdoin the advantage.

Jessie Small '11 added some insurance to the Polar Bear lead with five minutes remaining in the half by netting her first goal of the sea-

Small fought through traffic to gain control of a rebound and was then able to guide it into the back of the cage for Bowdoin's final tally of the afternoon

Even though the scoring was limited to the first half, Bowdoin dominated for the entire 70 min-

The Polar Bears offense peppered the Huskies with 28 shots and earned 19 corners, while the Bowdoin defense was solid and held USM at zero in both categories.

"I think the game was a true testament to our team because we were still able to play to our potential despite the injuries and illnesses," Michaela Calnan '11 said.

Last Saturday afternoon, the multi-point performance of senior captain Julia King (one goal, one assist) helped propel the field hockey team past the Williams College Ephs.

The 3-0 victory brought the Bears to 3-0 in NESCAC play.

The first Bowdoin goal came four minutes into the contest off the stick of senior captain Lindsay McNamara when she buried a feed from center midfielder King

Goaltender Katrina Tulla and the rest of the Ephs were able to

quiet the tenacious Polar Bear offense for the remainder of the first half, though eight more shots were launched at the Williams goalie.

Coming out strong, Bowdoin's McQueeney got it started for the Polar Bears in the second half when she redirected the ball off a shot from the top of the circle into the back of the cage at 29:03.

King landed the final blow of the Bowdoin attack at 19:52 when she capitalized on the set-up from Ingrid Oelschlager '11.

"We played against Williams with good vision and effective comm nication to generate many valuable scoring opportunities," said Tamlyn Frederick '09.

The Polar Bears return to their home turf this Saturday to face off against the Lord Jeffs of Amherst College.

"We are obviously happy with the first half of our regular season, but Amherst will be a very strong opponent," Head Coach Nicky Pearson said. "We won in overtime last year and I expect them to be as talented this year.

Women's soccer rebounds after loss to Ephs

BY AILEEN TSCHIDERER

The women's soccer team currently holds a 2-1-2 record after suffering an upsetting 4-0 loss to Williams last Saturday before redeeming itself in a 3-0 victory over the University of Southern Maine

on Wednesday.

The Polar Bears took no time at all to settle into a rhythm against Southern Maine, with a goal from Rebecca Silva '11 within the first 90 seconds of the game that started off the 3-0 domination of the Hus-

Silva continued on the offensive charge when, 10 minutes later, she ed a fantastic corner kick that was headed in by defender Tiernan Cutler '11. The third goal came from Dana Riker '10, whose corner threaded its way through a mess of players in front of the goal into the back of the net.

The Polar Bears outshot the Huskies 24-4 and Kat Flaherty '11, who played keeper for the second half, did not have to register a save.

Despite a diligent week of training heading into the Williams game on Saturday, the Bears were unsuccessful against the Ephs.

"Our passing was great, our movement of the ball was indicative of how hard we've been practicing the past few weeks," said Anna Tachau '12.

Yet the Polar Bears could not stop the Ephs, who are currently

"It was an incredibly frustrating loss just because we basically played one of our best games of the on up until the last five min-

utes," Tachau said. Even after the Ephs took an early lead, scoring only five minutes before the end of the first half, the Polar Bears remained relentless and created quality opportunities throughout the second half.

Yet in the final 10 minutes, the Polar Bears' defense lapsed and the Ephs managed to knock three into the back of the net before the clock

"It was a good learning experience: we not only know how to fix some of our tactical problems but we also never want to feel that awful feeling ever again," Tachau

The Bowdoin women will return home to face NESCAC rival Amherst, who is currently tied f or first place in the NESCAC, Saturday at Pickard Field at 12 p.m.

Football fails to hold on against champion Panthers

Bowdoin Football Team heads into its home opener tomorrow optimistic that it can improve and contend for a

"We have a talented team and we can compete with anyone in the league," said quad-captain Jack Ding-ess '09, "but we need to do a better job of capitalizing on opportunities and making the big play when we have the

The team will take on a tough Amherst squad that beat Hamilton home last weekend. Last season, Amherst beat Bowdoin 30-6.

"We have to take advantage of every opportunity they give us and create a couple more ourselves," said Head Coach Dave Caputi. "This is a team that, in order to beat them, you have to be grimly efficient on both sides of the ball. They don't give up a lot of big plays, and they're a senior and junior oriented team with a lot of good returning players."

The Polar Bears are led by returning players, but will need key con-tributions from first-year starters to compete with one of the best teams in

'The young guys are improving sig-

nificantly every time they step on the field," said Dingess. "We've learned from our mistakes against Middlebury, and I think we will be in a good position to surprise Amherst.

Last week's game against Middlebury was an offensive firefight that featured 885 yards of total offense and 10 touchdowns. Bowdoin led the game several times during the first three quarters, but the Panthers scored twice in the fourth quarter to put the game out of reach.

Bowdoin began the game with an impressive 12-play, 80-yard drive that quarterback Oliver Kell and, after a blocked extra-point, a 6-0 Bowdoin lead. Later, with the Polar Bears up 13-7, first year defensive back David Mandelbaum intercepted a Middlebury pass at the Bowdoin 10-yard line. Kell marched the Polar Bears down the field, passing for 31 yards and rushing for 31 yards, capping the drive with a ten yard touchdown run that put Bowdoin up 19-7 with seven minutes left in the first half.

The Panthers scored on an impres sive 80-yard drive to end the first half and scored again four minutes into the second, to take the lead 20-19. Later in the third quarter, Bowdoin senior Tyler Tennant intercepted a Middlebury pass and returned it to the two-

LOOKING DOWNFIELD: The football team runs a hand-off play in practice in anticipation of the upcoming game against the Lord Jeffs on Saturday

yard line. After first year Ian Vieira bounded in the two-yard score and Bowdoin missed its two-point conversion, the Polar Bears led 25-20.

Middlebury then scored two unanswered touchdowns, and the Polar Bears found themselves in a 34-25 hole in the fourth quarter. Senior Nolan McNair trimmed the Middlebury lead to 34-28 with a 30-yard field goal

with under ten minutes to play. On their next possession, however, Middlebury put the game away with a 60yard touchdown drive that took over five minutes off the clock, and secured the 42-28 Middlebury win.

"We had an excellent chance of winning last Saturday," said quad-captain Gus Spaulding '09, "but we came up short on a small number of plays that

ended up making the difference."

After taking defending conference champion Middlebury to the brink last weekend, the Polar Bears will look to take down another NESCAC title contender in Amherst tomorro

"We already know we can play with any team in this league," Spaulding "we just need to step up and play a little bit better on every play.

Williams serves men's soccer straight loss

The men's soccer team will be walking nto unfamiliar territory when they hos NESCAC rival Amherst on Saturday afternoon. Traditionally, the Polar Bears have started off the season very strong; dating back to the 2000 campaign, the men have amassed a remarkable 28-4 record through the first four games each year. Unfortunately, the recent three-game losing streak has prevented this year's early season success as Bowdoin has dropped to a 1-3 record.

The team has not let the frustrating start dampen its spirits though, and will be looking at Saturday's showdown with the Lord Jeffs as the perfect opportunity to revive the proud tradition of Bowdoin Men's Soccer

Co-captain Harry Ashforth '09 was disappointed with the energy level in last Saturday's 1-0 loss to Williams. Though Will Alden-Dunn '10 put a shot on tar get that would have surely gone in had it not been for an incredible save by the Williams keeper, most of the offense was from Williams. Though Dan Hicks '11, was able to keep them at bay, logging nine saves over the course of the game, the Polar Bears came up short.

'Dan Hicks was unreal in goal," Danny Chaffetz '11 said.

Unfortunately for the Bears, Williams player Gaston Kelly was finally able to put the Ephs on top with what Chaffetz called one of the most amazing goals he

Although Tim Prior '11 led a number of chances with speed up top, the Bears could not equalize, and went down with a 1-0 defeat

"The effort was there, the fitness wasn't, but after a tough week of practice, I'm more confident with our fitness level than I was four days ago," Ashforth

The Bowdoin community will be hoping that Ashforth is right because fitness will be essential against a talented Amherst team.

Saturday's showdown is especially daunting when one considers the laundry list of injured players that the team is dealing with. No one will be missed more than Co-captain Dominic Fitz-patrick '09, who injured his ankle in the second half of last Saturday's game.

Christopher Hickey '09 believes that the team will be able to cope.

"Obviously the injuries are tough, but we have a very deep team this year and a lot of guys have the potential to step up and do some damage against Amherst," he said.

"Everyone knows what we have to do, now we just need to go out and get it done," Fitzpatrick said.

Hot streak ends for women's volleyball

BY KERRY D'AGOSTINO STAFF WRITER

Saturday's losses against Amherst and Tufts marked the most difficult weekend of the women's volleyball 2008 season to date. Anticipation was high for the double-header at Bates which pitted the Polar Bears against the Lord Jeffs and the Jumbos, the leading teams in the NESCAC

Before the games, Jenna Diggs '10 predicted, "Our mental tough going to be the key factor that affects the outcome of the games this week

Bowdoin opened the 11 a.m. match against the No. 1-ranked Jumbos by invoking that tough mindset and an even tougher offense. In doing so, the Polar rs managed to snatch a first-set victory by two points, 25-23. However, the Jumbos came back with a vengeance to sweep the following three sets at 25-18, 25-16, and 26-19, for a 3-1 Tufts

Highlights of the match included junior Skye Lawrence's 11 kills and 10 digs, while classmate Diggs contributed 30 assists. Anna Noucas '11 posted an additional team-high 15 digs.

Despite the defeat, Gina Lonati '12

found a silver lining in the loss.

"Because we took a game off of them, we proved to ourselves that we can compete with the best," she said.

The afternoon Amherst match set Bowdoin against the next best team in the NESCAC. Amherst was in top form, coming straight from earlier, seemingly effortless, sweeps of Bates and Colby. Though the Jeffs continued the pattern by defeating Bowdoin 3-0, the Bears did not go down easily. A tight first match of 25-20 was followed by final scores of 25-14 and 25-17, during which Kristen Hanczor '12 led Bowdoin with 8 kills. Diggs was again effective with 23 assists to the offensive front; defensively, Jillian Berkman '12 added eight digs.

"Our losses to Amherst and Tufts

well-fought matches," Head Coach Karen Corey said. "Both teams played excellent defense and while we did not end up the victors, I am very

pleased with our progress so far."

She has reason to be pleased: even vith the two loss setback, women's volleyball has started off the season more forcefully than in recent years.

Lonati, too, is optimistic

"I think it was really beneficial for our team to see such challenging opponents early in the season b we learned a lot about what we need to work on for these coming weeks,

On Sunday, the team wrapped up the weekend with an Outdoor Volleyball Tournament on the Dudley Coe Quad that doubled as a program fundraiser and campus-wide event.

Next up for the Polar Bears is the M.I.T. Invitational Tournament, held on Saturday and Sunday. On Wednes-day, they ring in October with a 7 p.m. home match against Colby.

68 Heisman: What if?

RY IFREMY REPNEELD COLUMNIST

One was named the greatest football player to ever play at Purdue and is one of the faces of its athletics program. The other faces a sentence of life imprisonment for the second time and is currently in the midst of his second criminal trial. One has dedicated his post-football career to keeping kids in school; the

other has not been out of the tabloids.

One has his bust in South Bend, Inmember of the College Foot ball Hall of Fame. The other has been enshrined in Canton, Ohio, at the Pro Football Hall of Fame game. One had 14 touchdowns in the 1968 season, the other made the end zone 21 times. They finished one-two in voting for the 1968 Heisman Trophy as the finest collegiate football players in the land, and both were first-round draft picks in the 1969 NFL draft.

You've heard of one of them, but not the other.

O.I. Simpson is the household name from the NFL draft class of 1969. He had a storied career as a running back for USC in college, and for the Buf-falo Bills and San Francisco 49ers in the NFL. He won the 1968 Heisman Trophy, the 1973 NFL MVP award, and a host of honors with more acronyms than a dentist's business card. Of course, I wouldn't let him near a classroom of kindergarteners.

Leroy Keyes was the runner-up to "The Juice" in the 1968 Heisman Trophy contest, but he has fared decidedly better off the field in the decades since After a standout career as a running

back and defensive back at Purdue Keyes played four years in the NFL. He spent the rest of his career working w kids, as a desegregation specialist for Philadelphia public schools, and as an stant with the Purdue football team. While Simpson was in and out of the · courtroom, Keyes helped keep students in the classroom.

And yet, O.J. is one of the most famous living athletes. His fame has grown from admiration for his on-field accomplishments to notoriety for his off-field antics. Keyes, on the other hand, has faded into relative obscurity simply because he's done the right thing.

The problem, however, does not lie in O.J. as much as it lies within us. Who do we know, who do we celebrate? Apparently, the "most successful" athlete in terms of on-field production and postathletic-career notoriety is O.J. Not the good guy, but the famous guy.

The concept of fame is troubling, esecially within the athletic arena. Not knowing anything about athletes as in-dividuals, we thrust the greatest players onto a stage almost incomprehensible by ordinary people. We give them a voice most politicians can barely dream of and a following with a religious fervor. But who are these people? Should we really hold them as respected leaders? Are they who we want as role models for young kids?

It's unfair to blame the athletes themselves. Sure, they need to realize the depth of their actions and the enormous power they hold as role models. They need to understand that little kids at home aren't just watching their touchdowns or baskets, but their dates at the courthouse, too. But we can't expect ev-

ery athlete to be Lance Armstrong.

There are mean crossing guards and

It's easy to gauge athletic achievement and hard to measure success off of the field. We have any number of stats that tell us which athletes are the best and who are washouts. We can quantify wins and losses, yardage and points, tackles and goals. We can figure out what a successful game looks like. But there are no statistics that can show a successful life.

As O.J. endures another trial, his face will be plastered all over the news once again. Keyes, on the other hand, will go on living in relative obscurity.

Perhaps it's time we start glorifying athletes who are stars off the field, as well as on.

OPINION

BOWDOIN ORIENT

Voter registration

The election season is finally upon us. After an exhaustive series of primaries and conventions for both parties-and seemingly endless coverage and commentary on the candidates-November 4 is now less than a month and a half away.

It is an exciting time, and not only because for many of us this race marks the first time we will be eligible to vote in a presidential election. In addition to our obvious responsibilities as voters-learning about each local, statewide, and presidential candidate, and gathering information about the important is sues-there is another duty that is often overlooked or delayed until the last minute: registering to vote.

Registering to vote in Brunswick is not complicated, and taking care of it early will help to ensure a smooth, painless Election Day. Though it is possible to register in the state of Maine until November 4, the confusion at the Maine Democratic Caucus last February—confusion that stemmed, largely, from students and Brunswick residents trying to register the day of the caucus-underscores the obvious reasons for registering to vote before the polls become crowded and chaotic on Election Day.

The Bowdoin community has taken several commendable steps to ensure that students can register to vote on campus well in advance of November 4. Residential Life is currently registering students through October 9. The Bowdoin College Democrats have also set up tables in the Union where students-regardless of party allegiance-can register until October 14. From October 14 until November 4, students can register to vote at the Town Clerk's Office-a short walk or bike ride down Federal Street.

Students who have registered in Maine under a previous Bowdoin address will almost invariably have to re-register, since most students move to a different residence on campus each year. Bowdoin is carved up into four different voting precincts, so a student who lived in Stowe Inn last year and lives in Coles Tower this year has a different mailing address-and thus needs to re-register.

While we are all accountable for having an understanding of issues and stances addressed by John McCain and Barack Obama, students who register to vote in Maine should also familiarize themselves with the local issues. The ballot in November will include a number of statewide initiatives, as well as senate and congressional races. As Bowdoin students, we are four-year residents of Maine, and it is important to recognize that our votes will impact Maine's lifelong residents.

Voters in Maine will face difficult choices on Election Day. Deciding who we want running our country the next four years, or whether we believe that Maine should allow a full service casino in Oxford County, are indeed difficult questions, and should be considered carefully and thoughtfully. But the simple act of registering to vote involves a short walk to Moulton Union or the Brunswick Town Hall. Laziness or indecisiveness regarding registration should be considered, in a word, un-American.

LETTERS TO THE EDITOR

Students' letter misses the mark in measuring Palin's qualifications

To the Editors:

In a fit of nostalgia this week, I decided to glance at the Bowdoin Orient to check on the electoral discourse. I must say that I was a bit embarrassed to see the sort of ideological rhetoric embodied in the letter regarding Governor Palin's experience written by Jose Cespedes, Kylie Huff, and Katie Gordon ("Palffi's Experience Qualifies her for VP," September 19.)

First of all, governing a state which is home to federal troops yields corollary experience at best. While it indicates that Ms. Palin may have had access to higher-level security briefings, her position lies outside the chain of command for

decision-making for these troops.

Secondly, the notion that prox imity to a foreign nation yields special foreign policy experience is insulting to the intelligence of those with actual foreign policy experience. Given Palin's actual international travel record, this point is safer left unsaid.

In addition, her approach to oil and drilling in Alaska (and elsewhere) is sharply out-of-step with the broad majority of economists environmental scientists. There is little to indicate that the "drill, baby, drill" strategy will affect oil prices or help to solve the world's climate crisis.

What is most troubling about this letter, however, is that it picks the weakest of defenses for Governor Palin when much stronger ones

Instead of echoing her lines belittling community activism, Cespedes, Huff, and Gordon would be better served to note the equally elitist cultural criticism that many on the left have levied against the Governor.

The arrogance of many liberals regarding her origins and values is insulting to the populism that they often espouse. Instead of presenting exceedingly weak assertions regarding her political experience, conservatives should present her every-woman credentials and contrast them with the left's (at times) shrill intellectual elitism that threatens to re-open cultural wounds they ought leave untouched.

Bowdoin (and the nation as a whole) deserves a more robust and honest dialogue about Palin's candidacy and experience than this letter provided.

Sincerely, Conor Williams '05 PhD Candidate. Georgetown University Government Department

Campaign ads supplement political discourse

I love watching television. I also love politics. It only makes sense then that I love watching politics on television—and specifically political commercials. Indeed, as we get closer and closer to Election Day, it's hard to avoid these 30second nuggets during local news, game shows, and the late night comics. Viewers in Maine have seen an assortment of ads for Senate candidates Susan Collins and Tom Allen; for presidential can-didates John McCain and Barack Obama; and even for Jeanne Shaheen and John Sununu (candidates for Senate in New Hampshire). The ads have been sponsored by the candidates and their parties, and even by a collection of outside interest groups

For many, the TV ad is a symp tom of deep problems in the current culture of American campaigns Former Senator Thomas Daschle called negative ads "the crack cocaine of politics." Columnist David Broder once said they were "killing our democracy." I disagree. I think political commercials are great and serve a valuable function. Let me explain how

The most common argument against political commercials is that they turn voters off to the political process, and that they confuse voters about the important issues. The evidence clearly belies this, however. Last year, I co-authored a book with three colleagues on precisely these questions, where we worked hard to leverage the best available evidence ("Campaign Advertising and American Democracy," published by Temple University Press). Using a series of public opinion surveys from 2000 and 2004, and a database of ads aired in both elections (visit wiscadproject.wisc.edu), we found that citizens who watched more political commercials were knowledgeable about the candidates, more interested in the election, more trusting of government, and in some circumstances, more likely to vote. Further still,

exposure to negative ads had the largest effect on citizens in terms of knowledge about candidates and the issues.

A second argument against political ads is that they trick citizens into voting for candidates that they might not normally support. Is this claim true? Again, the answer is no. In my new research, I am investigating the relationship between ad exposure and vote choice. Convincingly, the evidence shows that ads speak most strongly to partisans, most often reinforcing one's political positions. In plain terms, Democrats tend to listen to Demo cratic ads, and Republicans tend to listen to Republican ads. Independents largely ignore campaign ads from both sides. This may offer little counsel to the hope that ads bridge partisan differences, but the evidence is clear that it does little to trick voters.

There is even better news, though. I find that political ads tend to influence political novices most strongly. That is, voters who know little about politics are far more responsive to political ads than vot-ers who consider themselves political experts. In this sense, not only are political ads reinforcing a partisan's viewpoint, they are breaking through to voters with little prior knowledge about politics.

This last point is crucial. Increasingly, campaigns are shifting energies to intense micro-target-ing efforts. This is where parties mine consumer purchasing data to identify various types of voters (wine-drinking Democrats; hockey Republicans). Campaigns then send highly targeted messages (usually though phone calls and canvassing) to different categories of voters. While successful, these efforts result in highly fractured campaign messages than can differ across neighborhoods, age groups, and income brackets. It also tends to ignore those citizens who don't traditionally vote (and who, by the way, typically know less about politics). In contrast, political ads on television are serving a valuable

swath of the electorate, and with a message that all viewers see at the same time.

I'm no Pollyanna, however, when it comes to political advertising. Lots of political ads, for example, seem to stretch the truth. I agree that this is problematic. Of course, misrepresentations are common in all forms of political discourse-campaign rallies, web pages, mailed literature, and candidate debates. The campaign ad is merely one vehicle through which candidates can and do convey their political ideas.

My colleagues and I often refer to political ads as the multivitamins of American politics. That is, they can often help provide nutrients in the absence of other political information. Of course, like all vitamins, political advertisements are most effective when they are supplementing, rather than supplanting, more substantial sources of nutrition. Just as people require a balanced diet and cannot survive on vitamins alone, citizens cannot and should not rely on campaign advertising as their only source of political information. Ideally, campaign ads simply would serve as accompaniments to a more substantial informational diet.

Ultimately, I think American politics has far deeper problems than the campaign ad. Observers have bemoaned, for example, the inability of our representatives to have serious debate about longterm problems like Social Security, energy consumption, or global warming. Could our leaders show more political courage? Absolutely. Would it be better if we could have reasoned debates about the longterm health of the Social Security system and a rational, forwardthinking energy program? For certain. Is political advertising to blame for (that is, a cause of) skittish legislators and the lack of serious discussion of pressing public policy issues? Unlikely.

Michael Franz is an assistant professor in the government department.

Coping with conservatism: Understanding the republican spectrum

BY STEVE ROBINSON

All over the country there are people who believe in conservatism. These people may be registered republicans, independents, or even blue dog democrats. They come from all walks of life, but whatever their color or creed, they see value in conservative ideals. It is important to realize that the Republican Party is not homogenous. Instead, it is a coalition of many groups whose ideas of conservatism differ, but share a central theme. Those who are unsympathetic to the Republican cause often paint the party with the same brush. A society that places an ever increasing importance on tolerance and diversity is showing an astounding level of prejudice towards republicans. To understand conservatism it is necessary to view the parts of the coalition separately and understand their motivation.

On one side of the republican spectrum we have the economic conservatives. These people may identify as socially liberal but fiscally conservative. So while they support laissez-faire economics, low taxes, and small government, their ideas regarding morality are not in line with the rest of the party. More specifically, they do not believe that the one, true moral code for society stems from religion. These moderates are not motivated by strong religious convictions and do not share the same social agenda as other republicans. They are drawn to the Republican Party because of common support of other policies.

On the opposite end of the spectrum we find the Christian right. This faction includes individuals from many Christian movements including Lutherans, Catholics, and Evangelicals. The Christian right is characterized by its strong support of conservative social policy. One can even argue that the social agenda of the Republican Party is largely determined by the Christian right. Motivated by deep religious convictions, this faction believes that the true moral code for society can be found in religion and should be enforced by the law. This explains their strong opinions regarding abortion rights and homosexuality.

Not every conservative directly coalesces with these descriptions. But compromise within the party is essential if its message is to be voiced. That being said, the Christian right tolerates pro-choice conservatives and socially liberal republicans tolerate the views of the Christian right. All factions of the coalition are motivated by a common enemy and they recognize that this compromise is vital to the longevity of the conservative movement. While the number and nature of coalitions within the party is subject to debate, it is evident that the Republican Party is a diverse political body and a living example of tolerance, a fact which contributes greatly to its strength. This diversity of ideas makes for lively debate within the party which formulates intelligent ideas.

Regarding the issue of tolerance, it's important to distinguish between which party talks about tolerance and which party talks about tolerance. The Democratic Party tends to favor an established platform that you can either take or leave. The static nature of their ideals makes them resistant to change and compromise. Being homogenous in nature and stubborn to the evolutions.

tion of ideas through debate means the tolerance of the Democratic Party is only skin deep. This lack of tolerance is especially prevalent at Bowdoin College where there is a distinct stigma associated with being a Republican. On the other hand, the Republican Party, being a coalition of varied interests, respects the idea that policy evolves over time through a process of intelligent debate. The Republicans know that the key to success is being an umbrella party which serves the widest range of interests possible. Tolerance is essential to this process.

is essential to this process.

The beauty of America is its spirit of tolerance and compromise. The far left needs the far right and vice versa. The vigorous campaigning of the more extreme individual allows for a compromise to be reached which is suitable to the moderate majority. The fierce competition between the two political groups ensures that the time and effort needed to come to the best decisions will be provided.

So how does all of this explain why

So how does all of this explain why I am voting for John McCain even though my beliefs 'regarding social policy are most similar to Barack

Obama? It's simple really. The current trend of increased abortion and gay rights is one that cannot be halted by the election of a republican president. So when I vote for John McCain, I do so with the knowledge that I am not contributing to decreased freedoms for homosexuals or women. Instead I am supporting a conservative agenda that I believe can save this country. All too often Americans let social issues dominate political thought and decision making. Pro-choice conservatives, myself included, put more weight in other areas of policy. Why? Although we disagree with the social policies of the Christian right, we see them not as a threat to the continued prosperity of the nation but, as a conservative force pulling policy towards the middle. The real threat, as we see it, is liberal idealism which preaches bigger government and higher taxes which in turn suppress small business and entrepreneurship. Not to mention a healthcare plan that is nothing less than an attempt to turn this great country into a socialist nation.

Steve Robinson is a member of the Class of 2011.

Vote Obama, Allen for change

BY CAITLIN CALLAHAN

On November 4, we, as Bowdoin students and residents of Maine, will have the opportunity to make our mark on history. Many consider this election to be the most important of our lifetime and the votes we cast will determine the direction of our country and the world.

First and foremost, it is crucial that we elect Senator Barack Obama as President of the United States. He seeks to restore America's position on the world stage, to enact policies that will protect the environment, to address our economic crisis, and to restore justice, equality, and access within our govern ent. However, without the support of a Congress controlled by Democrats in both houses, Senator Obama's actions as president will be greatly constrained. One of the key Senate races that could provide Senator Obama the majority he needs is taking place right here in our state, in the race between Representative Tom Allen and incumbent Senator

Tom Allen is a seventh-generation Mainer who graduated from Bowdoin in 1967. As a Polar Bear, Rep. Allen distinguished himself in academics and athletics, earning a Rhodes Scholarship and serving as captain of the football and track teams. Allen's leadership extended beyond the classroom and the field; when the national association of his fraternity refused to change its policy and admit African-Americans, Allen led the Bowdoin chapter out of the association in protest. Rep. Allen won his seat in Congress in 1996 and has served as a strong advocate for Maine in Washington ever since. Tom Allen stands in stark contrast to Susan Collins on several critical issues, including the Iraq War, economic policy, environ-mental policy, and health care.

Like Senator Obama, Tom Allen voted against the Iraq War in 2002 and has been actively working to develop a timeline to withdraw American troops from Iraq in a responsible manner. Representative Allen has a great appreciation for the splendor and importance of Maine's environmental resources, as well as an understanding of the imminent dangers posed by global warming and climate change, and has sponsored some of the toughest environmental proposals to address climate

change and provide relief for Mainers struggling with the cost of gasoline and heating oil. In addition, Tom Allen has shown his leadership and courage by introducing his own plan for universal healthcare. He is the only U.S. Senate candidate to have done so. Senator Obama endorsed Tom Allen and said that "there is no question that Tom's record of service, his tenacity, and his judgment will make him an excellent Senator."

Susan Collins, on the other hand, has voted with President Bush 77 percent of the time, according to a Portland Press Herald article published in August. Included in that 77 percent is support of the Iraq War, Bush's tax cuts for the wealthy, and the FISA legislation that aided warrantless domestic wiretapping. She also supported all but two of President Bush's judicial nominees, casting one of the deciding votes for Samuel, Alito's appointment to the Supreme Court. A vote for Susan Collins is a vote for more of the same failed conservative policies.

We cannot afford a continuation of the status quo. The United States stands at a perilous point in our history. We have the capacity, ingenuity, and perseverance to remain a world leader in areas of environmental protection and human rights, to find a responsible way to end the war in Iraq, and to end the economic crisis facing us today. But this election will determine if we take advantage of the opportunity to reverse direction and change our country, and the world, for the better.

We must elect leaders in this election who will move away from policies that have left 83 percent of Americans feeling that our country in on the wrong track. We must elect leaders who encourage us to believe in ourselves and understand the responsibility that comes with our role as a world power. We must elect leaders who work for the common good and protect the rights of women, children, veterans, the poor, and the middle class. We must elect leaders like Barack Obama and Tom Allen who will lead us to a better future. It is this future that we will inherit.

Make your voice heard on November 4 VOTE!

Caitlin Callahan '11 is the co-communications director of the Bowdoin Callege Democrats.

The Plague Fairy casts her shadow over Bowdoin

A SOJOURN IN CIVILIZED LIFE

BY ANNIE MONJAR

Last Monday morning, as I brushed my teeth, my roommate came into the bathroom pressing a wad of tissue to her nose.

"Whush wong?" I asked through a foam of Crest.

"I think I'm getting sick," she said, turning on the faucet with the hands that had just held the repository tissue.

"Oh, I'm shorry," I responded. But in the back of my head, through the toothbrush's bristling and the running water, I heard an eerie voice: "Seven days..."

And like clockwork, this past Monday, I woke up with my throat scratchy and nose stuffed. In my sleep, the Bowdoin Plague Fairy had come and cast her sticky spell on me, sprinkling a pixie dust cocktail of bacteria, pollen, sleep deprivation, and poor nutrition on my unsuspecting sinuses.

The Plague Fairy comes but once a year, usually for a three-week stint from late September to mid-October. She leaves behind a trail of congestive residue, however, that never permeates the Bowdoin Bubble's thick membrane. The nasal-residing dust scatters, becoming less concentrated on individual students but uniformly spread over

The result is a campus of 1,800 students, 25 percent of whom have a full-blown cold all the time. 'Tis the season for Emergen-C packets and Dayquil-popping, but the spirit

of congestion will stay with us yearround. Once the Plague hits you, you can be prepared to not take a complete, unobstructed breath of air until the last final exam of your spring semester.

It's no secret that college students have a better shot at winning the lottery than they do avoiding illness at school. Every facility, every piece of equipment we use is public: bathrooms, computers, drinking fountains, etc. Even the coffee taps (which I come into contact with countless times a day) have been touched by people just finishing putting their hands near their mouths.

Until college, I used to love being sick. Not gut-wrenching stomach-flu sick, but the kind of sickness that would make my parents feel just guilty enough for sending me off to school and thereby endangering the health of other kids. Sleeping in, followed by a day in front of the TV with a box of tissues, and a bowl of Ramen delivered with a heart-warming dose of maternal sympathy.

The tragedy of college illness is not its inevitability, but its destruction of the fond associations I always had with a case of the sniffles. Sickness at school gets you no time off from your daily stresses, but instead intensifies them two-fold. Going to class and writing papers on a brain foggy from oxygen deprivation and sinus pressure takes all the coziness out of colds.

But while everyone around me is swimming through the same sea of phlegm, I haven't stopped looking for sympathy. I tell everyone I see that I'm sick, alerting them of the progress of my recovery. To a casual "how's it going" from someone I only vaguely recognize in the Coles Tower elevator: "It's okay. I think I've got whatever's going around. Don't you hate that? Just when we have the most work, right? So annoying. I woke up a couple days ago all stuffed up. Couldn't believe it. I have a cross-country meet this weekend! What am I supposed to do? Oh, I'll just get off on whatever floor you're getting off at."

To a professor I bumped into outside of Sills Hall: "Oh, I'm just headed to Hannaford. I'm sick, you see, so I have to go buy some Nyquil and some of those Hall's Fruit Breezer thingies. I used to use Luden's, but I found that Hall's are better for congestion, because I'm very stuffed up, you see, so the vaporizing really helps with...oh, okay, I'll see you next week!"

To a classmate who neither asked nor cares: "Sorry about all the sniffling in class! I've been sick. Total phlegm-fest. I think I'm about 60 percent better, though. I told you 40 percent on Wednesday? Well, I guess I'm making progress, then!"

Clearly, I've even gone so far as to write a column about getting sick that I know will be printed for the entire school to read.

So while we all prepare ourselves for the minor, yet perpetual, head cold that will rest like a fog over the remainder of the academic term, bear in mind that you're not alone in your suffering. Know that when the Bowdoin Plague Fairy comes to your door in the next couple of weeks, you'll be ringing in the cheer of a new flu season with countless other victims, like me. Although I think I'm about 70 percent better.

LETTERS TO THE EDITOR

The Orient welcomes letters to the editor. Letters should not exceed 200 words and must be received by 7 p.m. on Wednesday the week of publication.

The editors reserve the right to edit letters for length. Longer op-ed submissions (400 to 800 words) may be arranged in advance with the opinion editor.

Submit letters via e-mail (orient@bowdoin.edu).

WEEKLY CALENDAR

SEPTEMBER 26 - OCTOBER 2

FRIDAY

LECTURE

Common Hour Lecture with Playwright Edward Albee

Albee, a Pulitzer Prize-winning playwright and the author of such acclaimed works as "Who's Afraid of Virginia Woolf," will give the Common Hour lecture. Pickard Theater, Memorial Hall. 12:30 p.m.

RECEPTION

McKeen Center for the Common Good

The afternoon will feature an exhibit titled "Bowdoin and the Common Good," a collection of profiles featuring members of the Bowdoin community and their experiences with service. There will also be free Gelato Fiasco gelato, McKeen Center T-shirts, local foods provided by the Dining Service, and a performance by the Meddiebempsters.

Morrell Lounge, Smith Union. 3-5 p.m.

DEDICATION

McKeen Center Keynote Address: "Educating for Democracy"

Following the McKeen Center's dedication by President Barry Mills, Adam Weinberg '87, executive vice president of World Learning, will address issues of civic education and sustainable development.

Studzinski Recital Hall, Kanbar Auditorium. 7:30 p.m.

FILM

"In Bruges"

The Bowdoin Film Society presents this 2008 film, which stars Colin Farrell and Brendan Gleeson as hitmen on the run in Bruges, Belgium.

Smith Auditorium, Sills Hall. 7 p.m.

SATURDAY

ART OPENING

"Visions of Industrial Spaces"

Watson Fellow Cotton Estes '07 will present a compilation of her drawings and photographs of Eastern Europe. Fishbowl Gallery, Visual Arts Center. 5-7 p.m.

FILM

"In Bruges"

Smith Auditorium, Sills Hall. 7 p.m.

SUNDAY

RELIGIOUS SERVICES

Catholic Mass Saint John the Baptist Church. 8 a.m. and 11 a.m.

Baptist Service

Maine Street Baptist Church. 10:30 a.m.

Protestant Service Chapel. 7 p.m.

NORTHERN PARADISE: Morning sunshine illuminates the pier at the Coastal Studies Center on Orrs Island.

MARY HELEN MILLER, THE BOWDOIN ORIENT

MONDAY

PRESENTATION

Meet the Artist: Norma Bowles

Bowles is the founder and artistic director of Fringe Benefits, an organization that helps victims of discrimination channel their emotions into plays that support a message of tolerance. Libra Theater Studio, Memorial Hall. 4-5:30p.m.

READING

Margot Livesey

Bowdoin's writer-in-residence will read from her most recent work, a novel titled "The House on Fortune Street."

Lancaster Lounge, Moulton Union. 4:30-6 p.m.

RELIGIOUS SERVICE

Rosh Hashanah Service

Bowdoin Hillel will hold Rosh Hashanah services and a dinner. Service: Daggett Lounge, Thorne Hall. 6:30 p.m. Dinner: Main Lounge, Moulton Union. 8 p.m.

FILM

"Head for the Hills"

This movie follows the adventures of intense skiers in Québec. Schwartz Outdoor Leadership Center. 7-8:30 p.m.

TUESDAY

RELIGIOUS SERVICE

Rosh Hashanah Service

Bowdoin Hillel will hold Rosh Hashanah services followed by a luncheon.

Service: Daggett Lounge, Thorne Hall. 10:30 a.m. Luncheon: Main Lounge, Moulton Union. 12:30 p.m.

OFFICE HOURS

President Barry Mills Café, Smith Union. 3-5 p.m.

FILM

"Surviving Friendly Fire"

An award-winning documentary narrated by Sir Ian McKellen, "Surviving Friendly Fire" details the work of Fringe Benefits, a theater organization founded and led by Norma Bowles. Libra Theater Studio, Memorial Hall. 7-8:30 p.m.

WEDNESDAY

RELIGIOUS SERVICE

Rosh Hashanah Service

Bowdoin Hillel will hold services and a luncheon at its headquarters.

30 College Street. 10:30 a.m.
Luncheon immediately follows the service.

LECTURE

"Wake Me Up When It's Over! Using Comedy to Set the Stage for Social Justice"

In her final appearance at Bowdoin, Norma Bowles will give a lecture sponsored by the Joseph McKeen Center for the Common Good and the theater and dance department.

Pickard Theater, Memorial Hall. 8-9:30 p.m.

THURSDAY

LECTURE

"The Perils of School Reform"

Diane Ravitch, assistant secretary of education under President George H. W. Bush and current professor of education at New York University, will deliver the 2008 Brodie Family Lecture. Pickard Theater, Memorial Hall. 7 p.m.

LECTURE

"Frankenstein"

Sponsored by the Association of Bowdoin Friends, Professor of English David Collings will discuss Mary Shelley's "Frankenstein." Kresge Auditorium, Visual Arts Center. 7-8:30 p.m.

ECTURE

Dr. Russell Crandall '94

Crandall, a Bowdoin alumnus and Davidson College's MacArthur Assistant Professor of Political Science, will discuss the rise of leftist movements in Latin America.

Room 315, Searles Science Building. 7-9 p.m.

RECEPTION

Museum of Art Open House

Featured exhibitions for the fall include "Fantastical Fables: Paintings, Prints and Drawings" by Amy Cutler and "Parterre: An Installation" by Lauren Fensterstock.

Rotunda, Museum of Art. 7-8:30 p.m.

Endowment Oversight Analysis

The Orient takes an in-depth look at endowment oversight at Bowdoin, past and present

BY NAT HERZ ORIENT STAFF

Over the past three years, Bowdoin has gotten straight "As" in most of the Sustainable Endowment Institute's "Green Report Card," which measures colleges' commitments to sustainability.

Belying those marks, though, has been its grade for endowment transparency. For the same three years, it has stubbornly remained at an "F"

Research into Bowdoin's history reveals an inconsistent record with investment transparency and oversight. Past initiatives have resulted in divestment from South Africa and non-investment in Darfur, and at one point in the '80s and '90s, the College had its own committee, written into its by-laws, that was charged with both proactively and reactively considering social responsibility in investments. However, that committee disbanded in 1998, and since then, these issues have faded into the background, even as the

Bank limits fund access after freeze

Bowdoin investments in frozen Wachovia fund valued at several hundred thousand dollars

BY NICK DAY

In an act suggesting that Bowdoin is not immune to the credit crisis gripping the country, Wachovia Bank froze a fund containing several hundred thousand dollars of the College's money on Monday. The same fund contained "millions and millions of dollars" of college money before Bowdoin transferred a large portion of it to other investments this summer, according to Senior Vice President for Finance and Administration Katy Longley.

"Fortunately, the College moved the funds elsewhere to safer investments," Longley said of the summer withdrawal.

According to President Barry Mills, a sizable portion of the funds were moved because of the nature of the investments.

"The investments that were being made [by the fund managers] didn't

Despite high crude oil prices, heating costs remain stable

BY NICK DANIELS STAFF WRITER

Despite the fact that the heating plant was turned on earlier than usual this year due to an unpredictable cold spell, Director of Finance & Campus Services Delwin Wilson said that since the College has "locked in 90 percent of our utility pricing, we're confident that we will either meet or be below our budget."

According to Wilson, Bowdoin enlists the help of an energy consulting firm to achieve aggressive strike prices and that these utility prices are usually locked for a period of one month to one year. This year's utility budget is around \$5.8 million, and of that amount, more than \$2 million will be spent on heating alone. Bowdoin's energy budget has remained fairly consistent over the past few years, increasing an average of five percent each year due to fuel price increases and the gradual growth of the campus.

The fact that the increase is relatively small is good news for Bowdoin's budget, as the price of crude oil has nearly doubled over the past

two years. This hike in prices has intensified the College's effort to utilize renewable energy and decrease carbon emissions.

According to Wilson, Bowdoin has decreased carbon emissions by 40 percent over the past two years.

This effort has been made in part to accomplish the goal of making Bowdoin carbon neutral, an objective mandated by the American College & University Presidents Climate Commitment, which President Barry Mills signed in 2007.

"Rising fuel prices along with our commitment to sustainability have caused changes in our [energy] policy," said Wilson.

Such changes include the installation of geothermal heating and cooling systems in Osher and West Halls, Studzinski Recital Hall, and the Museum of Art, the addition of Zipcars to the college's fleet of vehicles, and the conversion of three boilers to burn both No. 2 heating oil and natural gas.

"Being able to burn natural gas has been advantageous from a financial and an emissions perspective." Wilson said.

ANALYSIS

College's endowment has grown.

College administrators defend the current arrangements surrounding the endowment, citing confidentially agreements and lack of student expertise on investment issues, as well as a firm belief that the endowment is not a place for political expression.

Indeed, Bowdoin's current investment strategies are such that it is difficult for the College to provide additional transparency, and instances where stu dents can provide input are few and far

"I don't believe students have the expertise to be able to advise the College appropriately on the issues of the ways that we should appropriately be invest-ing," said President Barry Mills. "I have no issue with there being vigorous debate on all kinds of issues at the College, but when you're talking about balancing the fiduciary duty we have towards that endowment, it is not a political item. For that reason I think we have to insulate it from the political and social debate that

happens on campus." Meanwhile, a growing number of schools have created oversight committees that promote transparency, student involvement, and even push social and environmental investing -agendas: Experts say that there are at least some ways for Bowdoin to involve students in its endowment's management—if not through a committee, then at least by providing more information about the shares that it owns.

"Every student that walks out of a school with a sizeable endowment should have at least a basic understanding of how that happened, and the pro-cess behind how that happened," said Mark Orlowski, executive director of the Sustainable Endowments Initiative (SEI). "For the school to not be providing that information, it causes a major disconnect-not a single student knows where that money is really coming from, or how that money is being made

In light of these developments, the Orient has investigated Bowdoin's past and present investment practices, while comparing them to the policies of other

INVESTMENT BACKGROUND

Bowdoin's endowment, as of June 30, is valued at \$831.5 million. Part of the endowment consists of individual funds earmarked for a specific purpose, like professorships, lectures, or fin while other funds can be used for any

In the 2008 fiscal year, 24 percent of the general operating budget came from the endowment. About two-thirds of financial aid from the College was funded through the endowment.

Most schools, Bowdoin included, will withdraw a fixed percentage of this money every year, regardless of market fluctuations. The idea behind this is that the draw is sustainable over time.

"The endowment is about in good times and in bad times having a stable source of income with which to pay for your highest priorities," Mills told the

Bowdoin's investment office, headed by Senior Vice President for Investments Paula Volent, is responsible for the management of the College's endowment, under the direction of the Investment Committee of the Board of Trustees.

That committee includes eight trustees, a faculty member, Mills, and Volent as a liason officer from the Investments Office

Bowdoin does not directly handle any of its investments. Instead, the College's endowment holdings are handled entirely by outside investment managers.

These outside managers invest Bowdoin's endowment in many different areas, mostly in special types of "commingled" funds or limited partnerships which preclude the College from imposing any constraints on the types of investments managers make.

Additionally, Bowdoin signs confi-

dentiality agreements with the managers of these funds, which means that information about specific investments may not be disclosed to the College community or the public.

According to Mills, these confi-

dentiality agreements are not open to discussion.

"Confidentiality is not negotiable in any real sense," Mills wrote in an e-mail. "We are a small investor and don't get to dictate terms."

However, a small proportion of the endowment is invested by managers in securities in Bowdoin's name, which includes things like conventional stocks and bonds. The College has more flexibility in the way that these investments are managed.

According to Volent, approximately 2 percent of Bowdoin's endowment is invested in securities in this manner, though shares in corporations

make up an even smaller proportion. In an interview, Mills said that comunity members should trust that the school invests responsibly, and leave investment decisions to the trustees.

"We invest in ways that are prudent, with people we feel are responsible and who will do the best they can do...to

protect our capital and to get good returns," said Mills in an interview. "We invest with funds that we believe are appropriate after extraordinary due-

Mills added that the school does provide its commingled fund manag-ers with guidelines for proxy voting (a method used by shareholders to try to change management strategies, usually with social or environmental issues in mind), but said that opening this process to discussion was unnecessary.

According to Volent, very few proxy

votes occur each year on the shares held in Bowdoin's name, which generally deal with issues of accounting and auditing.

"It's time to be realistic," Mills said.

"Proxy votes are symbolic. It's pure symbolism. Bowdoin owns a tiny percentage of any particular corporation.

SOCIAL RESPONSIBILITY HISTORY

Bowdoin first came to address issues of transparency and oversight in investing in the late 1970s, when students and faculty at many schools were concerned with apartheid in South Africa.

In 1978, President Willard Enteman created a temporary committee to investigate the school's South Afri-

The committee's report helped begin the process of divesting from South Africa, although it was not until 1987 that the College was completely divested.

However, the temporary committee also recommended the creation of another, permanent subcommittee, which would "have a significant and telling voice in making policy recommendations on social responsibility issues related to investments."

The committee feels that the College should be in a position to respond to these issues in [a] systematic and informed fashion," the report reads.

In 1981, the trustees approved such a committee, though the board tweaked the format slightly-instead of creating an independent subcommittee, the school's investment committee was en-

larged to include two students and two faculty (at the time it only contained one of each), with a social responsibility subcommittee beneath it, made up of mem-

bers of the investment committee. In the May 22, 1981 trustee meeting, the trustees approved the establishment of this social responsibility committee (SRC) and amended the school's bylaws to reflect the change.

The pertinent section of the by-laws

"The Committee on Investments is charged with considering social responsibility in investments and shall establish a subcommittee [sic] of such of its own members and at least one representative of each of the faculty, students and alumni, all as the Committee on invest-ments may determine. The Committee on Investments shall report annually to the Executive Committee through the President such findings and recommendations on matters of social responsibility in investments as it shall deem

"The idea was that Isocial responsibility] was going to be coming up more," Associate Professor of History and Africana Studies Emeritus Randy Stakeman. Stakeman was teaching at Bowdoin at the time and was involved in the debate surrounding South Africa.

The committee was set up, Stakeman added, to vet these issues as they arose, reacting to concerns raised by students or other community members-and also to proactively investigate issues.

COMMITTEE ADVISING

Trustee meeting minutes show that the SRC met at least annually, starting in the early 1980s, at least until 1995 (trustee minutes show the last SRC reports in 1995; one committee member recalled that it convened until 1998).

While the committee initially was concerned with South Africa divestment, it quickly broadened its focus to

According to the trustee reports, starting in 1987 the SRC began advis-ing the Treasurer's office on its proxy votes. By 1992, the SRC, working with the Treasurer's Office, had developed specific guidelines for proxy voting, and according to a trustee report, "as a general rule, they voted for resolutions call-ing for further cuts in business ties with South Africa, and resolutions asking for reports on environmental and health policies of companies."

David Becker '70 was one of the original members of the SRC, and eventually became chair in 1990. While the SRC did not have final authority on the school's proxy voting, Becker said that the committee enjoyed a good rapport with the treasurer's office.

"I don't remember any big scandal about our being overruled," he said. "I

think it was a pretty amicable situation."

Between 1990 and 1995, the SRC investigated the school's holdings in tobacco companies, as well as potential environmental issues with its investments. It also continued monitoring the uation in South Africa to determine when reinvestment was appropriate.

According to Becker, the SRC was never able to make any progress on the issues surrounding tobacco com-

panies.
"That got nowhere," he said. "That was like, "We're doing South Africa, and that's all we can handle right now."

Once the situation in South Africa began improving, the SRC helped lead the process of reinvesting in companies with South African business dealings. After this process was finished, Becker said, the committee struggled to find a niche for itself.

"We were...casting around after that with other issues and not getting a lot of traction," he said.

When Becker went off the board, in 1998, a new trustee, D. Ellen Shuman 76 took over as chair of the committee.

Within a few meetings, Becker said, the SRC had voted itself out of

Shuman did not return repeated requests for comment.

In the records of the trustees, there was no mention of the folding of the committee, and the paragraph in the by-

laws referring to it disappeared in 1996.
"The committee disappeared immediately," Becker said. "I would say it certainly was done quietly, and I raised a couple of questions. I think certainly the board didn't raise any noise about it. A couple of faculty members asked me, and I said the board did not seem comed to looking into those questions, and they may have felt there were other ways to go about it."

Kent John Chabotar, president of Guilford College and Bowdoin's vice president for finance and administration from 1991 to 2002, said that he renbers the situation differently.

"I don't remember [the SRC] ever actually disbanding," he said. "I just think they probably were doing stuff but didn't report back, and it became a non-issue

DARFLIR

Discussions of transparency versight dwindled following the SRC's disbanding, and did not resurface again until early 2006, when students began

College Investing

Bates College: Endowment holdings are open to perusal by trustees and senior administrators, while records of proxy voting are not. Proxy voting decisions are made by Bates' investment managers.

Colby College: The college publishes a report detailing socially responsible investing efforts, which can be viewed by community members, including students. Proxy voting records are available only to administrators and trustees.

Dartmouth College: The Advisory Committee on Investor Responsibility votes on every proxy resolution on shares held in the college's name (these votes are recommendations, but they've never been rejected). it also provides a list of all publicly held shares to community members, including students.

Middlebury College: Endowment holdings are available to trustees and other members of the college senior administration. Proxy voting records are not public, but the school does have an Advisory Committee for Social Responsibility, made up of students, faculty, alumni, and staff, which provides the board of trustees with recommendations on proxy votes involving social issues.

Williams College: The Advisory Committee for Shareholder Responsibility recommends proxy positions on all shares held in the college's name. This portion of the portfolio is available to college community members, including students.

pressing the College to take action on the genocide in Darfur.

In response to concerns of both students and alumni, Mills created a committee of students, faculty, staff, and trustees to evaluate the situation, and make recommendations about what the College should do.

To assist the committee, Bowdoins investment office reviewed the Colleges holdings and determined that the school had no investments in businesses supporting the Sudanese government. After conducting further research,

After conducting further research, the committee ultimately made a series of recommendations to Mills. Among these recommendations were avoiding direct investment in companies with ties to the Sudanese government; firing indirect fund managers that would not divest from the aforementioned companies; and creating a permanent committee to identify "crimes against humanity."

After receiving the recommendations from the Darfur committee, Mills then made his own recommendations to the board of trustees, which were subsequently ratified.

Mills agreed that Bowdoin should avoid directly investing in companies complicit with the Sudanese government, but maintained that the College should not necessarily fire indirect fund managers that did not agree to avoid such companies—that decision would remain up to the trustees and the investment committee. Any profits from investments in such companies, however, would be set aside into a special fund used for supporting humanitarian efforts in Sudan.

Mills also declined to create a permanent subcommittee to identify crimes against humanity, writing that "the College should encourage individual activism on these important issues centered on the common good."

"Activism is not created or mandated," his statement continues, "it is not the stuff of committees."

After Mills's recommendations were made public, Bowdoin Student Government (BSG) passed a resolution in support of the committee that Mills had declined to support.

Ultimately, BSG and Mills reached a compromise, which allowed for the creation of a permanent committee—the Community Response Committee (CRC)—under the auspices of student government instead of the College itself.

This new committee was charged with investigating "humanitarian issues," rather than "crimes against humanity," which Mills and some BSG members felt was too broad of a mandate.

That committee was supposed to include three staff and four students, but BSG had difficulty finding staff willing to serve on the committée, and did not meet for the first time until last October.

According to current BSG President Sophia Seifert '09, the committee still exists, but has not yet been staffed due to turnover of last year's members.

RENEWED DEBATE

Today, Bowdoin has no transparency or oversight of its investments outside the board of trustees, the president, and the investments office.

While the College conducts duediligence for all fund managers that it invests with, those procedures are not enshrined in a public policy.

Mills said that while community members do not have information about our investments, the College does nothing that should be cause for

"We're here and we act and live in

support of what we consider our principles to be," he said. "We aren't doing anything with our endowment that we don't feel is appropriate or violates our principles."

Mills said that involving students in this decision-making process is not advisable, since students are not wellversed in this area. "We have students who work in the

"We have students who work in the investment office who have expertise who are utilized for that expertise and help out in important ways, but...it is not a political process," he said.

"If you're interested in affecting what corporations do, go off and do it on your own...Do your work, do your scholarship, do your common good work," he said. "That's going to have a whole lot more value and amplification than worrying about proxy votes?"

According to Mills, students are free to submit views or opinions to the president or board, but final authority lies with the trustees.

"You can organize all the people you want to tell the trustees what you think your views are on the way that we should be investing. But ultimately it is their decision, and it was always their decision."

Sheldon Stone '74, chair of the investment committee, said that he worries that pursuing additional transparency could hurt Bowdoin's reputation as an investor.

"One of the things we worry about is making sure that we're viewed to be a desirable client from a manager's perspective," he said. "I wouldn't want to do anything at all that would create any concern among managers that we're not honoring our confidentiality."

ALTERNATIVES

While Bowdoin has moved away from committee oversight and broader transparency in its investments in recent years, other schools have created bodies that function much like the SRC did in the 1980s and 1990s.

At Williams College, six percent of the school's \$1.9 billion endowment is invested in shares held in the College's name, through outside managers.

The Advisory Committee for Shareholder Responsibility makes recommendations on proxy votes for all of the college's directly held shares, and also provides guidance on broader investment issues. The committee includes faculty, alumni, students, and staff.

At Dartmouth College, where 40 percent of its portfolio is in shares held by outside managers in the school's name, the Advisory Committee on Investor Responsibility (ACIR) fulfills a similar function.

Composed of students, staff and administrators, the ACIR's major responsibilities include voting on "every [proxy] resolution relating to social issues for every company in which the College publicly owns shares," said the committee's executive administrator, Allegra Lubrano.

In addition, according to the committee's Web site, the ACIR also provides guidance and recommendations to the College's investment advisors regarding "certain investment positions that "could be deemed inconsistent with Dartmouth's mission."

These schools' activities are focused on shares held in their name, which make up 2 percent or less of Bowdoin's endowment, according to Volent.

However, Orlowski said that some

However, Orlowski said that some colleges in similar situations have to make this information public and involve students in investment oversight.

volve students in investment oversight.
"If it's only 2 percent, why not make that information public?" he said.

By not actively involving students in decisions on the management of the en-

dowment like drafting guidelines or recommending positions for proxy voting. Orlowski said that Bowdoin is missing an educational opportunity.

an educational opportunity.

"Just because it's only two percent doesn't mean there's no educational value to creating a committee," he said.

"Orlowski also said that other schools,

Orlowski also said that other schools, like Haverford College and the University of New Hampshire, have created educational and oversight committees regarding their investments despite the fact that those schools hold no shares in their names.

"Short of some kind of major financial crisis, people are not going to, in large numbers, inquire about this, because it's not part of their everyday experience on campus," Orlowski said. "The committee structure allows for an environment where there can be a more thoughtful and lengthy discussion and dialogue about the issues being raised. I think there's a lot of discussion that can happen and some major learning opportunities that are missed when these sorts of issues are ignored or otherwise downplayed."

Steve Viederman, former director of the Jesse Smith Noyes Foundation and a member of SEI's board of advisors, contested Mills' statement that proxy voting is merely symbolic.

Viederman cited numerous instances where his foundation had either started or become involved in proxy initiatives that resulted in changes in the ways a given corporation does business.

"The idea that it doesn't make a difference is intellectually dishonest whoever said that, he or she doesn't have the slightest idea what he's talking about," he said. "Voting proxies is not magic—I can sit here and talk with you for hours on how it has been effective. And it's more effective if more institutions get involved."

VOTERS

CONTINUED FROM PAGE 1

crats and the Bowdoin College Republicans both cited getting people to vote as a priority.

Registering to vote can sometimes prove to be complicated. Because the campus is divided into a number of different districts, even students who have previously registered often have to change their registration when they move to new dorms.

However, campus groups are working not only to register students but to educate them about the issues

At the beginning of the semester, the Bowdoin College Democrats merged with Students for Obama, another group on campus, which was formed "specifically to get Obama to be the Democratic nominee," said former Bowdoin Chapter Coordinator Zach Winters 11.

According to Claire Cooper '09, co-president of the Democrats, the larger group hopes to "foster dialogue and education about the issues which are most important to our party, [paying] special attention to local Maine politics...and current events."

The Democrats have used music to aid their cause. After the first week of classes, they hosted a kickoff concert with the Bowdoin Women's Association. The concert featured music from two student bands as well as tables of literature about candidates at all levels of government, "all the way up to Obama," said Cooper.

A concert co-sponsored by another politically-inclined student organization, the Young Democratic Socialists, along with Bax-

"There are a lot of special things about this election. Whoever wins it's going to be a first for something: either the first woman vice-president or the first African American."

BOWDOIN COLLEGE REPUBLICANS
CO-PRESIDENT

ter House, is to be held at Baxter tonight.

Event organizer Sarah Pritzker '11 said that she had "initially wanted to make the event a joint event for the College Dems and Republicans but neither group was interested in participating."

Pritzker identified herself as "definitely a big Obama supporter" but one who feels her first duty is to get everybody voting "so that each election accurately reflects the beliefs and needs of the people."

Because of the crowded and chaotic conditions at the caucuses in February, Cooper and the Democrats are encouraging early voting, which will be available on October

"Early voting is currently encouraged because of the anticipated high volume of people going to the polls, and to ensure that those who may not be able to make it to the polls on Election Day can still

cast their vote," said Cooper.

The Bowdoin College Republicans have volunteered to help with McCain's campaign through phone banks. Co-president Jeffrey Jeng '09 also said that the group will do "some door-to-door stuff" in the near future. The group plans go to local houses to encourage voting.

"There are a lot of special things about this election," said Jeng. "Whoever wins it's going to be a first for something: either the first woman vice president or the first African American."

Both Jeng and fellow Republican J.B. Dill '11 mentioned that there is a small but dedicated group of students who are heavily active for the Republican cause. The rest are not canvassing every weekend, but "care about what is going on," said Jeng.

Though Dill is not a member of Bowdoin College Republicans, he has held a longstanding interest in conservative politics. Earlier this year he posted a large McCain '08 banner outside of his dorm room window, a room which he shares with his Republican roommate Jeff Fanning '11.

"People really didn't like it," Dill said. "But to me that's a way of opening up dialogue, of discussing it."

After much discussion with housemates and Residential Life, Dill moved the banner inside.

Dill spoke of a double standard on campus. "I don't think I would have been

"I don't think I would have been forced to move the McCain poster if it had been an Obama poster," he said.

Cooper, on the other hand, claims that "controversy has dropped off recently." She said that although there is a "standard of liberalism" on campus, she does not see it being challenged.

Jeng, citing the importance of this election, highlighted the need to consider the issues rather than just voting along party lines as per usual.

"I think people should just consider more carefully who they vote for," he said.

SECURITY REPORT: 9/26 to 10/3

Friday, September 26

 Security identified a man observed following a female student on September 25 at Smith Union. Brunswick Police issued a criminal trespass order to the man and a campus-wide security alert was sent.

 A student reported the theft of a royal blue Eddie Bauer mountain bike from the bike rack at Winthrop Hall.
 The bike had been left unlocked.

FREEZE

make us comfortable," Mills told the Orient on Thursday night.

Bowdoin was one of more than 1,000 participating colleges and private schools in a \$9.3 billion account that Wachovia held in a short-term investment fund, managed by the Connecticut nonprofit fund. On Monday, Wachovia announced that it was stepping down as trustee of the fund, and that it would allow participants-including Bowdoin-to withdraw only 10 percent of their assets. The percentage later grew to 37 percent on Thursday afternoon, and is expected to reach 57 percent by the end of this year. The limited access to funds prompted concerns from participating schools about meeting day-to-day expenses.

Longley said that Bowdoin's in-

vestments in the fund consisted of a reserve health plan fund, valued at "less than half a million dollars." The fund, however, did not include assets essential to the day-to-day operations of the College, like pay

"The frozen investments with Commonfund are for a health plan reserve fund the College is legally required to keep," Longley said. According to Longley, the fund is required as part of the 1974 Employee Retirement Income Security Act (ERISA). "Bowdoin's Commonfund in-

vestments are truly a reserve fund," said Mills. "It really has no impact

on the College."

"It's not a fund we use, or even are able to touch. It's a small reserve fund," Longley said.

Longley said that the general op-erating funds of the College come from "Treasury bills, money market funds, and deposits in local banks." She said that local banks with College deposits are being closely monitored, but said the banks have a lot

"I don't think we could be in safer deposits if we wanted to be," she said.

Other colleges had millions invested in the Commonfund account. According to an October 2 New York Times article, the University of Vermont had approximately \$79 million invested in the fund

"A lot of other schools have millions and millions invested in the fund," Mills said. "Except for the reserve fund, we were completely unaf-fected by Commonfund."

Smaller institutions have also been hit by the freeze. Bethany College, a college of 830 students located in West Virginia, had \$700,000 invested in the fund. According to an October 1 Chronicle of Higher Education article, Bethany may face difficulty covering expenses since the school normally uses short-term fundslike those currently frozen-to pay for operating costs

"There's a lot of risk out there," Mills said of the current economic climate. "Right now, if you've got a hundred dollars, you keep it in your pocket, you try and protect it. You don't try to make it a hundred and fifty."

THE HEAT IS ON: This year, Bowdoin expects to spend \$2 million on heating the campus.

HEATING

It appears that most members of the Bowdoin community have not been significantly affected by rising fuel costs. Security Administrative Coordinator Jennifer Wienckowski said that since the number of registered student cars seemed consistent compared to previous years, it appeared that high gas prices "didn't seem to be drastically affecting the student body."

Director of Safety and Security Randy Nichols said that as Zipcars and other transportation services become more widely used on campus, people will be dissuaded from bringing their cars from home. Zipcar members used the two cars for 435 hours during the month of September.

A survey of Bowdoin faculty members indicated that a vast majority used alternative methods of transportation to travel to and from campus and that for most part, fuel concerns were not a primary motivator for doing so. Most respondents said they either biked or walked to campus on a daily basis.

Nonetheless, according to Tama Spoerri, Director of Human Resources, the College asked local eating oil companies to consider discount rates for its employees in order to ease worries concerning winter heating costs. Independence BioFuel responded with a message to all Bowdoin employees, explaining that they had granted a discount of 10 cents per gallon off all offered heating plans.

Livesey shares 'Fortune' with campus at reading

BY BRANDEN ASEMAH

Writer-in-Residence Margot Livesey of the English department received a standing ovation from students, faculty, and community members on Monday after reading aloud from her latest novel, "The House on Fortune Street."

The English department's other writer-in-residence, Anthony E. Walton, helped organize the event and gave Livesey an introduction before she read a passage from her novel to the crowd.

"Her work is known everywhere English is spoken." said Walton. "[Bowdoin] is very lucky to have her here...I don't think people really know how lucky we are."

The Scottish-born author was thrilled with the praise offered to her at the end of her program

"I was really touched and over-whelmed," said Livesey. "I am de-

Livesey said her path to becoming a writer was different than most After college, Livesey traveled and decided to write a novel. She said that after reading her completed work, she realized how poorly written it was. According to Livesey, this was her motivation.

A little more than twenty years later, Livesey has written more than five novels and many short stories. Livesey said that as she waits for her

"In general, I hope to see more readings on campus not particularly by me. I like the possibility of seeing students reading their work."

> MARGOTLIVESEY WRITER-IN-RESIDENCE

classes to start next semester, she will be working on a new novel.

This spring will mark Livesey's fourth year at Bowdoin. She teaches two fiction writing workshops each spring. One workshop focuses on beginner writing and introduces students to the idea of writing, while the advanced class is for those who would like to publish work someday.

After her book reading, Livesey said she hopes to see more book readings at Bowdoin.

'In general, I hope to see more readings on campus not particu-larly by me," said Livesey. "I like the possibility of seeing students reading their work.

Assistant Professor of English Mary Agnes Edsall said the hour and a half

was time well-spent as a listener.
"I thought it was marvelous," said Edsall. "She had us on the edge of our seats."

"Normally I get distracted by things like this, but from start to finish, it was completely captivating," added Sammie Francis '09.

Electronic books slow to catch on

BY TOPH TUCKER STAFF WRITER

On paper, e-books have long seemed like the wave of the future.

But while their attractiveness has yet to translate into a thriving market, that's not stopping the Hawthorne-Longfellow Library from offering access to an ever-growing supply of nearly 100,000 e-book titles. Associate Librarian for Public Services Iudith Montgomery said that the titles are provided through partnerships with e-content providers, like Ebrary

Our license agreements with pub lishers allow us to use the content -reserves without additional cost," said Montgomery.

Karl Fattig, system and digital initia tives librarian, said that "online 365/24/7 access to academic resources is an important part of our services."

"We're already working with profes sors to order titles for their courses and research needs," wrote Fattig in an eail. "Many faculty already use ebrary titles for their own research and for elec-

But he said that these "e-books don't cessarily overlap with textbooks."

According to Course Materials and General Book Manager Michael Tucker, market fragmentation and a limited mber of available texts has kept the College Bookstore from jumping into

"It hasn't congealed so that there's one standard format for it yet," he said Right now, we're researching all the options that are open to us, because as we've learned, the technology is changing fairly rapidly. Whatever we imple ment, we want to make sure it's the right fit for the College."

One of the possibilities is an upgrade to the Bookstore's point-of-sale system that would enable it to sell e-books at its Textbook Center.

"Basically, on the shelf you'd see the new book, the used book, and then ed be a little card, like a gift card,"

The card would have a PIN on it, which could then be used to download the e-book to a computer.

However, out of nearly a thousand texts requested by professors this semester, "there were only about six or seven titles that were available as e-books."

E-books benefit from the advantages in convenience, power, and flexibility that college students have come to expect from any me dium gone digital. Hundreds of texts can be fit onto a single laptop or e-book reader. A simple down load can replace a trip to the Textbook Center or library, and a title is never out of stock. E-books support annotations that go beyon dog-earring and margin notes, and volumes can be searched in mere

However, proprietary devices, software, formats, and distribution channels convolute the market. Digital Rights Management (DRM) keeps users from sharing many e-books the way one might lend a book.

Every publisher will put restrictions on how many pages you can print, whether you can even print it at all, where you can access it from," Tucker said.

Fattig said he is "not sure it's caught on as far as a trend." Still, the movement may be gaining momentum, in ways large and small.

We've seen an increase in the bundling of books with access cards," Tucker said. Access cards give students access to

supplementary online material.

Visiting Assistant Professor of Government Jeffrey Selinger's "Introduction to American Government" class uses a W.W. Norton textbook entitled "Ameriwhich advertis can Government," online materials on the back cover. The book includes a code to access an online "StudySpace," which offers chapter summaries, quizzes, and flashcards. An e-book version is available for half the price of the standard book.

"The problem is that most people would end up printing out the book anyway, or at least significant portions

CourseSmart, a joint venture of Pearson, Wiley, McGraw Hill Education, and other textbook publishers, offers more than 4,000 titles for paid download. Their home page promotes the environmental advantages of ebooks, claiming to have saved more than 110,000 trees so far, though that number may not account for students printing large sections. It also advertises that e-books save students an average of \$56.73 per textbook-a welcome fact for students discouraged by the prohibitive cost of traditional textbooks.

However, Assistant Director for Bookstore Operations Cindy Breton cautioned that there are factors at work beside the list price. E-books cannot be sold back to the Bookstore at the end of the semester, nor can they be returned if a student drops a course.

You have to ask yourself, when do I break even?" said Tucker. "When have I saved money? When is it worth the price?" He added that "faculty here are very aware of the price situation, and I'm always out there looking for as many used books as possible."

However, the gradual growth of ebook formats has gone hand-in-hand with a movement to make more course materials available online for free.

Associate Professor of Economics Zorina Khan said that she enjoys reading e-books on Project Gutenberg (www. gutenberg.net) and that she supports alternatives in the textbook market.

"Having choice always increases our benefits," said Khan.

So far, though, many readers prefer old-fashioned ink and paper.

Tve never used [the online supple ment], but I know it exists," said Stein '12, a student in Selinger's introductory government class. "I think it's better for me to have a hard copy of something rather than read it on a computer,"
"I get too distracted when I read on a

nger too distracted when I read on a computer," said Tom Marcello '12. "My mom said reading on a com-puter screen is bad for your eyes," added Chris Li '11.

Studios, labs fix waste violations

BY PIPER GROSSWENDT ORIENT STAFF

Last month, two members of the Maine Department of Environmental Protection (MDEP) paid an unnanounced visit to Bowdoin and cited the College for three minor violations.

The MDEP Bureau of Remediation and Waste Management, Division of Oil and Hazardous Waste Facilities Regulation came to campus to perform routine inspections of the College's handling of hazardous materials and waste.

The inspectors observed the paint shop and motor pool in Rhodes Hall, laboratory facilities in Druckenmiller Hall, the painting studio in the Visual Arts Center, the printmaking studio adjacent to Burnett House, and the painting studio and darkroom facility in the McLellan building.

The three minor violations to the State of Maine's guidelines for handling hazardous waste, which were formally reported to Facilities Management in a "Notice of Violation" were issued to the College on Wednesday. Violations included caps off or not properly attached to containers containing hazardous materials, missing labels on containers, and incomplete inspection logs.

incomplete inspection logs.

According to Manager of Environmental Health and Safety Mark Fisher, all of the violations were "very minor" and were "common human-error issues." Within 24 hours of the MDEP visit, Facilities Management saw to it that all violations were corrected to be in compliance with Maine State regulations.

Fisher accompanied MDEP agents throughout their four hours on campus, and said that it was a "normal, everyday inspection," similar to the inspection he regularly conducts as a part of his job.

Ren Bernier, the College's science center manager and lab instructor, was present when the MDEP inspectors observed the facilities in Druckenmiller Hall and assessed all areas where hazardous materials are handled, including each of the building's 56 laboratories. He said the only violation in Druckenmiller was incomplete inspection logs, which under Maine law, are supposed to be completed daily.

According to Bernier, the College is required by law to train "anybody [in the department] who gets a paycheck" how to properly handle hazardous materials and waste. This includes professors, research technicians, and student summer research assistants. Students enrolled in courses that involve the handling of hazardous materials are supervised by their trained professors and are not involved in dealing with hazardous waste.

Bernier said that MDEP has never shown up for this specific type of inspection during his 23 years at the College. His impression of the September 9 inspections was that the College has a good hazardous material and waste management program in place and MDEP inspectors were pleased with what they observed. MDEP inspectors, Bernier said, are "not going to go anywhere and not find something."

find something."

Facilities Management had not been anticipating the inspection, since visits from the MDEP are always unannounced.

In 2002, the College took part in a national program offered by the Environmental Protection Agency, the Voluntary Compliance Program (VCP). Fisher described the program as "a self-audit process to proactively document and correct any deficiencies that may have been cited in an actual inspection." Participation and subsequent approval clears parties from inspections for five years.

Because it has been six instead of five years since the College participated in VCP, Facilities Management knew that there would be an MDEP inspection sooner or later.

Nevertheless, Fisher described the MDEP's inspection as "a good reminder" of the importance of the proper handling of hazardous materials and waste.

"If you're not clear on the rules,

BSG tackles funding requests in first meeting

BY CATI MITCHELL

In its first meeting, Bowdoin Student Government (BSG) passed four funding requests, all unani-

The first of the four proposals requested \$4,500 for the BSG shuttle service, which takes students to Freeport, Cooks Corner, and Portland on Fridays and Saturdays for \$3, as well as the Brunswick Night Taxi, which provides free taxi service to students on weekend nights.

Despite the expansion of Security's shuttle service, Vice President of Facilities Mike Dooley '10 said he thought that BSG should continue to support the additional transportation options.

"We've always offered this service to students," Dooley said.
"Volume-wise, the Bowdoin Shuttle probably won't be enough at certain times, and we want to give students as many options as possible."

In addition, BSG passed funding requests for the campus newspaper service and discounted movie tickets, both of which were initiated by Dooley, as well as a request to help fund the Polar Bear Nation tee-shirts.

During the meeting, members of the executive council laid out their goals for the upcoming semester. Carly Berman '11, the vice president of student affairs, said she hopes to work collaboratively with Peer Health and the Health Center to help spark a discussion about students' health experiences at the College.

"This will be an opportunity to separate fact from fiction—myth from reality—as well as to identify and deal with actual problems that affect students," said Berman in an e-mail to the Orient.

"We want to increase students' trust in the Center by creating a dialogue addressing concerns which may not have received suf-

TAKING THE LEAD: President of BSG Sophia Seifert '09 and BSG Treasurer Ugo Egbunike review the agenda during Wednesday night's meeting, the first of the year.

ficient attention or discussion in the past."

Also new to BSG this year is the Special Committee on Programming, which will take the place of the Programming Chair.

President of BSG Sophia Seifert '09 said, "We have revamped the position to include a committee, both as a way to delegate responsibility but also as a venue to generate new programming ideas."

"One of BSG's priorities this year is to actively reach out to the community, and programs which support the issues we are discussing are going to be a key part of that initiative," she added.

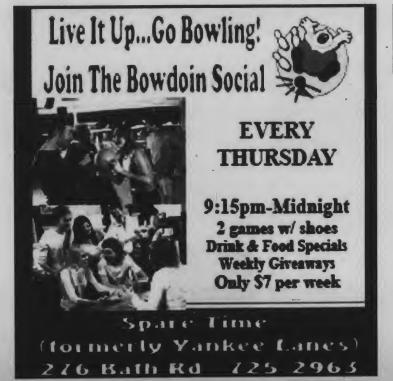

The new committee will be cochaired by two first years, Kris Klein and Derek Brooks, "who have amazing energy and enthusiasm," said Seifert.

Overall, Seifert said she felt the meeting went well. "Even though our agenda focused largely on internal matters and funding allocations, people were being insightful and pragmatic, and most importantly, showing enthusiasm," she said. "I can't wait to see what they do when we really dig our heels in and get some issues on the table."

CORRECTION

Due to an editing error in the September 26 brief, "Maine Day attracts resident applicants," Angus King was incorrectly named as dean for academic affairs. King's correct position is College distinguished lecturer.

The Orient strives to be accurate in all of its reporting. If you believe a correction or clarification is needed, please e-mail the editors at orient@bowdoin.edu.

FEATURES

For Hopley, Arabic 'not just a flash in the pan'

BY EMILY GUERIN

As the first professor of a subject that has never been taught at Bowdoin before, Russell Hopley has a lot to live up to. He has to convince his Elementary Arabic students that getting up for a 9:30 class five days a week is worth it. Additionally, he must satisfy those students who are too advanced for the beginner class and attend a weekly informal, not-for-credit seminar on Fridays. He also must show the administration that Arabic is not a passing fad or, as he puts it, "just a flash in the pan."

So far, things seem to be going well. The beginner class is full and Hopley said he is pleased with his students, who are motivated to learn despite the initial challenges presented by studying a language vastly different from English. Hopley acknowledges that Arabic can be challenging at first.

"There is no real carryover from English or another language," he said. The language is full of "odd, non-Western sounds" that challenge English speakers. Progress is slow," Hopley said. "We're in the fourth week of class and we're still covering the alphabet."

Though Hopley has taught Arabic before, he is most interested in North African and Berber culture and literature, a subject he is currently pursuing a Ph.D. in at Princeton. Hopley's interest in Arabic and North Africa began while living in Libya for two years when he was 10 and 11. His father worked for an oil company and the family moved around frequently, spending a significant amount of time in Indonesia. De-

"Prior to 9/11, being an Arabic scholar was seen as being a bit eccentric, but now it's seen as a lot more relevant."

RUSSELL HOPLEY
POST-DOCTORAL FELLOW AND LECTURER
IN ARABIC

spite the moves, Hopley remained intrigued byNorth Africa. He said he was drawn in by Arab culture because of how "different the culture is but just as robust, as strong as our Western tradition." His interest stuck with him into his college years when he began to study Arabic again at Northwestern University.

Hopley has visited the Arabic world many times. He studied at a university in Jordan and took a job in Syria at the American Cultural Center in Damascus. He describes his job there as "coming at an interesting time," as Syria and Great Britain had just had a diplomatic "falling out." As a result, the government was looking for Americans to replace the British as English teachers.

"They were desperate to hire Americans," he said.

Hopley continued his stint teaching English in Fez, Morocco, a city with "virtually no foreigners." Despite standing out, Hopley said that he didn't feel like an outsider then as much as now.

"There's more of a distance now than before. People are more suspicious, before they were more impressed [to meet an American who spoke Arabic]," he said.

Hopley attributed the change in reception not only to current United States involvement in the Middle East, but also to the presentation of Americans by Arabic media. He commented that 15 or 20 years ago there were very few Arabic television stations but now there are many—including the well-known Al-Jazeera—and they "influence how people are thinking about Americans." Additionally, Hopley said that the recent influx of Americans studying Arabic causes residents of Middle Eastern and North African nations to be suspicious of American interests in the region.

The increased interest in the region and the language has affected how Arabic scholars are perceived at home as well.

"Prior to 9/11, being an Arabic scholar was seen as being a bit eccentric, but now it's seen as a lot more relevant." Hopley said.

more relevant," Hopley said.
According to Hopley, Arabic scholars have evolved in the past decade. He noted that in the past, students of Arabic were people with "a strong interest in long-term graduate programs or Ph.D. study. Now people are more foreign service and business oriented than before."

Hopley said that unfortunately people increasingly study the Arabic language only and neglect the culture and religion, despite the fact that the three are extremely interconnected.

"Arabic can't be divorced from the two," he said.

Students of Arabic "are going to have to deal with the Koran," he said, describing the text as "a cornerstone of that culture."

While Elementary Arabic is just language study, Hopley noted the importance of hiring Robert Morrison, an Islam/Judaism specialist who also joined the faculty this fall. Students with interest in the

Middle East now have an opportunity to study the language and the religion, although the number of classes about the region is still small—only three class are available this fall.

The students who are most adamant about the establishment of a Middle Eastern studies department recognize that adding faculty positions takes time, and seem to be content—for now—with the addition of the two Middle Eastern specialists this fall.

"It's a great first step," said Pack Janes '09, who studied abroad in Jordan and is in Hopley's informal intermediate seminar.

"It can and should only grow from here," Janes said.

While supportive of the Elementary Arabic class, Janes was frustrated that there are no formal opportunities for intermediate students of Arabic to continue studying.

"Not getting credit and meeting only once a week is hard. You can't learn Arabic unless you're over there or studying five days a week," Janes said. Fatourna Kunjo '10 enjoys the be-

Fatouma Kunjo '10 enjoys the beginner class but said that she wishes there were more out-of-class support for the language.

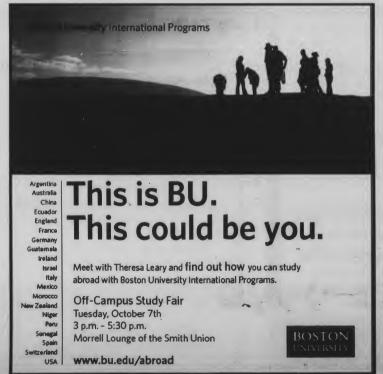

"There's no language table, no department, just class and homework. There isn't any Arabic typing software yet," she said.

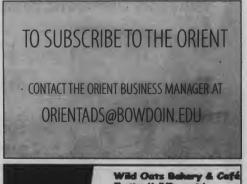

Professor Hopley said he understands the College's reservations about offering a second year Arabic course right away, but he finds that teaching intermediate Arabic only one day a week is challenging.

one day a week is challenging.

"Meeting only one hour a week, it's hard to make progress," he said.

At the same time, he said that students' willingness to attend a not-for-credit class indicates to him that "there has been interest building up for a while."

Dining Service accommodates 'more students than ever' with allergies

BY CAMERON WELLER

Within the last few years, the Dining Service has reached beyond the realm of comment cards and recipe submissions to accommodate its student's preferences. Now, the Dining Service is taking great measures to ensure the safety and comfort of a rising number of students with food allergies.

"Our main goal is to satisfy our customers," said Associate Director of the Dining Service Ken Cardone. "Each year, 25 percent of our customer base changes, so we have to make our own changes to accommodate that."

According to The Food Allergy and Anaphylaxis Network's Web site, milk, egg, peanut, tree nuts, fish, shell-fish, soy, and wheat account for 90 percent of all food-related allergies. If an allergic individual consumes even the tiniest quantity of an allergycausing food he or she could suffer from anaphylaxis, "a serious allergic reaction that is rapid in onset and may cause death," according to the site. The number of Americans with food-allergies has reached higher levels than ever before, with 12 million Americans (one in 25) suffering from some form of food allergy.. There has especially been a noticeable increase in students suffering from Celiac Disease, an allergy to the gluten protein found in most grains.

"Celiac is an allergy affecting a lot of our students, but we have students here with all sorts of allergies," said Director of Dining and Bookstore Services Mary Lou Kennedy. "This year alone I am working closely with eight to 10 students with allergies to ensure that they are receiving and aware of options in the dining halls."

According to Kennedy, parents of students with food allergies often approach her about food options at the College in order to ensure that their children will receive the proper nutrition and attention at Bowdoin. Other times, students will take the initiative to contact Kennedy on their own.

After she is aware of a student having a food allergy, Kennedy will normally read through menus with that student, give him or her a tour of the stockroom reading through food labels, and introduce him or her to head and assistant chefs so the chefs are aware of which students have food alleroies.

"A lot of times I'll be approached by a number of first years within the first few weeks of school, but once they're given a tour and understand the lay of the land, they often disappear and manage on their own," said Kennedy. "The students I work most closely with tend to have either very severe food allergies or multiple food allergies."

In order to make it easier for students with Celiac Disease to find safe eating options, the Dining Service is now labeling all foods that are definitely gluten-free, both on its menus and within dinning halls.

and within dinning halls.
Christine Head '11 was diagnosed with Celiac Disease this summer and said she has not had problems at Bowdoin's dining halls.

"I've never been sick after éating something labeled gluten-free, but they tend to label very obviously gluten-free items, like meat or vegetables," said Head. "I have to be more careful with random items throughout the dining hall, such as meat that is slightly breaded or soy milk, both of which have made me sick before."

According to Cardone, random items such as soy sauce, and some vinegars and sauces are made with gluten. Since the tiniest particles of allergy-causing foods can cause a reaction in those who are allergic, the Dining Service is highly meticulous in its food preparation.

"Even the dust from a mixing bowl could contaminate foods and make students sick," said Cardone. "A few years ago we replaced cereal containers with scoops with the dispensers in the dining halls today in order to avoid cross-contamination among the cereals."

Cardone noted the Dining Service has to be equally careful when deciding where to purchase food products.

"We have to make sure that all of the ice creams and chocolates we buy that should not contain nuts are produced by companies that guarantee their product is not built in facilities that also produce nut products," said Cardone.

According to Cardone, food production companies have become more aware of the rising demand for allergyfree products and have responded by supplying a wider range of options.

"As time goes on, there are more products available for those who are allergy-sensitive as the quality and accessibility of the ingredients needed to produce these products has increased," said Cardone. "A few years ago the alternatives for students with gluten allergies were terrible, and we were not going to present a product that students wouldn't want to eat."

The Dining Service purchases most

MARIEL BEALIDOIN, THE BOWDOIN ORIE

'GLUTEN'OUS: Almost every type of bread and hundreds of other food products contain gluten, a protein that millions of Americans with Celiac Disease are allergic to.

of its gluten-free, dairy-free and eggfree desserts from Associated Buyers, a company that supplies a lot of small specialty groceries and supermarkets such as Morning Glory in Brunswick.

"I love the gluten-free desserts in the dining halls," said Head. "Sometimes they're a bit stale by the end of the week, but if you get them when they're fresh, they're delicious and taste like wheat-baked goods."

Along with making a point to have gluten-free desserts available upon request, the Dining Service commonly makes vegan desserts available. According to Cardone, the recipe for the famous vegan "Sin City" dessert was provided by a student's mother a few years ago and has been a hit ever since.

"We try to have a gluten-free option at least three to four times a week, if not every night," said Cardone. "We have a vegan and vegetarian option at every meal, and whenever we're serving shellfish at one dining hall, we make a point of not serving it at the other dining hall so that students who are allergic to shellfish have a risk-free dining location."

According to Kennedy, the process is about balance.

"We have to balance the needs of the individual while making sure there is food for everybody," said Kennedy. "We recognize the importance of ensuring the students who are extremely limited can be healthy and stay safe."

Coming in: A reflection in honor of 'Coming Out' week

It was dinner time on a Sunday night, early October 2005. Alone with my roommate in a booth at the back of Thorne, I was determined to keep the conversation as general as possible. Something had been festering inside me all day, and now it was pushing its way up into my throat. Avoiding eye contact with my roommate, I tried to keep my lips clenched. But 20 minutes' time found me powerless over my inter-nal burden, and I slipped: "Shelley, I think I might be gay.

I hardly knew what the word "gay' meant. All I could be sure of was my attraction to women, both romantically and sexually, and an overwhelming compulsion to divulge this

It's been three years since that fateful Sunday night, and things have changed. I'm older, I've rea a few more books, kissed a couple of girls, boys, and some people who don't identify as either, and I'm a little bit more comfortable with myself now

Tomorrow begins National Coming Out Week-a seven day celebration of honesty and pride in being yourself. So, to that end, I'd like to convey some of my experience to you in the hopes that my story might prove useful in your own meanderings down the road to sexual discovery.

Now, let's get back to that Sunday

evening. Treading the familiar path from Thorne back to Coleman that night, I felt disillusioned in the way that one might feel if, upon waking, he or she found him-or herself on a transatlantic flight to Paris instead of their bedroom at home-I mean, Paris is great and everything, but what the heck am I supposed to do once I get there? I was deeply anxious. For 18 years I'd imagined a white picket fence, married with kids, heteronormative future—and now that comforting fantasy seemed to have vanished without a trace. Five minutes outside the safe confines of heteronormativity and I was already in over my head.

I desperately wanted something to anchor myself to and define my self with. In retrospect, I probably should have dealt with this feeling of instability by honestly coming to terms with the large array of insecurities that I associated with my new sexual identity. Instead, I did what I thought any logical person in my situation would have done—I began a ravenous quest for sexual and romantic experience. Turning to my teammates, and a smatter-ing of "open-minded" friends and acquaintances, I did my utmost to develop a body of sexual experi-

ence that might somehow validate me in this new sexual field. To my great chagrin, I found that hooking up with people you live and/or play organized sports with is a highly complicated endeavor which rarely turns out well.

Perhaps my methods were a bit excessive but, for whatever reason, I had convinced myself that sexual experience was all I required in order to build a viable identity for myself and relieve my confusion. As time went on, and complications arose, my bed seemed to lay fallow indefinitely, at which point I decided to expand my focus and take up sexuality as an academic pursuit. This decision would ultimately result in me spending my entire junior year at the Universiteit van Arnsterdam...what a trip. But, rather than go into detail about the sexual cornucopia I found in the Dutch discothèques, let's just say I made up for any sexual experience I felt I was lacking at Bowdoin.

Now I'm back at Bowdoin, re flecting on my past for your read-ing pleasure. I'm sure by now you've gathered that it hasn't always been easy for me to figure out where I belong in the grand scheme of things—I've tried on my fair share of masks in the process. At times it has seemed easier to pretend I'm someone or something else but, more often than not, the outcome has been disappointing and vacant.

If anything has changed for me

in the past three years, it's been my commitment to personal honesty. Satisfaction and sincerity have become a package deal. I've learned that if I truly want to understand myself and develop a sexual identity that I feel comfortable with, I need to start from a place of honesty and acceptance—I hope that this Coming Out Week, regardless of your preferences, you're able to

Beat rainy day weather by bringing out the brights

STYLE WATCH RY DAVID YEE COLUMNIST

Don't wear white past Labor Day. It's an old adage of American style. In fact, I've been alerted many times that my assortment of heinously bright clothing comes close to violating the rule. Once the middle of September rolls around and the colors are starting to explode from leaves and fall from trees, people stuff those same bright colors into the back of the et, not to return until springwhich, in the Bowdoin world, means right around graduation.

A search of "white past Labor Day" in Google yields a few practical reasons for the ban. In regions that exhibit four true seasons (like Brunswick, Maine), lighter colored clothing shows stain more easily, making it ill-suited for the mud and salt that may accompany the fall and winter months. Also, perhaps because of the power of the ban, many lighter-colored articles of clothing are summer weight (made of thinner material designed for breathability, not nearly insulated enough for subzero weather). This foul-weather argument is a valid point against light-colored clothing at Bowdoin, especially in the face of the constant rain and snowstorms soon to hefall us.

What happens with the onset of bad weather, however, is tragic, at least from an individualistic/stylistic point of view. Students around campus seem to see the meteorological foulness as reason to dress down and solely don sweatpants, sweatshirt and sneakers-clothing they don't care about. Essentially,

there is nothing wrong with this. If it is within the realm of how a particular person expresses their clothing style, then it is representative of that person's style. But dressing as such is not necessarily just dressing down, but may be dressing out of a one's particular style. If the weather serves to alter the style of a man who would have ordinarily worn a polo, a pair of chinos, and boat shoes, then the weather has drastically hindered his individuality. By wearing a sweatshirt, he becomes visually imperceptible from the person that always wears a sweatshirt, and though image is not everything, it (fortunately or unfortunately) accounts for a significant portion of how a person is perceived. Differ-ence should be celebrated, but during Bowdoin's fall and winter, it is sometimes thwarted.

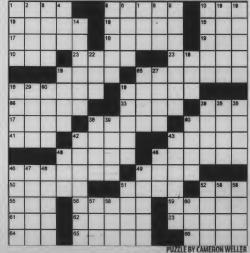

Weather should not prohibit freedom of expression, and those

practical boundaries weather presents are not as hard and fast as they seem. Don't let the weather get you down. In terms of practicality, single articles of thicker clothing (like a sweatshirt) absorb and retain more moisture than their thinner counterparts. Layering thinner articles of clothing achieves the same warmth, and also gives the wearer the ability to shed the outer article of clothing in question if it becomes uncomfortably soaked. Nicer shoes-those leather boat shoes in questionoften offer greater puddle protec-tion than the breathable fabric of sneaker. Concerned about the leather? Weatherproofing sprays offer a great degree of protection. (As they are currently en vogue, it's worth mentioning that high rubber wellies also offer a great degree of protection for women looking to keep dry feet).

To me, this aspect is the most important. On an already dour day, why pick a dour color? Sure, there are concerns of staining, but mud and road salt don't come out of a pair of jeans any more easily than it would a pair of khakis. Clothing should not only serve to make its wearer distinguishable from others, but should also comfortably shelter the wearer from his environment. So don't put away the brights quite yet, because darker colors can't do that on a gloomy day.

If you begin wearing bright col-ors, comments such as, "You look like spring," or "You remind me of Easter," will emerge. But freed from the dearth of color under the storm cloud, one can once again remember the green of spring and the pastelstriped Easter until we are delivered out of the storm. Isn't that what we all want on a rainy day?

ARTS & ENTERTAINMENT

'Landscape' photographers explore natural boundaries

BY ERIN McAULIFFE

Few places on Earth have been left untouched by man, and determining what now constitutes nature, from a polluted river bed to a pristine Alaskan mountain, has become an increasingly difficult task. This is the concept that "Landscape Photography: Politics and Poetics," an exhibit now on display at the Bowdoin College Museum of Art, investigates.

The photographs present a study of the impact of man on nature's most pristine areas. They question the definition of landscape, the importance of humanity, and the role humanity's actions play in a bigger environmental picture.

With works by classic landscape photographers such as Ansel Adams, the gallery also features contemporary pieces by artists Joel Sternfeld, Frank Gohlke, and Sebastião Selgado. The exhibit shows different images that address political and environmental issues in a poetic way. It focuses on the juxtaposition between contemporary and traditional modes.

"I really like Ansel Adams but it is interesting to see how different landscapes can be and what various artists consider landscapes," Kirsten Chmielewski '10 said about the exhibit.

Some examples of these alternative landscapes include Frank Gohlke's "The Sudbury River, Hopkinton, MA," a color photograph that depicts a dirty riverMARGOT D. MILES, THE ROADCON COLORS

EXPANDING HORIZONS: "Landscape Photography: Politics and Poetics," an exhibit on display in the Center Gallery at the Walker Art Building, features artists' interpretations of nature and juxtaposes natural and unnatural landscapes to raise questions about man's impact on the environment.

bank. Using long exposure camera techniques, Gohlke's river emits an ethereal quality not normally associated with such an altered and polluted landscape.

Another print, Sebastião Selgado's "Serra Pelada, Brazil," takes a much different approach to the idea of abstract landscape. A rock quarry teaming with workers provides an organic image; the photograph is reminiscent of

a busy anthill. This photography also presents the idea that humans shape the land in which they live because workers manipulate the landscape.

This idea, in correlation with Ansel Adams's print "Mt. McKinley," a view of nature in its pure form, provides an interesting comparison. Visiting Assistant Professor Meggan Gould weighed in on Adams's work in the exhibit.

"He was certainly a technical wizard, incredibly attuned to nuances of light, and he used his technical mastery to dramatic and monumentalizing effect," she said.

In addition to contrasting landscapes, the exhibit also employs a mix of black and white prints and color photography. The two different types of photos add more overall tonal complexity to the question of politics versus poetry.

"Black and white abstracts the world, to some degree, by removing a visual veneer of color. Neither an advantage or a disadvantage—it's just a different way of looking." Gould said.

"Intermingling multiple visual approaches in a show such as this is important," she added. "I tend to be most excited about landscape work that shows me something that I might not otherwise have seen or that speaks to the fact that it is, in fact, a photographic representation."

"Landscape Photographs: Politics and Poetry" will be on display in the Walker Art Building until October 19.

Acclaimed pianist to perform Ives, Rzewski

BY AKIVA ZAMCHECK CONTRIBUTOR

Local pianist Martin Perry will take the Studzinski stage this weekend to perform a concert of monumental works by composers native to New England—Charles Ives' "Concord Sonata," and Frederic Rzewski's "De Profundis." They are both inspired by 19th century literary figures and are also, despite originating in different eras, profoundly modern pieces of music.

Bowdoin students and faculty may recognize Martin Perry as the founder of the gourmet Henry and Marty Restaurant on Maine Street in Brunswick. However, he is foremost an active and accomplished professional pianist. His concerts in Boston, New York, and Maine focus on 20th-century composers. He recently performed Bernstein's "Age of Anxiety" with the Portland Symphony Orchestra.

Saturday night's program will certainly demonstrate Perry's specialty. He will begin with Ives' Piano Sonata No. 2, known as the "Concord Sonata". Ives was born in 1874 in Danbury, Connecticut, and his music is influenced by the culture of New England in the late 19th century. Ives wrote in "Essays Before a Sonata" that the piece "is an attempt to present [one person's] impression of the spirit of transcendentalism that is associated in the minds of many with Concord, Mass., of over a half century ago. This is undertaken in impressionistic pictures of Emerson and Thoreau, a sketch of the Alcotts, and a Scherzo supposed to reflect a lighter quality which is often found in

the fantastic side of Hawthorne."

The four movements of this venerable piece of American music are dedicated to these figures. Ives employs a juxtaposition of sounds which attempts to illustrate the universe of the four literary minds that resided at some point in Concord. It is a complex and demanding piece that can stun (and delight) the ears of a modern auditions.

"The Concord is highly sophisticated; at the same time, very scary and intimate," Perry said.

Perry is particularly excited to perform the piece at Bowdoin.

"It's fascinating for me to perform a work here that was inspired by Hawthorne," he said. "The Hawthorne movement is the most difficult, most descriptive and exciting. It is the wildest and most revolutionary movement. For instance, Ives' score, written in 1910, employs a 'strip of board' to play on the piano. This was unheard of at the time."

In "De Profundis," Szewski's aesthetic sense reflects the progress of nearly a century in composition. Like Ives' piece, "De Profundis" is nostalgic as well as impetuous, moving rapidly through vastly changing sonic space.

Written for piano and voice, the piano provides a movie-like musical accompaniment to the spoken recitation of excerpts from Oscar Wilde's essay and occasionally provides thrilling, virtuosic interludes.

Wilde wrote "De Profundis" while serving a two-year prison sentence in England after being convicted of "gross indecency," otherwise known as homosexuality. Szewski captures the drama of this essay and assigns different musical styles to different aspects of the text; it well suits the memoir-like tone of Wilde's piece.

"This particular text of Oscar Wilde has a compelling effect on me, philosophically and emotionally." Perry said. "And performing this piece, you really have to go out on a limb. Classical performers are often used to certain walls between them and the audience. In this piece, the pianist must whistle, sing, hum, grunt, play on parts of the piano other than the keyboard. All the while the music is rhythmically intricate, and technically demanding. Szewski does things that no one else does."

According to Perry, the two works

will communicate with one another.

"The pieces couldn't be more different, but at the same time, they
couldn't be more related, because
they are both inspired by authors who
went against the grain. Hawthorne,
Emerson. And Oscar Wilde couldn't
be more individual. Furthermore,
Szewski comes out of the Ives tradition," he said.

"As a student at Juilliard, I really looked out for concerts of this sort. It's not every day a performer will go out on a limb and do things that are potentially catastrophic," Perry added.

The concert will be Saturday, October 4, at 7:30 p.m. in Kanbar Auditorium at Studzinski Recital Hall. Admission is \$20 and free for Bowdoin ID holders and members of the Association of Bowdoin Friends.

'Parterre' grounds gallery

BY PETER GRIESMER
STAFF WRITER

"Parterre," an exhibit by artist Lauren Fensterstock that raises the question of how man fits in with—and attempts to control—nature, opens today at the Bowdoin-College Museum of Art.

The museum invited Fensterstock to browse through its archived works last summer in hopes that she would respond creatively to them. When Fensterstock came to the museum in August 2007, she knew that she was most interested in works of art depicting nature but wanted to be open to what she found.

"I became fascinated with two sets of prints: Views of the Chateau and Gardens of Ruiel" engraved by Israel Silvestre and Nicholas and Adam Parelles, and 'Victoria Regia or Great Water Lily of America' by William Sharp," Fensterstock wrote in the artist's statement she released for the exhibit. "Both are exquisitely rendered and illustrate man's reshaping of nature to express his own sense of place in the natural order."

Inspired by these works, Fensterstock designated a place for them in her collection and created two installations of her own. The first, called "Horizon/Versailles," involves lines of cubic zirconium rhinestones that are laid out to create a horizon around the room and conclude with a groundplan of the Palace at Versailles. The second, "Lily Pond," is a large structure that sits in the center of the room and simulates a pond filled with lily pads, flowers, and rocks. In addition to charcoal piles that simulate rock and Plexiglas that simulates water, Fensterstock created the lily pads and flowers in her work out of quilled paper. The technique of quilling involves rolling, shaping, and pasting paper together to make a certain design.

"Because the 'Horizon/Versailles' piece is so structured. I wanted the lily pond, in contrast, to be a little bit dark, murky, messy, and mysterious. With the lily pond, I wanted to have a series of the Amazonian water lilies to be mysterious, overly dramatic, and a little gothic. I wanted nature to express something a little human. I wanted to show a human landscape and not a natural one. I wanted to look at man's role in cultivating nature," Fensterstock said

Curatorial assistant Kacy Karlen, who does writing and research for artworks in the museum, said she found this artist's view of nature "particularly interesting because she's including implements that are materialistic; nature becomes a fetish."

Fensterstock continued her theme of man cultivating nature with two drawings using ink and gouache. The first is based off the cover of the ninth edition of James Gairdner's "Houses of Lancaster and York," with "The Conquest and Loss of France," a 19-century book bound in green levant with gold tooling and inlaid design. In Fensterstock's rendition, "War of the Roses," a group of flowers grow upward out of a black

BISBEE CONTINUED FROM PAGE 1

A man-about-town (or mill, at least), Bisbee spends 14 to 16 hours each day welding, hammering, and fusing together nails to create a ton of sculptures, literally.

Bisbee, a lecturer in the art department, is in the process of finishing his latest piece—seven cylinders created entirely with nails. Working with 40 boxes of nails that weigh 50 pounds each, Bisbee has welded several sculptures that, when finished, weigh one ton each.

Three of these pieces will be displayed at the Reeves Contemporary gallery in New York City from October 9 until November 8.

Although Bisbee claims to separate his life from what he creates, Professor of Art Mark Wethli, a friend and colleague with whom Bisbee co-directs the Coleman Burke Gallery in Fort Andross, sees Bisbee's unique sense of humor in his latest project.

"There's a certain humor in the idea of reducing the measure of a piece to its physical weight," Wethli said. "But by making each piece exactly a ton, it also introduces a constant that draws the viewer's attention to the great variety of things he's able to create from the identical quantity of iron."

The exhibit will showcase Bisbee's ability to create innovative sculptures with the medium he's used exclusively for the past 21 years-nails. In 1987 he found a bucket of rusty nails and when he overturned it, all of the nails fell out in one iodized clump. He found them fascinating, and has been working with the nail ever since.

"Accidents happened and I followed them," Bisbee said of his nail discovery.

"What impresses me most about his work is that he takes the simplest of premises and then, through repetition, comes up with these very elegant, very sublime works," Wethli said.

Although many artists' works capture impressions of nature, Bisbee's sculptures capture nature's inner workings and principles, according to Wethli.

"It's a lot like certain things we see in nature," Wethli said. "The natural world goes about its work very efficiently. In nature, form follows functhings like birds nests, shells, or seed pods may look beautiful to us, but nature doesn't care whether we find them beautiful or not. John's work is a lot like that. It has an essential quality and it's not made to please anyone, which is very like the things we find pleasing in the natural world."

According to Bisbee, he does not attempt to project meaning onto

NAILING IT DOWN: John Bisbee, professional sculptor and lecturer in art at Bowdoin, spends 14 to 16 hours each day working on pieces for his latest exhibit in New York. Above, Bisbee welds a student's work

any of his work.

"It's not up to me. It's up to the viewer," he said. "Shapes, patterns, rhythms, line density—the pieces have a phenomenal logical life. But it's not narrative stuff. I don't want to shackle these things."

Bisbee believes that all great art should be open to a "myriad of interpretation."

"Frederick Busch [late American fiction writer] said it best-'self expression is for amateurs," he said. "If ou [the artist] really need to say anything about it it's not that good."

Although nails may be an unusual sulpting material, Bisbee has ceased to notice.

"They're like lines now," he said. "It's just my mark."

"Every idea leads to something else," Bisbee said of coming up with fresh ideas. "If I'm using the same thing I have to do something different every time."

His work with nails is only one of the many facets of Bisbee's creativity and originality that contributes to his prominence at Bowdoin as well as outside Bowdoin.

For the past six years, Bisbee has been organizing art at Bonnaroo, a yearly music festival in Tennessee. Bonnaroo organizers found him after they saw his set designs for the band Phish in 2003 and 2004. In 2003 at a Phish concert in Lime

stone, Maine, Bisbee handed out 10,000 rolls of masking tape to concert goers and collaborated with fans as they created an evolving maze of corridors with the tape-a kind of "funnel web city," according to Bisbee.

At the 2004 Phish concert, Bisbee worked with Mike Long '04 and Brian McGregor '04 to power wash, strip down, and varnish 25 maple trees that they then planted upside down at the concert venue in Vermont.

"So when Phish broke up, Bonnaroo bought me," Bisbee joked.

For four summers, Bisbee has ornized community art projects at the festival. He and several former and current Bowdoin students help facili tate a community art project at each campsite at Bonnaroo.

Every city gets security, medics,

and a team of sculptors," he said, "We build a city. We're the mayors of it."

Peter McLaughlin '10 has been involved with the Bonnaroo projects for the past two summers.

"The idea is to have some kind of community art project as a center of each of the campsites," he said. "Each one is generally based on a different material"

Bisbee and his team arrive at Bonnaroo a week before the festival begins and collect materials for the sites. Once the festival starts, the team steps back and lets festival goers build anything they want.

'The whole concept is that they be as interactive as possible," McLaughlin said. "They're also loosely based on his concept of sculpture-taking one thing and multiplying it a million times to see what it can do."

When working with Bisbee, there's never a dull moment.

"He's an enigma. He has absolutely amazing charisma," McLaughlin said. "It's like there's this aura around him. He can walk into a store on Maine Street and he will be friends with every person in the store in 10 min-

"He's an aspiration and incredible," he added.

Sara Griffin '09 has helped organize the project throughout her time at Bowdoin. According to her, getting concert goers excited about the projects can be difficult, but not when Bisbee's around.

"John is the part that gets people excited about the project. He's really fantastic at getting people to trust in what they can do," she said. "He's so energetic and just fun, and that's what people respond to. That's why everyone knows who he is."

Bisbee has been teaching at Bowdoin for 13 years.

"I think of myself as potting soil," he said. "I create an environment where students are free to risk and fail enough times that they eventually find something."

Bisbee's charisma and attitude toward teaching and creating make his sculpting classes some of the hardest to get into at Bowdoin, even for art majors and minors.

"I heard about Bisbee immediately my freshman year from other people who said it's a must-take class if you can get it," said Olivia Madrid '10, a visual arts major in Bisbee's Sculpture

According to Madrid, Bisbee's classes are loosely structured, but he inspires his students to work many more hours out of class than the five he requires each week. "I end up working more than five hours because it's not about how much you work. You want to stay to see how it will turn out," she said. "Bisbee has a very unorthodox method, but for me, it works. It makes me feel like I'm doing it of my own accord rather than checking something off a syllabus."

Bisbee admires the students who take his classes.

"Anyone brave enough to take sculpture is interesting," Bisbee said. "I think it's the most frightening art medium. It's not material, it's not a onception, it's space. It's a scary thing to fail in space rather than on a page.

"I have the greatest respect for him as a teacher," Whetli said. "He brings students to life. He has the ability to draw people out of themselves. A number of students have chosen to become artists after working with him and many others, even if they've chosen other fields, have found a part of themselves they never knew existed."

As far as Bisbee is concerned, his classes help students reconnect with their deepest roots.

"Creativity is the only thing that separates us. Only we have the ability to metaphor," he said. "When I'm teaching, I'm only trying to teach people to get in touch with their most ancient and distinctive trait.

"I can't believe I get to do it every day. I'm so lucky," he added.

After his New York show opens,

he'd like to finish an album he's working on with his band, Bright Common.

According to Wethli, the band's assist, jamming with Bisbee is "always different, creative, improvisational. Always a great time.

And in the mean time, Bisbee will continue to be one of Bowdoin's most distinctive teachers.

CARVING OUT SPACE: Lecturer of Art John Bisbee has taught at Bowdoin for 13 years. He has attained celebrity status during his time at the College, and his sculpture classes are some of the hardest to get into at Bowdoin, even for art majors.

Architect Ogbu to discuss importance of public space

BY RACHEL GOLDMAN

Although a liberal arts education often lends a cold shoulder to the specialized world of architecture and urban planning, San Francisco-based architect Liz Ogbu will remind the Bowdoin and Brunswick communities of the socially, environmentally, and functionally significant role architecture plays in today's world on Monday.

Ogbu provides a pertinent voice: ten years after her own liberal arts education at Wellesley College, Ogbu has channeled her talent and bition into revolutionizing the role of architecture and its relationship to the community.

Following her graduation from Wellesley in 1998, Ogbu traveled to Africa on a Watson Fellowship and attended architecture graduate school at Harvard University.

Currently, she is working for the San Francisco organization Public Architecture. Founded in 2002 by architect John Peterson, Public Archi tecture works to recreate the model of architectural practice. ditionally, architects serve only the wealthiest 10 percent of the population, according to Visiting Assistant Professor Wiebeke Theodore. Public Architecture, however, "works to provide good design to the other 90 percent," she said

Public Architecture is a noncompetitive organization that breaks away from the "star architect" model. Instead, it works to convince architects to donate one percent of their time to working with non-profits in order to solve critical needs of the community.

"These non-profits are usually without good design and renovations because, under normal circumstances, they cannot afford the service of architects," Theodore said

The work of Ogbu and Public Architecture poses several provocative questions including: What can good design do? Why does design matter? What is its role in building a more equitable, fare, and just environ-

This Monday, Ogbu will speak about several of her current projects and tackle these questions while demonstrating the importance of economically and environmentally friendly design.

"Ogbu is really a design activist," Theodore said. "She is not the typical design professional but has found a very important way of engaging communities in the world of architecture. And it strikes a resonant chord because architecture effects so many people beyond just the individual. With just a little attention and effort, improved design can make a community feel vibrant and loved."

Ogbu's talk is especially relevant in today's world, where people are rebuilding existing architecture with an eye for economic and environmental efficiency. Even in Brunswick, the buildings are changing. Renovations are in the works for the old high school and the Armory. The work of organizations like Public Architecture encourages communities to find the best and most resourceful modes of the town's reconstruction.

"Ogbu will show us the opportunity for non-profits and architects to seek out one another and see the potential in their collaborations," Theodore said. "They can dream big and start addressing space problems with the help of local designers. Even students are needed to expand that team. It will be and has to be a collaborative effort."

Liz Ogbu will speak on Monday, October 6, at 7 p.m. in Kresge Auditorium. The event is free and open to the public.

Adultery, mid-life crises abound in 'Attachment'

THE BOOK

Ah, the delight of an extra-marital affair. Authors can't get enough of them and, it seems, neither can husbands or wives Isabel Fonseca's novel "Attachment" is a recent addition to this du-

Jean Hubbard, the American wife of an Englishman named Mark, stumbles upon a missive from his delicious and descriptive mistress, Giovana. Correctly guessing the password to his naughty boyl account, Jean exchanges spicy emails with her adversary. The trajectory of Jean's erotic education follows a steep incline, seemingly in tandem with her husband's physical experiences.

Mid-life crises are a concrete phenomenon and certainly worth inspection. They impact families and sometimes drastically change the lives of more people than the one in crisis. The Hubbards appear in the clutches of such a crisis. The reader might react more to the calamity if Jean were more intro spective. Instead she remains mired in her own psyche. Jean rarely rises above her predicament. Instead of challenging her husband the minute she hears of Giovana, as one would hope a mature woman in a long-term marriage would do, Jean perpetuates the transgression.

Jean is 46, hardly old, and certain-

ly not in decline. She is a successful

writer for a magazine and has a grown daughter. Her preoccupation with her husband's affair and her contradictory silence grow tiresome quickly.

Jean and Mark have chosen to live for an indefinite period on St. Jacques, an island off the coast of India. There, Jean flirts with the mailman and makes half-hearted, embittered ventures the gym. She glares at the toned bodies around her, comparing herself to these younger women. Her sojourns usually end with a perusal of Mark's naughty boyl account. He returns with relative frequency to England and Jean is left to fill in his absences with the snippets Giovana provides

Fonseca is fairly restrained in the virtual exchanges she creates between Giovana and Jean posing as Mark. At a certain point in the narrative, Jean asmes Mark's position as the adulterer. When Jean begins to delve into extra marital explorations of her own, the firsthand reality exceeds the promises of what was offered virtually. Jean's actual experiences are much more vivid than those that come to fruition with the bar rier of a computer screen. She is shocked, and finds herself in over her head.

The visual landscape of Fonseca's novel is particularly detailed. She seems to have the layout of the houses and the decor of each kitchen forefront in her mind. It is an interesting contrast to have a protagonist caught entirely in her head and still have the readers visualizing the luminous shine of wet British pavement. These conditions fail to complement one another. Fonseca's dialogue moves rapidly and is quite humorous, but it is a little too clever to be true of real life.

Jean is far too rooted in her head for her to give us much perspective on the cast around her. The relationships that are used as signposts in her life and as anchors for the novel are underdeveloped, making it difficult to invest in them. Fonseca's knack for description is an asset but she does not seem able to weave it convincingly into the greater tapestry of the novel. This unsuccessful fusion leaves the reader with an eveful of scenery but very little sympathy for

"Attachment" finds some traction in its interesting familial relationships. Unfortunately, this thread is not successfulexplored. Jean's relationship with her daughter is constructed in little more than oblique terms. Her relationship with her parents is never brought into focus. There is the haunting presence of the daughter of Mark's first lover to be dealt with as well. The shades continue to multiply in this story. They clutter it. The increasing growth of the novel's population mars all attempts to probe their depths.

The novel touches on the opacity created by a new era of communication. New personas can be assumed by anyone on the Internet. The tone of an e-mail is easily misread and can lead to pleasant or disastrous outcomes. This conundrum of our age is an interest-ing one. In "Attachment," however, this line of inquiry drowns in the wake of its

PARTERRE CONTINUED FROM PAGE 10

space. Her second drawing, "Fountains," presents a series of fountains arranged against a green background.

Finally, a small group of European watches and rings from the eighteenth century led Fensterstock to produce three small sculptures for the rest of "Parterre" called the "What Happens" series: the pieces include two rotten potatoes and one decayed banana, each inlaid with a series of precious gems.

Like the contradictions between the chaos that reigns over nature and the order man tries to impose on it, Fensterstock noted contradictory elements inherent in her smaller sculptures.

"I like the idea that contradictions can coexist so in some ways," she said. Rather than clarify some things, I wanted to show that the world can be more complex."

These "What Happens" sculptures,

according to Karlen, blur the line between what's attractive and what's re-

A resident of Portland since 2000, Fensterstock has gained national recognition within the past decade. Once an instructor at the Maine Center for the Arts, Fensterstock has degrees in metal-smithing and jewelry, though her most recent work with quilling and drawing has led her to study the decadence of nature.

"Parterre" will be open until January 11, 2009 in the Halford Gallery at the Walker Art Building.

Volleyball downs Colby in five-set thriller match

BY KERRY D'AGOSTINO STAFF WRITER

Women's volleyball began the week with two wiris and two losses at the MIT Invitational this weekend, but closed with a tight victory over Colby on Wednesday.

on Wednesday.

The Colby match was held at Farley,
marking Bowdoin's first home NESCAC match of the 2008 season.

Going into the match, first year Gina Lonati expected a win.

"Our game against Colby is going to be intense, despite our victory over them several weeks ago," she said on Tuesday. "They know our offensive style, but we also know theirs."

The atmosphere in Farley Field House was appropriately animated for such an occasion, and the crowd's enthusiasm was only enhanced with the progressively competitive nature of the face-off

Lawrence Wang '10, in attendance, noted the intensity of both the crowd and the game itself. "They were neck-and-neck for the entire time, in a back-and-forth play with no clear victors for the majority of the match," he said.

The set scores of the match corroborate Wang's observation. Colby opened the match triumphantly at 26-24, but fell in the next two sets at 25-19 and 25-23. However, in the fourth set, the Mules came back to take the match at a definitive 25-20. In the fifth and final set, however, the Polar Bears did not let the Mules off the hook. They finished the match at 15-10, thus securing their first official NESCAC win of the sea-

Colby may have already experienced the Polar Bears' offensive style, but the team was still unable to overwhelm Bowdoin's Kristin Hanczor '12 and Gillian Page '10. While Hanczor carried the match with a career-high 18 kills, Page supported her with 11 kills of her own. Jenna Diggs' '10 added 36 assists and 27 digs. The Polar Bears' experience at the

The Polar Bears' experience at the 2008 MTT Invitational was not as successful. Last Friday, they fell to Spring-field and Endicott at 3-0 each. However, Saturday witnessed their resurgence with Bowdoin victories over Vassar and Bridgewater State with respective scores of 3-1 and 3-0.

Hanczor and Page were again effective against Vassar, Hanczor with 16 and Page with 14 kills to build off of Diggs' 35 assists. Against Bridgewater, Page led with eight kills to Hanczor's seven, while Anna Noucas '11 posted a team-high 11 digs.

Although the matches against Springfield and Endicott were not as successful in terms of final score, they did not come without high points. Stephanie Drumright '11 collected seven kills against Springfield, while Diggs added 19 assists and 15 digs. Hanczor and Page again dominated against Endicott: Hanczor contributed eight kills, Page six kills and 10 digs.

Lonati admitted that the MIT Tournament was disappointing.

"This weekend didn't go as well as the team had hoped," she said. "We lost some tough matches to beatable opponents: Springfield and Endicott. Beating Vassar and Bridgewater State on Saturday did help lift our spirits, but we still need to prove that we've got what it takes to upset the top teams."

The Polar Bears have the opportunity to continue proving themselves this weekend at the Midcoast Classic, which Bowdoin will co-host with Bates. They start off the tournament on Friday with matches against Emmanuel and Keene at Bates before returning to Bowdoin on Saturday for a 10 a.m. match against Rivier College and a 4 p.m. game against Gordon.

ANOTHER DAY, ANOTHER WIN: Senior midfielder Kate Gormley attempts to pass the ball down the flank during the Bears' 3-1 win over Amherst.

Field hockey takes down Amherst

BY KATHERINE POKRASS
CONTRIBUTOR

Turning out to be a bigger threat than anticipated, the Amherst Lord Jeffs applied the most pressure to the Polar Bear defense of any team all season last Saturday. Despite the offensive onslaught from Amherst, and the Bears' first surrendered goal of the season, Bowdoin prevailed with a 3-1 win at Ryan Field.

Securing the victory over the Jeffs required contributions from Bowdoin's top three scorers, solid defensive play, and acrobatics between the pipes from goalkeepers Emileigh Megzert'09 and Emily Neilson'11.

Ella Curren '12 and Madeleine Mc-Queeney '09 got the offense started for the Polar Bears 16 minutes into the first half. From deep in the Amherst corner, Curren sent a long pass across the circle to McQueeney charging to the back post to redirect a shot behind Jeffs goaltender, Emily Vitale.

Just under two minutes later, Ingrid Oelschlager '11 dazzled the crowd when she dangled the ball around an Amherst defender with a nifty left-toright move and shot just inside the left post for Bowdoin's second goal of the half

"I was standing on the end line with a pair of photographers when Ingrid took control of the ball in the offensive zone. After she scored, we all stood and looked at each other—it was the most amazing field hockey goal that any of us have ever seen," said Bowdoin's Sports Information Director Jim Caton.

The last Polar Bear tally came at 27:49. McQueeney '09 put a hard shot on net that resulted in a rebound off of the stick of Lindsay McNamara '09. McNamara quickly gathered the ball and hit it into the back of the cage with a turn-around shot to give Bowdoin the 3-0 lead at the end of the first half

After giving up a penalty corner opportunity, Bowdoin's seven-game shutout streak of the 2008 season came to an end. Amherst forward Haley Douds positioned herself be-

hind the Polar Bear defense to redirect the hard pass from Carly Dudzik into the back of the net at 42-00. However, this would be the only Amherst goal as the Bowdoin defense remained focused and strong until the end of the game.

With the victory, the Polar Bears move to 4-0 in NESCAC play and 8-0 on the season.

Tensions will be high this Saturday at Ryan Field as the Polar Bears look to defend their top spot in the polls and keep the No.2-ranked Panthers of Middlebury College in second place.

The NESCAC rival Panthers will bring with them a potent attack yielding an average of 5.33 goals per game and a tight defense that limits its opponents to 1.33 goals per game.

"Our main focus for the game is to play the way we know how to play, to stay as one defensive unit, and to leave everything on the field," Oelschlager said. "It doesn't matter what they are planning, what they expect toexecute, as long as we play Bowdoin field hockey."

Tennis duo makes ITA finals

BY EMMA POWERS
STAFF WRITER

Tennis team co-captain Alex White '09 and teammate Stephen Sullivan' 11 reached the doubles final of the ITA New England Championships at Williams last weekend.

The duo overpowered teams from Bates, UMass-Boston, Middlebury, and Trinity before falling to top-seeded Ben Stein and Amrit Rupasinghe of Bates, 8-5. One of the pair's most noż table wins of the tournament came in the semifinals against second-seeded Trinity doubles team Gautam Samarth and David Yahng.

Individually, Sullivan and White both went far in the tournament. In their respective singles matches, Sullivan and White both made it to the round of 16 but fell to players from Williams. Sullivan lost to Jeremy Weinberger in a three-set match, 2-6, 6-3, 6-3, while White was beaten soundly by Karol Furmaga, 6-2, 6-1.

Co-captain Alex Caughron '09 proved successful in his first-round match, defeating Middlebury player Jeromino Riefkohl by a score of 6-4, 6-2. In the second-round, however, Caughron faced a tough opponent in

Amherst's Zack Lerner. Caughron was unable to keep up the energy necessary to go on to the next round and fell 6-1, 6-4.

First year Josh Cranin defeated MIT player Ken Van Tilberg to win his first-round match, 6-3, 6-4, but lost to Spencer Feldman of Trinity in a nail-biting super-breaker, 6-4, 2-6, (14-12).

Cranin had four set points in the super-breaker. "I should have won the match," he said. "My opponent was a really solid player and he's quite good but I had him on the ropes."

Oscar Pena '12 and Nico Fenichell '12 both fell in the first round; Pena lost to Middlebury's David Farah, 7-6 (4), 6-2, and Fenichell lost to Alex Chin, 6-7 (6), 6-3, (10-4).

"It showed me that I have to work on my game and change a lot of stuff," Finichell said. "There's room for improvement."

As their fall season winds down, the Polar Bears look to gain momentum in the last couple weeks of the season.

The team will play in the Bates Invitational in two weeks, where four singles flights and four doubles flights will contend. All members of the team will compete.

D'Elia '09 and Davis '10 reach semifinals

BY EMMA POWERS

The women's tennis team showed off its skills recently, playing well at the ITA New England Championships, hosted by MIT last weekend.

Co-captain Sarah D'Elia '09 and teammate Brett Davis '10 dominated the doubles bracket, advancing to the semifinals of the tournament

"The high of the weekend was probably Brett and Sarah making it to the semifinals of the doubles," Emily Lombardi '12 said. "They were playing really well together and it was fun to watch."

"The duo of Davis and D'Elia had an awesome run," Rachel Waldman '09 said. "On the final day of competition they fell to the eventual champions, but they fought hard to the end and gained a lot of experience on the court."

- The power doubles team defeated pairs from Middlebury, Amherst, and Williams before falling to Cary Gibson and Nikki Reich of Williams in the semis.

Individually, D'Elia and Davis both did well, each snagging a firstround singles win.

"Brett Davis had a huge victory over No. 5 seed Meghan McCooey who made it to the semifinal of the national tournament last year. The match was three hours long and showed extreme patience from Davis, who didn't let McCooey's steady ball get the best of her." Waldman said

D'Elia also proved strong on the singles court, defeating Edwina Stewart of Tufts, before falling in the second round to Amherst's Natasha Brown

"D'Elia had a great singles run, making it to the quarterfinals and falling to a solid Amherst player," Waldman said.

Overall, the team gained experience in doubles play, and looks to improve as they head into the

rest of the fall season, and into the spring.

"It was the first intense weekend of the season in terms of the level of tennis at the tournament, and it was hard to jump right in after only a few weeks of practice," Waldman said. "But all together the team performed very well and we had a lot of fun doing it."

"We learned what we need to do to beat some of the top doubles teams...we can play with these teams and beat them if we work on staying aggressive at the net and playing smart," Lombardi said.

The players heads to Middlebury for a doubles tournament this weekend, where they hope to gain experience and improve their doubles play.

"Our goal at Middlebury is to play a lot of doubles, and play good doubles...Middlebury is our chance to practice and improve our doubles' mentality and strategy," Waldman said.

Midseason pickups deserve recognition

GUEST COLUMNIST

C.C. Sabathia won't win this year's National League Cy Young award, and he certainly won't win the NL MVP Award. After all, most players traded midseason relinquish any chance of winning these honors (Manny Ramirez is the other obvi-

COMMENTARY

ous player who may suffer from this fact, but I'll

get to him later). Sabathia was traded to the National League on July 7, playing the remaining 79 games of the season with the Milwaukee Brewers. However, during that time, he was undoubtedly the most dominant player in baseball. He went 11-2 with a 1.65 ERA and seven complete games. In fact, he led the league in complete games for the season despite only starting 17 games in the NL. Stats are stats, but he also carried the Milwaukee Brewers into the postseason-not on his shoulders, but on his arm.

Most pitchers these days are too fragile to single-handedly transform a team. But this year, the hefty lefty started his Brewer career with a 9-0 record and then went on to pitch his last three starts of the regular season on three days rest, which he had never done before. During each of these final three starts, Sabathia pitched at least 100 pitches and never let up more than a run-and all this in an era where an ace's arm is the most protected thing in

And in the very last game of the sea son, the game that clinched a spot in this year's playoffs, Sabathia pitched a complete game against the best team in the National League. Maybe the Cubs were on cruise control, but that doesn't take away from Sabathia's 122-pitch; four-hit, zero-earned run effort. If the Most Valuable Player Award goes to the person who had the biggest impact on a team's season, which in my mind it should, then how can you not give the big man some serious consideration?

Earlier I mentioned Manny Ramirez, the only other player who made this

type of impact on his club. He too was a mid-season acquisition, playing even fewer games for his team than Sabathia did. As you all know, on August 1, the slumping and somewhat lethargic Ramirez punched his ticket to Hol wood in a blockbuster trade that left him playing under long-time Yankee manager Joe Torre in Dodger Blue. Through the first 109 games without Ramirez, the Dodgers were a mediocre one game under .500, three games back in the division. After 53 games with Ramirez, the Dodgers found themselves two games ahead of the D-Backs and six games over .500.

How can one player account for such a turnaround? Maybe it's by having the best numbers in the majors during that 53 game span. His batting average was a massive .396 while driving in 53 runs with 17 home-runs. But maybe even more impressive are his .753 slugging percentage, .489 OBP, and 1.232 OPS Some people have trouble giving an award to a player that only played a third of the season for a team, but without Ramirez, the Dodgers would have been watching the first games of the playoffs instead of winning Game 1 of the NLDS against the heavily favored Cubs. And just for the record, Ramirez went yard in that game as well.

So who should win this year's NL

MVP? Sabathia or Ramirez? If I had to pick, I think I'd go with Ramirez simply because I like seeing him do some damage outside of a Red Sox uniform and as far away as possible from the Bronx. But either way, I think its time we start considering midseason spark plugs for the MVP. Pujols may have the best numbers in the league, and Howard does lead the league in RBIs and HRs (but also has 199 strikeouts and a miserable .251 BA), but neither one of them played his team into the playoffs quite like Ramirez and Sabathi

Voters, instead of giving the MVP award to the best player in baseball (as with Alex Rodriguez in 2003 for the Texas Rangers), give it to the player who most fundamentally changed the trajectory of his team, regardless of when he joined the roster.

PRIOR EXPERIENCE NECESSARY: Sophomore striker Tim Prior breaks away from an Amherst defender in the team's 4-2 win on Saturday.

Men's soccer wins big game over Jeffs

Bowdoin, say hello to Eddie Jones. The young, dynamic first year exploded onto the scene with two impressive assists against Amherst in his first collegiate start.

Jones was a welcome addition to a squad that had been struggling to core goals over the first four games this season

Before Amherst, the men only managed three goals in four ga but a combination of Coach O'Leary switching things in the line up and more confident play by the team's attackers, the Bowdoin offense lit up and scored four goals during last weekend's match.

The 4-2 win was especially impressive considering how ineffective Bowdoin, and much of the NESCAC, had been against a solid Amherst de fense in recent years. However, the victory did not come easily for the Polar Bears as the Lord Jeffs scored first, taking a 1-0 lead 20 minutes into

the game. The Amherst goal ignited the Bowdoin attack, which had been fairly dormant through the beginning of the season. Will Alden-Dunn 10 was the first to respond when he lofted a perfect shot over the Amherst net minder just two minutes after Amherst's opening score.
"We were able to play the ball deep

into their half and apply pressure consistently," Dan Hicks '11 said. "[We had been] working on this attacking mindset in practice."

Minutes after Alden-Dunn dead-

locked the score at one; Jones drilled a missile off the crossbar and paved the way for Nick Powell '12 to notch his first career goal and give Bowdoin its first lead in over 270 minutes.

Minutes before the end of the first half, Jones struck again as he played a gorgeous through ball to Sean Bishop '12 who was also able to score his first collegiate goal with a rocket header to give Bowdoin a 3-1 lead.

"Our freshmen stepped up big,"

Bowdoin did a great job of con-

taining the Lord Jeffs throughout the second half and once Hugh Fleming '10 slotted a shot in the bottom left corner of the goal, the game was all but finished for Amherst.

Hicks continued his recent run of solid play between the sticks as he made six saves to stop a talented Amherst attack.

The Polar Bears have a very small amount of time to relish the first W of the 2008 season as they prepare to host reigning Division III champions Middlebury tomorrow and Bates on

"Middlebury is going to be a little more disciplined defensively. We're probably going to have to be a little more creative in the offensive third of the field," Hicks said. "I don't think we have to change much though because I have momentum from Satur-

These two games are crucial for the Bears as they look to get back on track and build off an impressive win last Saturday. Both weekend matches are set to kick off at noon.

Golf places 5th in NESCAC

BY MIKE BARTHA

Despite a fifth place finish in the NESCAC Tournament, which barely pushed the Bowdoin College Men's Golf Team out of qualification for the NESCAC Championships, senior captain Jeff Cutter and Ryan Blossom '10 both earned All-NESCAC recognition.

Cutter, who finished fifth overall in the tournament with a score of 150 (78-72), nabbed First Team honors after qualifying for Second Team recognition in the previous two seasons. With an 11th place finish (77-76, 153) Blossom secured Second Team honors.

Also performing for Bowdoin were Turner Kufe '10 (22nd, 155), Kevin Smith '11 (29th, 158), and James You 09 (37th, 163).

The team carded a 616 over the two-day tournament. The Polar Bears started day one of the tournament with a score of 313. The next day was better for the Bears as they shot an improved 303 on Sunday's rounds. The team felt the difference between

the two days of play.
"I think knowing the course helped

shave off a few strokes but also our team saw how close we were to teams that had previously been a level above,"

"Everyone knew we had a chance to vin so we just went out there on Sunday and focused on each shot."

In the end, Cutter believes that the urnament was an overall success despite their failure to qualify for the championship tournament.

"To be honest, coming so close to qualifying is quite an achievement for us," he said. "Our team is very proud of the way we played and have nothing to be ashamed about."

Furthermore, Cutter felt the tournament could spark the team for future seasons. "Coming so far and falling short definitely leaves a bitter taste but it will serve to fire us up for next year," he said

For the women, two representatives, Chelsea Young '11 (39th, 118) and Lindsay Luke '10 (41st, 125) partici-pated at the Wellesley Invitational last

This weekend, the men will tee off once again at the Sid Farr Classic at the Waterville Country Club.

Gould '12 leads women's soccer to win

BY AILEEN TSCHIDERER CONTRIBUTOR

Battling two NESCAC opponents this week, the women's soccer team displayed definitive style defeating Bates 2-0 on Wednesday, as well as in the 3-3 tie with Amherst earlier in the

Wednesday brought clouds and a slight rain to Pickard field but did not damper the Lady Polar Bears as they handed the Bobcats their fourth consecutive loss. The game opened with a slight scare as Bates forward Sam Alper broke loose and hit a shot that flew just wide of the net. The Bowdoin en retaliated, fortified the defense and maneuvered the rest of the half easily through the midfield with 1-2

asses and crisp movement.

The Bobcat fullbacks found them-The Bobcat fullbacks found them-selves hustling toward their own goal throughout the half as well-placed through balls played by the Bowdoin midfield split the defense repeatedly. Several notable opportunities were created. With just under 30 minutes remaining in the half, Alex Von Geri-chten '09 served a ball into the box to first year Ellery Gould, whose onetime flick toward the upper left corner, after being batted slightly by the Bates keeper, sailed just high of the crossbar.

After the Alper breakaway, the next closest opportunity for Bates came in the closing two minutes of the first half when the Bobcats were awarded a free kick from around 20 yards out. The ball, however, was a direct shot to keeper Kelly Thomas '09, who handled it easily. The rest of the half was hard fought and as the clock ran out, the game was locked 0-0.

The second half proved fruitful for the Polar Bears. Twenty minutes in, Gould ripped a shot from the top of the goal box that slipped just under the cross bar on an assist by Aceto.

"We are doing a great job switching the point of attack and possessing the ball," Rebecca Silva '11 said.

ball," Rebecca Silva 'I1 said.
Gould struck again in the final five minutes as she managed to control a loose ball in Bobcat territory that she lofted past the keeper and just inside of the left post. It was Gould's fifth goal of the season and she currently leads the team in goals scored.

Saturday brought a host of highe

and lows that ended in a 3-3 deadlock

with Amherst. The Bowdoin women started strong, ping to a 2-0 lead early in the first half. The first goal was scored by Silva who converted off a beautiful through ball delivered by Kit Hamley '10. Hamley proved effective again by finding Gould, who handled two defenders before finding the corner of the goal. The lead was short-lived, how when Amherst scored twice within the last 20 minutes of the half. The second half began with the score tied at 2-2.

nau began with the score used at 2-2.

"We have moments of greatness followed by complete lapses," Silva said.

The second opened with the Lord Jeffs scoring within the first minute but Gould was able to bring back the Bears in the final 15 minutes by knocking one into the net from inside the large strength of the properties have the same entered constraints. box. The game entered overtime but neither team was able to break the 3-3 score. The tie is Bowdoin's third of the season, matching the school's all-time

The Bowdoin women now look to Saturday's game against the Middle-bury Panthers at Pickard Field at 11:30

Women's rugby defeats UMaine-Farmington 79-0

BY CHARLOTTE RYAN
CONTRIBUTOR

Taking on intra-state rival University of Maine-Farmington, the women's rugby team made a defiant statement, winning the game by a resounding score of 79-0.

"The game was a scoring fest with a lot of attacking opportunities," Head Coach MaryBeth Mathews said. "Their victory was a team effort; nine different players scored tries throughout the game, which shows the strength of the team as a whole."

Evident by the score, Farmington could not withstand the Polar Bears' intensity.

"Whenever they got the ball we tackled them and got it back, but they were good sports and never gave up mentally or physically," Mathews said.

According to Mathews, Maria Koenigs '09 played a fantastic game judging when to make tactical kicks in order to advance and maintain possession.

"Her kicks were so good that we didn't lose possession or Farmington was under so much pressure that they kicked it backed or fumbled it," Mathews said.

Koenigs had the job of deciding when to continue passing the ball along the line or kick it further, and Mathews said she read the game well and made good tactical decisions. Koenigs also scored a try in the first half. Rookie Danielle Willey '12 scored two tries in the first half and was very strong running with the ball and advancing the team.

Becky Stevens '11 was responsible for 24 points by scoring a try in each half and converting four kicks in the first half and three in the second.

In the first half, Sara Faurer '11 and Catherine Jager '09 each scored a try and Lizbeth Lopez '09 scored

With a lead of 43-0 after the first half, many alternates got more playing time. Anna Nicol '11 and Danielle Carniaux '10 each scored a try, and rookie Onyi Esonu '12 scored two tries.

"The fact that we still racked up points in the second half with substitutions was amazing," Mathews

Although the University of Maine-Farmington didn't have a B-side, they re-shuffled their team and played a shortened second game. The Polar Bears lost 10-0.

"It was a good experience because defense wins games so we've got to learn how to play defense," Mathews said. The ladies will play University of New Hampshire on October 4 at 2 p.m. After an explosive offensive preformance the team is working on their defense for the stronger UNH side.

"We will put pressure on our opponent and up our physicality a notch and our mental game,"

Stacy Wilson helps select Team Canada

BY EMILY GRAHAM

Accompanied by Bowdoin women's hockey coach Stacy Wilson will be selecting more than just Bowdoin's squad this year.

From September 17-21, 41 of the top female hockey players in Canada met in Calgary for the first round of the selection process for the national team accompanied by Wilson. At the selection camp, Wilson coached one of two teams alongside one of the Team Canada coaches. Wilson said she gave input about her players through evaluation forms.

The selection process for potential national team members begins when the hockey players are teenagers. Those in charge of selection track promising players through their careers and eventually invite them to selection camp, Wilson said.

"There will be four more evaluations and competitive events before the final group is selected for Olympic centralization. During centralization, final selections will be made for the 2010 Olympics," she said.

Wilson said the selection camp helped to determine which athletes would work toward the 2009 World Women's Hockey Championship as well as Olympic centralization in February 2009.

Prior to her work this September, Wilson was involved in the development of Team Canada.

"I coached the Under-22 Canadian National Team development camp in the summer of 2007 and was asked back again this past summer," she said.

Wilson was invited to take part in the next round of selection, which will be held this month, but declined because of her pre-existing commitments at Bowdoin. She said her role has ended for the time being.

Sophomore Michaela Calnan, who plays on the Bowdoin Women's Hockey Team, said Wilson announced to the team that she would be working with Team Canada at one of the team's first meetings of the year.

"Coach was modest about how impressive this position is and joked about how she would rather stay here at Bowdoin with her golf team instead of going," she said. "She realized how beneficial her experience at the national camp would be to our team because she would be exposed to different styles of play and systems that we could potentially integrate into our team's game, which is exciting to think about."

Growing up. Wilson played boys' minor league hockey before starting a women's hockey team at Acadia University, where she went to college. Wilson said the team she formed was a club team, as female varsity hockey at the university level did not exist at the time.

After graduation, Wilson played with Team New Brunswick, making it to several national championships. Wilson also played for Team Canada from 1990 until 1998, and is currently enrolled in the Canadian High Performance Coaching Certification Program.

Bowdoin's athletic culture is one that encourages personal growth and development, Wilson said.

"I know that the players are training and working hard to be the best they can be, and they are always encouraging each other to strive to be better than they were yesterday," she said. "This team culture applies to the coaches as well, thus I know they were happy when this professional development opportunity was presented to me, knowing that it will

help all of us to improve and have a suc-

"Being around high performance players and coaches is always a great learning experience," she said. "I look forward to applying certain aspects of what I learned with our team this year during practice, in games, as well as off the ice."

Sports Shorts

Sprague and Bolmgren lead sailing to mid-table result in lone regatta last weekend

With light winds and still waters plaguing competition, the Bowdoin Sailing Team was unable to compete in two of the three regattas scheduled last weekend.

The group of sailors competing sailed in Larks at the Hood Trophy at Tufts University, where they posted a 16th place finish out of a fleet of 24 boats. A light 2-4 knot northerly over Upper Mystic Lake enabled a total of six races to be sailed over the entire weekend. Viktor Bolmgren '11 and Coco Sprague '11 placed 13th in the A-division, while Doria Cole '09 and Laura Heyl '10 placed 21st in the B-division.

This weekend, the Polar Bears will send co-ed squads to vie for the Smith Trophy at MIT and the Hewitt Trophy at the University of Southern Maine. The women's team will travel to Boston University for the Regis Bowl.

Because Dane Cook Isn't Here to Tell You

COLUMNITIKET SEE 'EM

BY CHRIS ADAMS-WALL COLUMNIST

Dear Hank,

Thank you so much for all you've done in your first year in charge of the New York Yankees. Boy, are we proud of you. To think that you, the Boss's own biological and eldest son, were handed the reigns (along with Hal, of course) to sports' most prestigious franchise is as storybook as it gets (lucky Steve Swindal got that DUI and decided to divorce your sister, huh!). I would have addressed this letter to Hal, too, but I feel like you deserve the majority of our gratitude for a job well-done.

That earth-shattering trade you miraculously pulled off with the imbecilic front office of the Minnesota Twins that brought Johan Santana to the Bronx in exchange for Ian Kennedy and Melky Cabrera-two guys who weren't even on a major league roster by the end of the season-ingenious! And the same can be said about acquiring reigning AL Cy Young Award win-ner C.C. Sabathia from Cleveland at the trade deadline, thus amassing the league's most formidable rotation ever! And A-Rod! Oh, A-Rod! Thank goodness you let the league's biggest loser and his delicate personality walk after he opted out of his bogus contract last October. Not only do we not have to worry about paying someone \$275 million over the next 10 years, but we also have a much better chance of playing everyday baseball with a clear head in the hopes of winning No. 27 without the endless distractions and emotional baggage that came with our former third baseman.

Good for you for standing firm resolute, and staying true to your word of not negotiating with him when he came crawling back to you helpless and homeless. Such character deserves a medal...and a cookie! Also, I'm so glad you decided to bring back Joe Torre for his 13th year as manager. I mean, the guy led our club to the playoffs every single year since his appoint-ment in 1996 for crying out loud. I'd say you made the right choice. Oh, and then at the Yankee Stadium farewell, a classy move on your part to dedicate a large portion of the night to saluting Mr. Torre-as op osed to not mentioning him at all, taking him for granted.

Very classy, again, I must say it. That same bittersweet evening I was also struck by your sheer candor in including the much maligned Roger Clemens in the farewell video on the Jumbo Tron. He contributed just as much, if not more so, than everyone else during those late '90s title runs, and it's nice to know that you can, for one night, ignore the alleged steroid claims to revere one of the more iconic pitchers in Yankee history, for as you and I know all too well, people do make mis-

Oh, forgive me! You don't! How silly of me! Your labeling of Red Sox Nation as "kaka del torro," and your bold reminder to the small market clubs of America like the Rays of your subsidizing them (along with other big market teams) was the perfect cherry on top to your graceful attitude towards the media and human beings in general

Like Tampa Bay will ever make the playoffs, ha! And now, looking toward October, I really don't see how we can lose-excuse me-how you can lose. You've done it all sir, and you have the track record and postseason birth to prove it. And in your first year as boss, I'll say it again. I'll bet most people thought it couldn't be done. Probably thought it was about as likely as Dustin Pedroia winning MVP! Am I right? But you did it: You've risen above your father. So from all of us here in your self-constructed, trademarked Yankee Nation, from the bottom of our hearts, we thank you: for being an exceptional Senior Vice President, and an even better person.

With love,

Fans of the New York Yankees Now to the teams that will actually be competing this fall. These are, as follows, the briefest of all (2008) MLB Postseason predictions.

Angels vs. Red Sox

Anybody who has paid any kind of attention to playoff baseball over the last half-decade knows that Boston absolutely owns the Halos. It's Los Angeles and the league's best record versus Josh Beckett, David Ortiz, and a tad bit more experience than Ms. Palin herself (is that mean?). I don't know about you, but this sounds a lot like the 2001 ALCS. Mariners fans know what I'm talking about.

Red Sox in four. Rays vs. White Sox

I am still stunned that the Tampa Bay Rays made the playoffs (let won the AL East a mere year after finishing with the worst re-cord in baseball). Literally stunned. The ChiSox got lucky and barely beat the surging Twins. It's young versus old in this unlikely clash of titans, and I could go either way on this. But I'm not going to thanks to the return of the sufferer who deserves it more than anyone: Carl Crawford.

Rays in three.

Phillies versus Brewers

I can't believe the Mets choked on the final game of the season, in the final game ever at Shea Stadium. Not even Willie Randolph would have screwed that up, Jerry Manuel. Oh, wait. He did the same thing last year?! The Phillies have to be the underdogs here, and I'm not just talking about this series, but rather out of the eight postseason teams in general, so I am very tempted to pick them. But the C.C. story is just too good, not to mention the potential imagery of a bratwurst race during the NLCS at Miller Park. It's gotta be the Brew Crew.

Brewers in four. Cubs versus Dodgers

The most intriguing match-up this postseason—if I do say so myquite simply because I don't think anybody really knows quite what to expect. It could be the Cubs' year, and a Windy City showdown in the Fall Classic might make base-ball fun again. Then again, if the world knows what's best for Hank Steinbrenner, Joe Torre and L.A. should have no problem in extin-guishing another promising Chicago flame. Karma is a you-knowwhat, but you knew that going in,

didn't you Hank?

Football falls just short vs. Amherst

STAFF WRITER

Down by three with 10 minutes left, the Bowdoin Football Team was poised for a comeback win over Amherst on Saturday, but it was not to be. The Polar Bears dropped to 0-2 to start the season after the tight 31-24 loss.

Quad-captain Gus Spaulding '09 praised the team for its resilient play and said the game "Was a good overall team effort-we just wish the outcome was different."

Just before the end of the third quarter of Saturday's game, the Polar Bears were down 24-7 and the game looked out of reach. However, with seconds left in the quarter, first year Ian Vieira returned a kickoff 62 yards to the Amherst 30-yard line to give Bowdoin

"We fell behind 24-7," said Head Coach Dave Caputi, "but Ian Vieira's kickoff return really sparked us. Being able to play with that kind of emotion regularly is really important for us."

Less than a minute and a half after the inspiring kickoff return, Vieira received a swing pass from junior quarterback Oliver Kell for a 10-yard touchdown. The Bowdoin defensive unit held strong on the ensuing Amherst possession, forcing a crucial three-and-out. Taking a cue from the stalwart defense, the Polar Bears assembled a quick 51-yard drive in under a minute and hit pay dirt on a 35-yard pass from Kell to sophomore Kevin Raymond to put Bowdoin with-

Amherst put the game essentially out of reach on the next possession, a ten play, 67-yard drive that took five utes off the clock and put Amherst up 31-21. A late 31-yard field goal by nior Nolan McNair capped the scoring for Bowdoin.

However, the Bears seemed to have a chance at victory by forcing a second three-and-out for the Lord Jeffs, giving Bowdoin the ball deep in its own territory. While Kell drove the team half down the field, helped in part by

LAYING OUT LORD JEFFS: First year Michael Blouin '12 tackles an Amherst receiver in the loss

sophomore right tackle Chris Grillo's interception-saving reception, the Bears still came up short.

While the Polar Bears made it close, the team ultimately faced a second

"Making the plays that win games is the challenge," Caputi said. "We put ourselves in the position to make those plays with confidence and maturity; we just have to get our guys in a slightly better position to capitalize." Kell continued his fine performance

as quarterback, finishing the game 20 for 37 with 202 yards, one interception and all three Bowdoin touchdowns. Junior linebacker Kevin Zikaris again led

the Bowdoin defense with 14 tackles. According to Caputi, this Saturday's me against Tufts will be similar to last week's against Amherst.

"[Tufts is] very much in the Am-herst mold with a big, strong, physical offensive line who like to run the football," he said. "Tufts has an opportunistic passing attack and they are, defensively, a strong team that does a good job of stopping the run."

While Kell had three touchdown passes against Amherst, Caputi hopes to emphasize the running game this week in the team's match up against Tufts (2-0).

"[Last week] there was improved defensively on the perimeter, thanks to our defensive backs, and our defensive end play has been very good," said Caputi. "We need to be a little bit more consistent in what we do defen-sively to stop the run, and we have to be a little more consistent in establish

ing our running game offensively."

Look for the Bowdoin defense to key on the tough Tufts running attack, and for the team to come out firing.

"Tufts is a team that typically relies on its running game," Spaulding said. "They have some big players and a good running back, so limiting that aspect of their game will be important. But as always, if we play with enthusiasm for the entire game, and not just in spurts, we have a good chance of

Bowdoin plays at home against Tufts Saturday at 1 p.m.

OPINION

BOWDOIN ORIENT

Endowment discussions

'n a recent report, the Sustainable Endowment Institute gave Bowdoin a failing grade on endowment transparency. Only a handful of people, including President Mills, have any information regarding how the endowment is invested. Bowdoin investments are handled by outside managers rather than directly, which means the College must adhere to confidentiality

Though the system is not transparent, it appears to be working well—the Orient reported last week that the endowment earned a 1.3 percent return during the last fiscal year, a number that college officials are pleased with in light of the turnultuous economy. While it is not necessary for all of Bowdoin's investments to be public, it is important that students have a greater understanding of the endowment that funds our education.

The endowment plays an important role at Bowdoin, both now and in future. During the last fiscal year, it accounted for about a quarter of the operating budget, including about two-thirds of the financial aid budget. A growing endowment ensures that the College will be able to maintain its commitment to a liberal arts education for years to come. The endowment, however, is complicated.

There are a number of ways to allow students to become more involved and informed. Bowdoin could make the investments held in its name-about 2 percent-accessible to students in some way. A broader discussion about the role of the endowment could also help to increase understanding; Monday's forum on the financial crisis is a good place to start. How might the credit crunch impact the endowment, and what steps will the College take?

Students should invest in their own understanding as well. Though students have been involved in the endowment in the past-most recently in 2006 with the genocide in Darfur-it should not take a humanitarian crisis for us to start asking questions. The endowment plays an important role in funding our Bowdoin education, and we ought to be more informed.

In 1981, Bowdoin President Willard Enternan, expanding on the role the College might play in socially responsible investing around the apartheid in South Africa, wrote: "Bowdoin's commitment to liberal education, which involves moral and aesthetic dimensions as well as more neutral intellectual concerns, gives us special obligations. As liberal educators, we try to teach our students to integrate a wide range of concerns and to draw facts and values together (if they ever could really be separated) in arriving at their own con-clusions and decisions. ...We should welcome, not flee from, opportunities to show our students how liberally educated people face such decisions

Our commitment to a liberal education and the common good should be pushing all of us-administration, faculty, and students-to always be thinking about ways we can improve ourselves and our surroundings. That includes thinking critically about how the College operates.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Mary Helen Miller, and Cati Mitchell.

LETTERS TO THE EDITOR

Callahan's Op-ed against Collins poorly reasoned

To the Editors:

In her Op-ed last week, Caitlin Callahan asserted that "a vote for Susan Collins is a vote for more of the same failed conservative policies" ("Vote Obama, Allen for change," September 26). An example of a "failed policy" she gives is the appointment of Justice Samuel Alito to the Supreme Court. How she manages to conclude that appointing Alito to the Supreme Court is a failed policy is beyond me. Alito has served on the Supreme Court for less than three years-any assertion on whether his appointment is a success or a failure at this point would simply be premature.

This line of "reasoning" that Caitlin employs in coming to her conclusion does little for her cause. To launch attacks from the assumption that all conservative policies are bad is polarizing and reflects intellectual sloth. If Caitlin hopes to convince anyone who hasn't already decided to vote for Allen to vote for him, she needs to argue convincingly and stop making dubious assertions.

Co-Chair

Bowdoin College Republicans

Conservative Op-ed misrepresents Dems

To the Editors:

In his Op-ed piece last Friday, Steve Robinson ("Coping with con-servatism: Understanding the republican spectrum," September 26) makes a strong case that the conservative movement in America is multi-faceted. It is surprising, then, that he subsequently presents a wholly inaccurate and oversimplified view of the Democratic Party and its agenda.

Contrary to Robinson's argument, Democrats favor responsible fiscal policies. We want to keep deficits low, spend wisely, and reduce taxes for the middle class. Under Sen. Obama's tax plan, for example, 95 percent of working families would receive a tax cut. This is hardly an example of the big-government straw man Robinson decries. If one wants to discuss fiscal responsibility, one should consider the enormous deficits the country has accrued under a Republican administration

On health care, Robinson again condemns a non-existent evil. The Democratic position on health care is simple: It is time to address a crisis that has lingered for too long. The high costs of health care harm businesses and individuals. We must make an effort to bring down costs and increase access, as every other industrialized nation has done.

For too long, political dialogue has ignored substantive issues in favor of sound bites. Steven Robinson's disingenuous claims about Democrats detract from a serious discussion of the issues.

Sincerely, Eamonn Hart '09 Communications Co-Director, Bowdoin College Democrats

In light of financial crisis, bailout necessary

BY JOHN CUNNINGHAM

You should all hope that my understanding of the nature of a "Great Depression" is better than a friend of mine's, otherwise, we may soon be seeing "anarchy, with mobs roaming the streets, looting, and pillaging. Potentially taking us to that point the current course of the financial system. Loathe as I am to say it, the government is now the only institution that has the ability to save us from disaster.

The financial system faces a terrible crisis. Very simply put, because of ir-responsibility and short-sightedness all levels of the housing system, the big investment banks and other financial institutions ended up hold ing a lot of very depreciated mortgage backed securities (MBSs), along with piles of debt they had acquired to buy the MBSs. Unable to finance these debts and those necessary for regular operation, all the big investment banks, in some way or another, ceased to be investment banks. Their demise indicates how much more damage those MBSs will inflict.

The market for the toxic securities has failed. Given the decline in home prices, the MBSs' "real" price should be something like \$0.65 for each dollar originally paid. But trading for these securities has virtually ceased, as participants are unwilling to take on more risky assets or sell assets at the current, hugely undervalued market price-the fire sale price. The fire sale price is essentially the highest price a company can get on an asset it needs to sell to remain

This market failure has dire implications for the entire financial system. The balance sheets on many financial institutions now threaten to announce insolvency, as the value of the assets has just been determi by a failing company's last ditch ef-fort at survival. Financial compa-nies finance themselves largely with

short term loans. When their balance sheets indicate they may be on the verge of bankruptcy, this financing will be far harder to attract, leaving them fighting for survival and certainly unable to provide significant financing for other firms. Banks with significant deposits in them are not in a much better position. With institutions disappearing and stock prices sinking, large depositors will continue their panicked withdraw of money, forcing the depository institutions to hoard cash so as to not fall in the face of banks runs as Wachovia and WaMu just did, or like the Bank of the United States did in 1930.

This collapse on Wall Street will ruin the American economy. Like banks, American companies rely on short-term, and long-term, debt to finance operations. With investment banking divisions frozen and commercial banking divisions desperate to hold cash, companies will cease business investment and nearly halt operations, slashing wages and laying off workers, especially after con sumer spending comes to an equally abrupt halt. Families, once hoping to send their three children to college, will find themselves with incomes unable to meet mortgage payments and student loans totally unavail-

This is, I think, about where the mobs of my friend's image hit the streets.

Fortunately, the government can avoid using martial law by passing the proposed "bailout" and creating a market for the toxic assets, thus unfreezing the financial system. The rough plan is this: The Treasury will use \$700 billion to buy as many of the MBSs' firms that wish to sell at a price determined through a reverse auction, thus assuring it will be above fire sale price. This will solve the root of the market failure-illiquidity, and banks will be willing to trade the assets, knowing that there is a guaranteed buyer and holder

Banks' balance sheets will look far less red. From there, all the problems described above will be, not so neatly, resolved, as the fundamental hindrance will have been lifted.

None of the objections to the plan are sound. The first objections have been made by the House Republi-cans and hold the least ground. Be-ing up for reelection and having your feelings hurt by Pelosi are not valid excuses for not saving the country. The general concern that the government is risking \$700 billion makes no sense. Given that these assets will likely be resold at about the auction price, we can expect the government to break about even.

Another group of dissenters, the free marketers, say that the greedy, stupid banks should be punished and this bailout is an abomination-the free market must be preserved. The first part of this makes sense, except that the terribly irresponsible banks have died or will die on their own accord. At stake are the innocents: competent, responsible, and nec-essary banks-J.P. Morgan Chase, Morgan Stanley, Citigroup, etc.-and the entire American economy. To the second charge, those libertar-ians should take the history lesson my friend is also in need of, during which they will learn where their American boogeyman came from: The last time we were in this position the government did nothing and FDR happened.

The history my lesson friend and the aforementioned free marketers need tells of how we tried not acting in this situation before. Let's learn from that mistake.

The House is set to vote on the bailout today. There are flaws in the bill, but, as I hope is clear, it must pass. So before you go vote for Change or a Real American Hero, write your Congressman or Congresswoman and tell him or her to vote for this bill.

John Cunningham '10 is a co-chair of the Bowdoin College Republicans.

Susan Collins's experience makes her the best choice for U.S. Senate

BY STEVE ROBINSON

As I am sure you are aware of, this is an election year. Politicians' signs adorn every yard and television without political advertisement is a rarity. Among the elections facing Bowdoin students is the Senate race between incumbent Senator Susan Collins and Representative Tom Allen. Although all polls to date show Collins as the favorite by a large margin, this election has drawn national attention. Many believe that should Barack Obama be elected, a senate majority will be essential to achieving "real change". As a native Mainer and a Bowdoin student I feel I can express a unique perspective on this issue.

As a native of Portland and seventh generation Mainer, Tom Allen should be held in high regards by Maine voters who typically view common heritage as a sign of trust. The problem for Tom is that he seems to believe that Maine ends after Augusta. On paper he may seem like a good ole boy but, most Mainer's think he is a phony city slicker. This is an attitude that is reinforced by the

Allen campaign's decision to limit campaigning to the more populated cities of southern Maine. It is no surprise that donations to the Allen campaign have been far less than what was expected.

In fact, Allen had hoped to raise enough money to purchase a campaign bus that he could use to tour the state. Financial limitations have forced Allen to settle for an old van instead. It seems an interesting parallel exists between Tom Allens campaign plans and his ideology. Allens belief that he could raise enough money to buy a tour bus is built on the same unrealistic grounds as his idealistic policy.

The campaign strategy of Susan Collins stands in stark contrast to that of Tom Allen. While maintaining a near perfect floor vote attendance, Collins has still paid attention to all of Maine, not just the southern part of the state. Over the years Senator Collins has earned the trust of the Maine people and cultivated a following that is unique to her. Her support base is not dependent on party lines and this is evidenced by the fact that 30% of Maine democrats

do not support Tom Allen. Furthermore, the voting record of Senator Collins indicates a pro-gay rights and a pro-women's rights tendency. She is also a supporter of stem cell research. These characteristics make her one of the most moderate Senators of the 110th Congress.

However, an article in last week's Orient sought to discredit Senator Collins by tying her to President Bush. The author pointed out that Susan Collins has "voted with President Bush 77 percent of the time." What she was ineptly referring to is the presidential support rating of Susan Collins. The author led readers to believe that this was a rather high rating. What she neglected to mention was that this rating is the fourth lowest in the entire Republican Party. It is clear that empirical evidence suggests Senator Collins is not a fai right republican as the author would have you believe. This same article said that Barack Obama voted with Tom Allen in 2002 against the Iraq War. Huh? That is impossible considering that Obama was not a United States senator in 2002. You would expect the more fervent supporters of Obama to have some knowledge of his career.

It is interesting for me to see the involvement the Bowdoin community seeks in state elections. Part of the unique perspective I am offered is to see how a generally liberal cam-pus feels about my favorite represennot been on the Maine political scene long enough to realize the true impact of Senator Collins's policy making efforts. Susan Collins has demonstrated an ability to play a national role in policy making. This is a quality we Mainers have come to expect ever since the landmark career of Margaret Chase Smith. Senator Collins has shown time and time again that she is willing to make decisions based on what is best for this nation, not just for her state. In contrast, senators such as Robert Byrd, a Democrat from West Virginia, display a propensity to prioritize his state above national matters. One could say that Senator Byrd can "bring home the bacon," better than any other sena-tor. He even secured a Coast Guard base in his state, which happens to be land locked! Senator Collins has also

brought home the bacon, only she has done so in the form of military contracts for BIW and other programs which benefit both the nation and the state of Maine.

and the state of Maine. I encourage the Bowdoin community to become involved in Maine's state elections. However, I urge each and every student to make an informed decision this fall. Do not rely on biased media that belies the truth. While you may consider these opinions to be biased, bare in mind that I make no claims to objectivity. As a native Mainer I have experienced first hand the effects of Susan Collins's career and I'm tellin' you what: Senator Collins is an intelligent voice of reason and moderation in an increasingly polarized Congress. A vote for Collins is not just a vote for the Republican regime- it is a vote for an ncredible woman who has worked diligently to increase the prosperity of this state as well as the nation. No senator represents her constituents' attitudes better than Susan Collins and I am sure that the election results

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin edu.

Several submissions will be selected and published in the October 17 issue.

Statements of Candidacy 2012 Class Council Elections

Class of 2012 President

Samantha Chin

Hello Class of 2012!

My name is Samantha Chin. I'm happy to say that I'm one of the candidates for Class President. At first the transition from Seattle, Washington to Bowdoin seemed daunting. However, I was assured once I stepped foot on campus that this was going to be the best experience of my life. I was grateful to go to a school where there was such a tight-knit community and to be a part of the Bowdoin family.

I want to become more involved at Bowdoin because I want the opportunity to give back to a community that has already given me so much. I believe that the student government is all about the people. Thus, it is important for me to listen to what you have to say and do my utmost to get what you want and need. I have the organizational skills, innovation and dedication to help make your Bowdoin experience even better.

It is my goal to not only strengthen the relations among the first years, but across class lines as well. Your needs could range from establishing monthly freshman parties to freshman sweatshirts or to weekly discussion groups about acclimating to Bowdoin and plans of going abroad.

a strongly believe that one person can make a difference. In high school I was an active leader as President of the Asian Pacific Islander Club and Lieutenant Governor of Key Club. I would love to be an active leader here at Bowdoin.

I fully intend on making Bowdoin perfect for you. If you vote for me satisfaction guaranteed. Thank you.

Megan Kelly

My name is Megan Kelly, and I am running for Class Council President for the Class of 2012. In 2012, we will all be preparing to take the next big step of our lives, looking back on the incredible friendships we have made and the times we laughed, learned, and loved. As freshmen, we have four years together as a class, and as the president of class council, I would work to make them years worth remembering.

In the past, I have participated in leadership programs and initiated fundraising efforts for my high school. I would use my experiences, value your inputs and opinions, and work with the other officers and members of our class to plan and organize outings and programs to create a sense of community as we begin our careers at Bowdoin.

Sage Santangelo

To my beloved classmates,

Do YOU love polar bears?! I do, and because of this I would love to be the proud mama bear of the Class of 2012's white and fuzzy family. You see I have a dream... a dream that our class will be the class of all classes... that we will be remembered. Now in order to accomplish this we need to get cracking. I want to bring an identity to you, class of 2012. I want to show not just Bowdoin, but "the surrounding community and beyond, why we strive for more, and why we shoot higher.

Now you may say, "It's just class president. Why does she care?" I care because I want us to want more. I want us to make a difference. Yes, we are students of an excellent liberal arts college, but we are also young adults who love to have fun and strive in other areas beyond academics. You see, I feel that I can best represent our class because I understand what the struggles and successes are as a Bobo freshman.

I myself am a varsity athlete, I am in clubs, I see you at parties on the weekends, I laugh at the security reports, and I stay up till the wee hours working hard, or hardly working (unfortunately sometimes). I understand you, and because I understand you, I feel I am the best representative of the class of 2012. I want to lead us onto the path of success, and bring us something different, so that we can stand out.

So if you would be so kind, please grace me with your vote, and I promise to end global warming and bring back the polar bears (not literally, I sadly do not have that much power, but metaphorically). Thanks for your time and vote for me!

Class of 2012 Vice President

Zac Crawford

My name is Zac Crawford and I am running to be your Vice President on Class Council. Since Orientation, this freshmen class has made its presence felt on campus. Now we have the opportunity to make an impact on Bowdoin Student Government.

Because we are all so new to campus, we all bring different expectations and ideas to school with us. I believe it is the job of the class council to really interact with the students it represents and present their ideas to the rest of the school. While other classes may have more experience with student government, we have more enthusiasm and a longer future at Bowdoin to plan for. So it is in our best interest to take all of our individual ex-

pectations and make them facts of Bowdoin College life.

As Vice President, it'll be my goal to emphasize the fun side of Bowdoin, after all what else is college about. Therefore, I encourage you to live it up before midterms get you down and vote Zac Crawford for Vice President. It's the sexy choice.

Keel Dietz

Hello fellow members of the class of 2012. My name is Keel Dietz, and I'm running for your Class Council Vice President. Ok, a little bit about me. I'm originally from Minnesota, although I now call first-floor Hyde my home. On campus I'm involved in IM soccer, yoga, whitewater kayaking, swing lessons, an a cappella group, and I make cameo appearances at the martial arts club. I wish I had time to do more stuff, but alas, our time is finite.

So, I bet you're asking yourself, "Why should I vote for this crazy Minnesotan who I may or may not know?" Well, the number one reason I can think of is: I'm passionate. If you vote for me I will do my best to make sure our year together is an unforgettable one. The Class Council gets to plan events and activities for 2012, and electing me will ensure these events are fantastic.

I know it can be easy to feel disconnected from the entire student government process, and I also know that that is a problem. How can a class council represent a constituency it is disconnected from? That brings me the next reason you should vote for me: I'm approachable. I'll make it my mission to make sure the Class Council does what is best for you. I will always be there if you have any questions and/or suggestions concerning programming and other class matters.

Hopefully we can form the strong bonds that will allow us to have the most successful year possible. I hope the beginning of your year has been as fantastic as mine has. Here's to a great year.

Christopher Omachi

Hi, my name is Christopher Omachi and I am running for firstyear class council Vice President. I have been involved in student government in high school for all four years and I look forward to continuing my service at Bowdoin.

As freshmen, we've only been here at Bowdoin for about a month, but I already feel like it is home. There is so much about this school that I love: the students, the food, and the great state of Maine, to name a few. But most of all I love the countless opportunities the Bowdoin student can pursue whether it be in athletics, community service, or a special

interest. Obviously there are many things right about this school, and in fact little is wrong with it. But I have some ideas for our future as a class that will unite us and make our time here at Bowdoin more eniovable.

The first month or so of freshman year is a whirlwind of meeting new people. But after a while, I've noticed people start to get into a routine and meeting new people doesn't seem like such an important idea.

One program I would like to start up is an optional First-Year Dinner with Strangers Program. Students who would like to participate in this program would sign up and then be randomly assigned to a dinner group with freshmen whom they have never met. Bowdoin has done this program before but with staff and students of all grades, and it was a success. I would like to bring this program back and sponsor it by the First Year Council.

Another idea I have for our grade is to sponsor, along with the Bowdoin Outing Club, trips to the outdoors with your floor. I am currently in Leadership Training and I am a huge advocate of getting off campus with the BOC. The BOC does a great job of offering a wide variety of trips, but I think it would be remarkable if we could sponsor trips for each floor to go out and experience the Maine outdoors together.

Class of 2012 Treasurer

Emma Nathaniel

My name is Emma Nathaniel '12 and I am running for class council treasurer. My senior year in high school I was the student government treasurer, where I served both as part the Student Union Executive Board and independently in my treasurer duties. From this position, I gained experience in being part of an organizing body working for students, and in dealing with financial transactions in a school setting.

I want to bring my experience to our class council so that we have not just a great freshman year, but four crazy years. As treasurer, I will work to make sure that we can have lots of programs and activities this year, and still have money left for the future.

According to the BSG, class councils are supposed to help promote the social and structural upty of each class. Having only been her a month, how can we find unity? And how can I help as treasurer? We were told at orientation that it would be the last time all 489 of us were together in the same place un-

til graduation in nearly four years. As treasurer, I will work with my fellow class officers to disprove that statement and bring our class together in fun and original ways throughout the year by providing the financial means to do so and using my previous experience to help organize such events.

I am hard-working and I love being involved in school politics. I also love Bowdoin, and I want to do everything I can so every single person in our class can say the same. If elected treasurer, I promise to devote the time and energy that our class deserves into making this the best freshman year anyone could have hoped for. Thank you for taking the time to read this, and remember, Emma Nathaniel for '12 treasurer!

Zach Perez

Greetings classmates,

My name is Zach Perez, but many of you may know me as "Cast Zach," "Casty", or some other variation that acknowledges the fact that, for my entire time here as a Bowdoin student, I have had a conspicuous red cast on my right arm. I did not have the cast put on until the day before I left for Bowdoin, and I was petrified for how I would adjust to an entirely new life while newly impaired.

I should never have worried though, for all the new people I met at Bowdoin were so willing to help me when I needed it, even if I was mostly a stranger. The kindness I received from other Bowdoin students really impressed me, and in exchange I want the chance to give back in any way that I can. For that, I would be honored to serve as Treasurer for the class of 2012. I have always taken great pride in my management skills, from the clubs I lead in high school to the IM soccer team I helped form at Bowdoin. More importantly, I am never afraid to take initiative and examine all sides of an issue. If elected as your Treasurer I vow to always take the entire class into consideration when it comes time to make decisions. I will never be hesitant to ask all of you for your opinions (so long as you don't mind listening to mine sometimes!) and I look forward to meeting many of you during the campaign. Just look for the guy with the red cast.

Class of 2012 BSG Representatives

Branden Asemah and Jack Hilzinger will serve as the BSG Representatives for the Class of 2012. Their statements were omitted because the election is uncontested.

Voting is open from 8:30 a.m. on **Tuesday, Oct. 7** until 8:30 p.m. on **Thursday, Oct. 9**. All members of the Class of 2012 can vote online at **bowdoin.edu/vote**.

WEEKLY CALENDAR

OCTOBER 3 - OCTOBER 9

PAWAT SERITRAKUL, THE BOWDOIN ORIEN

RED HOT: These fresh chili peppers come from the Bowdoin Organic Garden, which produced a record amount of food this fall.

FRIDAY

LECTURE

"France and/in Europe:

Immigration and National Identity"

UCLA Professor of French and Francophone Studies and Comparative Literature Dominic Thomas will discuss French immigration policy.

Room 107, Kanbar Hall. 2:30 p.m.

SCREENING

"The Vagina Monologues: Stories from China"

Professor and director Ai Xiaoming will discuss adaptations made by Chinese interpreters to "The Vagina Monologues" following a screening of the American

Beam Classroom, Visual Arts Center. 7-9:30 p.m.

CONCERT

Esperanza Spalding

Spalding, a jazz composer, bassist, and vocalist who recently performed on The Late Show with David Letterman, will give a concert with her quartet. Kanbar Auditorium, Studzinski Recital Hall. 7:30-9:30 p.m.

FII M

"City of Men"

The Bowdoin Film Society and Latin American Student Association will screen this Brazilian film, which highlights the friendship between two teens in gang-infested Rio de Janeiro.

Smith Auditorium, Sills Hall. 7 p.m.

SATURDAY

FILM

"City of Men" Smith Auditorium, Sills Hall. 7 p.m.

CONCERT

Martin Perry, Pianist

Perry will perform Frederic Rzewski's "De Profundis" and Charles Ives's "Piano Sonata No. 2." Kanbar Auditorium, Studzinski Recital Hall. 7:30-9:30 p.m.

SUNDAY

GAME

Intramural Quidditch

Maine Street Station breaks ground

BY MARY HELEN MILLER **ORIENT STAFF**

As soon as 2010, traveling to Boston could be as easy as crossing Maine Street and hopping on a train.

On Tuesday, Governor Baldacci joined members of the Brunswick nunity and others for the of-

ficial groundbreaking ceremony of Maine Street Station. Even in spite of the dire state of the economy, construction for the \$25 million development is scheduled to begin

"We are getting back to basics in our economy," Baldacci said in his address at the ceremony. "This makes resources are there to support it.

Plans for the five-building development, which is scheduled to open in July 2009, include spaces for retail, an inn, offices, condominiums, and a train station.

Bowdoin has signed to lease two

Recent grads stay in Maine after Bowdoin

159 alums from classes of 2000 to 2008 currently work in state

BY CATI MITCHELL

This spring, hundreds of Bowdoin seniors will walk across the stage at Commencement. While many will head off to jobs and graduate programs across the country and around the world, some will join the nearly 1,500 Bowdoin alumni living and working across the state of Maine.

Based on figures provided by the Office of Alumni Relations, Maine has been a popular destination for recent Bowdoin graduates. One hundred and fifty-nine alums from the Classes of 2000 to 2008 are currently working in the state.

Though Bowdoin students may be familiar with some of the more well-known alumni living in the state, including Congressman Tom Allen '67 and Olympic marathon champion Joan Benoit Samuelson 79, there are also a number of recent graduates doing work across

Rep. Tom Allen '67 discusses U.S. Senate contest, economy

The Orient speaks with the U.S. Senate candidate as Election Day draws near

BY NICK DAY

Six-term Maine Congressman and Bowdoin alum Rep. Tom Allen '67 (D-Maine) is making a bid for the U.S. Senate on November 4, hoping to incumbent Sen. Susan Collins (R-Maine). The Orient caught up with Congressman Allen at his campaign Iquarters in Portland last Friday to discuss the upcoming election, the state of the economy, and the Red Sox. [Editor's note: Portions of this inter-

view have been edited for length.]

The Bowdoin Orient: Since ye announced your candidacy for U.S. Senate in May 2007, what has been your message to the voters of Maine? Has it changed since you launched

your campaign?

Rep. Tom Allen: Throughout the campaign, I've been talking about the economy and jobs, about health care, energy, and Iraq, and the dif-ferences I have with Susan Collins TOM ALLEN TO VISIT CAMPUS When: Today, 1:30–3 p.m. Where: Morrell Lounge, Smith Union Admission: Free

on all those issues. And that hasn't changed. It's the same subject matter. We spend less time on Iraq now, more on the economy than we did before... During the summer, when people were so upset about potential heating oil costs and diesel gasoline costs, we spent more time talking about energy, and the energy plans. And now it's mostly about how we got here with respect to this eco-nomic meltdown, and Wall Street and the credit markets and where we need to go. So even though I've been talking consistently about the same four issues over these two years, there is a change in emphasis to respond to what people are feeling at the moment.

Orient: The economic bailout package was passed by Congress and signed into law by President Bush on October 3. Since then, the stock

Mills, DeCoster hold forum to address financial crisis

Presidents Barry Mills joined Associate Professor of Economics Gregory DeCoster to offer a lecture on the state of the economy in Studzinski Hall on Monday, October 6. The two speakers addressed a full auditorium.

"I wanted to speak with all of you during this time of economic uncertainty bese I have a background in the investment world, and I feel that these issues are complicated," said Mills, a former partner at Debevoise & Plimpton law firm. "I view this as a great learning opportunity for all of us to come together and understand the situation a bit better."

Mills assured the audience that Bowdoin students and their families need not worry about the state of the College's finances.

"We are operating the College in a way that will allow us to withstand a whole lot before we need to worry about the state of the College," said Mills "What's really amazing is that Bowdoin is currently worth more than Iceland."

According to Mills, the mortgage backed securities and the credit-defa swap systems that evolved in the '80s were "instruments that really changed the world of corporate finance.

When people were borrowing money for houses and putting down 15 to 20 percent, the market that Fannie Mae and Freddie Mac were creating expanded the real estate market and allowed a lot of people to buy homes that before never could," said Mills. "That's when the wheels started to comes off the bus."

President Mills turned the microphone over to DeCoster to focus on the current state of the economy.

DeCoster described the U.S. economy as an engine lubricated by oil. He is the credit market, and right now we are witnessing events in the subprime mortgage market that are taking the oil out of our economy and therefore putting it at risk of being unable to function.

"The Chairman of the Federal Reserve said, 'If we don't do this, we may not have an economy on Monday. When the Chairman of the Fed says we might not have an economy on Monday, he means we may not have an economy on Monday," said DeCoster. "If companies can't borrow, they can't pay their workers, and the workers can't buy anything, and stores go out of business, and slowly the oil leaks out of the engine. We v riding that edge, and now we're still rid-ing that edge."

DeCoster said that in order to fix the problems with the economy, the Federal Reserve needs to identify which banks are solvent, which banks are operating, and which banks need a little help. In order to identify which banks need help and which banks are operating correct-ly, the Federal Reserve needs to create a

"You need a big, reliable buyer to create a market," said DeCoster. "The biggest reliable buyer out there is the U.S. government, because it can pretty much just print out the money."

At the conclusion of the lecture, one audience member asked whether or not the economy is facing a fullblown recession.

"If we're not in a recession, we're pretty close to being in one, and it's going to take a long time to get moving again in a positive way," said Mills. "We consider the lingering problem of credit card debt and have to ask when it will play into the state of the economy, as well. It's pretty scary."

MARGOT D. MILLER, THE BOWDOIN ORIENT

SOUARE-TABLE DISCUSSION: BSG's second meeting of the year, which took place in Daggett Lounge on Wednesday evening, focused its discussion on the social scene at the College

BSG CONTINUED FROM PAGE 1

the implications of maintaining such a close-knit residential college community. BSG plans to use these topics in the future for a larger public discussion.

Members then moved on to discuss what the most effective venue for campus-wide discussions of gender and sexuality issues would be. Representative Justin Foster '11 suggested that BSG collaborate with Residential Life, which has already begun planning its response to social developments on campus. Seifert spoke in support of co-sponsorship with Residential Life, and BSG members spoke about discussion outlets such as a series of opinion pieces, increased action by groups such as Bowdoin Men Against Sexual Violence (BMASV), or a live ussion. However, the organization made no decision on Wednesday to pursue a particular solution.

Representative Ian Yaffe '09 said that BSG's conversations about the Ladd House party should have taken place sooner and that BSG does not always get campus-wide discussion started quickly enough.

"We're not able to get that done in a way that captures the momentum of the event," Yaffe told the Orient. "[Wednesday's] conversation needed to happen a while ago."

Other notable items from this week's meeting include the conclusion of firstyear elections, which saw a 71 percent turnout. Class of 2012 President Sage Santangelo, along with Vice President Christopher Omachi, Treasurer Emma Nathaniel, and BSG Representatives Branden Asemah and Jack Hilzinger will comprise the Class of 2012's Class

Additionally, BSG looks forward to facilitating an open dialogue about student's perceptions of the Dudley Coe Health Center. Next week, the Judicial Board and Sexual Assault Board will deliver their annual reports to BSG. Representative Kristin Gunther '09 said that while "people like to talk about sex," next week's discussion should be a serious one.

ALLEN CONTINUED FROM PAGE 1

wildly, and Americans continue to harbor doubts about the health of nomy. What sort of steps do you think the federal government can take-and should take-to try and alleviate this crisis?

Allen: Well first of all, the bailout package was designed as a first step. It was designed to stabilize the credit markets-particularly the short-term credit markets-and it will over time I think, help. But it clearly wasn't enough, and you're still seeing interventions by the Treasury, interventions by the Fed, agreements with central banks around the world to reduce interest rates, or one way or another to try and restore confidence...But I will say this-the level of economic anxiety right now in Maine is the highest that I've ever seen it in my lifetime. People are beside themselves, because the cost of almost everything they buy is going up, and their wages are staying stable or going down.

Orient: In debates and speeches, Senator Obama and Senator Biden have both painted the current economic crisis as essentially eight years of failed Bush economic policies. Do you think that this is a fair characterization, or do you think that it's more complicated?

Allen: I think it's a fair characterization. I think it's probably not an absolutely complete characterization, because in the '90s, there was a movement-driven by Republicans, but lots of Democrats went along with it-to free up the investment banks and allow more flexibility in making investments...[Investment banks] were able to leverage themselves more than commercial banks, they didn't have the same kind of oversight. But overall, I think it's a fair charge for two reasons. Number one, the movement for deregulation reached its full flower during [the Bush] administration...and the attitude, that the markets take care of themselves, that government is more often the problem than the solution, was pervasive. Secondly, what really weakened this country, and was a substantial contributor to this crisis is the Bush economic policies, specifically those big tax cuts for the very rich, which enacted in 2001 and 2003 and 2006 Those packages together, stripped and you about this-but \$1.2-1.5 trillion out of federal revenues in seven years. And then you add to that the invasion of Iraq, which has already cost \$600 billion in direct costs...So when this economic crisis came, we were trying to do a stimulus package, we were trying to do a rescue package, on top of a national debt that had grown by \$4 trillion in

Orient: During the presidential debates, Senator McCain has talked a lot about earmarks, and the proble that come with them. But part of the iob of a U.S. Senator is to bring funds home to your state. How do you feel about earmarks?

Allen: Well, John McCain has spent a lot of time complaining about earmarks. There are good earmarks, there are bad earmarks. Most of them make an awful lot of economic sense. Some people would say, 'well, we want to eliminate them, but if you eliminate them, the federal budget gets set by the Office of Budget and Management, who by and large, don't have a clue about specific states, and that's why the more democratic—small "d"—ap proach is to essentially share federal revenues [among states]...the State of Maine couldn't have funded the Casco Bay Bridge without stopping all trans-

PHOTO COURTESY OF TOM ALLEN FOR U.S., SENATE

CAMPAIGN TRAIL: Maine Congressman Tom Allen speaks at a community supper in Lewiston. The Democratic contender is running for a U.S. Senate seat on November 4.

"It's particularly important that young people take on the responsibility of being citizens. Which means following what's going on, being engaged, supporting candidates that they care about."

> REP TOM ALLEN (D-MAINE) **CANDIDATE FOR U.S. SENATE**

portation projects for years... I think that the number of earmarks needs to be driven down, the amount of money that is parceled out in earmarks needs to be driven down, but I don't think that they can be or should be effectively eliminated.

Orient: What issues do you think are most important to young Americans-and young Mainers-today?

Allen: Well, the economy, jobs, energy, and climate change... The cost of a college education for many young people is also a big deal. I know there are plenty of people at the University of Maine system who can't afford to buy the books for the courses that they take. And this Congress, under Democratic leadership, has increased the amount of Pell grants, we've reduced the interest rate on student loans... I know that a lot of young people are also concerned about Iraq and our foreign policy as well. But in terms of affecting people directly, it's mostly the economy and health care, and education.

Orient: You mentioned the cost of a college education. At many private colleges, including Bowdoin, tuition hovers close to \$50,000 a year. Do you think that there's any reason, any need for the government to step in directly to try and contain the ballooning costs of a college education?

Allen: I don't think that the federal government is going to try and micromanage the budgets of private institutions, I just don't see that happening. The rapidly rising costs for higher education is a federal budgetary issue, as well as a state and university and private college issue. But I find it hard to believe that we have enough collective wisdom in Washington to figure out what higher education should cost... I just think that this is a competitive environment, for private college, and I don't have much confidence that the federal government could

Orient: Even before the housing crisis and credit crunch, Brunswick was already anticipating an economic slowdown, with the closing of the Brunswick Naval Air Station (BNAS) in 2011. In what ways do you see the base being redeveloped?

Allen: Well, clearly the base is a

great development opportunity. The

portions of the base that would be available for development is a terrific opportunity for Brunswick. If it's like other military bases that have been closed down, there is a period of time where the existing jobs get lost, and it takes a while to bring in the new businesses, especially in this kind of climate. But, that's something at the local level, the state level, and what I would try and do as a United States Senator, is to help that process along.

Orient: You've been involved in politics a long time, including 12 years in the U.S. House of Representatives as a Congressman from Maine's 1st District. A lot of other distinguished Bowdoin grads, including former Senator George Mitchell (Class of 1954) and Joshua Lawrence Chamberlain (Class of 1852) have been dedicated public servants. What would you say to a Bowdoin student interested in going into politics or public services

Allen: Well, particularly if you are going into elective office, make sure that you have a fall back career. I think it's important that for young people, public service ought to be thought of as a part of your life, but not the whole of it ... I was in the private sector for 20 years. I'm not saying people have to do that, but people who run for the legislature right out of college can find that they spend a decade or so in a state legislature and then come out with the skills of a generalist...but not with a career or a ne of work that they can go back to. So I think that it makes a lot of sense to have a career. It doesn't have to be in the private sector, it can be in the non-profit sector, or the public sector. But elective office is something I think people should go into knowing that you can win or lose it at any time. It's particularly important that young people take on the responsibility of being citizens. Which means follow ing what's going on, being engaged, supporting candidates that they care about. This is all about we, not just me. Governments are the way that societies act collectively, for pursuit of the common good.

Orient: The Red Sox and Tampa

Bay are playing Game One of the ALCS tonight. Are you planning on watching the game?

Allen: I am, I have an event in the middle of the Red Sox game tonight, I have to go off, but I'm going to watch

Orient: Any predictions on the outcome of the series?

Allen: I think it's a hard one to call,

probably because I'm not as tuned in this year. But this Tampa Bay team is real...on the other hand the Sox are very seasoned. And they've been here enough so that I don't have any doubt they'll probably be playing at a high

Orient: Still a Manny fan? Allen: Well, Manny's gone, I'm a Jason Bay fan.

ELECTION '08

McCain, Obama address FAFSA, loans

Though students and families may be concerned with the future of fi cial aid given that college costs have increased by almost 40 percent over the past five years, the current presidential campaign has, for the most part, turned its focus elsewhere.

"I think education, and higher education in particular, is not high on any-one's list," said Director of Student Aid Stephen Joyce. "Realistically, it's not the most important national priority right

Although the issue is not at the forefront of either John McCain or Barack Obama's campaign, John McCain and Barack Obama both propose to tackle the staggering fees students face by changing the current financial aid sys

Accessibility is one of the problems applicants face. The current Free Appli cation for Federal Student Aid (FAFSA) is long and complicated, and its com plexity may deter some eligible students from applying for aid.

According to Joyce, Obama and Mc-Cain both propose simplifying the pro-

"McCain proposes a simplified FAFSA, the consolidation of existing tax credits and federal grant programs and better, clearer information for students and parents as they make college decisions," said Joyce. "Obama would also simplify the aid application process by eliminating the FAFSA and using a check box on the federal tax return to indicate an interest in aid."

Another issue students face when ap plying for financial aid is affordability, and according to Joyce, "both parties

"I think education, and higher education in particular, is not high on anyone's list. Realistically, it's not the most important national priority right now."

> STEVE JOYCE DIRECTOR OF STUDENT AID

are quite concerned."

Given the rising costs of higher education, some families face difficulties when it comes to funding. Each of the candidates has proposed programs to alleviate the problem.

McCain's Web site states that he plans

to consolidate financial aid programs in order to simplify the process for students and administrators. In addition, McCain supports loans from the private sector. Whether this support implies the reduction or elimination of grants or public loans is unclear.

Obama takes a different tack. In a speech given on November 11, 2007, Obama stated that he "will create a new and fully refundable tax credit worth \$4,000 for tuition and fees every year, which will cover two-thirds of the tuition at the average public college or

Students who receive this credit will be required to perform 100 hours of public service a year.

Obama's Web site notes that because this plan, called the American Opportunity Tax Credit, is refundable, it will the families who are most in need. However, Joyce pointed out that this credit will not affect people in the lowest income bracket who are not pay-

In addition, tax credits on tuition sometimes end up paying for other ex-penses, especially in low-income fami-

"A tax credit gives families more discretionary income, but it's never clear whether the money is really paying tuition or whether families have higher priorities like heating bills, mortgage payments, health insurance, or medical expenses," said Joyce.

The proposals laid out by Sena-tors McCain and Obama are centered around one major problem: the growing cost of higher education

In recent years, Bowdoin's total costs have risen by about five percent annually. Fees for the 2008-2009 academic year, which includes Tuition. Room and Board, and an Activities Fee, totals \$48,570. This figure is close to the cost of many of Bowdoin's peer institutions.

Some argue that the escalating cost of college is not due to the actual needs of schools, but to the fact that people will pay for education, regardless of cost.

Joyce, however, is "convinced that

[the latter is] not the case at Bowdoin and not many colleges are operating like that." Schools, he says, do not want to deter good students with high costs and are raising tuition mainly to cover their own expenses.

Major expenses at Bowdoin that contribute to the annual increase in tu-ition costs are the salaries of professors, faculty, and staff, rising oil and electricity bills, recent increases in the cost of paper, the necessity of having the latest technology, and, ironically, financial aid.

These expenses, Joyce said, make it difficult to cap Bowdoin's cost at the two or three percent per-year increase in the

Higher Ed Act pledges to ease student burdens

This year, the College has begun work to meet the stipulations of the Higher Education Opportunity Act (HEOA) which was passed by Congress and signed into law on August

The act, which was five years overdue for reauthorizing the 1965 Higher Education Act, incorporates a variety of seemingly unrelated initiatives all meant to make colles and univer-sities more affordable and accessible Ultimately, it seeks to increase the number of college-going Americans.

Director of Student Aid Steve Joyce

said the legislation passed was cremental...not historic or groundbreaking."

According to Joyce, the Student Aid Office is still working through its response to the act.

Transparency is a major theme in the HEOA, which holds colleges accountable for tuition hikes by requiring them to report their reasons for

increasing fees.

Joyce had "mixed feelings" about colleges reporting to the govern-

"Consumers certainly will benefit from having access to this information, and it's appropriate that Congress wants to know that the money they're putting toward education is being used effectively," he said.

On the other hand, Joyce said, "This bill is asking colleges to do more-to report more, to keep track of data, and present that data in a clearer way

HEOA provides students with fair and full information about their bor rowing options when taking out and repaying student loans, including the terms and conditions of both federal and private student loans. However this aspect of the bill does not impact Bowdoin, which last year replaced all oans with grants and does not provide families with selected lender lists.

The act also simplifies the compli cated seven-page Free Application for Federal Student Aid (FAFSA) by reducing the number of questions, frontloading key income indicators, and creat an easy-to-navigate two-page FAFSA-EZ form for low-income families.

One of the most positive features of HEOA is the vow to make college more affordable for low-income and non-traditional students by allowing them to receive Pell Grants, federal grants for students with estimated family contributions under \$40,000

More money for Bowdoin's Pell grant recipients, who make up roughly 12.5 percent of the student body, will "help us maintain ecoic diversity on this campus, said Joyce. However, he pointed out one loophole: more grants have been authorized by Congress, but have not necessarily been funded.

"My concern is that they probably won't be funded, at least in the near term, or won't be funded with significant increases," he said.

Additionally, the bill creates a new scholarship program for veterans and military families and ensures equal college opportunities for students with disabilities.

Another major goal of the HEOA is to strengthen the U.S. workforce and its competitiveness, especially in science. Its expansion of loan forgiveness for a variety of professions may influence Bowdoin students' priorities in career planning.

"Our hope is that students are em-

"The College is already doing many of the things the act requires: however, some things are new. The act covers many different areas of the College and each of the senior officers is assessing how this impacts her or his area. Where necessary, we will coordinate our efforts."

> TIM FOSTER **DEAN OF STUDENT AFFAIRS**

powered to select a career that they feel passionate about where the starting salary becomes secondary to true career interests," said Director of Career Planning Tim Diehl.

Specifically encouraging students to enter public service jobs, the act reinforces the importance and de sire for Bowdoin students to serve the common good upon graduation,"

The bill encourages colleges to adopt energy-efficient practices, field in which Bowdoin leads the

Coordinator for a Sustainable Bowdoin Keisha Payson said she hoped Bowdoin would profit from oney the act set aside for grants to colleges promoting sustainability.

"We have a list of things we want to do, but not enough funds," Pay-son said. "We'd love to be one of the schools that benefit."

Grant money, for which colleges must apply, will be made available some time in 2009.

In addition, HEOA provides students with advance information on textbook prices to help them plan their expenses before each semester, and it sures that colleges and faculty have full textbook pricing information when aking purchasing decisions

The Bowdoin Bookstore already posts its book list online, including oth new and used prices, and as of Fall 2008 it gives students the option to buy their textbooks in advance so that they can secure less-expensive used books.

We believe we are already in compliance with most aspects of the act, so we don't expect it to change our business practices as radically as it might at other colleges," said Course Materials & General Book Manager Michael Tucker. "The only change we foresee is the posting of ISBNs online along with our book list."

"Anything that gives students more choices, provides more transparency, and forces textbook publishers to rethink their current business practices is a good thing in our opinion," said Tucker. "We understand students' frustrations regarding textbook pricing and we are committed to doing everything we can to keep prices down."

The bill incorporates a number of other topics that may affect student life, including campus safety, peer-topeer file-sharing, fire safety, missing persons, and protection of student speech and association rights.

"The College is already doing many of the things the act requires; however, some things are new," said Dean of Student Affairs Tim Foster. The act covers many different areas of the College and each of the senior officers is assessing how this impacts her or his area. Where necessary, we will coordinate our efforts.

Students confused by meal plan billing mistake

Due to miscommunication be tween the Student Aid Office and the Dining Service, approximately 125 students were initially undercharged for their fall semester meal plans. On September 2, the College billed these students the \$405 that had not been included on the previous bill in orde to correct the error. Students affected were on financial aid and had opted for a 14-or 10-meal per week plan.

A full meal plan, which includes 19 meals per week, costs \$2765—\$405 more than both the 14-meal and 10 meal plans. The 14-meal plan includes \$100 worth of Polar Points, and the 10-meal plan includes \$250 worth of Polar Points per semester

According to Vice President for Communications and Public Affairs Scott Hood, students who receive fi nancial aid for tuition expenses also receive deductions on their meal plan

The financial aid package that students on financial aid get is dependent on which meal plan they are on," said Hood. "Some folks who were signed up for the less expensive one got aid for the more expensive one."

Students receiving financial aid who signed up for the 19-meal board plan were entitled to the \$405 deduction from their tuition, but those who had signed up for a plan with fewer meals per week received the deduction by mistake. Due to confusion about which meal plan certain stu-dents on financial aid had selected the Student Aid Office inadvertently awarded these students aid as if they were signed up for the 19-meal plan,

Jessica Lian '09, who has been on the 10-meal plan since sophomore year, said that it was students who had switched plans earlier than last semester who were affected. Students who changed their board plans in May of last year did not experience problems, Lian said.

"The error took place when Student Aid requested one list from Dining, and Dining supplied a different list," Hood said.

Michelle Argueta '09 is one of the students signed up for the 10meal board plan and affected by the fee, which she discovered on her OneCard tuition statement while adding money to her card. She sub sequently met with the Student Aid Office to discuss the situation.

"It would have been fair to let us know what was going on instead of randomly slapping on a charge, because that would have been less stressful and conflictual overall," she

Though Argueta was surprised to see the fee, Hood said that an e-mail was sent to affected students in September.

The e-mail sent to success
"According to our records, you have The e-mail sent to students read: semester. As you may know from our dining service, you will now be billed by the college at the lower board rate The lower board expense also reduces your financial aid budget for the semester and the amount of grant awarded to you. The amount you and your family pay to Bowdoin is not altered by your election of a reduced board option

Argueta said that she felt that the e-mail did not adequately or clearly explain the charge, and was frustrat-

additional \$405 fee at all.
"While the e-mail does say that financial aid will be adjusted, it does not specify by how much or even make mention of the need to make a monetary adjustment," said Argueta

Lian, who was also charged the \$405 fee, said that although she read and received the e-mail, she did not think it suggested that any changes would be made to her bill.

Because the e-mail said that it didn't change my financial aid, I didn't think it was a concern for me.'

In addition, Lian said that her online bill reflects that she was charged for the 10-meal board plan during the summer, so she was surprised that the Student Aid Office treated her as if she were on a 19-meal plan.

"On our tuition it said we w billed on July 1 for a 10-meal a week plan, so my logical assumption is that when they were calculating my financial aid back in the summer, they knew I was on a 10-meal plan," she

According to Hood, 30 to 35 parents contacted the College with questions after the deduction was made.

"The College has apologized for the error and has told parents that they can take until the spring se-mester to settle their accounts," said Hood

"A lot of people do monthly payments and incremental payments so they're basically saying that you can divide that \$405 dollars by 'x' number of months and get it back," added Hood. "It's not a giant hit, so you don't have to come up with \$405

STATION

spaces in Maine Street Station. According to Mike Lyne, project manager, Bowdoin's agreement to be a tenant is "significant."

"Bowdoin also generates activity," Lyne said. "Ifpeople see that Bowdoin is a part of the project, we think that it will attract others as well."

Bill Torrey, senior vice president for planning and development and secretary of the College, said Bowdoin has "agreed to take the first floor of Building 1, and we agreed to take the second floor of one of the other buildings."

Torrey said that plans for how the space will be used have not been finalized but possibilities include additional dance studios, IT offices, and a Bowdoin bookstore.

The 5-acre site for the development is located between Noble Street and Hannaford. Bowdoin's McLellan Building is located on a corner of the lot.

ing is located on a corner of the lot.

"We've been involved with the project since we bought all of this property with the town 12 years ago," Torrey said.

According to Torrey, Bowdoin conveyed its share of the lot to the town, except for the site of the McLel-

MARGOT D. MILLER, THE BOWDOIN ORIENT

DIGGING IN: Construction on the \$25 million Maine Street Station site is scheduled to begin next week

lan Building. He said that Bowdoin has not invested in the development beyond the property conveyance and agreement to be a tenant.

The developer for the project, J. Hilary Rockett, Jr., is a member of Bowdoin Class of 1986. He said that Bowdoin has been involved with the project since its inception.

"I really thank Barry [Mills] and Bowdoin College for their support," Rockett said during his address at the ceremony.

According to Rockett, phase one of

the project will include Buildings 1, 3, and 4, which are to be used for retail, office spaces, and a train station.

"We're going to spend this winter finalizing [plans for the condominiums and the inn]," Rockett said.

In his address at the ceremony, Chair

of the Brunswick Downtown Association Rob Jarratt, a member of the Class of 1964, described the gap between Bowdoin and the rest of downtown Brunswick as "an embarrassment."

"[Maine Street Station is] a bridge from Bowdoin College to the rest of the downtown, and its been a long time coming," Jarratt said.

According to Patricia Quinn, the executive director of the Northern New England Passenger Rail Authority (NNEPRA) who spoke at the ceremony, NNEPRA has filed an application to the Federal Railroad Administration and aims to have the Amtrak Downeaster arrive by 2010.

Although Senator Susan Collins, Senator Olympia Snowe, and Representative Tom Allen were not present at the ceremony, each wrote a letter which was read aloud by representatives from their offices. Each letter expressed the significant impact that the development will have on downtown Brunswick.

"The Maine Street Station will be an extremely public-private partnership that will dramatically reshape the downtown," Allen wrote.

Allen also expressed in his letter that with the pending closure of the Brunswick Naval Air Station, this development is exactly what Brunswick needs.

MAINE CONTINUED FROM PAGE 4

May for Safe Passage, a non-profit founded by Hanley Denning '92. Safe Passage works with the children and community living in the area around the Guatemala City garbage dump, seeking to end the cycle of poverty by providing education and opportunity.

Cowen's position as Outreach and Communications Coordinator at the U.S. office in Yarmouth is focused on development and fundraising. In an e-mail to the Orient, Cowen wrote, "I just returned from a trip to visit the program in Guatemala, and itwas incredible to see and spend time with the children and families that our work in Maine supports."

Though Cowen grew up in Scarsdale, New York, she felt no qualms about staying in Maine after graduation. "After four years at Bowdoin, I felt I still had more to do and experience here," she said.

Cowen currently lives in Portland, and she noted that it is comforting to know that the College is close by "if I do need a Bowdoin for".

However, she doesn't need to leave Portland if she misses the Bowdoin network. "We're all over the city, which is great—it's always nice to see a familiar face. I think it speaks to how much Maine comes

to feel like home after four years of college."

One of the familiar faces Cowen might see is that of Luke McKay '07, who is also living in Portland.

McKay has been working for the Maine Chapter of the Nature Conservancy since April 2008. Though the office is located in Fort Andross, McKay, a stewardship field assistant, spends most of his time outdoors. "My specific tasks are to monitor

"My specific tasks are to monitor our easement lands, conduct ecological inventories of our preserves, and conduct hazard assessments of properties we plan on acquiring, along with every day management of all our properties."

These properties, McKay notes, total more than 275,000 acres of conservation land across the state.

McKay, also a native of New York state, found the job at the Conservancy this spring because he found himself "missing Maine." A co-president of the Outing Club his senior year, he noted, "I did a lot of stuff with the Outing Club and missed Maine's mountains, beaches, rivers, and the ocean."

Though he works in Brunswick, McKay enjoys living in Portland, which he said is "a great city."

"It's small so you never feel overwhelmed (since it has] lots of young people, a good bar scene, restaurants, and decent music. It's pretty happening," he said.

Further north, Betsy McDonald '08 just moved to Augusta to begin "After four years at Bowdoin, I felt I still had more to do and experience here."

Z-Z COWEN '08

working as an AmeriCorps/Maine Conservation Corps environmental educator at Maine Housing, where she will be working on home energy projects, addressing both shortand long-term issues.

McDonald was an environmental studies major at Bowdoin, so she jumped at the chance to work for Maine Housing. "It seemed like a cool opportunity to get involved with issues I cared about and to come back to Maine."

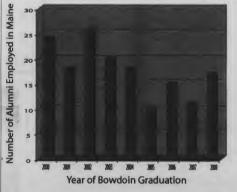

Though McDonald is originally from Massachusetts, some of her family lived in the southern part of the state, so she felt a connection. However, she noted, "I definitely didn't take advantage of all the state had to offer while I was at Bowdoin, so I'm grateful for a chance to spend more time here."

A number of Bowdoin graduates living in the local area are a product of the College's student teaching program, which runs every spring through the Education Department. During the spring semester, a handful of Bowdoin seniors student-teach in local schools, including Morse High School, where Tasha Graff '07 is now working.

Graff, an English major at Bowdoin, is in her second year of teaching at Morse, where she student taught from January to April in 2007. The decision to work there, Graff noted, was an "optimal choice."

"Not only did I have my mentor teacher, Johanna Stanton, in the class-room next door, I also had two of my stalwart mentors from the Education Department, Penny Martin [associate professor of education emerita] and Suzanne Aldridge [visiting professor of education] nearby," she said. "Their expertise, love, and friendship helped me through my first year in what can be a very difficult, taxing profession."

Graff noted that her close proximity to and relationship with Bowdoin is helpful in a number of respects,

MARGOT D. MILLER THE ROWDOIN ORIENT

from scheduling field trips to securing guest speakers. Last spring, two Bowdoin students, one a Morse alum, visited her classroom to give a mini-unit on college aspirations.

Another former student teacher, Seth Knowles '03, is now teaching Latin in Cumberland. A Classics major at Bowdoin, Knowles also advises the Junior Classical League at his school and will be the president of the Maine Classical Association next year.

"I involve myself in these organizations to boost my program and keep my teaching current," said Knowles.

A native of Maine, Knowles cites the close proximity to his family as one of the top benefits of staying in Maine. He plans to stay here for the long-run, noting that since property values are reasonable, "young people have opportunities to buy homes here."

However, Knowles noted, "The biggest negative to staying in Maine is the lack of higher education opportunities."

Some alumni work around that by continuing to work in higher education—specifically, at Bowdoin. Alumni work in nearly every facet of campus life, returning to the College as professors, deans, administrators, and even the president.

Currently, three out of the five members of the Residential Life staff are Bowdoin alums: Associate Direc"The biggest negative to staying in Maine is the lack of higher education opportunities."

SETH KNOWLES'03

tors Erica Ostermann '06, Dudney Sylla '08, and Manny Lora '04.

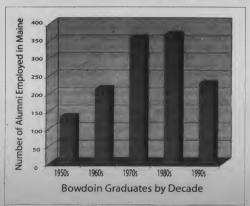

Though Ostermann is originally from Maine, growing up in Belgrade, both Sylla and Lora hail from more urban locales—Boston and Brooklyn, respectively.

However, noted Lora, "After spending a total of six years in Maine as a student, coach, and College official, I have gained a love for this place; it is so different from where I grew up."

"Though it sounds cheesy, what makes this place special and continuously calls people back are the people you meet and the lifelong friends you make," said Lora.

Executive Director of Alumni Relations and Annual Giving Eric Foushee '90, returned to Maine with his wife, also a Bowdoin grad, "for the quality of life."

"Obviously, coming back to work at Bowdoin is fabulous," said Foushee. "To work for a place that you believe in and care about is that much more rewarding."

MARGOT D. MILLER, THE BOWDOIN ORIENT

SECURITY REPORT: 10/3 to 10/15

Friday, October 3

 A Noble Street resident reported that a group of students was having a loud afternoon party at an off-campus student apartment at 26 Noble Street. A security officer spoke with the students and asked them to lower the music volume.

Saturday, October 4

• A student lost control of his vehicle, spun around, and struck a curb on Maine Street near Helmreich House. The driver and female passenger, both Winthrop Hall residents, were not injured in the crash. The vehicle received extensive rearend damage and was towed from the scene. Brunswick Police and Bowdoin Security responded.

A student called Security to request a wellness check on an intoxicated student in Maine Hall. The student's condition was assessed, and a medical transport was not required.

 Students at 8 Potter Street reported concern about the condition of an intoxicated student who had consumed hard liquor. A security officer transported the student to Parkview Hospital where she was treated and released.

Sunday, October 5

A student at Super Snack reported that there was an intoxicated student in the men's room at Thorne Dining. The student had vomited on a table in the dining hall and in the rest room. Security officers assessed the student's condition and assisted the student to Osher Hall where he was placed under the observation of a proctor.

 Security officers responded to a report of a suspicious person in the area of Dayton Arena. An intoxicated local man was identified and released at his residence on McLellan Street.

An intoxicated Reed House student

became disoriented and ended up at the Mid Coast Senior Citizens Center on Baribeau Drive at 2:30 a.m. Brunswick Police responded and called Bowdoin Security. The lost student was transported to his residence.

Monday, October 6

 A fire alarm at 38 College Street was caused by a malfunction in the alarm system.

 Damage was reported at Ladd House. A dart board had been nailed to an antique wood paneled wall. Numerous dart holes in the paneling resulted from errant dart throws. The matter was referred to the Office of Residential Life.

 A student driving a College van struck a post in a Boston parking garage, causing bumper damage.

rage, causing bumper damage.

• A female rugby player was transported to Parkview Hospital with a possible broken finger.

 An officer reported a safety hazard in the basement of Baxter House involving a drinking game table with numerous rusty nails projecting from it. The matter was referred to the Office of Residential Life.

• A student reported the theft of a bicycle tire from 10 Cleaveland Street. The bike had been locked to a bike rack. The tire is a black Trek with a quick release mechanism.

 A student vehicle struck a parked student vehicle on South Campus Drive, causing minor damage to both vehicles

Tuesday, October 7

 A student living at 6 Potter Street reported a bicycle theft from that off-campus residence. The bike is a bronze and silver Royce Union mountain bike with bull horn grips.

 Stuart Bull, 37, of Brunswick was issued a criminal trespass order after he was reported to be following a female student and looking into a women's rest room in Smith Union. Bull is banned from all College property and a security alert has been issued to the College community.

Friday, October 10

• A fire alarm was activated on the eighth floor of Coles Tower at 1:20 a.m. causing a building-wide evacuation and a response by the Brunswick Fire Department. A first-year student admitted responsibility to security officers for maliciously setting off the alarm. The matter has been referred to the Dean of Student Affairs.

 An ill student asked to be transported from Stowe Inn to Parkview Hospital.

 An ill housekeeper was transported from Druckenmiller Hall to Parkview Hospital by Brunswick Rescue.

 Students grilling on an outdoor grill at 10 Cleaveland Street inadvertently set off the building's fire alarm when smoke from the grill wafted into the building. The fire department responded, and the alarm was reset.

Students reported loud noise coming from a second floor apartment at Stowe Inn. Security responded and found a large unregistered event taking place. The gathering was dispersed and two apartment residents accepted responsibility for the alcohol policy violation.

Sunday, October 12

 A Bowdoin student and his visiting brother were stopped by the Brunswick Police while walking on Park Row in possession of alcohol. The two minors were issued summonses for possession of alcohol.

At 3 a.m., an unregistered event was discovered to be taking place at

Baxter House.

• A female student received minor injuries when she was involved in a bicycle accident on Bath Road near Cook's Corner. There were no motor vehicles involved. The student was checked by Brunswick Police and she was transported to campus by a Bowdoin security officer.

 A security officer encountered three Brunswick Apartments students riding recklessly in a golf cart on Park Row.

Monday, October 13

 A fire alarm was activated in Osher Hall when a bag of microwave popcorn burned in the kitchen.

Tuesday, October 14

• A staff member in the Annual Giving office at 83 Federal Street reported the theft of some personal property from a bag on an office desk.

 The Environmental Health and Safety Office investigated a report of the smell of gas in a Druckenmiller biology lab. The lab was checked with a portable gas detector and no gas was detected.

 A football player was taken to Parkview Hospital for evaluation of a

wrist injury.

• A student reported the theft of a bicycle from outside of Stowe Hall sometime between October 11 and 14. The bike is a green mountain bike with a pink water holder, unknown make and model.

Wednesday, October 15

 An ill student was transported from Hyde Hall to Parkview Hospital.

• A College fleet vehicle being operated by a staff member was rear-ended at the intersection of Maine and College Streets by a local resident. There were no injuries. Brunswick Police investigated.

BOWDOIN BRIEF

Senator Mitchell'54 endorses Obama

Former Senator George Mitchell '54 has come out in support of Barack Obama in the 2008 presidential election.

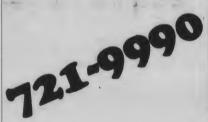

Mitchell endorsed Obama in an interview with the editorial board of the Kennebec Journal, an Augusta paper. In the interview, Mitchell said that if Obama were elected, his policies would reverse those of the Bush administration that have led the nation into the current financial crisis.

While Senator John McCain is one of his good friends, Mitchell said that Obama is "the right guy to be president."

In the interview, Mitchell also added that Obama's proposed programs for higher education were the best that he's seen in his lifetime, and that they have special relevance to the state of Maine.

"We are a state of relatively low incomes and relatively low aspirations, and we've got to raise those," he said.

FEATURES

SONGS OF PRAISE: Dozens of Bowdoin students come together every Thursday evening at 30 College Street for prayer, worship, and fellowship.

CAITLIN BEACH

Now in its 20th year as a campus organization, the Bowdoin Christian Fellowship (BCF) continues to serve as a support network and active community group for Christian students on campus. With more than 100 contacts on the email list and a consistent group of 30 to 40 students attending weekly meetings, the BCF endeavors to nurture and develop spirituality on the campus.

Students' continued interest in the BCF supports a recent study conducted in early 2008 by the Higher Education Research Institute at the University of California at Los Angeles that revealed that students tend to become increas ingly spiritual during their college years. Findings from the six-year study showed that although church attendance in college students declined, what was characterized as "measures of spirituality" increased by an average of 10 percent from first to junior year.

Intervarsity Christian Fellowship (IVCF), the larger umbrella organization of BCF, is an interdenominational campus ministry group working to continue the growth of spirituality on over 550 college campuses across the nation. The Bowdoin group is one of six IVCF chapters in the state of Maine. Peers Colby and Bates, as well as several University of Maine campuses, sponsor IVCF chapters as well.

The purpose statement of the IVCF, according to its organiza-tional Web site, is to "establish and advance at colleges and universities witnessing communities of stu-dents and faculty who follow Jesus as Savior and Lord: growing in love for God, God's Word, God's people of every ethnicity and culture and God's purposes in the world." The Bowdoin chapter follows a similar mission statement, which is "to see student and faculty transformed, campuses renewed, and world changers developed."

The Bowdoin Christian Fellowship's programming spans a broad reach that includes planning for singular campus-wide such as the annual springtime Gospelfest, as well as smaller and ects. The group regularly invites guest speakers, including Christian musician Grant Norsworthy and Director of Black Campus Ministries Virginia Ward, to lead campus-wide events and discussion forums.

One of the cornerstones of club programming are Thursday Night Gatherings, where members convene once a week at 30 College Street for prayer, activities, and discussion.

"A typical [Thursday Night Gathering] will generally include some prayer and singing, as well as a student or guest-led discussion, explained Tana Scott '10. According to Scott, these discussions are led and moderated by a range of people, including adult community

Some might refer to these gatherings as spiritual sustenance. They really bring forth a sense of fellowship and community, which is something

TANA SCOTT'10

members, guest speakers, and student leaders

"Some might refer to these gatherings as spiritual sustenance," said Scott. "They really bring forth a sense of fellowship and community, which is something

In addition to Thursday Night Gatherings, members also meet for Sunday evening Chapel service es as well as a variety of student-run small clusters that take the form of Bible study, worship time,

or prayer group.
Unlike many other campus organizations, the BCF has no singular leadership figure. Instead, various club members take on a range of different responsibilities in all aspects of the Fellowship's affairs.

"The group really consists of a team of people that all come to-gether and lead," said Joelinda Coi-chy '11. "Community is a very big

The BCF does enlist the help and support of IVCF staff rep-resentatives who act as advisors and mentors to student members. These staff members are both appointed employees and volunteers through the IVCF and function as spiritual leaders as well as community liaisons.

Sim Gregory, a Damariscotta resident and Colby graduate, is the current IVCF staff representative at Bowdoin. After volunteering with BCF for four years, Gregory replaced Lance Seelbach, a longtime IVCF liaison, as a staff worker at the end of the 2007-08 academic year.

"This has been kind of a transition year in terms of leadership for BCF, but it has all gone smoothly," said Coichy.

A number of volunteers from area churches and local pastors work with BCF in its programming, chapel services, and meet-According to Scott and Coichy, the staff members serve as invaluable spiritual leaders for student members.

"The adult mentors are like our parents here at Bowdoin," said Coichy. "They are a real support system-not only do they help us plan, but they take care of the students and have a special and abid-

ing interest in the group."
"Mentors are also crucial for first-year students," added Alex Haskins '11. "We actively help new members find mentors that can answer some of their questions and be a source of accountability and support as they transition to Bowdoin life as well as throughout their years at Bowdoin and beyond."

Gregory, as well as additional

adult volunteers, also act as integral community links for BCF members, providing countless contacts and prospects for neighborhood outreach.

"Many of the students, on an ad hoc basis, have been involved in a number of community youth groups and assisted the needy in the Midcoast area," added Gregory There are also opportunities to participate in service trips to Uganda or Latin America."

Navigators, a national organization similar in scope and mission to IVCF, also provides mentoring opportunities for BCF members. Through Navigators, Coichy found an opportunity to start volunteering with the youth ministry at the Vineyard Church in Lewiston

Several BCF members agreed that opportunities offered through Christian organizations such as Navigators and IVCF create a sort of "snowball effect" in terms of volunteering and mentoring within the community. It is this sense of community created through spiritual work and connections that many BCF members agree to be one of the most rewarding aspects of the organization.

"Christianity on a college campus is hard sometimes," admitted Coi-"The community and support that [being in the BCF] has created for me has made being a Christian at oin so much easier than if I had to do this on my own. My faith has definitely grown here."

MARINES CONTINUED FROM PAGE 1

Graduating from OCS, located in Quantico, Virginia, is the most conventional way to become an officer in the Marines. Candidates can take two six-week courses, one after their first or sophomore years and one after junior year, or one 10week course.

Dingess and Janes say that even before coming to Bowdoin, they knew they wanted to join the military. So it was only coincidence, they say, that as first years they were roommates on the third floor of Maine Hall.

Dingess, a quad-captain and de-fensive end for the football team, says he first heard about OCS from teammates David Donahue '07 and Brendan Murphy '07.

Janes, who plays short-stick midfield on the lacrosse team, heard about the program through Dingess, and lacrosse teammates Donahue and Alex Gluck '08.

"Pack and Jack are great guysthey're going to do great things," says Murphy, who is now a commissioned officer stationed in Virginia.

OCS recruiter Captain James Colvin visits Bowdoin a few times a year to recruit Bowdoin students, but he says that because Bowdoin is "very closeknit," students tend to learn about the program from other students

Indeed, Dooley heard about OCS after being introduced to Dingess by a friend who knew he was interested in joining the military, and Flinn discovered OCS after his brother. John Flinn '05, directed him to Donahue and Murphy.

Murphy attended The Basic School (TBS) after graduating from Bowdoin. TBS, a 26-week course designed to train new officers, operates on the tenet that every Marine is a rifleman, and thus teaches officers asic infantry tactics while directing the new Marines to their specialties.

"I'm basically in charge of 50 drivers," says Murphy, a second lieutenant specializing in logistics. "What we do is run convoys in support of an infantry battalion."

Officially the mission of OCS is to

train, screen, and evaluate potential officers, but the four candidates say that the emphasis of the program is on the latter two aspects.

"The whole process is to see you don't freak out under pressure,"

"It's like if you had the championship during exams, and everyone is screaming at you," says Flinn, who plays baseball for the Polar Bears.

When asked what the hardest part of OCS was, both Dingess and Janes independently give the exact same ver: "Staying awake," especially

Still, they consider the impossibly busy schedule of candidate life

a positive.
"I definitely learned to push my body harder than I thought I could," Janes says. "You can push yourself, mentally and physically, a lot harder than you think you can."
Dingess says that his time at OCS

has let him put Bowdoin's workload into perspective.

The most stressful day at Bowdoin is not comparable to an average day at OCS," he says.

Candidates must eat their thricedaily meals, called "chow time," as efficiently and quickly as possible.

"You basically have about five minutes to engulf as much food as possible," Dingess says. "If you take any more time than that, you will draw the Sergeant Instructor's attention, which is never a good thing."

The four students say that every candidate gets into at least minor trouble at some point during the session, considering the strict standards of discipline the sergeants enforce.
"I think everyone has that percep

tion that they give out push-ups," Dooley says. "And they do, but a big part of OCS was essays—they give you essays if you mess up-they're pretty much designed to make you nuts.

The 300-word-and they have to be exactly 300 words-essays can be assigned on any subject, such as discipline or accountability, and include a host of other format requirements, mainly to "get under your

skin," according to Janes.

Though OCS is intended to attract leaders, the candidates say that the

COLIRTESY OF MAXINE JAMES

IN UNIFORM: Candidate Jack Dingess '09 poses with an academic excellence award in July 2008 at the Officer Candidate School (OCS) in Quantico, Virginia

best way to excel is to not stand out. You want to fly under the radar there," Flinn says.

"In order to be a good leader, you have to be a follower first," Dooley explains, paraphrasing a lesson he learned this summer. "You'll never understand how to get people motivated if you can't get motivated yourself."

The candidates speak highly of the benefits of military life. Dooley says that he has tried the typical office internship path, but does not

find it as satisfying as military life.
"Doing those internships in the summer hasn't been half as rewarding," Dooley says.

Janes says that he wants to be a

Marine because he loves the outdoors and a good challenge.
"It's the adventure aspect," he says.

"There's a thrill, you wake up every day, and what you do is important for survival."

Colvin explains that the four can-

didates' commitments are rooted in pride in their country, too.

"There's a strong sense of patrio-tism in all of them," Colvin says. Dingess recommends that students

interested in OCS should show up in shape. Janes and Dooley focus on the candidates' mental approach.
"Attitude is most important,"

Janes says.

You can be the smartest guy in the world, the most fit guy in the world," Dooley says, "but if you get down there with a bad attitude, then you're not going to do well at all."

When Janes and Dingess graduate from Bowdoin, they will officially receive their commission Both say they will definitely accept their commissions, though candidates are allowed to reject them and pursue other careers. In the fall, the new Marines will train at TBS.

Dooley and Flinn plan to return for their second six-week OCS ses-

A typical day at the Officer Cand date School

5 a.m. - Lights come on

5-5:30 a.m. - Clean the squad

5:30-8:00 a.m. - Physical training, such as the obstacle course, runnin weight circuits, followe

Homecoming wardrobe: Rethinking Bowdoin pride

KIDNAPPED BY STYLE

BY DAVID YEE

It was a chilly autumn day—one where you could see your breath—but nevertheless, five senior girls marched out to the center of the field, dressed in the most decadent skimpy dresses (the kind that end above the knee) their wardrobes would allow. In that group stood four popular girls, and it was assumed that one of those four would win the crown of Homecoming Queen.

But something magical happened that day on the halftime field. The band quieted, and the names of each young lady blared across the stadium. Each of the four popular girls stood in anticipation of her crown. Then, shocks As announcer named the Homecoming Queen, the four popular girls dropped their jaws in horror, and the girl at the end-the girl that everyone forgot about, the nice one, the kind one-stepped forward and received her crown. The popular girls were livid. On that Homecoming Day of parades and floats, of football and heaping doses of school spirit, it was this Cinderella-story of the girl that everyone wrote off prevailing over the four popular, evil stepsis-ters. Some force broke the typical high school social constructs and allowed a special moment for an unsuspecting girl: magic for one night. In a word, special. This was highschool homecoming.

This doesn't happen on your average Bowdoin Homecoming. The day fades into shades of mundane. There is a day; there is a football game. But there is no dance, no dress, no day devoted to showing off school spirit. Lacking any of these things does not doom a homecoming to the anonymity of any other day, but there is a certain spirit behind these things that create a very specific atmosphere—magic, if you will. Bowdoin students treat the day as any other

Do you have those hideous, white acidwash pants that you bought for the 80s party but have found no other way to use them in a socially acceptable manner? Now is your chance!

day, mostly because it is any other day. There are some events, some concerts, but little of the fanfare that I saw in high school. No magic, unless you deem a win by the football team "magic." To me, homecoming should be a bit more special. Though there are a myriad of ways to approach solving the situation, I believe a more definitive Homecoming Style should be implemented.

There are several routes you can take as far as fashion is concerned. First, and this is perhaps the only time I will come remotely close to endorsing this, show as much Bowdoin pride as possible through bookstore apparel. Every Bowdoin student has some sort of shirt, sweatshirt, jacket, or hat that says Bowdoin somewhere on it, and dressing in as much of this as possible does show a certain amount of dedication to the cause at a football game. But many Bowdoin students already employ this strategy of Bowdoin-ness

Showing Bowdoin pride should extend beyond simply wears that brand "Bowdoin" across the chest. For some reason, this seems lazvlike the work is already done. Get creative! Perhaps think of this: How many outfits can you make in your wardrobe that contain solely black or white? Do you have those hideous, white acid-wash pants that you bought for the 80s party but have found no other way to use them in a socially acceptable manner? Now is your chance! Pair it up with a black shirt or black jacket, and you have school spirit through the epitome of tastelessness. If you have nothing that would allow you to reach full black/whiteness, raid a downtown Brunswick thrift shop for their stock of potential.

Try creating a tradition of

MARIGOT D MILLER, ORIENT STAFF

BOWDOIN PRIDE: Students are encouraged to wear more than just their everyday Bowdoin sweatshirt this Homecoming Weekend.

Bowdoin Homecoming style. University of Virginia has a tradition where women go to football games clothed in dresses last found at the fashion forefront circa 1900, but they come with parasols and sweet tea to match. You and your roommates can dress ipfull suits (also on the cheap at logal thrift stores) and bowler caps, /capturing Bowdoin schooling of a different era. Come dressed in all madras patterned material, because if you have madras in

your closet, odds are you think it's pretty cool, and odds are it makes some wealthy, country-clubbin' Bowdoin alum proud.

To many, this may seem like putting on a costume, and though Halloween is fast approaching, this is not near the intent. In fact, to an extent, fashion is a part of what I am calling for. Every man can wear a suit, and every woman can wear a dress, but it would not replicate the essence of what I experienced at my high school years ago. This is a call for a re-manifestation of the way Bowdoin perceives pride and showing it. It is a large-scale, homecoming weekend, public art project to bring the feeling of Bowdoin to our time and represent the times before ours. In the end, this should not look like trick-or-treating, but a campus style transformation—one that is not the Bowdoin we know, but still remains, somehow only we can recognize, distinctly Bowdoin. It should be, in a word, special.

From homo to 'rojo': The sliding scale of sexuality

SEX MATTERS
BYJULIA BOND

To open this week's column, which is written in honor of Coming Out Week last week, If alike to start with a quote from one of my favorite movies, "The Adventures of Priscilla Queen of the Dessert." A bit of context: the movie follows three drag queens as they drive to the center of Australia for a show. Along the way, they discuss everything from outfits to dance numbers to homophobia. Here's a choice conversation about sexual orientation:

"We've only recently discovered that young Anthony here bats for both teams."

"I do not!"

"Oh, so [you're] straight?"
"No"

"Oh, then you're [gay] after all?

"Then what are [you]?"

"I don't f***in' knov

To many people, the idea of not being able to identify yourself as a certain sexual orientation, especially as an adult, seems very strange. People are labeled as gay, straight, or bisexual, with "questioning" meaning a phase of transition between them. The prevailing attitude seems to be that once you identify as a certain sexuality (i.e. what "team you play for," to borrow a popular colloquialism), you've committed to this preference for life. No trades allowed.

Sexual preference, however, is not as simple as all this. It doesn't end after doing some introspection and labeling yourself as gay, straight or bi. Rather, it is about experiencing and acknowledging feelings of sexual attraction.

A good friend of mine, who would be termed a lesbian in traditional societal vernacular, recently informed me that she sometimes refers to herself as "rojomosexual." This means that she's attracted to women and a few choice redheaded men. Though the term "rojomosexual" sounds pretty funny, that doesn't mean that her sexual attraction to this selective list of redheads is any less valid.

redheads is any less valid.

In a day and age where the debate over sexual orientation has

Boxing people who have had homosexual relationships and hookups into a larger category of "not straight" while keeping those who are involved with members of the opposite sex in a "straight jacket," so to speak, limits our ability to explore our sexuality.

been focusing on the argument between "genetics" and "choice," how can this sort of phenomenon be explained? Isn't a case like this exceptional? According to Dr. Alfred Kinsey (a Bowdoin alum, in fact), this sort of fluidity in sexual orien-

tation is quite normal.
Dr. Kinsey did a lot of ground-breaking work in the field of human sexuality, culminating in his publication of "Sexual Behavior in the Human Male". In this book, Dr. Kinsey demonstrates that people have a much higher tendency than anticipated to engage in sexual behavior beyond heterosexual intercourse. In fact, over the course of his work he designed a sliding scale, termed the Kinsey scale, used

to measure sexual orientation. The scale-runs from 1-6, with 1 being completely heterosexual and 6 being completely homosexual (0 was added later, and means asexual). Most people, when administered the self-evaluation attached to the scale, come up as neither a 0 nor a 6, but rather somewhere in between. Kinsey concluded that human sexuality is a lot less dichotomized than most people believe. In "Sexuality in the Human Male" he writes that:

"Males do not represent two discrete populations, heterosexual and homosexual. The world is not to be divided into sheep and goats...The living world is a continuum in each and every one of its aspects."

The tendency to reduce experiences into right and wrong, black and white, good and bad is inherent in human nature. It helps us keep track of things. Life would be a lot more tiring and confusing if you had to categorize all your friends based upon their own unique sexuality. Jenny is "blonderosexual," while Brad is a "breasts, butts or biceps" man. But at the same time boxing people who have had ho-

mosexual relationships or hookups into a larger category of "not straight" while keeping those who are involved with members of the opposite sex in a "straight jacket," so to speak, limits our ability to explore our sexuality. The human mind doesn't function in a simple way, and to ask it to remain within these straightforward boundaries we've created isn't reasonable.

I am not suggesting that we all go out and hook up with whoever we want, regardless of gender, orientation, age, etc. My point is that respecting the sexuality of others means understanding the fact that nothing is black and white. In the case of my dear rojomosexual friend, insisting upon celebrating her as a lesbian is counterproductive. She is in tune with the fact that she is attracted to certain kinds of people, and that self-knowledge is what should be celebrated. Labeling her as a distinct sexual orientation is limiting and could be detrimental to her desire to explore her sexuality. If she so chooses, she should be allowed to sleep with Hermione or Ron. Or both. Now that would be one magical threesome.

Becker exhibit examines portrayals of Genesis

BY RACHEL GOLDMAN

Man and Woman, naked in the Garden of Eden, is an image that has spawhed many artistic and sexual interpretations. Associate Professor of History Dallas Denery's exhibit "Genesis and its Interpreters," up this month in the Becker Gallery on the first floor of the Walker Art Museum, allows viewers to observe the ubiquity and persistence of these interpretations as well as their contemporary relevance.

The Becker Gallery provides a space for professors to co-curate an exhibit in conjunction with one of their classes. "Genesis and its Interpreters" was created in conjunction with Professor Denery's European history seminar "Creating the World," which examines the history of interpretation of the first chapters of Genesis. Professor Denery worked closely with Curatorial Intern Diana Tweet, and selected the works of art from both Bowdoin's own collection as well as private collections in order to explore and present his proposed idea.

The pieces in the exhibit are interpretations of Genesis stories'

THE GARDEN OF GOOD AND EVIL: Associate Professor of History Dallas Denery used the Becker Gallery in the Walker Art Building to examine art inspired by Genesis for his class "Genesis and its Interpreters."

produced from the 16th century to the present. The art focuses on the story of Adam and Eve, but the stories of Noah's Ark and Sodom and Gomorrah are also represented. Most of the art is religious and was created for religious audiences, according to Denery. "It is mostly Christian art because these early stories in Genesis are pervasive throughout the New Testament," Denery said. "Jesus' mission is understood in terms of

Peary-MacMillan museum replete with arctic treasures

BY ERIN McAULIFFE
STAFF WRITER

The polar bear has long been a symbol of Bowdoin and its historic relationship with the great white North. However, many students have never set foot inside of one of the college's greatest hidden gems: the Peary-MacMillan Arctic Museum, located in Hubbard Hall and named for two Bowdoin graduates.

Named after Robert Peary (Class of 1877) and Donald MacMillan (Class of 1898), the museum boasts an impressive 32,000 artifacts, photographs, and archival films.

The only museum in the United States dedicated completely to Arctic studies, the recently renovated space is home to artifacts both purchased by Bowdoin and donated by collectors from all over the world. Stored in climate-controlled facilities on the top floor of Hubbard is everything from brass navigation tools used on arctic explorations to Inuit snowshoes to the fur coat belonging to MacMillan's wife.

The newest exhibit in the museum is a collection of baleen baskets woven by a Northern Alaskan Inuit tribe in the early 20th century.

The space is "an anthropological, natural history, art museum," said Associate Professor of Sociology and Anthropology Susan Kaplan, who has served as the director of the museum for the past 20 years. With its plethora of historic objects, the museum often uses student independent studies to help maintain the upkeep of artifacts.

"You never put something on exhibit permanently because it could be damaged by too much

MARGOT D. MILLER, THE BOWDOIN ORIEN

THE POLAR EXPRESS: The Peary-MacMillan Arctic Museum, located in Hubbard Hall, has several artifacts from explorers' expeditions to the North Pole.

light exposure," Kaplan said. "Each year two or three brave undergrads check all of the stored objects for bugs." Bowdoin students have also contributed interactive computer programs and informational brochures to the museum, as well as aided in the agitising of the hundreds of reels of footage shot by MacMillan during his 1908 expedition to the North Pole. With an extensive amount of access to these artifacts, the lack of Arctic studies classes at Bowdoin is surprising.

"As important as the Arctic is for an undergrad to study, it would really limit them because it does not exist as a graduate program anywhere," Kaplan explained.

Students interested in Arctic studies must focus on different aspects of the arctic such as geology and anthropology.

and anthropology.

While much of the museum focuses on the past, the problem of climate change is starting to determine the direction in which new exhibits are going.

A media exhibit shows a time lapse of Arctic melting in 2007, while a life-sized ice drill used by scientists to monitor water flow, sunlight exposure, and ice density sits aton the reference desk.

sits atop the reference desk.
"It's ironic because 100 years ago people traveled to the arctic to find resources," Kaplan said. "Now, with the ice melting, there is dispute over ownership of natural oil and coal under the ice."

This school year is perhaps the most important in the museum's history because this spring will mark the 100th anniversary of Peary and MacMillan's historic journey to the North Pole,

The celebratory exhibit "Northward Over the Great Ice: Robert B Peary and the Quest for the North Pole" opened in April of 2006 and will remain on display until April 2009.

Featuring replica ships, uniforms, manifests, Inuit clothing, and footage shot by the explorers, the exhibit sheds light on the planet's last frontier.

Allagash brewers concoct beers for all palates

THE BEER GEEK

If someone were to ask me which beer they should try to get a sense of a craft beer, a Maine microbrew. or an example of a modern Belgian beer, I would recommend Allagash Brewing for each. I'm somewhat partial here-not only is Allagash my all-time favorite beer-but I have also worked at the brewery for the past two years.

Belgian beers have always been popular amongst beer geeks, but recently their popularity has at-tracted the casual drinker. Beer has been brewed in Belgium since the Middle Ages by Trappist monks. With breweries in operation for almost two centuries, one can assume they were doing something right. For almost two decades, Allagash brewing has strived to bring back experimentation with craft brewing as well as revitalize the ancient brewing methods of Belgium. Since its opening, Allagesh has created many different varieties of ale, including "Lyon's Folly," an accidental brew stemming from the actions of Bowdoin alumnus Pat Lyons '06

Allagash's flagship beer is Allagash White. It is based on tra-ditional Belgian wheat beers, and is a fair contender with modern Belgian Wit beers. It pours cloudy, and unless on-tap, is bottle-conditioned before making its voyage to the marketplace. White is good for all seasons and occasions, with

ALLAGASH ALLURE: Allagash beers are brewed in Maine and include a variety of original ingredients and flavors from light to dark ales—one of which was discovered by Bowdoin alumnus Pat Lyons '06

all the deliciousness a beer should have without the overly complex overtones of sourness or hoppiness that may turn off the everyday drinker. It is brewed with spices that leave subtle hints in the beer's

final taste, along with some overtones of fruit. I highly recommend it for anyone willing to try to expand their beer horizons and even for those who already have—it re-mains a very drinkable beer that warrants having another.

Those willing to explore a little more can try Allagash's other classic brews, Dubbel and Tripel. Dubbel is a darker and more complex beer with a malty taste and a dry finish. If White seems too light, Dubbel is full of flavor and interest while keeping a balanced overall presentation. For a dark beer it

Please see ALLAGASH, page 15

MIXING IT UP

MARGOT D. MILLER, THE BOWDOIN ORIENT

Cullen Winkler '09 will exhibit his artwork at the Fishbowl Gallery in the VIsual Arts Center for the next week. The opening for his show is Saturday night from 7-9 and includes a variety of mixed media.

Generations of Meddies to croon for celebration

Meddiebempsters young and old will reunite during Homecoming for a celebration of the group's 70th anniversary. Members from various generations of Bowdoin's oldest a capella group will perform in a concert on Satrday night.

The performance will feature between 50 and 60 former members of the Meddies who are now alumni of Bowdoin. Current and former members have several events on their reunion agenda throughout the weekend, including rehearsals for Saturday's show.

Among the returning members of the group are New York composer Dave

Hays, Former Dean of the Ithaca College School of Music Art Ostrander, and ductor and Senior Lecturer of the Department of Music Tony Antolini.

Returning singers will represent dif-ferent eras at the concert and will present the music by time period. The Med dies will begin by performing songs in the roots of the a capella tradition and will end with songs from its contempo-

A few of the group's older songs include "Lazy Afternoon," "Sal, Nell, and Sue," "Ding Dong Daddy," "Sunshine Girl," "A Lovely Way to Spend an Eve-"Close as Pages in a Book," and "Oh You Beautiful Doll."

Former and current members of the

group will sing together as one ensemble for two songs at the beginning of the concert, "Glorious Apollo" and Edvard Grieg's "Brothers, Sing On!"

They will also perform as one group for the concert's final piece, a medley of Bowdoin songs performed by the school's Glee Club and "Mood Indigo" by Duke Ellington

"It's personally rewarding to be a part of a group that's been around for 70 years. It's nice to come together as a family for a performance like this," said Mike Krohn '09, the group's current music director.

The concert is free and open to the public. The Meddiebempsters will perform at the Studzinski Recital Hall in Kanbar Auditorium at 8 p.m.

Nick and Norah's playlist hearkens teenage angst

BY LAUREN XENAKIS

I'm not a city girl (that's why I came to Bowdoin). Bright lights at night, con-stant traffic, and the sweet smell of sewage just aren't my thing. However, "Nick and Norah's Infinite Playlist" instilled within me a deep desire to go from indie club to indie club in New York City in search of an elusive hand.

Beyond that, though, "Nick and Norah's Infinite Playlist" did nothing else for me. In fact, the hour and a half long movie could have been distilled into a half hour of boy meets girl, boy's friends take girl's drunk friend with them and then lose her, boy and girl look for drunk friend and indie band, and finally boy and girl hook up (surprise, surprise).

Michael Cera (known for his role in luno") plays the bassist of a band called the Jerk Offs named Nick (he's the only straight one) and is hung up on his cheating girlfriend, Tris. Kat Dennings (from "Charlie Bartlett") plays Norah, the outof-place girl who can get into whatever nightclub she wants due to her father's position in the music industry. Norah is also the schoolmate of Tris and has heard all about Tris's many infidelities. Norah has also heard all of the "break-up mixes" that Nick made for Tris and has fallen head over heels for the guy who created the thoughtful playlist

Nick has been pining for Tris for a couple weeks when his bandmates de-cide to pull him out of his funk. They have a gig that night in a club in New York, but Nick resists until they hear on the radio that Where's Fluffy, Nick's favorite band, is making a special appearance in the city in an undisclosed location. To get to the show, you have to unravel the clues and follow the pink bunnies that show up in places around the city. Nick agrees to go into the city after hearing this newscast.

At the Jerk Offs' gig, Tris and Norah show up. Nick, determined to talk to Tris about why she dumped him, is stopped by Norah's kissing him when she needs a boyfriend for a few minutes to prove to Tris that she isn't out on her own again. Norah, after randomly se lecting a guy and kissing him, is shocked to learn that he's Tris's Nick, but Nick's friends couldn't be more thrilled. They

Political and personal drama abounds in 'America'

BY FRANCES MILLIKEN COLUMNIST

> THE BOOK NOOK

Arriving for my morning shift at Head House Books in Philadelphia this summer, the title of a new arrival caught my eye. "America America," read the cover of Ethan Canin's latest novel. I wrinkled my nose in disdain. The title struck me as trite and sentimental. Bucolic images of golden skies and verdant fields came to mind. Was this book a tribute to a rose-tinted vision of the country? What purpose would that serve other than to deny the reality of the present? The apparent superficiality of the book prompted me to open the jacket, and to my surprise the summary was compelng. Applauding myself for not judging a book by its cover, I proceeded to fly through "America America."

Canin has constructed a classic American story. Corey Sifter is the son of a plumber. His parents are good folks, warm, in love, and patient with their lot. Corey is bright and earnest. He is accustomed to work and is employed by the Metareys, the most successful and powerful family in the town. He finds himself taken under their wing and his brush with their world impacts the direction of his life

rection of his life.

It is 1971 and Senator Henry Bonwiller is challenging Nixon for the presidency. Bonwiller fits a politician's profilehe is charming, eloquent, and friends
with powerful people. The Metareys
are the primary financial supporters of
Bonwiller's campaign. As Corey spends
more time with the Metareys, his contact with Bonwiller and the world of
politics and power increases. politics and power increases.

Corey is a teenager during Bonwill-er's campaign and his proximity to the candidate is seductive. He is equally entranced by Mr. Metarey. Corey is gra for the work and enthralled by his elder's opinions and his lifestyle. Mr. Metarey is wealthy but a hard worker and does not occupy an elitist position despite his circumsta

Bonwiller begins to make rash decions. Corey is forced to recognize the reality behind the façade. Not all of the Metareys are happy with Mr. Metarey's decision to propel Bonwiller into history. In the face of these developments, the fabric of Corey's awe, and the con-struction of the Metareys contentment,

Because "America America" is a novel about politics, scandal is inevitable. The crux of Bonwiller's success ultimately rests on the facts and rumors of his private life. There is the usual mixture of sex and secrets, lofty ideals and bodily

desires. Corey becomes a somewhat unwitting accomplice in the disguise of a car accident involving the senator and his mistress. His youth could explain his his mistress. His youth could explain his naiveté, but the mature narrator refuses to see the event clearly as well. The trag-edy of that night and Corey's fatherly understanding of what it would mean to lose a daughter is the reason he recounts the tale to his apprentice Trieste. One wishes he took an unambismous stand wishes he took an unambismous stand wishes he took an unambiguous stand on his brush with greatness and the con-

Canin is heavy-handed with the parallels he draws between Corey and the up-and-coming journalist Trieste. Like Corey, she is the daughter of working-class parents. Like her boss, she was dealt a more challenging hand than that of the Metareys. Trieste has gumption and it is evident that she will succeed. Canin is too willing to suggest that history does not have to be repeated and amends can be made with the past.

The author's style will be familiar to those who have read Robert Penn Warren's "All the King's Men." "America America" does not suffer from its emulation of this great political novel, but it is not as flawlessly executed. Canin puts too many balls in the air and is unable to catch them with Penn Warren's aplomb. But his characters are engaging and it is interesting to reflect upon what ultimately determines elections.

Metallica's latest album has 'magnetic' qualities

BY MIKE PETKOV CONTRIBUTOR

I must admit, when I learned this year that my favorite band, Metallica, was releasing a new album, I did not expect much. Ask any die-hard fan and they would say that the boys from California haven't really done anything substantial since 1991's epochal "Black Album," that featured the one song I'm sure everyone knows, "Enter Sandman." 17 years, 3 mediocre albums, and a Napster lawsuit later, Metallica was a band with a lot to prove.

Enter the announcement of "Death Magnetic" in early 2008. Upon hearing the band describe the album as the "missing link" between Metallica's Big Three albums from their days atop the thrash metal scene in the '80s and the more mainstream "Black Album," I was skeptical. It's typical of a dinosaur band to compare their latest album to the 'good ol' days," but rarely does it ever ring true. Also, the album title confused rather than excited me. One

of the most important parts of a good metal album is a cryptic title, preferably with a mention of death, doom, or global corruption. Lead singer James Hetfield rationalized the choice of "Death Magnetic" by stating that "some people are drawn towards [death], just like a magnet, and other people are afraid of it and push it away"—cryptic and most certainly gloomy.

The band starts off with two fastpaced thrashers clearly intended to take the listener back to 1984. The opening track, "That Was Just Your Life," even features a slow, melodic intro, a staple of the Big Three. By the time the power chords hit you 40 seconds in, you're amidst a furor of metal that the second track, "The End of the Line," has no intention of releasing you from.

The third track, "Broken, Beat & Scarred," is the most humorous on the album. Overused clichés aside, how can you lose with a chorus of, "That don't kill ya, make ya more strong?" In the lyrics, Hetfield gives a proverbial

middle finger to his critics, and makes no qualms about it. Reports of Metallica's death have been greatly exaggerated, it seems.

The album then progresses into the slower paced, "The Day That Never Comes." About as close to a ballad as old-school Metallica got to, the downbeat "Day" features the powerful lyrics and extensive solos needed in an inspiration metal track. The next two tunes, "All Nightmare Long" and "Cyanide," pick up the pace and mood a little (although their titles don't exactly reflect this). What these two brothers have to offer is a pair of solid, serviceable rockers that fit the album's flow perfectly.

Up next is the most anticipated track of the album, "The Unforgiven III." Would it be more like the melodic-but-heavy "Unforgiven" or the country-inspired (shudder) "Unforgiven II"? The answer is: neither. Numero tres follows the ballad format set up by the previous two, but never really resembles them outside of the lyrical theme. It's a great song never-

theless, but I'm not sure the title is appropriate.

What follows is the obligatory song about suicide, "The Judas Kiss." Although featuring a bridge that strangely reminds me of "Sgt. Pepper's Lonely Hearts Club Band," the track doesn't offer anything that hasn't been heard already. Ironically, following it is "Suicide and Redemption," a song with no lyrical mention of the tabooed topic because it is a 10-minute instrumental.

Metallica closes out the album with the hectic "My Apocalypse." The song features some of Lars Urlich's best drumming, a clear sign he has decided to discard whatever pots and pans he was banging on in "St. Anger," a change welcomed by all.

Overall, I believe the band stays true to their word by going back to the formula that worked. I would highly recommend giving this album a listen. The only thing missing is an epic that makes you push repeat over and over again.

PLAYLIST

CONTINUED FROM PAGE 13

think that Norah is just the girl to help Nick get over Tris.

However, Tris, with a new guy of her own, is infuriated that Nick and Norah are apparently "dating" because if Nick isn't pining over her, she won't let him be happy with anyone else. She follows Nick and Norah around the city in their search for Fluffy (and Norah's drunk friend) in a desperate attempt to get Nick back.

You can see where the story line is going. This is a high-schooler's film after all, where the happy ending is necessary for box office success and the movie is based on a novel by Rachel Cohn. Norah does have some snappy lines and the soundtrack inth half bad, but other than that, the movie drags along with the same argument happening over and over about whether Nick should go with Norah or with Tris.

If you want to relive high school and the drama you experienced there, then by all means, grab a seat and some popcorn and hunker down. But if you've moved on, skip this film and try something that has more of a plot.

BECKER

The art in the exhibit represents a historically significant moment in Christian thought, according to Den-

ery.
"The story of Adam and Eve
marked the creation of everything
bad: sin, death, labor pains. People
couldn't go to heaven until they were
cured of these. It's why Jesus had to
come, it's why we are all thought of as
sinners today," he said.

"These scriptures are holy and thus each word is a word of God and must be important," Denery said about the potency of Genesis as a historical text.

Even beyond Christian thought, the stories in the early chapters of Genesis are provocative because of their scale.

"God creates the world in all its goodness, Adam and Eve are cast out of Eden, cursed, and forced to toil for their livelihoods. Many centuries later, of all the inhabitants of the Earth, only Noah, members of his family, and a collection of animals will survive a global flood. This is history on a grand and cosmic scale," Denery said.

Pondering these biblical stories

Pondering these biblical stories pushes viewers to explore fundamental questions: Where did we come from? Why did this happen to us? Why is there evil?

It is the stark, basic storytelling of Genesis that allows a wealth of interpretations.

"The creation narrative in Genesis is open to a nearly limitless variety of interpretations," Denery said. "Its half-voiced hints and ambiguities, its contradictions and assertions, entice the reader to develop multiple readings, to uncover hidden secrets among its pages."

Although the grand scale of these

Although the grand scale of these tales seems somewhat daunting, Denery believes that Genesis is surprisingly accessible.

"The thing about Genesis is that these are huge epic stories about huge epic events that you think you couldn't wrap your head around," Denery said. "But in fact, at their core, they are about specific people. And this is a great source for art."

Partially, it is this specificity that al-

lows biblical stories to lend themselves to artistic interpretation. Many of the pieces in the xhibit illustrate the views of several biblical interpreters such as John Milton, John Calvin, Saint Augustine, and contemporary R.A. Boulay, who asserts his belief that Adam and Eve were in fact homo-saurs, half ape-man, half-intelligent aliens. Other pieces proliferate their own artistic interpretations.

Although many of these interpretations hail from centuries ago, Denery explains that the exhibit is extremely pertinent to society today.

"Fundamentally, evolution and science are the biggest challenges to Genesis," he said. "Because who were Adam and Eve if evolution happened? The relation between science and religion, as well as the role of religion in society, are our biggest cultural controversies today. Each side is polarized and doesn't care about the other."

"Genesis and Its Interpreters" examines these issues as part of a larger colloquium hosted by Bowdoin entitled "Faith, Reason and Evolution." This colloquium features three public talks by scholars who explore a variety of topics including evolution and creationism, science and religion, reason and faith

"Everybody has reason," Denery said. "The colloquium aspires to create a place where people can have discussion about their ideological differences. People will always disagree at some point, but they should have all the facts."

Art plays a particularly important role in bringing these facts to cultural and social attention.

"Art gives people a better sense of the cultural and moral questions at stake. It embodies what would otherwise be abstract stories and questions," Denery said.

"As people, we are always attracted to what is visual. It gives us a way of remembering." Denery said while looking at a Flemish print by Maarten de Vos that depicts Adam and Eve and a provocative woman-headed snake. "If you can remember this picture you can remember everything about the fall," Denery said.

"Genesis and Its Interpreters" will be on exhibit in the Becker Gallery until November 16. ALLAGASH

is kind of thin, but is an excellent pairing to food and an appropriate replacement for someone who isn't a fan of wine with dinner. Tripel is a stronger beer but it has a taste that goes from tropical fruit to peppery without ever touching the alcohol. Like the other classic ales, it is quite drinkable and is an excellent choice among friends.

Once you've tried out the classics, it is only natural to sample some of Allagash's special brews. They are pricier, but so is a good bottle of wine.

The brewers of Allagash have tried many different tricks and techniques common and uncommon to brewing, including aging their beer in barrels, using different strains of yeast or spices meant for wines and foods, and playing with the carbonation of the beer

to mimic that of champagne. Some beers to try include:

Four: Brewed with four malts, four sugars, four hops, and four yeast strains. A darker beer with many layers of flavors.

Black: This Belgian-style stout that was originally a trial run but is now a leading member of the Allagash family. It gives Guinness a run for its money.

Fluxus: The recipe changes yearly. Originally brewed with Yarrow and now with ginger, it is an excellent pairing to Thai food and embodies Allagash's changing nature as a brewery.

The barrel-aged beers, most notably Curieux, are also worth trying. Curieux is another experiment gone right. The brewers age the Tripel Ale in Jim Bean barrels for eight months. During this time the beer transforms and takes on characteristics of the barrel. There are soft coconut and vanilla fla-

vors, not to mention the bourbon essence. This beer is quite strong, partly due to the bourbon taste, but it adds to the overall taste and experience of this beer, making it my favorite beer to date.

Allagash has done well for itself. It can be found in most grocery stores around Maine, with some of the special brews found at beer and wine shops down Maine Street.

Beyond Maine, Allagash ships nationally as far as California, and the head brewer has even shipped himself to Belgium in a sort of exchange program to produce new beers between two breweries.

Also in the works at the brewery is a lambic ale, a product of spontaneous fermentation under the direction of mother nature as much as the brewers.

The brewery is located in Portland, and they sell all their current beers as well as provide daily tours of the facilities.

Men's soccer moves up to 4th with two wins

STAFF WRITER

In the space of a crucial 72-hour span, a resurgent men's soccer squad turned its season around

The Polar Bears started the stretch, which was a two-game road swing, against NESCAC opponent Con-necticut College last Saturday after-

The must-win game started poorly for the away team as the Camels scored two goals in the opening 40 minutes to stake Bowdoin to a daunting 2-0 deficit. With five minutes to go until the end of the first Tim Prior '11 and Eddie Jones '12 helped the Polar Bears go into the intermission with a glimmer of hope as Jones netted his first collegiate goal off a magnificent crossing pass from Prior

The scoring went dry for the next 25 minutes until Jones set up Brendan Mooney '09, who scored what was described as "one of the most incredible goals in the history of Bowdoin " by senior defender Christopher Hickey '09. Mooney knew the team needed at least a point to stay in NESCAC contention and did his part to help the cause by slotting a magnificent one-timer from the left side of the box with just under 20 minutes to play.

Minutes later, Jones continued the offensive outburst by blasting a heat-seeking missile into the back of the net to give Bowdoin the winning goal. Jones's amazing performance against the Camels, scoring two goals and setting up one, earned him the honor of becoming the NESCAC Player of the Week. Jones's addition to the lineup has been a much needed boost for a team that was desperately in need of goals and wins. Since his insertion into the lineup against Amherst on September 27, the team has gone 4-1, with 11 goals in five games. Before to his contribution, the team had opened the season going 1-3 with just three goals in four games.

Bowdoin completed the much needed 2-0 road swing with an easy win against Husson on Tuesday afternoon. The Polar Bears dominated throughout, outshooting the home team 29-11 when it was all over. Nick Powell '12 provided much of the offense as he assisted Call Nichols '12 in the 53rd minute and then scored his own goal off a Ben Denton-Schneider feed with four minutes to play in regulation. The goal ensured that the Polar Bears would return to Brunswick with an impressive threegame win streak intact.

Starting Saturday, Bowdoin will open a very important four-game stretch as it battles NESCAC opponents to earn a place in this season's NESCAC championships. The Polar Bears open the crucial stretch with a tough game against Trinity at home tomorrow. The men are currently in a three-way tie for fourth place in the NESCAC and the Bantams currently stand ahead of them in third place The game will kick off at noon

BOOM! Sophomore skipper Viktor Bolmgren hikes out as crew and fellow sophomore Coco Sprague mans the mainsail.

Sailing wins Nicholas Barnett Trophy

BY CAITLIN BEACH ORIENT STAFF

The Bowdoin Sailing Team competed at a familiar venue last weekend as they played host to 12 teams from all over New England for the Nicholas Barnett Trophy held at Bethel Point.

The annual event, known in previous years as the Casco Bay Open, was med for the late Bowdoin sailor Nicholas Barnett '11, who was killed in a car accident over Thanksgiving Break in 2007. Former Head Coach Sherry Mason felt that it would be a good idea to rename the yearly event in the memory of Barnett as an invaluable sailor, teammate, and friend.

Bowdoin sailors came out on top at the Barnett Trophy, finishing in first out of a fleet of 13. The team's performance at the event enabled Bowdoin to rise to a No. 16 spot in the weekly New England Intercollegiate Sailing Association rankings, which encompass more than 30 schools.

"The Barnett Trophy was a big win, and since it was the renaming of the event for Nick, it was a big win for Bowdoin Sailing as a whole," said Head Coach Frank Pizzo.

Bowdoin edged out a strong Tufts squad by a three-point margin for the win. Incidentally, Tufts and Bowdoin are the only two teams in intercollegiate sailing who still train in Larks, a dinghy whose popularity has been surpassed by the more common FJs

Viktor Bolmgren '11 and Coco Sprague '11 handily won the A-division competition by over 20 points. A string of close races on the second day of competition, however, "found Bowdoin and Tufts battling it out,"

A solid performance by seniors Pete Wadden and Meredith Steck in the B-division complemented the successes of Bolmgren and Sprague and propelled Bowdoin to the first-

Meanwhile, an additional squad of six sailors traveled down to Larchmont, New York, to compete in the Storm Trysail Club Intercollegiate Offshore Regatta. This regatta, a unique departure from traditional collegiate dinghy sailing, featured competition on bigger one-design keelboats. The Bowdoin team competed on Morning Glory, a J/105 yacht owned by alumnus Carl Olsson '60. Over the two-day competition, the team sailed to an overall sixthplace finish out of a fleet of 12.

"This regatta was the only keelboat event that we had lined up for the fall season," said Tom Charpentier '10. "It was a different type of competition and a fun break from dinghy sailing."
This weekend, the team will look

to build upon its recent successes through competition at the Captain Hurst Bowl at Dartmouth and the Great Herring Pond Open at the Massachusetts Maritime Academy,

Women's soccer takes two over Camels and Panthers

BY AILEEN TSCHIDERER

STAFF WRITER

The women's soccer team is on the rise after recent victories over Middlebury and Connecticut Col-

Despite it being Fall Break last weekend, the Connecticut College Camels were afforded no rest as they were soundly defeated by the Bowdoin women, 4-1, on Saturday. The onslaught began early. In the eighth minute Dana Riker '10 was able to find the back of the net from a corner served by Rebecca Silva

A mere five minutes later, leading goal-scorer Ellery Gould '12 reaffirmed her status as an offensive force as she converted on a oneon-one situation. Yet the brilliance of the start was dimmed when the Camels responded to the Polar Bears with a goal of their own. With just over 15 minutes left to play in the first half, the ball was wrestled away from Bowdoin keeper Kelly

Bowdoin would not let Connecticut College have the last say, though, and in the closing minutes of the first half, Gould struck again. She scored with a long ball from 25 yards out, bringing the score to 3-1 at the half in favor of the Bears. In the second half, Rebecca Silva '11 scored the fourth and final Bowdoin goal.

The game against Middlebury on October 4, aside from being a win, was an entirely different story as the Polar Bears battled the defending NESCAC champions.

Middlebury's four-game winning streak was ended on Pickard field. After the Panthers out-shot the Polar Bears 9-0 in the first half, Bowdoin was lucky to enter the second half unscathed with the match scoreless. Perhaps inspired by the challenge, the Bowdoin women picked up the pace in the second half.

Kit Hamley '10 was finally able to score as she took control of the ball at the top of the box, lifted it just under the cross bar, and watched it fall into back of the net.

Middlebury continued to out-shoot Bowdoin for the rest of the game but failed to ever capitalize on any opportunity. The Polar Bears were greatly aided by Thomas who made a season-high of nine saves to keep the Bowdoin women on top.

Riding a three-game winning streak, the women will tackle Trinity this Homecoming weekend at 11:30 a.m. at Pickard field.

Women's rugby defeats Bates, UNH

BY CHARLOTTE RYAN CONTRIBUTOR

The women's rugby team came away with its second win against Bates this season with an even more decisive victory of 22-0.

"They play a physical, rough game, and we play smarter, not harder," Coach MaryBeth Mathews said.

Although the team fought hard to dominate in the first half, it was still a close game with a score of 5-0. The try was scored with a blind-side attack designed to create an overlap. Anna Nicol '11 scored the try with

an assist from Maria Koenigs '09.
"We ended the first half at the goal line, but didn't score. We were right there knocking on the door, Mathews said.

In the second half, the team took advantage of Bates's penalties.

"We played with discipline and poise and continued to play our game, not Bates's," Mathews said.

Alivia Moore '09 started the sec ond half with a try, which solidified the Bears' lead.

The team's goal for the game was to get the ball to the wings and use speed to score, and they followed through. All four of the tries scored were by backs. Hannah Larson '10 brought speed to the wings. Nicol scored another try in the second half off a bounce. Becky Stevens '11 converted a kick to bring the score

On October 4, the Polar Bears defeated University of New Hampshire in a tight game, 29-22, in New Hampshire.

"Anytime you go to their field, play tough and win, that's really satisfying because they are a good team," Mathews said.

Coming out strong in the first half, the ladies held a lead of 19-0. lessica Walker '09 scored the first try off a play called the peel and tap after Stevens had a kick, which helped gain significant territory.

UNH failed to clear the ball from its end-zone with a kick, and Koenigs picked the ball up off the bounce and ran the ball back in to score another try, Catherine Jaeger '09 scored another try and Stevens converted two kicks in the first half.

In the second half the opponent came out much stronger.

"We definitely missed tackles on them when they worked the ball to the sides," Mathews said. Although the Wildcats dominated in the second half, both times the Polar Bears entered UNH's endzones, they scored. Lizbeth Lopez '09 scored the first try and Stevens scored the

The Polar Bears will play University of Maine-Orono on Saturday on home turf. If they win, Bowdoin will host the first game of the playoffs.

Alex Caughron '09 leads tennis at Wallach Invite

BY EMMA POWERS
STAFF WRITER

The men's tennis team proved to be nothing short of stellar at the Wallach Invitational at Bates last weekend.

Leading the Polar Bears were Alex Caughron '09, Alex Jacobs '12, and Andrew Won '12.

Caughron claimed the B-Flight singles title, while Jacobs and Won defeated Skidmore to win the B-Flight doubles championship.

Caughron rallied in all of his matches, coming back from a oneset deficit in all four of his matches to win.

Ultimately, Caughron defeated Surainder Asokaraj of Amherst in his final match.

"Alex Caughron's impressive comebacks and big wins were very exciting," Jacobs said.

Jacobs and Won's doubles performance was equally impressive. The duo defeated duos from

The duo deteated duos from Vassar, Middlebury, Colby, and Skidmore on their path to victory. Since Jacobs and Won had previ-

Since Jacobs and Won had previously lost to the Middlebury team earlier in the season, the Middlebury win was particularly sweet.

"The highlight of the tournament for my doubles partner Alex Jacobs and I, at least, was beating the Middlebury team in the second round," Won said.

"It was very uplifting ending the season with a doubles championship under my belt," he added.

Jacobs was also ecstatic about the first years' victory.

"It was an awesome feeling to win at Bates. Andrew Won and I got better and better as we moved through the tournament. It was a great end to a great fall season," Jacobs said.

Stephen Sullivan '11 and Nicholas Fenichell '12 also proved successful, as both made it to the semifinals of their flights, respectively.

"I felt happy with my performance this weekend, but it reminded me I still have a lot of room for improvement," Fenichell said.

Improvement is what the Bears will aim for as they head into the spring season.

With the fall season now over, the Bowdoin team will work on their fitness and conditioning to prepare themselves to defend a NESCAC title.

"As we enter the off-season, we will strive to become the fittest team in the NESCAC," Jacobs said.

Field hockey still No. 1 in nation

BY KATHERINE POKRASS STAFF WRITER

Blood, sweat, and tears all hit the turf during the past two weeks for the field hockey team as they added three more tallies to its win column. The Polar Bears are now 11-0 on the season and have out-scored their opponents by a staggering 38-2.

Last Saturday, Bowdoin traveled to New London, CT to face the Connecticut College Camels. A strong team effort from the Polar Bears help ed propel them to the 3-1 victory.

The first goal of the contest came courtesy of Julia King '09. Set up for a left penalty corner attempt, King collected the pass from Kristen Veiga '09 and rocketed a shot just inside the near post at 16:12 of the first half.

Lindsay McNamara '09 added some insurance to Bowdoin's lead before the half was over. King drove the ball to the middle of the scoring circle where McNamara was waiting to redirect it into the back of the case.

cage.
The Camels came out strong in the second half. Outshooting the Polar Bears six to four. However, Emileigh Mercer '09 stayed strong between the posts for Bowdoin, only allowing

one goal

McNamara would not let the game end on an unanswered Camels goal. With 3:31 remaining on the clock, Ingrid Oelschlager '11 charged down the right side of the field and fed a hard cross to McNamara on the left for the deflection behind the Connecticut College goalkeeper.

"Our game against Connecticut College was the first of four demanding games at the end of our regular season. We went in with the mental focus and fight needed to defeat the Camels right before our Fall Break," said defender Ashley Peterson '10.

On October 4, the clash between the two field hockey giants, Bowdoin and Middlebury, took place on the turf of Ryan Field, in a rematch of the 2007 NCAA National Championship game.

There were only two goals in the match and both came from McNamara. Twenty-five minutes into the first half, King blasted a waist-high shot toward the right side of the net and McNamara was able to get her stick on it for a mid-air deflection past the Middlebury goaltender, Caitlin Pentifallo.

Another King-McNamara connection resulted in Bowdoin's second goal with 8:19 remaining in the game. King sent a hard, low shot to the left post and McNamara redirected it into the net to seal the win for the Polar Bears.

Even though the Polar Bears had a 20-6 advantage in shots, Bowdoin goalies Emily Neilson '11 and Mercer were called upon to make two saves a piece, and defenseman Leah Ferenc '09 had to sacrifice her body on a Middlebury penalty corner attempt. Ferenc's injury required six stitches and kept her out of competition for one game.

tion for one game.
"One of our goals for the Middlebury game was to play with a high level of intensity while remaining composed and I think everyone on the team committed to this goal," said Julia King.

Carrying this intensity and composure from the victory into their next game on October 8, the Polar Bears sailed past the Beavers of the University of Maine-Farmington with a 3-0 shutout. In the game, Bowdoin first year Ella Curren scored the first goal of her college career.

The Polar Bears will host the Trinity College Bantams this Saturday for Homecoming Weekend. Trinity is currently ranked third in the NES-CAC and has a talented offense that averages 3.90 goals per game, and could challenge the solid Bowdoin defense.

Men's XC disappoints at Open NE's

BY KEATON LORA CONTRIBUTOR

Against a huge field of competitors, including some Division I programs, the Bowdoin Men's Cross Country Team put up a disappointing performance at the Open New England Championship last Saturday, finishing just 23rd out of 47 schools.

The Polar Bears, who were third in the NESCAC last year, finished just sixth-best among the eight NESCAC schools who competed last week in Franklin Park, Massachusetts.

"We were disappointed with our race relative to other teams that we hope to be running with this season," Head Coach Peter Slovenski said. "It was a good wake-up call for us to see that we won't be a top-five NCAA regional team without more desire and outs"

The race, featuring over 300 runners, saw Thompson Ogilvie '10 (57th overall) and Colman Hatton '10 (75th) put up top showings for the Polar Bears.

However, Slovenski explained it will take a team effort to improve the team's overall performance. "Our front-runners had good races, but we did not run that well in the middle positions," he said. "In championship races we need to have our fourth and fifth runners where our third runner was at Franklin Park."

But the team must progress quickly; The team faces a line of championship meets over the next several weeks through the end of the season.

Two weeks ago, the Bowdoin men fared much better at the Maine-Farmington Invitational, following the cancellation of the September 27 Connecticut College Invitational. Top runners Charlie Berdahl '11 (first), Will Stafstrom '12 (second), Barrett Wood '12 (sixth), Brian Wu '11 (seventh), and Anders Samuelson '12 (ninth) carried the Polar Bears to first overall. Slovenski explained their strategy to deal with a rough course.

deal with a rough course.
"We tried to be patient so that we wouldn't get bogged down on the course early and be too tired for the last miles," he said. "We tried to pace ourselves out for the hills and the mud."

This week, Bowdoin heads to Cumberland, ME for the Maine State Meet, followed by the 2008 NESCAC Championships hosted by Bates at Pineland Farms in New Gloucester, ME on November 1. In a season that has provided some mixed results for the Polar Bears, the next few weeks will decide just where the team fits among its divisional rivals.

Football upsets Tufts at home, falls to Hamilton, 28-17

BY JEREMY BERNFELD

Outscored 21-0 midway through the third quarter, the football team could have given up during Saturday's game against Hamilton. However, the team scored 17 unanswered points to give the Continentals a scare, but ultimately fell short, losing 28-17.

Now halfway through its season, the team still has hopes for a winning campaign despite a 1-3 record after the loss.

"Our season so far has been defined by us playing well at times and poorly at times," said quad-captain Gus Spaulding '09. "We've had stretches where we made the plays we know we are capable of making. Unfortunately, we held ourselves back the rest of the game by losing focus. We need to be able to stay on our game for a full 60 minutes."

Despite being down three touchdowns in the third quarter, it only took one play to put some life back into the offense and some points on the board. Junior quarterback Oliver Kell threw a screen pass to Nick Tom '10 who juked his way to a 68-yard touchdown and the first Polar Bear points of the game.

"The play that really sparked us was Nick Tom's screen pass," said quad-captain Tim Kelleher '09. "The offense was in a funk and a big play like that really fired the guys up."

Bowdoin quickly scored again. After a quick Hamilton three-andout, Bowdoin took over possession at their own 41-yard line. On the opening play of the drive, Kell spotted Kelleher wide-open down the sideline and tossed a 59-yard touchdown bomb to close the gap to 21-14.

After the defense stopped the Continentals again, the Polar Bears took over and marched down the field on a 15-play, 67-yard drive. During the drive, Bowdoin faked a punt on fourth and five, as junior Matt Leotti ran six yards to keep the drive alive.

"The offense stalled near midfield needing only five yards for a first down," Kelleher said. "After Matt Leotti made a gutsy run to reach the sticks for the first down, the offense felt like it was their turn to respond. That's what this team is about; we feed off of each other."

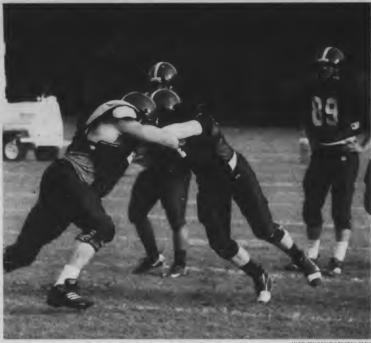

The drive ultimately stopped at the Hamilton six-yard line, but senior Nolan McNair kicked a 24-yard field goal to put Bowdoin within four.

On the next Bowdoin drive, after a Kell incompletion on fourth and two, the Continentals got the ball back with great field position and drove for the score to put the game out of reach.

Two weekends ago, the Polar Bears notched their first win of the season, a 28-26 nail-biter over Tufts at home.

"The first win is huge," quad-captain Jack Dingess '09 said. "After playing well but coming up short in the first two games, we really needed to beat Tufts to put us back on the right track."

Kell finished 22-23 with 224 yards and a touchdown, and Matt Moran 10 caught four passes for 71 yards while first-year Ian Vieira had two rushing touchdowns.

MARIEL BEAUDOIN, THE BOWDOIN ORIENT

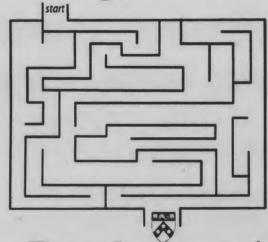

TRENCH FIGHT: An offensive and defensive lineman square off against each other in practice on Wednesday. The Bears look to defeat Trinity on Satúrday.

Junior Tyler Tennant led the Polar Bear defensive unit with 13 tackles, one forced fumble and an intercep-

ion. Bowdoin will take on perpetual NESCAC powerhouse Trinity, who stand atop the conference at 4-0, Saturday at 1 p.m. at home.

"To beat Trinity we are going to have play sound, fundamental football on both offense and defense and jump on them early," Kelleher said. "If we can get out to an early lead with a total team effort, we will bring home a win on Saturday,"

Some say a good thing is hard to find.

Prove them wrong!

Volleyball struggles on West Coast

The four losses of the wo volleyball team at the Wild West Tournament last weekend can be a misleading statistic. Though it accurately portrays a tournament without a Polar Bear victory, it does not account for the anomalous level of difficulty the team faced in its matches and the ways this level of difficulty benefited Bowdoin.

The Wild West Tournament took place at California State University East Bay and set Bowdoin against the host school as well as against California Lutheran, University of California-Santa Cruz, and Mt. St. Joseph. NCAA currently ranks East Bay, Lutheran, and St. Joseph in the top 25 in collegiate women's volleyball.

"[The tournament was] an oppor tunity to compete at a level we just haven't seen before," said Skye Lawrence '10.

"Our coach purposefully scheduled these matches right before our last six NESCAC matches so that we could learn from our mistakes against some of the toughest teams in the nation, and subsequently use this knowledge to prepare for our upcoming matches," said Jenna Diggs '10.

The tournament opened on Saturday with a morning match versus match against Santa Cruz. Though Lutheran shut out Bowdoin 3-0, the Polar Bears held their own against the Banana Slugs in a 3-2 face-off with competitive set scores of 25-21, 23-25, 25-23, 23-25, and 15-10.

"That UC-Santa Cruz game just slipped by us!" Head Coach Karen

Both the Santa Cruz and the Lu-theran matches had their highlights. Gillian Page '10 and Diggs led against Lutheran, Page with five blocks and Diggs with 10 assists. Against Santa Cruz, Page contributed an addi tional 15 kills and Diggs a flexible 43 assists, 34 digs, and four blocks. Kristin Hanczor '12 was also active with 14 kills and five blocks.

On Sunday afternoon, ninth ranked East Bay shut out Bowdoin 3-0. In a more successful evening match against No. 25 ranked Mt St. Joseph, the Polar Bears returned from a weak start at 25-12 to snatch the second set at 22-25. It was not enough, however, to overcome the Lions' subsequent efforts of 25-18 and 25-16 as they ultimately defeated the Bears at a score of 3-1.

Page and Diggs were again effec-

tive in both the East Bay and St. Joseph fronts

Against East Bay, Page added 9 kills and 17 digs; against St. Joseph, she led with 9 kills and 4 solo blocks

Diggs's 19 assists against East Bay and 30 against St. Joseph. In the East Bay match, Jillian Berkman '11 and Skye Lawrence '10 posted an additional 23 digs and 20 digs with 3 aces, respectively.

Diggs summarized the tournament optimistically.

"We went 0-4 this past weekend in California, but this record did no justice to our tremendous improve ment as a team. In future weekends we will be serving tougher, passing better, and hitting harder than we ever have in the past," she said.

Gina Lonati '12 also noted the importance of the Polar Bear bonding while on the California trip.

"We grew even closer as a team," she said. "We have a great, cohesive group of girls that all individually contribute so much; I know that going into this weekend's tournam at Trinity we will do well.

The Polar Bears will also be able to draw from their victorious 3-0 encounter with Bates on October 8. Coach Corey called the 25-21, 25-19, and 27-25 match "exceptional" and "the best volleyball we played all year.

Bowdoin kicks off the Trinity tournament at 8 p.m. Friday against Weslevan, to be followed by Saturday matches against Trinity at 11 a.m. and Connecticut College at 4 p.m.

RUMP 'N' RUN- Sonhomore Grace Lazarus prenares to hump a ball in practice on Wednesday

Women's XC looks to improve at Maine State Championship

STAFF WRITER

The temperature was a comfortable 70 degrees, the course is known for its flat terrain, and the women's cross country team knew they were in for a fast race.

And as the first five Polar Bears vent through the first mile mark of the 5K course under, or close to, a six-minute-mile, it was clear that the race would end up being just

The women's squad placed 21st at Open New England's last Saturday, out of a field of 45 teams that included several Division I schools. Franklin Park, the Boston public park where the race took place, has earned a reputation among New England teams for particularly fast times run on it.

"It's a great place to run a personal record," said co-captain Courtney Martin '09. "The ground is solid, and there are only a couple of minor hills to work up.

Many of the squad's varsity runners had their last scheduled meet at Connecticut College, canceled due to thunderstorms, and were anxious to test out their legs after almost a month of all training and no racing Feeling fresh, the runners went ou in a hard first mile, continuing to work their way up through a field of 301 runners.

Annie Monjar '09 came in 22nd for the Bears with a time of 18:28, followed by 73rd place finisher Christina Argueta '11 in 19:08, and Martin, who finished 124th with a time of 19:43. Grace Kerr '11, Lindsey Schickner '09, and Anna Ackerman '12 crossed the finish line within 16 seconds of each other, in 174th, 185th, and 198th places, respectively. Rounding off the top seven was Holly Jacobson '11, who ran a personal best of 20:41.

Ackerman felt strong after her victory at the University of Maine-

Farmington Invitational on October 4, leading the field by nearly 20 seconds. Jacobson, Lindsay Hodge '11, and Laura Newcomb '11 also helped to sweep that race, coming in third, fourth, and fifth place, respectively.

With Open New England's under their belts, the Polar Bears now have a firmer idea of what competition will be like as they approach lateseason championship meets.

"We made a good showing at the

race," said Head Coach Peter Slov enski. "We were hoping to be a top-20 team, and I think we'll get there in the next month."

Among the teams that the Polar Bears will have to defeat in order to achieve that goal is Colby College, whose women's squad placed 13th at Opens. The two teams will meet this Saturday at Twin Brooks Parks, where the State of Maine Championship race will take place. Though dogs of the meet, Slovenski, as well as co-captains Martin and Monjar, remain optimistic about the Bears chances of success

"We've done a lot of good hill training this season to get ready for the championships," Slovenski said. "All three of our major champion-ships-the state meet, NESCAC, and NCAA regional-will be held on hilly courses. We've done tough

The state meet, hosted by University of Southern Maine and held on the notoriously soft and hilly Twin Brooks Park, will take place on Saturday. Bowdoin, the defending champions of the race, will attemp to stave off Colby and Bates, as well as a host of other Maine college teams, in an effort to hold its title as State of Maine champions.

WHAT NOW?

THE BRYANT MBA One-Year Program

Do you have what you need to get thy job you want? With the Bryant MBA one-year program you will gain both the skills and experience to launch a successful career

This accelerated one-year program is designed to build upon undergraduate programs in all academic areas - liberal arts, science, technology, and business - to name a few

- · Begin the program directly after you graduate from college
- · No professional experience is required.
- · Gain hands-on experience, and build mentor relationships with corporate executives through the Business Practicum program

MEET A BRYANT UNIVERSITY REPRESENTATIVE at the Bowdom Graduate Fair

Wednesday, October 22, 2008 3:30 - 5:00 p.m. David Saul Smith Union

There's Only One October

BERNING

BY JEREMY BERNFELD COLUMNIST

If it was unclear to you before, TBS and Fox have most certainly reminded you by now that there is only one October. And thank God.

Don't get me wrong, I love all that goes on in the sports world in October, but if November or December fought October for sports supremacy, I'd be flunking out of school even faster than I already am (sorry Mom).

Sure, there might be a presidential election, an economic downturn (I refuse to acknowledge that a crisis began the year that I'm applying for a job), wars in Iraq and Afghanistan, and a new Seth Rogen movie. And, oh yeah, I'm working on a college degree. But the only math problem I can do right now has nothing to do with quadratics or obtuse angles. October = baseball playoffs + football season + hockey + the NBA. I'm no math major, but I know that by the transitive property, October = me having no time for academics or a social life.

The Sox are in the playoffs, the Pats are on, the Celtics are getting set to defend their title, hockey still exists, and the MLS may or may not be shifting into do-or-die mode. As I said, I'm not complaining. I'm just overwhelmed.

As if it wasn't hard enough before, it's now simply impossible to get any work done. Like a circus clown and his knives, I'm dangerously juggling two to four sports teams every night. I've got preand post-games, studio shows and sideline reporters, fantasy leagues and teaser bets. How can there be time for anything else?

Take this past week, for example. Fall Break was no break, it just left me a little wiggle room with the sports gods because I actually had zero pressing engagements that were more important than the sports that were on television. Since last Saturday, I've spent 16 hours watching Red Sox games and another four hours watching the Patriots get shellacked by San Diego. And those are only the actual games; it doesn't include the countless highlights and analysis

shows I've subjected my addled

The Celtics played three times veek and I didn't even watch I think I'm getting soft in my old age. And don't even get me started on hockey or soccer; I've got too much on my plate.

And sure, it's better than the alternative. I'm lucky that I've got four or five professional sports franchises to follow. I'm fortunate that my baseball team is playing after September. I mean, what if I lived in-gulp-Buffalo?

It's never easy being a fan. In fact, it's a lot of hard work. Every good sports fan knows that their team can't win without the proper support. Just as it's a player's job to get out on the field and play, it's a fan's job to jump on the couch and root. We have to watch every play and buy every jersey. We can't miss a game or a chance to talk smack about an opposing player. My playoff beard is how legends are made.

Obviously, I've got to wear my favorite team's jersey or shirt, but it does not end there. We all have our rituals, both pre-game and during. Mine happen to involve lucky boxers, an African mask, a giant raspberry iced tea and, if it's an elimination game or against a team from the New York/New Jersey/Hell area, a Sweatin' '09 headband. Opponents beware

October is a special month. The leaves are changing, the air is crisper, and I just got back from Fall break so I'm a little bit more

The other months are nice, replete with holidays, birthdays, and Ben & Jerry's Free Cone Day, but October is special. October show cases the raw passion of playoff baseball and the rebirth that accompanies the start of the NBA season. In October, every game counts in baseball and every basketball team starts undefeated. It's when the sports world collides and crescendos in a glorious monthlong celebration of excitement, fury, and pride.

So crack open a Gritty's Octoberfest or six, throw on the jersey, and get psyched. Because you know when you spend more time watch ing sports on TV than you do with your parents and girlfriend combined, you're either a pathetic unloving loser, or it's just October.

Golf teams hit the rough

The Bowdoin Men's Golf Team finished its season with a fifth place finish at the Husson Invitational last Sunday at the Penobscot Golf

Five Polar Bears played in this final tournament. Ryan Blossom '10 led the squad as he shot his best two-day score of the season at 149 (75-74). Captain Jeff Cutter '09 finished right behind him, carding a 161 (79-82) followed by Bobby Campbell '11 (167), Max Bridges '11 (173), and Eric D'Elia '11 (182).

In the previous weekend, the Bears teed off in two tournaments: the Sid Farr Classic at the Waterville Golf Club on Saturday and the CBB Championship at the Marting-dale Golf Club.

At the Sid Farr Classic, James Yoo '09 captured fourth place, carding a

was Turner Kufe '11 (81), Blossom (82), Kevin Smith '11 (84), and Zak Kubetz '11 (94). The Bears placed fourth overall out of seven teams.

Bates College captured the CBB Championship, defeating the lar Bears by just two strokes with a score of 416. Playing for Bowdoin was Smith (77), Kufe (81), Jimmy Herter '11 (84), Kubetz (85), and Yoo (89)

The women's team faced off against Bates in a one-on-one matchup; the Bobcats won 431 to

Bowdoin's two best shooters were Libby Barton '09, who carded a 90 placing second overall, and Kelly Keebler '10, who posted a 99.

"The course was very narrow and was based on a Scottish course so there was a ton of waist-high grass, said Rebecca Warner '11, who cardThe 9 users currently in the teen chat room.

Financial fitness

ark, dusty, even a little bit dingy, Brunswick Apartments have faithfully served students for ages. There's no one to clean the bathrooms, no view like from the top of the Tower, but the rooms are cozy and quiet, and they've got character. Students love them—many seniors choose to live there even when presented with a bevy of other options.

Contrasting sharply with Brunswick Apartments is the construction currently taking place on the College's new Fitness, Health and Wellness Center. According to the Bowdoin Web site, the center will be "sheathed in glass," making it "a literal and figurative lantern: a beacon of fitness, health and wellness for the campus community." With its \$14.75 million price tag, the College is sparing no expense to provide spaces for such activities as yoga, meditation, tai chi, biofeedback, massage, and acupuncture.

Make no mistake: The College needs a new fitness center. Three years ago, we used this space to publish an editorial entitled "1,666 students, 6 treadmills," which argued strongly that Watson Fitness Center was inadequate. However, given the current financial crisis and the renovations of other buildings across campus, it seems that some of the frills we've been promised are over the top.

The College has recently invested millions in expensive upgrades to other facilities, including the Museum of Art, first-year dorms, and Studzinski Recital Hall. But students are pampered beyond facilities. In certain dorms, housekeepers empty the trash and clean bathrooms for students every day, and security provides rides across campus on chilly nights. Food choices in the dining halls are endless, and the menu items are gourmet. As many of our families make sacrifices at home to pay tuition, we choose from 20 toppings at the salad bar.

Two forces are at work here. First, there are some parents and students who place a high value on top-notch facilities and services. Many of the College's recent upgrades have come in response to such demands. Second, there's peer pressure, in the form of external rankings and reviews. Administrators and alumni are often concerned with maintaining Bowdoin's image as a first-rate institution.

As the downturn in the economy begins to hit us from both sides—evaporating college savings accounts and diminished endowment returns—the Bowdoin community is going to have to start drawing distinctions between needs, wants, and luxuries. Do we really need ministure TV screens on every treadmill? After all, administrators should have the good sense to recognize that the kinds of people we want at Bowdoin are not lured here by our material wealth, but instead by our excellent faculty, sense of community, and our spirit.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Mary Helen Miller, and Cati Mitchell.

LETTERS TO THE EDITOR

Students voting locally need to know the ballot

To the Editors:

Each election season, many Bowdoin students register to vote in Maine. This carries with it an obligation to become informed of local politics.

If you are voting on a local ballot, take the time to learn about the "beverage tax veto." This is a referendum to repeal taxes on beer, wine, and soda. These taxes produce revenue that funds Dirigo, a health program for Mainers who cannot afford health insurance. To put it simply, when you buy a beer or a soda, you are charged a few extra pennies. These pennies fund health care for struggling people. Vote "No" on State Question 1 to help support health care for more Maine people.

Before November 4th, learn about the issues facing Maine. Visit ballot.org or the Web sites of the League of Women's Voters of Maine, Literacy Volunteers of Maine, or maine.gov for local ballot guides. Keep in mind that, for four years, Maine offers Bowdoin students a vibrant learning environment; if we choose to participate in the state's elections, it is our obligation to show informed respect for the issues that unfold here.

Sincerely,-Amy Ahearn '08 Portland, Maine

Allen's van is a smart alternative to a bus

To the Editors:

Although troubled by the amount of misinformation included in Steve Robinson's Ope-de regarding the Tom Allen and Susan Collins's experience makes her the best choice for U.S. Senate," October 3), I found one particular assertion exasperating.

Robinson writes that, "Allen had hoped to raise enough money to purchase a campaign bus that he could use to tour the state. Financial limitations have forced Allen to settle for an old van instead."

This is hardly the case. The Allen campaign raised quite enough money for a bus, but decided-wisely, I would say-that riding around in a giant bus in the middle of an energy crisis while the economy languishes is a waste of money and fire!

Robinson cites Allen's van as an example of "unrealistic...idealistic policy."

Given how pinched everyone's pockets are right now, I'd say that Allen's decision to downsize is a lot more practical, forward-thinking, and in touch with the current reality of everyday Mainers than Collins's continued use of a gas-guzzling bus.

Sincerely, Kristen Gunther '09

Argument in Robinson Op-ed is problematic

To the Editors:

In his Op-ed ("Susan Collins's experience makes her the best choice for U.S. Senate," October 3), Steve Robinson chose to attack Congressman Allen by using childish namecalling and blatant falsehoods. Some issues deserve a mention, particularly as Robinson focuses on claiming that Collins fights for "the prosperity of...

Was that the case when she failed to provide oversight of contracting in Iraq? That was her duty, as the chair of the Senate Committee on Homeland Security and Government Oversight. She failed to hold a hearing for over three and a half years to look into the matter of waste and fraud in Iraq. That cost the taxpayers over \$23 billion dollars. That might be looking out for the prosperity of Halliburton, but not for that of the nation as a whole. At the same time, Allen authored legislation establishing an independent body to investigate wartime contracting and the ways in which taxpayers had been

On critical issues, Collins has failed to provide leadership. Since she hasn't done the job, it is time for someone else to step up, and Congressman Allen has proven himself ready to do so. Sincerely,

Sincerely, Eamonn Hart '09 Communications Co-Director, Bowdoin College Democrats

McCain's economic plan values liberty

BY STEVE ROBINSON

In this crucial election year, the pres-

idential race has, more or less, become a ballot issue. The decision is simple: Obama-yes or no? With Obama comes a tax plan that will lower taxes for all individuals making less than \$250,000 while placing a substantial tax increase on richer individuals. The alternative is McCain's plan, which cuts taxes for all Americans but more so for wealthier ones. Obama's plan is heavily redistributive to say the least, while McCain's seeks to lessen the burden of taxes on the economy. Conservatives who support McCain-style taxation are often portrayed by liberals as not caring about the poor. Let me clear this up: Conservatives care just as much out poor Americans as liberals do. The only difference is conservatives believe that the free-market and economic growth will benefit the poor more than government run redistribu-tion. The inefficiencies and fraud rates of current redistributive policy lend further support to the conservative's argument. Crucial to this debate is the idea of liberty and whose plan will pro-

First, let's examine some basic liberties. The idea of liberty is based on the concept of self-ownership. You own your life and any product of your life. This includes any wealth one might accrue. To take from someone, against their will, a product of their life is to diminish their liberty. Only when both parties give consent to a transaction can it be mutually beneficial. Similarly, it is an attack on liberty for a group, such as government, to take from an indi-

vidual by force, or without his consent. Any institution which makes laws that directly contradict basic human nature and liberty will create conflict. History is ridden with examples of revolution fueled by attacks against man's liberty. As Butler Shaffer said, "A society will remain as free or as enslaved as the conscious dispositions of the individuals determine it shall be." Keep this in mind when it comes to redistribution.

The current system of redistribution in America has become institutional ized. As government expanded, jobs were created, and more people came to benefit from big government. Bigger government meant more taxes and now we are stuck with a massive government that operates well outside the ideas of our forefathers. What ever happened to "that which governs least, governs best"? We will not have progress in this country until the American people realize that the government cannot and should not be responsible for a majority of the functions it currently undertakes. We cannot continue to look to the government to help us. If the Democratic Party takes control of Congress and the White House we can expect to return to the economic conditions of Jimmy Carter's adminis tration: double digit inflation, unem ployment, and interest rates.

The alternative to Obama's plan is allowing basic liberty and economic freedom to prevail over taxes and government oppression. The free market ideology is the only way to protect liberty. The government does not need to do anything except get out of the way and allow free enterprise and entrepreneurship to bring prosperity. The pri-

vate market will create any institution, agency, business, service that is truly worth having. A positive side-effect of this phenomenon is growth. Economic growth, which creates jobs and lowers interest rates, redistributes income in a way that increases total wealth. This is why conservatives support the free market; it's not because they hate poor people, it's because they believe the best way to help them is by respecting liberty and economic freedom. Id rather create jobs then send welfare checks.

Barack Obama's plan to redistribute wealth constitutes an attack on the liberty of American citizens. The so-called "rich" that he will stick the heaviest tax burden to are also small-business owners and investors. What incentive will a small-business owner making less than \$250,000 have to grow his business if the government is going to punish him for doing so? None! While his intent is admirable, his energies are misguided and his plan will only increase the plight of poor Americans. McCain's plan is in way conservative; however, it offers a better alternative than launching a "Robin Hood"-style class war against the wealthy. It has become an American tradition to demand lower taxes and more government programs. Why not lower taxes and have fewer programs? Obama's plan can only harm the liberty of Americans and cannot be tolerated simply because it only assaults a minor ity. Liberals often speak of fairness but it seems they have forgotten one thing: there is all the difference in the world between treating people equally and at tempting to make them equal.

Steve Robinson is a member of the Class of 2011.

As Programming Director of Ladd House and one of the architects of the party we hosted October 4, I would like to defend our choice of theme. The inspiration for this Saturday's controversial event at Ladd house came from an "Entourage" episode that features a party at the Playboy Mansion, not from a particular interest in the magazine itself.

Our party was meant to emulate a party at the Playboy Manthe theme was not Playboy itself. This is important because the Playboy Mansion represents ideal outside of the modern Playboy magazine, and not only its reputation for insane parties, but of Hollywood glamour and

Parties at the Mansion and their unique dress code are a timeless tribute to that simple but ephemeral period in 1960s America when Playboy was an erudite celebration of the cultured man. He would don a smoking jacket and relax to lounge jazz, smoking his pipe and reading a magazine that offered first and foremost enlightening social commentary through interviews of political and cultural icons, and clever fiction from the likes of Ian Fleming, Vladimir Nabokov, and Ray Bradbury.

The addition of the odd nude was just a pleasing garnish to the literary feast that Playboy offered the reader. But these images were of great consequence, as Marilyn Monroe's classic likeness of fered more than meets the eye-it warned American men that their wives weren't bringing them another Martini. Playboy centerfolds gave a fleeting glimpse of the fairer sex escaping the Middle American "By celebrating the Mansion and not the contemporary magazine, Ladd House commemorated the dawn of the same feminist ideals that brought protestors to our lawn."

prison of domesticity and gender repression, a first salvo against the kitchen walls and the oppressive chauvinism in what was still a Man's America

The rest is history, and in the wake of the Feminist and Sexual revolutions Playboy has fallen from grace, and is rightfully derided as the mere pornography it has become. However, the Mansion defends the last bastion of its former glory, a reminder of the evanescent days of yore.

We picked the Mansion theme for its iconic imagery and its reputation. Simply put, we thought it would be a great party. However, since members of this campus found in it implications beyond our intentions, allow me to do the

By celebrating the Mansion and not the contemporary magazine, Ladd House commemorated the dawn of the same feminist ideals that brought protesters to our lawn. The publication of Playboy liberated women from misogyny, a hateful term I only mention because it was shouted Saturday

Demonstrators questioned the dignity of our guests who wereprobably unknowingly-paying homage to women in all their power and beauty. At Ladd, we are always open to criticism and encourage campus activism-please just de your homework first

Wes Fleuchaus is a member of the Class of 2011.

In defense of the 'Mansion' Ladd party spurs campus discussion

BY LINDSEY BRUETT AND KERL FORBRINGER

On Saturday, October 4, a protest was held in reaction to the "Mansion" party occurring at Ladd House the same night. As members of the Inter-House Council (IHC), we have become intimately involved in the conversations following the event. In the week immediately following the protest, discussions on the issue occurred in the IHC, the BSG, Curia, a student-run online magazine about Bowdoin, and countless informal settings. Discourse on the event seemed to represent many different and sometimes conflicting opinions.

In hopes to include the voices of the rest of the campus in this editorial, IHC Secretary Keri Forbringer '10 sent out a campus-wide email on October 11 eliciting responses regarding the event and Bowdoin's social atmosphere in general. The responses were incredibly varied: Some were excited about the protest, some were vehemently against it, and some were

Following is a sampling of the responses:

Parties are parties. They are meant to be good, safe times where people can get out of the library and let loose for a little."

"I think it is upsetting that we have already had a slew of controversial themes, which instead of doing what themes are supposed to do (being a fun experience) have resulted in debate."

"I think that College Houses should be held to a higher standard."

"No matter what the theme of a party is, people do NOT have to dress up if they do not want to...

If you have an objection with the party, don't attend."

I honestly feel that the fallout from the Mansion and State School parties is ridiculous...It seems to me that both parties attracted good crowd, and even though their themes might not have been entirely politically correct, the underclassmen enjoyed them and that is what is important."

People need to get over themselves. Starting a protest over a social house party feels like more of a cry for attention than throwing a Playboy party ever was to begin with... What people wear to Ladd house on a Saturday night con-cerns me little."

There is an absence of 'more dancing, less drinking' parties. Drinking should not be an event of itself, but a complement to an existing event.

Some additional responses sug gested that Office of Residential Life should have more oversight over party themes. On the contrary, the IHC has taken the stance that the student body should continue to be responsible for its own actions and not rely on others to determine right from wrong, Only in cases where Houses and the IHC have failed to fulfill their responsibilities as self-editors should ResLife have the obligation to intervene.

It seems that the take-home message from this debate is that as a student body, we represent a wide spectrum of what we view as appropriate and inappropriate in regards to social events on our campus. Moving forward, and keeping in mind that we are a system funded by the College, the Houses will consider this spectrum to a greater degree when planning events.

"The IHC has taken the stance that the student body should continue to be responsible for its own actions and not rely on others to determine right from wrong."

Furthermore, since this event, the IHC has begun to use its meetings to consider the impact of Houses' events and to continue to encourage a wide variety of events on any given night.

In short, we would like to en-courage the Houses and all other social groups on campus to be self-regulating: to think twice about events that could be offensive, and why, before carrying them out. This can all be accomplished without placing unnecessary restraints on the creativity and enthusiasm of our students.

We would like to thank each individual who has engaged in this important and somewhat unprecedented dehate

We ask you to continue to voice your opinions, listen to those round you, and consider the underlying issues that may influence those opinions.

As usual, the greater Bowdoin community is always welcome to attend IHC, BSG, and College House meetings to let their opin ions be heard.

We hope this debate results in more thoughtful social atmosphere on campus.

dent of the Inter-House Council and Keri Forbringer '10 is the Secretary. Vice President Dan Heth-'09, Events Coordinator Chelsea Jackson '09, and Treasurer Simon Ou '10 also contributed to

Assassin II: Bowdoin becomes a polar-bear-eat-polar-bear campus

A SOJOURN IN CIVILIZED LIFE

BY ANNIE MONJAR

By the time this article is published, I could be a goner.

I write this on the threshold of a

battle that could go on for months. I have 11 hours and 45 minutes until Bowdoin becomes a polarbear-eat-polar-bear campus. Until we are no longer a cozy liberal arts college on the coast of Maine, but a war zone recognizable only by the crumbling, blood-stained polar bear statue standing solemnly at

Some may attest that I'm exaggerating, but I say to you, my com-rades-in-arms, that the protest is only made in denial of the apocalyptic undertaking set to begin at 8°a.m. on Thursday, October 16, 2008.

Campus-Wide Assassin II is upon us.

I've just gotten off Facebook, and can safely assure this unassuming young victim that their place of ence, birthday, campus activities, hometown, and favorite films are etched into the dark recesses of my plotting mind, providing me ample data with which to sock them to their destruction. There's

a reason why I've "friend-locked" my profile.

They say that WWI was a war of the trenches, where bloody stalemates drew out a painfully violent war. Last year's Assassin seems to reflect that logic-I'm not sure any of us actually knew when the game ended, or who won it for that matter. It seems highly likely, though, that the victor hid his or herself in his or her bedroom, waiting until the number of casualties had risen to a sufficient number, and then emerged, machine-sock in hand, elting the remaining few to their demises.

But just as military strategists recognized the need warfare tactics during the Second World War, so has the Residential Life staff seen that efficiency in killing is vital if this game is to end before the class of 2009 graduates. The "airpower," if you will, of Assassin II, the initial carpet bombing that will sweep away mass numbers of players for a more focused game will be the instigation of this new rule:

Stay in the game with one kill by 10/23 and two kills by 11/6." Spooze and lose, essentially,

While the gravity of the impending battle weighs heavily on me, I have reason to be confident in my success in this year's campus-wide

Some weeks ago, the floor that I live on in Coles Tower decided to have a floor-wide activity in an effort to get to know one another a bit better. There were movements to bakes cookies, to go bowling, to have a movie night, but the 15th floor of the Tower decided on what we deemed the best way to bring us closer together: to feign murdering one another until only one

And so the 15th-floor Assassin game commenced. Two major problems quickly arose-first, we all live together, so the most effec-tive strategy for "killing" consisted of wandering into the neighboring you rummaged out of your drawer. Second, it became clear from the start that the intended effect of creating a floor bond was for naught. My stomach still jumps any time I see one of my roommates.

All in all, the game lasted about 48 hours, and though my strategy for this impending game will have to be altered, I'm still convinced my brief experience gives me a leg up on the rest of the field.

And though even if I won an iPod Touch which there's no way I could ever figure out how to use and would probably lose anyway, my sense of being a seasoned veteran in Assassin prevents me from taking this challenge with anything less than my utmost seriousness

So from here on out, until whatever fatal Gold Toe or SmartWool brings me to my end, I am 100%

I am determined to be the Abomb of Assassin II, bringing a swift and bitter blow to whatever target has the bleak misfortune to fall into my hands.

This determination, however, will cause me extreme embarrassment in the event that I have to tell readers that I got socked between writing this column and the actual publication of this week's Orient.

unbearable.

CAMPUS QUESTION

Is Bowdoin an intellectual campus?

In the October 3 issue of the Orient, the Bowdoin community was asked to respond to the question, "Is Bowdoin an intellectual campus?" The following replies were submitted.

Josh King '10

Many people at Bowdoin are very intellectual, but there is a huge range of intellect on campus. The huge jock who sits next to you in class who you don't think has much going on in his head seems to make insightful comments all the time, but it doesn't always translate to him being intellectual outside of

I have seen a lot of debates over issues such as global warming and politics. Bowdoin is so liberal that every time someone makes a comment that doesn't fit that mold, it spurns a massive debate.

I like Bowdoin the way it is though. If you want to be an intellectual and debate politics with your friends, you can find that, but if you just want to hang out and crush beers with your friends, there is no shortage of that either.

Chris Sanville '12

Tuesday morning I sat down in the library beneath Sills to do some homework before class. But, as invariably happens before I can ever accomplish anything, I had to fritter away precious time checking my e-mail accounts, Facebook, and reading the whole of Student Digest (you know how it goes). Usually by this point I'm ready to

move on, however something in the Digest caught my eye. There was a post posing the question, "Is Bowdoin an intellectual campus?" It asked for a 400-word submission for the Orient.

Well, I had no intention of writing anything more than I absolutely had to for class, but the question got me thinking. And, my body, obviously trying to prevent me from academic success, let me know that it was time to use the bathroom.

As I walked to the bathroom and proceeded to take care of business, my mind remained fixated on the question postulated by the Digest. I thought about the exact meaning of it and considered my classes and the discussions in them. They

were pretty intellectual, but as I thought about it, I decided that was different. Classrooms are meant to be so and don't make a campus. I contemplated the conversations I have with friends and concluded they were the same at home: a little philosophy, a little gossip, and everything between. It was intelligent conversation, but it didn't make the campus intellectual.

I just couldn't come to a decision about Bowdoin. I stared at the stall walls pondering, when suddenly I noticed something. Where I'm from, and seemingly everywhere I'm not, people, for whatever reason, have the irresistible urge to carve the dumbest, most lewd images on bathroom stalls. Here however, it was different. Instead of

various pieces of human anatomy, there was poetry and quotes by Emerson. I could not believe my eyes. Who writes poetry on a bathroom wall?

So, even though I haven't started, let alone finished my homework yet, I definitively have an answer. Bowdoin is undoubtedly an intellectual campus. For it is not the philosophical discussions we have in class, nor the academic activities we participate in, nor even the philosophical conversations we have on the quad that make an intellectual campus. Those are on any college campus. It is instead the small things, such as poetry rather than pornography on a bathroom stall, that truly make Bowdoin an intellectual campus.

ARE YOU SATISFIED WITH BOWDOIN'S SOCIAL SCENE?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu.

Several submissions will be selected and published in the October 24 issue.

STUDENT SPEAK

If you were to throw a campus-wide party, what would the theme be?

Antonio Watson '12 "Stoplight party."

Carolyn Levine '11 "Longfellow bros and Chamberlain hoes."

lan Yaffe '09 "Revolution party."

Audrey Hatch '10
"Too soon, but it's too soon to have one of those again."

Molly Kringdon '11
"Stereotypes at Bowdoin."

James Park '09
"Slip 'n' slide."

Allie Gunther '10
"Women's rights."

Mike Ardolino '08

WEEKLY CALENDAR

OCTOBER 17 - OCTOBER 23

FRIDAY

LECTURE

G. Calvin Mackenzie '67

Mackenzie, the Goldfarb Family Distinguished Professor of Government at Colby College, will deliver the Common Hour lecture. It is titled, "The 1960s, Then and Now." Mackenzie's scholarly interests include presidential appointments and transitions.

Kresge Auditorium, Visual Arts Center. 12:30 p.m.

ELECTION'08

Congressman Tom Allen '67 and Senator Sheldon Whitehouse

Rep. Tom Allen '67, Democratic candidate for the U.S. Senate, will discuss his campaign and answer questions. Sen. Whitehouse (D-Rhode Island), will also speak. Refreshments will be served.

Morrell Lounge, Smith Union. 1:30-3 p.m.

"Observing the Bird of the Universe"

Princeton University Professor of Physics Lyman Page will discuss the proper contextualization of cosmic

Room 315, Searles Science Building. 7:30 p.m.

PERFORMANCE

Cultural Explosion

Sponsored by the Latin American Student Organization, this event will feature poetry readings and several types of dance, including bellydancing and a Dominican Palo dance

Morrell Lounge, Smith Union. 8:45-11 p.m.

AUTUMN LEAVES: A path on the Quad is lit up by the bright colors of fall leaves

SUNDAY

Phil Soule 5K Phlail

Sign up for the race on Friday between 12 and 2 p.m. in Smith Union or during the football game on Saturday. Entry is free and participants will receive a complementary T-shirt. The race benefits the Bowdoin Nordic Ski Team.

Whittier Field. 11 a.m.

MONDAY

Homecoming Choral Concert

The Bowdoin Chorus and the Bowdoin Chamber Choir will perform.

Chapel. 2-4 p.m.

SATURDAY

SHOW

The Regurgitator

Stevie Starr, known for his regurgitations of goldfish, billiard balls, and lightbulbs, will perform two shows. Kresge Auditorium, Visual Arts Center. 6 and 8 p.m.

Meddiebempsters' 70th

Anniversary Concert

Bowdoin's oldest a cappella group, the Meddiebempsters, will give a concert to commemorate their 70th

Kanbar Auditorium, Studzinski Recital Hall. 8 p.m.

Cullen Winkler Art Opening

Cullen Winkler '09 will exhibit his independent study project, which consists of painting and mixed media. Fishbowl, Visual Arts Center. 8 p.m.

FILM SCREENING

"Night Scene: Queer Identity and Alienation in China"

Professor Zi'en Cui of the Beijing Film Academy's Film Research Institute will lead a discussion after the film. Beam Viewing Room, Visual Arts Center. 7 p.m.

INFORMATION SESSION

Global Citizens' Grant

The Global Citizens' Grant supports independently designed student projects that focus on local community work. The grant is designed to broaden student perspectives by providing recipients with international experiences. Room 111, Adams Hall. 7:30-8:30 p.m.

TUESDAY

"Why Using International Trade Restrictions to Enforce Environmental Standards Is a Bad Idea—and a Better Approach"

MIT Professor Emeritus of Economics Robert Solow, the recipient of the 1987 Nobel Prize in Economics, will deliver the Kenneth V. Santagata Memorial Lecture.

Kresge Auditorium, Visual Arts Center. 7:30-9 p.m.

WEDNESDAY

"Engaging the Ancestors: Ceramics, Archeology, and the Penobscot Nation"

Dr. Bonnie Newsom, the Penobscot Nation's Tribal Historic Preservation Officer, will discuss her work in management of

historic tribal properties and archeological oversight. Beam Classroom, Visual Arts Center. 7-8 p.m.

"Reading Manufactured Landscapes: **Drawing Meaning from Film and** Photography"

A panel of professors will respond to photographs by Edward Burtynsky and discuss selections from the film, "Manufactured Landscapes."

Kresge Auditorium, Visual Arts Center. 7-9:15 p.m.

THURSDAY

"End of Life and Palliative Care" .

Dr. Thomas Keating '78, Medical Director of the Palliative Care program at MaineGeneral Medical Center in Augusta, will discuss his work in reducing the severity of disease symptoms.

Schwartz Outdoor Leadership Center. 9-10 a.m.

"Genesis and the Creation of the World"

Jon D. Levenson, the Albert A. List Professor of Jewish Studies at Harvard Divinity School, will give this talk. It is the first in a series titled "Faith, Reason, and Evolution: A Public Colloquium," A panel discussion will follow. Talk: Room 151, Cleaveland Hall. 4 p.m. Discussion: Kresge Auditorium, VAC. 7:30 p.m.

SOWDOIN ORIENT

ECONOMY

College limits spending but remains 'secure'

BY NICK DAY AND MARY HELEN MILLER

As hard times grow harder, Bowdoin is tightening its belt.

While the current economic crisis has severely limited the expansion of facilities, faculty, and other college programs, President Barry Mills said that the College is eco-nomically "secure."

"The message is that all of our staff positions are secure, all of our faculty positions are secure," Mills told the Orient. "Our financial aid support is secure, and that fundamentally, everything that we're doing, everything that comprises the core strength at Bowdoin is secure?

However, Mills said it was unlikely that the College would renovate facilities or expand the ranks of faculty in the near future.

"We are going to be looking hard at expansion of program at this point," he said. "Expansion of programs adds cost at a time when clearly our endowment is not going to grow at the same kind of rates it has in the

The College plans to finish building the hockey rink and fitness center—two projects that are already underway— but Mills said that the pace of facility upgrades "will diminish considerably."

Polar bear mascot puts new paw forward

BY PIPER GROSSWENDT ORIENT STAFF

While the polar bears at the North Pole struggle to stay afloat, the Bowdoin polar bear has been facing problems of its own. A quick browse through the bear-branded merchandise at the bookstore yields all the insight needed: Bowdoin's polar bear has been suffering from a major identity crisis

After a year of consulting with mem-

working with a graphic design firm, the Office of Communications and Public Affairs hopes to have cured the mascot's ails in their selection of a new polar bear logo.

In its 96-year tenure as Bowdoin's mascot, the polar bear has been through many graphic incarnations. From the statue that stands at the entrance to Smith Union, dedicated by the Class of 1912 in 1937, to the car

toonish running polar bear that graces each student's keycard, to the more ag-gressive profile that has gained popu-larity in recent years, each logo has one thing in common: None of them have been deemed official.

Vice President for Communications and Public Affairs Scott Hood explained that "there is value in having consisten cy," and that the new logo is intended to

Please see MASCOT, page 4

ELECTION '08

Bowdoin vote may determine local elections

BY ANYA COHEN

Bowdoin students may think their November 4 vote won't count. They should think again.

According to Town Clerk Fran Smith, about 1,200 Bowdoin students, a figure which may include recent alumni, are currently registered to vote in Brunswick. That number will likely increase over the next two weeks since students can register up to and even on Election Day. Bowdoin students are divided up into four different town voting districts and two state representative districts based on their addresses.

Smith said that the last presidential election generated a significant amount of interest from students. According to a report by the Bowdoin College Democrats, 796 Bowdoin students voted in 2004; in a town of 21,000, the influence of this voting bloc is undeniable.

"The college community is definitely an important voting demographic that can influence Brunswick politics," said Democratic candidate for Maine State Representative for District 66 Alex Cornell du Houx '08.

Cornell du Houx's opponent, Republican Ion Crimmins, said that in the past Bowdoin students have been "whipping boy" for whichever

Disorderly House Ordinance may affect students off campus

Students living in off-campus housing in Brunswick may think twice before cranking up the bass at the next party they host

On Monday, the Brunswick Town Council passed the Disorderly House Ordinance at its bi-weekly meeting Though the ordinance fines landlords-not residents-of houses that repeatedly engage in disorderly con-duct, it has implications for Bowdoin students living in off-campus hous-

According to District 6 councilor Margot Knight, who has been working on the ordinance with District 4 coun cilor Karen Klatt, the town council has attempted to find various solutions to the problem of disorderly houses for the last year.

On Monday, Knight told the council that the purpose of the ordinance was to "establish a process to address chronic unlawful or nuisance activity and remediation, and only if that fails

DISORDERLY HOUSE ORDINANCE

• A 5-4 vote at the Brunswick Town Council meeting on Monday passed an ordinance that will fine landlords, not residents, for repeat disorderly conduct offenses · Two disturbances within 60 days and five disturbances occuring within one year qualifes a residence as "disorderly."

• Fines for landlords can amount to \$10,000.

on monetary penalties."

Under the ordinance, landlords are held responsible for any disor-derly conduct occurring within their residence, unless the landlords and their tenants come to some other agreement within their leases. If two more events of disturbance occur within 60 days, or if five or more occur within a year, the Brunswick Police Department can classify the house as disorderly and issue the landlord a fine between \$5,000 and \$10,000.

wdoin and "any institution with a full-time security department" will fall under the umbrella of the ordinance.

Please see ORDINANCE, page 2

Field hockey snaps 31-game win streak

BY KATHERINE POKRASS

Tasting defeat for the first time in two seasons, the Bowdoin Field Team fell to the Trinity College Bantams last Saturday af-ternoon. The 2-0 shutout snapped 39-game home win streak and a 31-game overall win streak for the Bears, as well as the first Trinity victory over Bowdoin since 1997.

The Polar Bears held the advantage in shots (8-0) and penalty corner opportunities (9-0) for the first half and effectively controlled the play in Trinity's defensive end. However, difficulties converting on scoring chances and the remarkable individual effort from Bantam goalkeeper Gina DiNallo left Bow empty-handed after 35 minutes had

"We were encouraged by the amount of possession we had but obviously need a greater sense of urgency in converting our oppor-tunities," said Head Coach Nicky

Unfortunately for the Polar Bears, a different Trinity team took

SHUTOUT: Shannon Malloy '11 looks to pass upfield during the Bears' 2-0 loss to Trinity on Saturday.

the field for the second half. Put ting four shots on the Bowdoin goal and earning five penalty corner at-tempts, the Bantams found a way to take the game from the favored Polar Bears

udents they did not know. Page 11.

"Trinity's offensive speed forced us to make quick defensive switches and recoveries," said Megan Mc-Cullough '10.

CONTINUED FROM PAGE 1

While funds have been raised for eight of the 12 endowed faculty positions that are to be added through the capital campaign, Mills said he is "not highly optimistic that I'm going to raise the money for the additional four in the short term.

Mills said he is confident that the College will reach the \$250 million capital campaign goal by June 30, 2009. Even so, the four remaining endowed faculty positions will no be funded unless gifts are made specifically for them, according to Senior Vice President for Finance and Administration Katy Longley.

Additionally, the College has decided not to go forward with the implementation of a new student information system, which would include online course registration. So far, the College has invested less than \$50,000 in the project, according to Longley. Mills said that, in all, the implementation of the program would cost \$2 million in capital and between \$300,000 and \$350,000 in annual expenses.

Mills sighed and said, "It's just not possible."

He said that facility improvements-including the reprogram-ming of Smith Union, and more general renovations to classrooms

would also have to be put on hold.
"The prudent course here is not to get ourselves overextended," Mills

As of June 30, 2008, the end of the last fiscal year, the College's endowment was valued at \$831 million, a figure that represents a 1.3 percent increase from the previous year.

"From where I sit right now, if we had 1.3 percent growth [in the current fiscal year it would be fantastic," Mills said.

Mills attributed the College's "strong and stable position" to the rapid growth of the endowment in the recent past, which has increased more than two and a half times in the last decade, and the College's relatively small accumulation of debt, which was approximately \$131 million at the end of the last fiscal year.

"If you have a lot of debt, in an environment where economic trouble hits, you can't absorb a whole lot of loss," Mills said. "There are schools out there that have a lot of debt, who are in a whole lot worse position than Bowdoin is today."

According to Director of Student Aid Steve Joyce, it is "a little soon" to know how much financial aid students will need for the 2009-2010 academic year. The student aid office is currently in the process of designing the financial aid budget for next year.

Although Joyce said that "every year we factor in the state of the na-tional economy," he added that the figures they are working with this year are from 2008, and may not necessarily reflect the figures for 2009.

"Bowdoin will not have a limitless budget for financial aid," Joyce said. "But because it's one of our highest priorities, we want to make sure we do everything we can to make college accessible to those who are applying to college for the first time, and be sure that those who are already here can finish their degrees."

"The question will be how much

"There are schools out there that have a lot of debt, who are in a whole lot worse position than Bowdoin is today."

> RARRY MILL'S PRESIDENT OF THE COLLEGE

can the College do, and how much more financial aid can we put into the budget line without throwing the rest of the college budget out of kilter," Joyce said.

In terms of families paying this year's tuition, Joyce said, "Families have already paid their fall bills, and I would think in most cases they made plans for the spring

However, Joyce did say that "a handful of folks" have approached the student aid office, requesting additional aid for the spring semes ter, but he said "normally we don't get these requests until the spring bills go out."

Thursday, Mills sent out a campus-wide e-mail with the subject line "The Economy and

"Bowdoin has seen national economic distress many times in its long history, but we have never been better positioned as an institution and as a community to deal effectively with the consequences," Mills wrote.

However, Mills also wrote that we are facing significant challenges in the months and years ahead that require clear thinking and prudent management of our resources.

Mills went on to explain that the College plans to adhere to four fundamental principles: providing sufficient financial aid, supporting the academic program and faculty, performing major maintenance, and supporting "the sense of community at Bowdoin so vital in times like these focusing especially on our staff."

According to Longley, two of the three people who work in Capital Projects have been "put on notice." One employee has managed the construction of the hockey arena, and the other has managed the construction of the fitness center.

However, Longley said, "There's no hiring freeze.

"If a housekeeper or a dining hall employee stepped down, we would replace the positions," she said.

Longley said that Bowdoin is in "good financial shape now, but we're asking people not to grow their budgets."

"We're not going to borrow any more money," she said, explaining that borrowed money is used fo new buildings and that Bowdoin will not start new construction projects in the near future.

Mills explained that the College has grown "at warp speed over the past seven or eight years" in terms of its faculty, facilities, and programs.

"And so people have come to expect that that's the standard that we should live up to," Mills said. "But I think we have to understand our economic realities. So we should be proud and secure in the stability of the place, but recognize that just like everyone else is going to have to tighten their belt, we're going to have to adjust our expectations for

STAKING A CLAIM: Brunswick residents display campaign signs near the College on McKeen Street. More than 1,200 Bowdoin students are currently registered to vote in Brunswick

VOTE CONTINUED FROM PAGE 1

"If I lose, I'm not going to blame them," Crimmins, who serves as Chair of the Brunswick Republican Party, said. "I'm not so concerned about the impact they have, as long as it's well thought out. If I lose because someone is critically thinking and decides the other person is a better candidate, then that's okay."

"Bowdoin students have the poten tial to make or break a local election, certainly in the state house race," said Chair of the Brunswick Democratic Party Greg Howard.

Howard said he "absolutely" considered Bowdoin students an important demographic to reach out to.

"We want them to exercise their right to vote and be heard, and to be a resource in terms of bodies who want to help," he said.

The Brunswick Democratic Party has worked closely with the College Democrats to provide information or the candidates and issues. The College Democrats, in turn, have assisted regularly with phone banking and canvassing, mostly for the Obama campaign.

The issues Bowdoin students care about align with most of the Demo cratic candidates in Brunswick, which should help the Democratic candidates in 2008," said Cornell du Houx.

"We're [voting] in the first congressional district, which ends up going Democrat, so in terms of the Senate race, we'll probably see a lot of sup-port for Tom Allen," said Claire Cooper '09, co-president of the Bowdoin College Democrats. "This tends to be reflected on the local level, as well."

According to Cornell du Houx, each year, Republicans try to introduce bills that will change the Maine state law to prevent out-ofstate college students from voting in Maine.

"When Republicans introduce bills to prevent college students from voting, it's a political ploy to disenfran-chise college students because they know most students support democratic issues," said Cornell du Houx.

Crimmins said he would not fight the current state law, but he emphasized the need for students to be informed. Their vote "will impact people who live here for years, decades, even a lifetime," he said. "Those decisions can't be taken lightly.

Crimmins said that some Brunswick residents resent Bowdoin students as members of a "transient community" who do not stay after graduating to see the effects of their vote.

People in Maine are worried that one, we don't understand the issues, and two, we won't live through the consequences because so many students leave after college," said co-head of the Bowdoin College Republicans Jeffrey Jeng '09. "But this is not a sufficient reason for discouraging college students from voting.

In response to potential criticism, Town Council member Newell Augur said that current students "are serving as a proxy, in essence, for Bowdoin students who will be here five, 20, even 50 years from now."

Bowdoin is an important part of the town, and to the extent that Bowdoin students are persuaded or moved to participate in local politics, we're a better town for it," he said.

Bowdoin students will affect congressional and presidential outcomes to a lesser degree since they make up a smaller portion of the voting pool.

"As far as swaying [results] one way or the other, they're basically irrelevant," said Professor of Government Christian Potholm. "Voter turnout in this election will be so overwhelmingly high that the student dimension rill be diluted."

Potholm said he also believed that Bowdoin students would have no impact on the state-wide ballot quesns. "The tax on soda [Question I] will be defeated immediately anyway," he said.

The Town Clerk's office will hold absentee voting and voter registration at Smith Union on Saturday, October 25 from 10 a.m. to 3 p.m.

ORDINANCE CONTINUED FROM PAGE 1

All institutions will have to "prove to the Chief of Police's satisfaction that they have a mechanism in place to administer and respond to complaints," Knight said when addressing the

One amendment during the meeting changed the language so that the police chief "may" refer complaints to the College instead of "shall," leaving the decision to report disorderly nduct to Brunswick Chief of Police Richard Rizzo.

Jeff Matthews, owner of 16-18 Oak St., questioned whether Bowdoin Security holds all of its students responsible for their actions on and off campus. Director of Safety and Secu-Randy Nichols responded that the College holds all of its students accountable through an internal disciplinary system, regardless of where they live.

Resident of 17 Cleaveland St. Nicholas Norton '09 had not yet heard of the ordinance.

"It seems strange that we have not even been informed about this," said Norton. "I would like to be informed in the future, even if the ordinance does mostly pertain [to] the land-

According to Cleaveland St. resident and Associate Professor of Film Studies Tricia Welsch, the 12 student residents of 17 Cleaveland St. this year are "quiet and respectful." Welsch found that last years' students, however, were rowdier and often disruptive. Welsch said that she and other neighbors pushing for a change in the ordinance hope for legislation that will not only imize disturbance but also protect

the historic houses within Brunswick

"We worry that houses which for many years have been single-family dwellings and are historic homes, will be run down," said Welsch. "These houses are not meant to hold tons of people—they should be preserved and cared for."

According to Welsch, she and other neighbors on Cleaveland St. first initiated an effort last fall to limit the number of residents who could live together in single-unit dwelling. The move would have qualified 17 Cleaveland St., which housed 11 Bowdoin students last year, as a boarding house and placed it in violation of District TR2's zoning laws. Though this ordinance did not pass, the Town Council conducted research about similar disorderly housing ordinances in other towns before proposing a new ordinance in June. The new ordinance was finally approved on Monday night by a 5-4 vote.

Councilor-at-Large Joanne King opposed the ordinance because the whole burden ends up being on the landlords, and that is quite difficult to approve within this economy."

District Three Councilor Hallie Daughtry also voted against the ordinance on similar grounds, claiming that it placed undue pressure on the property owners.

would feel more comfortable if the person disturbing the peace were held more responsible than the property owner," said Daughtry. "It ms too convoluted to address the landlords instead of cutting to the

Anthony Seretakis, who co-owns

17 Cleaveland St. with his brother, also disagrees strongly with the ordinance.
"I don't think it's fair to hold the landlord completely responsible for paying any potential fines," said Sere-takis. "I think the tenant should be at least 50 percent responsible for the fine. Ultimately, this piece of legislation discourages me from making any [further] investments in this town

Many residents in Brunswick, however, were happy to see the ordinance

pass.
"I had an incident this past weekend with a disorderly house on School Street," said Cliff Fisher, who has lived on School St. for 12 years. "It is nice to know that this ordinance will provide some better way to address disrup-

Bev Bevilacqua, who lives on the corner of Federal St. and Cleaveland St., is also pleased that the ordinance

has passed.
"I get all sorts of noise on weekends from students walking from campus to their residences at Stowe Inn," said Bevilacqua. "They come and go sø fast that by the time I notify the police, they're gone. There simply must be some way to hold somebody account-

According to Knight, the town of Orono enacted a similar ordinance more than two years ago, and since the ordinance was passed "the complaints about noise and disorderly conduct have plummeted." She also said that the Chief of Police has yet to fine a

Norton said that this year's residents of 17 Cleaveland St. hope to avoid ever being affected by the ordinance by being proactive and conscientious neighbors.

"Certain individuals have said, 'If you make noise, we will call the police, and we understand that," said Norton. I feel very optimistic about the situation and our ability to avoid any sort of conflict this year

CORRECTION

Due to a reporting error, a quote in the October 17 article, "BSG mulls over campus social scene," by Kristen Gunther '09 was taken out of context. Gunther's comment was made during the discussion about the gender

and sex issues raised by the Playboy mansion party debate. Gunther's first name was also misspelled.

Nobel laureate lecturer Solow challenges current environmental standards policy

ORIENT STAFF

Though Nobel Laureate Robert Solow will vote for Barack Obama on Election Day, he disagrees with the Senator's support for imposing higher international environmental standards on poor countries.

Solow, who is Institute Professor Emeritus at the Massachusetts Institute of Technology delivered the Kenneth V. Santagata Memorial Lecture lecture, titled "Why Using International Trade Restrictions to Enforce Environmental Standards is a Bad Idea—and a Better Approach," to a packed Kresge Auditorium on Tuesday evening, Using a simplified model economy, Solow, who was awarded the Nobel Prize in Economics in 1987, explained how the U.S. currently enforces an ineffective and unfair system of environmental protection in the countries with which it trades.

"There's a rich county and a poor country, or a group of poor countries. Each of these countries produces some characteristic stuff...lt produces those goods and services using capital and labor, and whatever natural resources it has at its disposal," he said.

Production of goods, however, can cause pollution, which becomes an expensive problem for countries. Though countries have the option of spending money to abate pollution, whether they choose to do so or not heavily depends on their financial circumstances.

"Abating pollution and protecting the environment is costly to a country," said Solow. "It has to choose between more consumable output and better air quality."

The politics of the situation shift when a rich country demands that the poor country spend more money on the abatement of pollution by threatening to exclude their products from the rich country's markets.

"In the new state of affairs, after the rich country has imposed higher environmental standards on the poor country, real wages in the poor country will be lower," said Solow. "The environmental preferences of the rich country are satisfied at the expense of the workers of the poor country."

According to Solow, countries like the U.S. that claim to be "friends of the earth" are actually "enemies of...the

Solow, however, said he doesn't believe that "well-meaning people want that outcome," and he proposed that wealthy countries list environmental problems "in order of priority and associate a cost with each priority."

sociate a cost with each priority."

While reforesting the Amazon basin or improving the air quality in Mexico City would likely come near the top of the list, certain problems would have a lower priority.

"Improving beaches on the French Rivera might come lower," said Solow. "Improving beaches in Maine might be a different matter."

Though Solow said making a master list of the world's environmental problems would be a difficult task, it would demonstrate the inversely proportionate relationship between wealth of a country and the severity of environmental problem

"Many of the high priority projects will be in poor countries," said Solow. "The bulk of the costs could be levied on rich countries."

Since environmental standards are usually imposed from external countries, Solow said that it makes sense for those countries to contribute funds, rather than just threats.

"Rich countries could pay to stroke their own environmental preferences, instead of trying to force underpaid workers in countries to pay," he said.

Solow acknowledged that his solution is a difficult one, and that it might not be enacted literally.

"All I mean by this is to drive home the important principle that the location of environmental improvement and the location of the payment for environmental improvement don't have to be the same," he said.

Solow also said that those who support policies that impose higher environmental standards on poor countries may be well-intentioned, but that they are unaware of the unintended consequences of such standards.

"I certainly don't believe that Senator Obama, for whom I will vote for with the greatest of pleasure, understands the consequences," he said.

According to Solow, a close look at the repercussions of these restrictions in poor countries will promote better policies.

"There is really no substitute for trying to understand all the consequences of policy decisions—not just the ones that you have in mind when you invent them," said Solow.

Cleaveland Street apartments deemed unsafe for big gatherings

BY CATI MITCHEL

Students living in the apartments at 10 Cleaveland Street were informed in an e-mail Thursday afternoon that they should limit the number of visitors to their apartments because the building may not be structurally safe for large gatherings.

In the e-mail, Director of Residential Life Mary Pat McMahon wrote, "Each apartment in Cleaveland Street should limit visitors to no more than three or four guests at any given time. The structure is quite safe as a residence, but it should not be used for large gatherings."

As a result of the new requirements, students living in the apartments will no longer be able to register parties.

The change came about after residents noticed that the ceilings of the apartments were tilted and the floors often shook.

Residential Assistant Ugo Egbunike brought the issue to Residential Life this summer and again in the fall.

summer and again in the fall.

"You could tell that some parts [of the apartments] needed additional attention," he said.

However, he said that "they thought the issues pertained to the house being old," and Residential Life pushed the inspection back until fall break.

The e-mail from McMahon noted that over the past week, Facilities has been working on the railings, basement, and stairwells of the building. An engineer brought in to inspect the building made the new recommendations.

"We want to restrict capacity," said McMahon. "We're being conservative about safety."

Senior Vice President for Adminis-

tration and Finance Katy Longley said that there were safety issues with railings and floor structures inside the house.

"There were some railings, some floor structures that needed to be fixed," Longley said. She said that many of the repairs will be made when students are away on vacation.

"We're going to try and do most [the repairs] over break," she said, but added that some of the repairs, like railings, could be done while students occupied the buildings.

"We're going to try and work around the students' schedules," Longley said.

Associate Director Major Maintenance Programs for Facilities Mike Veilleux, who is overseeing the inspection, did not respond to numerous requests for an interview.

Several of the students living in the building had not read the e-mail from McMahon. Juniors Sarn Smith and Ahmad Hassan Muhammed, who live in a first-floor apartment, were initially "outraged" when they learned that residents

would not be able to register parties.

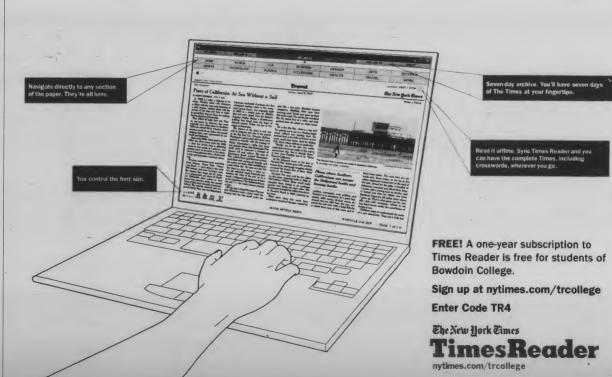

"Not much we can do about it, right?" said Muhammed.

Sara Griffin '09, who lives in an upstairs apartment, said, "I'm glad that they brought in an engineer to look at it since it's been something I've been thinking about. When I hear creaks, I get a little nervous."

"Knowing that an engineer approved this as being safe to live in makes me feel more comfortable," Griffin added. "I just hope that we don't get punished because they didn't check it out before putting the building in the housing lottery."

MASCOT

serve as a consistent and timeless graphic identity for the College.

Collaboratively conceived by the Morrow Creative Group of Portland, Oregon, alongside committees Bowdoin students, faculty, staff, and alumni, the new logo depicts an ana-tomically correct polar bear, rendered in a stylized black line drawing. The bear, gazing directly at the viewer, stands on three legs, with the fourth paw raised and resting on a capital letter "B."

A cropped version of the new logo, which shows the head of the full-fig-ured polar bear of the main logo en-circled in a black ring, was also developed to allow more flexibility in the use of the image. Additionally, an entirely new typeface was developed for use in conjunction with the new logo

Hood explained that the College has been in the process of streamlining its "graphic identity" over the past few years. Projects have included the development of the Bowdoin "wordmark signature" along with redefining the official version of the college seal with the sun.

The need to establish an official polar bear logo became an immediate concern when the plans for the Watson Arena called for the depiction of a polar bear logo on the floor of the lobby. The plans used a popular image of the mascot, one that shows a polar bear's head in profile with its mouth open so to suggest a ferocious snarl.

Realizing that this image would be set in stone at the new facility, Hood said the need to formally establish an official polar bear logo became apparent.

Though plans were altered and no longer call for the logo to be reproduced on the lobby floor, the problem of designing an official logo persisted. New plans call for the cropped logo to be reproduced in the center of the ice rink itself.

According to a history of the mascot found on the Athletics department web site, the polar bear became Bowdoin's official mascot in 1912. Donald B. MacMillan, the 1897 graduate who became famous for his expeditions to the Arctic, brought a real polar bear back to Bowdoin in 1915 and "presented it

BEAR STARE: The new mascot features a large, intimidating polar bear with one foot atop a "B."

to the College with the words: 'May his spirit be the Guardian Spirit not only of Bowdoin Athletics but of every Bowdoin [person]."

Hood emphasized MacMillan's sentiment as a concern that was taken into consideration in the designing of the new logo. While its affiliation with Bowdoin athletics is especially strong, the polar bear is the mascot for all aspects of the Bowdoin community.

Throughout the process of design ng the new polar bear, Hood said that those involved considered the question, "Do we need an icon for the college that's mean and growling and scary because it projects power?"

Morrow Creative Group, founded

and run by the Nike's former creative director Michael Morrow, visited campus last year and consulted with groups of students, faculty, staff, and alumni to understand what the Bowdoin community felt the new logo should represent.

These focus groups came up with a list of characteristics that they felt the new logo should embody. Pride, dignity, intelligence, confidence, courage, quiet power, genuineness, and presence were all characteristics about which the groups felt strongly.

With these ideas in mind, the design

firm developed a number of initial ideas that were narrowed down to four logos that were sent to the focus groups to look at over the summer. Hood explained that the approximately 80 people who received the electronic survey were not asked to simply vote on their favorite design, but to assess all four and submit

a written response as to how each of the logos reflected the identified qualities, how timeless the image was, and how it would translate to merchandise.

Hood said that the selected logo was the "overwhelming favorite of the peo-ple that were involved" in the process.

Director of Athletics Jeff Ward said he felt the new logo emphasized the point that the mascot is representative of "one campus," and not only of the

The impact of the new polar bear logo on Bowdoin's graphic identity will not be felt immediately, as Hood explained, "[a new logo] is the sort of thing you phase in over time" and that "takes a number of years" to establish.

Assistant Director for Bookstore Operations Cindy Breton wrote in an e-mail to the Orient that the bookstore will be ordering new merchandise in February," and that they plan "to start implementing the bear then.

Hood was quick to clarify that although the new logo is now the official Bowdoin polar bear, "all those [other] bears...are not going away."

Breton added, "Since previous bears

re popular with different generations of Bowdoin alumni, [the bookstore] will continue to carry some items with these previous designs

Noting that in the wild, polar bears have no predators other than man, and that a ferocious, growling mascot was not the image the college was looking to project, Hood said that there's "something appealing about having a mascot that is looking directly at you."

Trustees assess budget at Homecoming meeting

In the first of this year's Board of Trustees meetings, all eyes focused on the sorry state of the economy and its impact on Bowdoin.

"This meeting was dominated by

discussion of what's happening in the financial market and what impact it may have on the College and its finances, said Senior Vice President for Planning & Development and Secretary of the College Bill Torrey. "Nearly all of it was talking about how we're going to prepare ourselves."

After assembling on campus Thurs-day, the board members broke into committees, and presented their work at a plenary session on Friday to the rest of the board.

On Saturday, the morning was devoted to another plenary session on the most important issue identified the day before: the economy

According to Torrey, "the board charged the President and administration with looking at all of its sources of revenue." The goal of this analysis was to identify "the things we need to cut back on to protect financial aid, protect academic programs, and protect the Bowdoin experience

Bowdoin's current economic situation is somewhat misleading due to the fact that its operating budget reflects the state of the endowment a year ago when the market was considerably less turbulent. Next year, Torrey said, will be in-teresting because the budget will begin to reflect the economy's decline.

On Saturday, the Board attended a post-dinner panel discussion fea-turing top-level financial advisers, including Lawrence B. Lindsey, the former Director of the National Economic Council (2001-2002), the former Assistant to the President on Economic Policy for President George W. Bush, and current Presi-

"Because we are in a position of strength...this kind of economic stress is something that doesn't intimidate anyone, and doesn't raise questions about the strength and vitality of Bowdoin."

> BARRY MILLS PRESIDENT OF THE COLLEGE

dent and Chief Executive Officer of The Lindsey Group, a global eco-nomic advisory firm based in Wash-ington, D.C. William A. Daley of JP Morgan Chase & Co.'s executive committee also participated during the panel discussion.

According to Torrey, Lindsey said that in terms of the nation's economy, "the immediate future is bleak."

"He's not optimistic at the moment,"

"I think the reaction of the Trustees was that they've seen times at Bowdoin where the College was not poised to be able to take this kind of economic stress" said President Mills in an interview on Monday. "And that because we are in a position of strength...this kind of economic stress is something that doesn't intimidate anyone, and doesn't raise questions about the strength and vitality of Bowdoin."

According to a letter from Mills, the good news is that the college is 97 percent of the way to completing its \$250 million capital campaign, and has excellent staff overseeing Bowdoin's finance and investments, as well as a solid base of loyal alumni

and parents.

All Bowdoin can do, said Torrey, is to "take each day as it comes and prepare ourselves for the future by looking at everything we do."

BSG meets with two boards; **Why Re-Elect** plans to co-host econ forum TERI MCRAE BY ALEX PORTER

With annual reports from the Student Judicial Board and the Sexual As-It and Misconduct Board, a discussion about the pending Health Center investigation, and a contentious vote to extend the mandatory adjournment time, Bowdoin Student Government (BSG) representatives had their hands full at Wednesday's meeting.

After introducing Assistant Dean of Student Affairs and Judicial Board Advisor Laura Lee, Judicial Board Chair Mark Newman '09, and Advisor to the Sexual Assault and Misconduct Board Meadow Davis, BSG President Sophia Seifert '09 opened the floor to questions from BSG representatives. Many of the questions fielded by the three visitors focused on procedures followed by the two boards. Referring to a specific case in which a student accused of sexual assault accepted responsibility for his actions, Representative Nyle Usmani '12 asked if any "plea bargain system" existed.

Both Lee and Davis asserted that an admission of guilt does not prevent a student from receiving a sanction for his or her actions.

While the topic of sanctions has its basis in official policy, some BSG

representatives questioned their visitors on issues more open to interpre-

Representative Ian Yaffe '09 asked Lee if she believed that class-specific honor codes undermined the strength of the college honor code. While Lee did not condemn individual honor codes, maintaining that "professors have the latitude to do it," she did say that reiterating part of the college

honor code "would be redundant."

Through further questioning by
BSG representatives, Lee revealed that college administrators hold a "Week-in-Review" meeting every Monday morning at 9:15 a.m. to discuss student infractions and their severity. Administrators then decide if and how to take action based upon the nature of the offense. Often, they refer the most severe cases to the Ju dicial and Sexual Assault and Misconduct Boards. In terms of sanctions passed down by these bodies, Newman asserted that "nothing is set in stone" and that his Board considers sanctions, guided by precedent,

on a case-by-case basis.

At the end of the meeting, Seifert announced that President Mills will join BSG for its November 5 meeting and hopes to co-sponsor an economic forum with BSG in the future.

SECURITY ALERT

Local man banned from campus

ORIENT STAFF

For the third time in a month, the Office of Safety and Security has issued an alert for a man identified for follow ing a female student.

Brunswick resident Michael C. Barry, 19, was issued a criminal trespass warning on Thursday after trailing a female Bowdoin student in his red 1995 Cadillac El Dorado late Wednesday

Around midnight, a female sophomore Bowdoin student pulled out of the Brunswick Apartments parking lot onto Longfellow Street with a non-student female friend. As she drove down Longfellow Street, the student noticed a red Cadillac parked on Longfellow St. with its headlights shining on her car. The man in the Cadillac then followed her at varying distances on Longfellow St.

The student then turned left on Coffin Street, planning on returning to her residence. Noticing that the red Cadillac was still following her, she decided to head to the safety and security office on Bath Road. After turning right on College Street, toward the Outdoor Leadership Center, she turned left onto Sills Drive and then left onto Bath

The Cadillac continued to follow her, and though the student wanted to turn into the Security parking lot, she wor ried about what might happen if she stopped the car, and so she continued down Bath Road

Director of Safety and Security Randy Nichols said that continuing down the road was a good decision.

"She did all the right things," Nichols

The student then made a left

onto Maine Street and called Security from her cell phone.

As she turned left onto College Street, Security advised her to pull in the Security lot, and so she turned left onto Sills Drive again. At the intersection of Sills and Bath, a Security officer started tailing the Cadillac

The student then pulled into the parking lot, but the Cadillac continued down Bath Road

By this time, the Security office had ed the Brunswick Police Department (BPD) of the situation. After going around the right side of the First Parish Church, the Cadillac turned left onto Maine Street, and then turned right on McKeen Street, where the Security officer tailing the Cadillac signaled it to pull over.

While still in their cars, the Security offer questioned the suspect, but Barry soon sped off, at which point Security

updated the BPD on Barry's actions.
"We don't engage in chases," Nichols

About 20 minutes later, the BPD located Barry in his vehicle. After chases on car, on foot, and through water, the BPD finally apprehended the suspect, who has been charged with operating under the influence and eluding an officer.

On October 2, Stuart Bull of Brunswick was issued a criminal trespass warning for Bowdoin property after following a female student on foot on October 7. Benjamin J. Marlowe was issued a warning after pursuing a female student by car on September 25.

Nichols said that he is pleased with the reaction of the students on campus who have been followed by suspicious men.

"In each instance, our students did a very good job of handling the situation," said Nichols.

SECURITY REPORT: 10/17 to 10/22

- A student reported being inadver-tently bumped while drinking from a beer bottle at Jack Magee's Pub and the mouth of the bottle chipped two of the student's front teeth.
- A Ladd House resident reported a strong smell of gas in the area of the commercial kitchen. The building was evacuated. The fire department determined that a gas burner had been left on and a pilot light had blown out.
- · Two students walking on Maine Street in downtown Brunswick reported that they were being followed by a man. Security officers located and entified the man. It was determined that the man did not pose a threat.
- · An unregistered event involving drinking games was dispersed in the basement of Ladd House and a quantity of beer was dumped. The matter was referred to the Dean of Student Affairs.
- A visiting prospective student was taken to Parkview Hospital with an abrasion to the forehead. The person was treated and released.

Saturday, October 18

- The small child of a visiting alumnus pulled the fire alarm near the entrance to Sargent Gymnasium, causing ation of the gym, Smith a brief evacı Union, and Studzinski Recital Hall.
- · A student reported the loss of a women's wallet at Moulton Dining or Whittier Field. The wallet is white and brown and contains a Bowdoin ID, credit cards and a driver's license.
- An underage student walking on College Street with a backpack full of beer was cited for an alcohol policy violation.

Sunday, October 19

· A fire extinguisher was maliciously sprayed in a third-floor room in Ladd House causing a fire alarm at 12:20 a.m. Approximately 150 students attending an Epicurean event (many clad in to gas) were evacuated as Security cleared the building and the fire department responded. The incident remains under investigation.

- · An intoxicated student was taken from Ladd House to Parkview Hospital where he was treated and released after
- · Students in Maine Hall requested a wellness check for a fellow student who was intoxicated. Officers assessed the student's condition and he was not transported.
- A student fell in Baxter House and struck his head on a door, receiv ing a laceration. He was transported to Parkview Hospital where he received 14 stitches and was released.
- Students in Osher Hall requested wellness check for an intoxicated student. Officers assessed the student's condition and she was not transported.
- · An officer on patrol found an unsecured storage trailer on the Watson Arena work site. Nothing was missing.
- · A Howard Hall student with a general illness was taken to Parkview Hospital.

Monday, October 20

- A student working at Thorne Dining Hall was transported to Parkview Hospital after her thumb got caught in a dishwasher.
- There was another report of a gas leak at Ladd House. The building was evacuated. The cause was determined to be the gas stove in the commercial kitchen. After shutting off the gas, students re-entered the building. A repair

Tuesday, October 21

• A student with a possible concuswas transported from Winthrop Hall to Parkview Hospital.

· A student found his bike that was reported stolen in August. Wednesday, October 22

- · A student suffering from na was transported from Burnett House to Parkview Hospital by Brunswick
- A student with an allergic reaction was taken from Chamberlain Hall to Parkview Hospital
- · A student with a general illness was taken from the Health Center to Parkview Hospital.
- Students in Hawthorne-Longfellow Library reported a local resident touching himself inappropriately while using a library computer. Security responded and spoke with the 18-year-old male who was ordered to leave campus. A criminal trespass order is pending.
- · An unregistered keg and hard alcohol were found in a room in Baxter
- · A female student driving her vehicle near campus called security to report being followed by a suspicious red Cadillac. The student kept driving until she reached the Security Office. Security officers then identified the vehicle and followed it onto McKeen Street where it sped away. Brunswick Police located the vehicle and engaged it in a high speed chase into Freeport where the vehicle crashed. The driver, Michael C. Barry, 19, of Brunswick, was arrested for OUI and Eluding a Police Officer. A criminal trespass warning was issued for all College property and a security alert has been posted (Please see story, left).
- · Security and the Office of Environmental Safety conducted several dorm fire drills.

Parkview offers health care with a 'spiritual dimension'

GEMMA LEGHORN
ORIENT STAFF

Bowdoin students awaiting treatment at Parkview Hospital might be surprised to find more than traditional magazines available for waiting-room reading. Pamphlets titled "The Healing Power of Prayer," "Does God Care That I'm Hurting?" and "When Jesus Comes Again" can be found lining the shelves of an unobtrusive rotating rack in a wide, tiled hallway. Down the hallway and to the right stands a small chapel with a stained-glass window and few wooden pews. Scribbled notes in a guest book offer their thanks for praise and prayer.

Though this scene is reminiscent of a church, its location is actually Parkview Adventist Medical Center, a religiously affiliated hospital located a mile down Maine Street from Bowdoin and frequented by Bowdoin students seeking medical attention beyond Dudley Coe.

Given its proximity to campus, students are regularly transported to Parkview's emergency room and hospital.

"In any given week, we average five to 10 routine transports to Parkview," said Director of Safety and Security Randy Nichols. He added that Security also transports an occasional student to Mid Coast Hospital, which is located about three miles from campus, near Cook's Corner.

"There are only four faith-based hospitals in the State of Maine," said Vice President of Parkview Adventist Medical Center Sheryl McWilliams. While the three other religiously affiliated hospitals are Catholic, Parkview is the only Protestant hospital of the four.

According to McWilliams, doctors and staff at Parkview believe in the power of prayer, and do not discriminate based on a patient's religious affiliation.

"We acknowledge the spiritual dimension to health...regardless of your belief system," said McWilliams.

Parkview's hospital administration includes an active chaplaincy service, which consists of individuals adhering to a variety belief systems.

"These people are actively engaged in the model of caring for patients" said McWilliams.

Through the patient admission process, Parkview can determine which patients want to be actively engaged in prayer, and which would prefer to be excluded. If a patient indicates a desire to be actively involved, he or she will receive a wristband that alerts hospital staff that they can pray aloud with the patient. In addition, hospital staff members also wear bands to cue the patient that they are available to pray.

According to McWilliams, the band system eliminates any awkwardness that might arise when asking a patient about prayer.

"The blue band for the patient is a visual cue to the staff that this patient would like to pray," said McWilliams. "Those visual cues displayed that weight thing."

eliminate that weird thing."
According to McWilliams, patients

"We acknowledge the spiritual dimension to health...regardless of your belief system."

SHERYL MCWILLIAMS
PARKVIEW MEDICAL CENTER
VICE PRESIDENT

who do not indicate that they would like to actively participate in prayer, however, are not entirely excluded from the system—they are simply prayed for, rather than with.

"We pray for every single patient every single day, unless they ask that we not," she said. "Prayer is engaged a lot here."

The attachment to religion is especially strong with the elderly or the very sick.

"As people age, or as they encoun-

"As people age, or as they encounter life-altering situations, a vast majority of the people reach out for a higher power," said McWilliams.

While students admitted to the emergency room for alcohol do not interact with prayer in the same way that regular patients are invited to, patients and friends of the patients said that they felt that Parkview's religious affiliation negatively affected their hospital visit. In particular, students voiced concern that staff members at Parkview are less tolerant of drinking and underage drinking because of their religious beliefs.

Although Security has only transported two students for alco-hol-related reasons this year, last year 15 students were admitted into Parkview's emergency room under heavy intoxication.

According to Randy Nichols, all the alcohol transports last year were strictly emergency room visits.

"None of those visits resulted in admission to the hospital," he said.

admission to the hospital, he said. A student who requested her identity remain anonymous said that when she accompanied her intoxicated friend to the emergency room two years ago, the hospital staff treated her friend with less sympathy than might be expected.

"They were very brusque with her the next morning," said the student. "Granted this was something that she had done to herself and it was her own fault, but I did think that her obvious poor mental state could have warranted a little bit more gentleness."

"They did talk to her a bit about being responsible," the student added.

Another student who also requested anonymity and who stayed with her intoxicated friend at Parkview said she felt that the emergency room staff was more disapproving than helpful.

"My friend was visibly very very upset and the doctor was not really sympathetic at all. He was really curt with us and he didn't really do anything," she said.

Zac Skipp '11 said that when he accompanied an intoxicated friend to Parkview in May of last year, he also found that staff members seemed less friendly than they would have been had the situation not involved underage drinking.

"I've heard people say that when you have alcohol poisoning you get

THE POWER TO HEAL: The Ronald A. Beetle M.D. Chapel at Parkview Adventist Medical Center is one of the several religious features of the Protestant hospital, which is located one mile down Maine Street from Bowdoin.

put in the back of the line, but it was so late that there was no back of the line," he said.

According to Randy Nichols, if this does occur, it is likely related to the graveness of patients' illnesses and not any religious affiliations.

"It totally depends on the severity of the conditions," said Nichols, adding that hospitals routinely have to triage patients when waiting rooms are busy.

Though Nichols said he had heard stories about students receiving a lecture when being discharged after intoxication, he has never witnessed it in person.

"My experience there has been strictly based on students receiving care and not receiving a lecture."

One student, who also requested anonymity, was admitted to the emergency room for a sports-related injury last year. The student said she felt uncomfortable when a staff member asked about one of her daily medications.

her daily medications.
"I told her it was birth control and she simply raised her eyebrows at me, without giving me a chance to tell her I was on it for the hormones, not to have loads of promiscuous pre-marital sex—as her look suggested!" said the student.

look suggested: said the student. McWilliams suggested that students' feelings about emergency room visits, especially those related to alcohol, may be a perception. She assured that the hospital is accustomed to seeing illnesses and cases that directly confront traditional religious values, and that religious judgments have no place alongside providing care for the patient.

"That's not a factor in health

care," she said, "You would be floored at the stuff that walks through our doors."

If a lecture is delivered to a patient at the hospital, Nichols agreed that it is probably advice for the future given out of professional medical concern, and not from a religious standpoint.

"I've been very pleased with our relationship with Parkview," Nichols said. "I've really got the sense that they work well with us."

that they work well with us."

"Religious affiliation has no effect
on the quality of care," said Director
of Health Services Sandra Hayes.

Though there are two hospitals in the area, Security and Brunswick Rescue default to Parkview when transporting Bowdoin students because it is closer than Mid Coast.

"Either hospital in the area does great work and quality work, regardless of religious affiliation," said Hayes.

Despite the reservations that some students have about the hospital, many agree that the care they receive there is no different than the care they would receive somewhere else.

"The only way I've ever noticed Parkview's relationship to religion are the crucifixes on the walls," said Ian Yaffe '09. Otherwise, it's just a smaller hospital that is overshadowed by Mid Coast."

shadowed by Mid Coast."
Wilson Dippo '12 visited
Parkview four times this semester
after breaking his wrist. He said
that while people told him about
Parkview's religious affiliation, his
main priority was to receive medical care and he views Parkview as
he would any other hospital.

"What they have on the walls doesn't really make a difference," Dippo said.

For Mormons on a mission, Maine's a challenge

ORIENT STAFF

Elders DeGomez and Gammell stand out from the other patrons of the Brunswick Public Library. Dressed in nearly identical black pants, collared shirts, and plain ties, the two young men sit politely on a bench while the more casually-dressed duck into the library to hide from the rain. Their nametags confirm that they are missionaries from the Church of Jesus Christ of Latter-day Saints, more commonly known as the Mormon church. Both are from "away," Arizona and Utah respectively, and are making a stop in Brunswick on their two-year mission

The mission is an important part of religious life for many Mormons, especially men. When a young man turns 19, he is encouraged to spread the faith by spending two years away from home in a location selected by the church. During this time he is unable to visit home, and contact with family and friends is limited to writing letters or e-mails once a week. DeGomez and Gammell, who use the title "Elder," explain that they can call home only twice a year: on Christmas and Mother's Day.

Their daily schedule mirrors the rigidity of these rules of conduct. From 6:30 a.m., when they wake up, until a bedtime around 10 p.m., their days are entirely structured. Following exercise, breakfast, and a bit of personal time in the early morning, the missionaries spend the hours between 8 and 10 a.m. preparing their lessons. From 10 a.m. until 9 p.m. they are required to be out in the community teaching and talking to residents in the greater Brunswick

Mainers tend not to be very responsive to the Mormons' message. "A lot of people up here are really set in their ways," says DeGomez. The most common phrase the missionaries hear when approaching people about their faith is, "We're all set." Maine is the state with the church's lowest conversion rate, and all of New England is a notoriously tough region. DeGomez's experience is reflective of this: In his nine months in Northern New England he has converted no one. "It's definitely not as successful [in Maine] as it is in a lot of other places," says DeGomez.

There are days when all you do is knock on doors for seven or eight hours and no one wants to talk to you. And after the end of those days you're just like, 'This sucks," he says.

Despite the often cold reception, the Elders try to remain optimistic. Having a good companion makes work "a lot more fun."

"Some of the best times are when you're really enjoying who you're with and you're teaching some really cool people, and you can really see them changing and grasping what you're teaching That's when you feel like you've done something." DeGomez says. DeGomez and Gammell instruct

members of the Church in addition to the uninitiated. They attend services at the Church of Jesus Christ of Latter-day Saints in Topsham, a place DeGomez describes as his favorite of the mission so far due to the "quality of people." The Topsham church is much smaller than what they are used to, especially for Gammell, who is from Utah. He estimates that nearly 90 percent of his hometown is Mormon, while the Top-

sham church has only 170 members. He calls his home in Utah "a bubble," but says that being surrounded by Mormon peers made it easier to obey certain tenets of the doctrine, such as the law of chastity and the Word of Wisdom, a scripture-based health code. Those who follow the behavioral codes do not consume alcohol or caffeine, nor do they engage in pre-

"It's good to have some people around just to know you're not the only one doing all this stuff," De-

DeGomez says that the small size of the community in Maine can be frustrating. "It's harder to be Mormon here," he says. "The churches are really spread apart" and the distance makes some people quit attending services.

The small size of the Latter-day Saint community in Maine is similar to that of Bowdoin, where the Orient s able to identify only one Mormon student, Francesca Perkins '10. Perkins, who was raised Mormon but attended public and Catholic school growing up in New Jersey, says that she is used to being in the minority. "I was the only Mormon at my high school," she says, "so it's not a new feeling."

Perkins chose to apply to Bowdoin, a school she identifies as "a pretty secular place," instead of attending college in Utah because she knew she was comfortable with her minority status and having non-Mormon friends. Still, her previous experience in secular schools and communities did not prepare her for the Bowdoin social scene.

"Coming into Bowdoin was a huge culture shock," she says. Before college, Perkins had "never seen a drunk

WALKING IN THE WORD: Mormon Elders DeGomez and Gammell hope to "spread the faith" in Brunswick

person and never smelled beer or pot." She opted to live in a chem-free dorm, but was surprised to find that almost everyone partied. "I felt like I didn't belong," she says. "I thought it wasn't possible to have a good time unless I was drinking."

Perkins grew tired of having to explain why being Mormon meant she did not drink. Few people were familiar with the health code, and explaining it included the recurring frustration of "hav[ing] to start at ground zero."

Overall, however, Perkins says she enjoys responding to other students' curiosity about her religion. "If any thing, it has opened up doors. People ask a lot of questions," she says. "No one has ever made me feel uncomfortable."

Like the missionaries, Perkins says

that adjusting to the small Topsh church was a "huge transition." More than the size of the church, Perkins had to get used to being an unfamiliar face. At home she went to church with her family and knew many people in the congregation. Here she goes alone and sits by herself. Another difference she identified is the lack of people her age at services, save for the missionaries.

"They all go to school in Utah," she

"Many of my friends are older." Still, Perkins attends services ev ery Sunday, as well as scripture study on Wednesdays

"At times I feel a bit isolated becau religion is such a huge part of my life," she says. "But I don't have to be with other Mormons to feel like I'm living my life the way that I want to."

Testing, testing, one, two, three... check

SEXUALLY SUGGESTIVE BY ALANNA REROITA

About this time three years ago, I lay on my back, listlessly staring up at the stained and dingy ceiling of the Coleman basement. Both of my roommates had long since drifted off into calm and rejuvenating slumber, leaving me awake and alone in that moonlit dungeon I'd begun to call home. I couldn't sleep, you see, because my mind was alive and raging in dire abandon-recalling dark and sweaty encounters in Chilean discotecas, frivolous lawn romps at graduation parties, steamy hot tub indulgences, and nostalgic tributes to auld lang syne in the back seats of cars. I couldn't sleep because I'd never been tested for sexually transmitted infections.

Never been tested? How could that be, you might ask. Well, let me step back here for just a moment. Despite a certain wealth of sexual experiences prior to entering my first year of college, at the time of my matriculation at Bowdoin I had yet to experience heterosexual penetrative intercourse. Being the naïve young thing that I was, I had no idea that virgins needed to be tested for sexually transmitted infections (STIs). Luckily, my first-year roommates were two young ladies who had done quite a bit more "first-hand research," shall we say, on the subject; both advised me to get tested as soon as possible despite the fact that I'd never done "it." I had engaged in a whole lot of other "its," which actually were equally risky in terms of contracting an STI. What would I have done, d it not been for my two rather sullied roommates? If not for their cultivated array of sexual experience, would have continued to wander through life under the blissful assumption that I was entirely clean and clear down there.

Unfortunately, I waited three

years after that fateful conversation to get a free screening for STIs at Dudley Coe. Although the test results suggest that I may rest easy in confidence that I have not contracted a lifelong or potentially life-threatening STI, I must admit that my delay in scheduling an appointment for a screening was not only irresponsible to my own health, but to the health of every single person I've come into sex ual contact with for the past three years. In other words, I'm lucky. Despite the fact that I was a virgin coming into college, and the fact that any heterosexual penetrative intercourse I've engaged in has been protected, I definitely cannot say the same about my oral encounters. And, I'm willing to bet, a lot of you can't either.

At this point, you're probably thinking, "we've heard the condom talk a million times," or "dental dams are just so awkward" (that is, if you've ever seen a dental dam, which I hadn't until a few months ago when a young man handed me a safe sex package at an under-ground queer club in Amsterdam). The thing is, safe sex is more than kind of a big deal. Safe sex has more than just leather bound books and an apartment that smells of rich mahogany. It has integrity, honesty, and respect for you and your partner(s). So, if you want to be the "Anchorman" of safe sex (or if you just want to be a healthy and decent human being), getting tested is an important first step. Being aware of what you do or do not have lurking about and scheming in your blood and sexual fluids allows you to protect yourself from contaminating your sex machine with something nasty, and it offers you the opportunity to prevent the spread of whatever undesirable little microbes may be breeding inside of you.

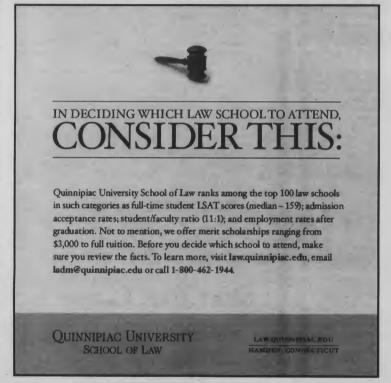

Now, I understand that there are a couple of reasons why some one would not want to get tested. For me, it began with the naïve as-

made me ineligible to contract of be tested for STIs. Three years ago, I came to know that this is certainly not the case; regardless of your virginity status, if you have ever engaged in unprotected sexual contact you should definitely be tested. Why, then, did I wait so long to be tested if I've known for three years that I should? To this question, I must answer that I have been the victim of fear and denial-two very insidious and, frankly, dangerous character traits when it comes to the subject of

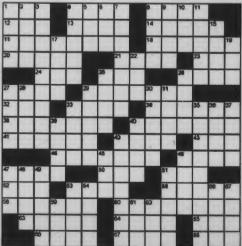

testing. By allowing fear and denial to dictate my actions, I put myself and others in danger, and that's not something I'm proud of. Getting tested regularly is the responsibility of anyone who chooses to be sexu ally active, regardless of what acts they are engaging in or what protec-

As someone who failed to uphold this responsibility for a period of over three years, I want to make clear that I feel incredibly lucky that my test results came back negative. There is no rhyme or reason to this;

it all happens by chance and we all know that abstinence is the only way to ensure complete freedom from STIs. In my case, abstinence is no longer an option. I urge you to do your part and get tested. Whatever the results may be, it's better to know now and deal with it than to live in denial and potentially hurt yourself and others. And just remember, if your results come back positive, it doesn't make you a person of any less value. In fact, it makes you just like all the rest of us sexually active people: a victim of chance

Broken Social Scene's diverse sound to rock Farley

Normally, when students think of Farley Field House, they might be reminded of cut-off football jerseys, eye black, and pre-orientation sleepovers. This Saturday night, however, Bow doin's athletic facility will be transformed when Bowdoin's radio station, WBOR, presents the Canadian indie rock band Broken Social Scene.

Based in Toronto, Broken Social Scene is a musical collective, formed in 1999, that is currently comprised of 19 members. They have been recognized consistently and prominently, winning two Juno Awards in 2003 and 2006 as well as a nomination for the Polaris Music Prize, which is awarded annually to the best full-length Cana-

The variable nature of their style is one of the reasons that the concert will be enjoyable to all students-both die-hard fans as well as first time li

"They have extremely danceable hits, like 'Fire Eye'd Boy," Audrey Chee '09, WBOR music director, said.
"And also more mellowed-out sounds as well. Each song is different so it's impossible to ever get bored."

WBOR concert director Micah McKay '09 and Chee defined Broken Social Scene's sound as "baroque pop." Moreover, because they are such a large band, the respective musical projects of the many members com-

bine to create an orchestral sound.

"It's a really layered effect," McKay said. "They have a very diverse

In addition, Broken Social Scene has asked for accomplished Bowdoin musicians to join them on stage

SOCIAL BUTTERFLIES: Broken Social Scene, a Canadian indie rock band, will perform at Farley Field House on Saturday night. The group, along with openers Land of Talk, will be the first to use the space for a concert. "They have a very diverse sound," according to WBOR concert director Micah MicKay '09.

Three students, Abriel Ferreira '10, Sean Weathersby '10, and Cris Hall '11 will add to the band's sound with their trombones and trumpets.

Bringing Broken Social Scene to Bowdoin is an exciting opportunity for both WBOR and the College.

"We're always trying to bring bands that aren't necessarily on people's ra-dars," McKay said. "It's not our goal to bring bands that might be on the top of the pop charts but whose concerts

really aren't that great."

"Instead, we're pushing people to try out sounds that aren't originally found within the college circuit. We're broadening people's musical perspectives and turning them on to bands they might not have heard," he added.

In addition to providing a new musical experience for many Bowdoin students, Broken Social Scene is a

well-known, acclaimed, and talented indie band that colleges and univer-sities—especially in northern New England—do not usually have the resources or ability to watch live.

This is a great opportunity because en it comes to indie music, they are kind of the definition," McKay said.

Both WBOR and the College are anticipating a high turnout of College students, and nearly 200 tickets have

This concert in particular is placing Bowdoin on the musical map and will draw students from the younger Portland crowd, Bowdoin, Bates, Colby, and other Maine universities, as well as devout Broken Social Scene fans throughout New England. For this reason, the concert is not going to be held in the traditional, smaller space of Smith Union, but instead is going to be the first concert held at the Farley Field House in the history of the College.

"It's never been done before," Chee said of having the concert in Far-ley. "WBOR is confident that it will

Excitement for the concert is present throughout the Bowdoin student

"Concerts are fun," Chee said. "They don't happen very often and it's exciting to be able to get big names to perform five seconds from your

Aspen Gavenus '09 echoed Chee's excited anticipation.

"When I was a freshman, my [friend] Zachary Tcheyan confessed that his stranded-on-a-desert-island album would be Broken Social Scene," Gavenus said. "Since then I've always been eagerly awaiting the opportunity to see them live."

Broken Social Scene with openers Land of Talk will perform at 9:30 p.m. on Saturday, October 25, in Farley Field House. Doors open at 9 p.m. Admission is free to all students, faculty, and staff with a Bowdoin ID. Tickets for non-Bowdoin students are \$15 and can be purchased at the Smith Union info desk or by calling (207) 725-3375. Concert-goers can also purchase tickets at the door.

Artist explores the whimsical inside Coleman Burke

BY LYDIA DEUSTCH

As the most recent show in the Coleman Burke Gallery conveys, creating nature can result in beautifully organized chaos.

The art gallery, located in Fort Andross and co-directed by John Bisbee and Mark Wethli, Bowdoin art professors, is currently home to an original installation, "Down n original installation, Back," by Philadelphia artist As-trid Bowlby. The gallery, founded by Bisbee in the winter of 2007, is spacious room right beside local cultural hot spot, the Frontier

"I love empty space, but this space was screaming for this. It was serendipitous, and as easy and fun as I anticipated," Bisbee said. "We are able to hand the space over to the artists with the only stipulation that they have a dialogue with the space."
"Down Back," is the sixth and

current exhibit. It is concurrent with her show at the nearby Icon Art Gallery. Bowlby's show at the Coleman Burke Gallery is original work created in the space.

"She took a huge chance with this show," Bisbee said. "I'm proud she was able to take this leap with us."

Bowlby has worked in drawing for the past eight years, and returns

Bowlby's installation emulates a paradox: arranging objects in a state of seeming disarray.

"One of the great things about this installation is how it bridges a gap between the organic and the

seeming randomness," Bisbee said. Wethli agreed. "There is a sense of great precision and order and at the same time a natural quality, like a Zen garden," he said. "We gave Astrid the opportunity and she used it as we hoped, to push a new

The space and its history were her foremost inspirations. For example, she uses long rolls of paper that hearken back to the time when Fort Andross was a mill

Bowlby liberally employed both color and form.

"As I spent more time in the space and looking out the windows, the local color was a great source of inspiration," she said. "I had the desire to gather in or list beloved things. Everything was chosen because I love it."

"I also hate it in a way. I used objects from daily life that make people feel their own two feet relative to the space. I may be honoring domesticity, but there is a beauty and drudgery to repetitive simple tasks. A kitchen is not unlike studio. You make messes there and

NATURE'S CALLING: Artist Astrid Bowlby's exhibit in the Coleman Burke Gallery, "Down Back," pushes the boundaries of using space to create art.

you clean them up. It's just as honorable to make a good sculpture as a good apple pie. And the pie you get to eat!" she added.

But this domestic flavor is not the main component of inspiration

"I was inspired by childhood experiences, and referenced this

whimsical idea of how scale is used in fairy tales. Many young kids peered in as I was working on it and wanted to know what the heck I was doing in there," she said.

Bowlby is happy with the result. "I am beyond happy with this installation. People can get set in

their ways, and this project allowed me to pull out all the stops and gave me new ideas for the future," she said.

Bowlby will give a lecture on Tuesday, November 11, at 7:30 p.m. at Kesge Auditorium in the Visual Arts Center

Postcards fill unsuspecting mailboxes with artwork

ORIENT STAFF

This week, a mysterious surprise greeted certain Bowdoin students as they opened their Student Union mailboxes. Black and white postcards, with no explanation as to why they were there, had been addressed to the recipients by people they did

Who was behind it? Visiting Art Professor Meggan Gould, who had assigned members of her Photography I class the task of photographing their fall break destinations in order to transform their photos into postcards upon their return to campus.

After developing their pictures on Ilford postcard photo paper, students spent this week writing and addressing 20 postcards each.

The catch? They had to send at least half of their cards to people they did not know.

Gould created the project after considering how much time photographers spend "taking" from other

people.
"We do all of these projects that require us to take images of people, but we rarely give anything back. So I wanted to give back," Gould said. She introduced the project last semester and decided to make it part of her curriculum for this semester as well "because it was so much fun."

In addition, Gould sought to take students' art out of the classroom and diffuse it into Bowdoin and Brunswick.

"Part of the idea was to get the work outside of the context of this class and into the community," she said.

Raya Gabry '10, who took Gould's class last semester, appreciated the community outreach aspect of the

"It was a community service proj-

ect more than it was an assignment,"

In the spring, Gould had students take pictures of the Brunswick area for their postcards.

"She wanted us to look at Brunswick in a different way," Gabry said. "It was really great because I got to know the town better just by walking around for a few hours."

Aside from the community aspect of the project, Gould also probed students with questions about the artistic elements of the postcard as a

"We discussed what postcards are," she said. "And then I asked them not to do that. Postcard images are often detached, removed, and predictable. I wanted students to have a much more engaged reaction to the places they were traveling or places in the community."

Bryant Dossman '11, a current student in Gould's class, had to rethink his process of taking pictures when he realized they would be used as

postcard images.

"Everyone thinks of photographs as artsy, not as postcards," he said. "It made me think about how I take pictures differently. I had to take them with a specific person or purpose in

Gould also asked students to consider the aspect of using the postal service as part of the art process.

"People use the mail system as an integral part of a piece of art. Putting these images in the mail changes the context of the art," she said.

She held up a photograph of a telephone as an example.

"You might see this on a gallery wall, but sending it as a postcard changes the context radically, especially when it arrives in your mailbox from someone you don't

YOU'YE GOT MAIL: Students discuss the postcards they created to send to people in the Brunswick and Bowdoin community as part of a Photo I project.

Mark Thorne '09 altered the context of his photographs even further by writing short stories on the back of every postcard he sent.

"I thought it would be a fun way to manipulate the context by giving speech to people who can't have speech because they're in photos," he said. "The medium of photography is inherently unspeechful."

Gould required that her students put their e-mail addresses on their postcards, but allowed them to choose their recipients and the message their cards would bear.

"I sent one to Randy Nichols, an other one to a woman who works in Thorne, and one to the Little Dog Coffee Shop downtown," Gabry said.

Using the Bowdoin directory, this year's class randomly picked a first year to whom everyo postcard.

In addition, students sent cards to family members, faculty, friends, and Brunswick businesses.

The messages on the back of the cards varied from student to student. Dossman chose to write

one-line interpretations of his photos. For example, on the back of a picture of a blurry street, he wrote The road looks hazy."

"When you just read a short sentence you can interpret it in so many ways," he said. "Not having to explain yourself is key."

Coco Sprague '11 took a different approach by writing long meson her postcards, even to people she did not know.
"That's what postcards should be,"

she said. "You get a fun message and it's exciting."

Fleet Foxes' self-titled stands out

THE WEEKS

BY LOUIS WEEKS

We are in the presence of genius As with all staggering geniuses, they have beards. Just like Randy Nichols' security report, it is my duty to make you all aware of these beards. These beards go by the name Foxes. The folk alternative genre is, in

my absolutely useless opinion, in a dry spell. The last five months have yielded relatively mediocre music. Even some of the best musicians of the genre have failed to put out works that live up to their potential. Brett Dennen's new release "Hope for the Hopeless" is overproduced, and a little too sweet. Jason Mraz's "We Sing. We Dance. We Steal Things" —We want our things back. Okkervil River's "The Stand Ins" is a disappointing follow up to the brilliant "Stage Names." Most upsetting, the new Ray Lamontagne album "Gossip in the Grain" doesn't sound like his usual brilliance. While its single "You Are the Best Thing" is a solid piece of soul-folk (his greatest strength), the rest of the album suffers from rambling, hook-less melodies, and the absence of his patented stel-lar vocal performances. Lamontagne's past vocal performances have been in-definably pleasant. To say that I would kill for his voice is a bit strong, but I might be inclined to ruin someone's

little signs of the Ray of old. His beard however, continues to believe it is still producing good albums.

In light of this album drought I kept returning to Fleet Foxes self-titled, debut album. The album has it all. Imagine if you will, the Beach Boys (of Pet Sounds), The Shins, BBC's Planet Earth, finding and then catching Miew, making a Colby kid cry, and Super Snack. Now blend all of those up, pour it into a Nalgene and take it with you to Ivies. But don't drink it. Instead, pour it into your ear-trust me.

Fleet Foxes are a phenomenon to the folk genre because they are, on one hand, as purist folk as you can get. Their instrumentation is accurate and true to the style. Using guitars, mandolins, tambourines, and upright basses, their harmonies are simple, full, four-part arrangements that are iniscent of Crosby, Stills, Nash & Young. Their lyrics are in the traional vein of folk prose: i.e. a red squirrel here, a meadowlark there, a big blue mountain over yonder. While they are in these respects a run-ofthe-mill folk group, they are, on the other hand, a band with an alt-rock sound. If they aren't vamping on that pastoral folk sound, they are playing hard-hitting guitars with driving bass and drums leading the way.

Fleet Foxes are not doing anything very different from their rock or folk counterparts. However, they are more successful than most at combin-

sound. Most groups that try to bridge this gap approach the two genres as separate entities, and their songs sound split down the middle. Fleet Foxes have succeeded because they approach their rock sound with the same musicality of their folk sound and vice verse. The result is a totally original and cohesive sound that is seldom heard anymore.

The maturity and mastery of this album is outstanding. It's hard to believe it's a debut or even an album of this time period. It is anachronistic both in its style and its conceptualization of "the album." Thanks, in many parts, to the advent of the iPod and iTunes Music Store, the "album" has fallen to the wayside. We are all much more likely to buy one song we like for 99 cents than 10 songs we don't know for \$9.99. Fleet Foxes are challenging us as listeners to consider the whole album. The songs of the album are connected by a series of complex instrumental or a cappella interludes that are woven in seamlessly so every minute of the recording is as important as the next. That being said, there are specific high points of the recording. "White Winter Hymnal," "He Doesn't Know Why," and "Ragged Wood" are the album's strongest group performances, while "Mead-owlarks" and "Oliver James" are outstanding folk songs that highlight Robin Pecknold's voice. If you haven't heard Fleet Foxes "Fleet Foxes" by now, buy now, bye now.

'W.' dramatizes skeletons of first Bush administration

STAFF WRITER

As the recent events of the 2008 presidential race become popular fodder for late night comedy and sketch routines, the bumbles of the current administration seem to be slowly fading from memory. But Saturday Night Live has nothing on Oliver Stone. Famous for his leftist cinematic controversies, Stone has delivered to the American public a satirical journey through the life of the 43rd U.S. president, beginning with his Yale fraternity days and concluding with his first term in office and the present war

The opening scene of the movie finds Bush, played by Josh Brolin, in the Oval Office surrounded by a myriad of familiar faces: Condo leezza Rice, Colin Powell, Donald Rumsfeld, Paul Wolfowitz, and a lurking Dick Cheney, played convincingly by Richard Dreyfuss. The conversation centers on the "Axis of Evil" and how best to convince the American people that Iraq and Iran are relevant to the events of September 11, 2001. While the subject matter is serious and something that most at Bowdoin are familiar with, one can't help but expect Bush to turn to the camera and scream, "LIVE FROM NEW

YORK, IT'S SATURDAY NIGHT!" The mannerisms, physical characteristics, and demonstrative traits of these household names are so exaggerated, so drawn out, and so underhandedly exploited by Stone that the entire cohort plays out like a parody of itself.

Most of the film fails to reveal anything new about Bush's early life or his administration. Jumping back 40 years to 1966, Stone portrays Bush's college years as boozy, destructive, and unproductive. Bush's alcoholism and his struggle to stay sober remain a prevalent theme throughout the rest of the movie. The audience is also intro-duced to George H. W. Bush and his relationship with his less-than-motivated progeny. James Cromwell, whom students may recognize for his role as a kind-hearted farmer in the movie "Babe," is unconvincing as the elder Bush; despite his best efforts, he plays the role of the disapproving father without much conviction. Laura Bush, played by the unlikely Elizabeth Banks, known for her comedic roles in movies such as "The 40 Year-Old Virgin," works to show the unflustered and more thoughtful side of her husband

Stone uses many of the embar-

Bards' worlds collide in 'Wil

THE BOOK NOOK BY FRANCES MILLIKEN COLUMNIST

Scholars often question the authenticity of William Shakespeare's prolific and impressive canon, but in Jess Winfield's "My Name is Will A Novel of Sex, Drugs, and Shakespeare," one aspect of his life is certain-it was a party. Winfield leaves many questions unanswered: Is it really plausible that the son of a tanner from Stratford-Upon-Avon could be the master of the theater? He had only a limited formal education, so how does one explain his immense vocabulary? But while Winfield does not try to prove or debunk the real identity of Shakespeare, he offers an engaging spin on the playwright's life in his debut novel.

The novel is divided into alternating storylines. William Shakespeare Greenberg is an English grad student at University of California, Santa Cruz, in the 80s. Willie, as he's called, is having trouble putting his finger on his thesis. He knows Shakespeare will be his topic, but is no longer sure why the playwright resonates with him, aside from his having the bard's ne as his middle nan

Willie's intellectual focus is frequently interrupted by other explorations of the psyche, namely experi-

mushrooms and pot in large quantities. Lustful and misdirected, Willie searches for a better understanding of Shakespeare as well as a buyer for the largest mushroom he's ever seen.

Meanwhile, back in the 14th century, William Shakespeare is busy pissing off authority and spouting sonnets. Winfield allows Shakespeare to bed many a lass in the fields. Young William has a quick tongue and is working as an English master at a boy's school. The Shakespeare that Winfield describes is virulent and lively and the author glibly imagines the source of some of the bard's most famous poetry.

Winfield intertwines Willie and William's lives in two ways. Sections of Willie's completed thesis introduce each section that takes the reader to William's present, while Shakespeare quotes are included at the start of each of Willie's. The bare bones of the latter's thesis are that William was a secret Catholic. The William of the novel obliges by becoming embroiled in the underground world of the papists of which his mother is one. This component allows for more drama and for yet another twist of the Shakespeare biography. Winfield's second ploy is to have the two characters' realities intersect bizarrely, and somewhat ineffectively, toward the close of the novel.

Winfield does a fair job of evoking the atmosphere of the 1500s. I was lor in which the people of England lived at the time. Winfield has no qualms about using graphic imagery to conjure a scene or an emotion. Both time periods were vivid but Shakespeare's proved the more striking because of its unfamiliarity.

The drugs and sex, to which the title refers, abound. William inin liquid substance abuse available while Willie dips into the much vaster array of psychedelics. Both gentlemen plentifully indulge in the pleasures of the flesh. Their paramours are lovely and/or seduc-William has a charming way with the ladies whereas Willie seems to end up with his partners out of sheer luck. Winfield goes to town a bit with his illustrations of their love affairs. There are fields and dark corners for William's dalliances, while Willie is allowed a more colorful array of futons, tents and, in one particularly spicy instance, the back of

"My Name is Will" is crammed with wisecracks and puns. Winfield is a little heavy-handed and forces too many parallels between his two protagonists, but the novel is undeniably fun. As only an amateur fan of Shakespeare, I can't imagine the effect this book will have on real aficio-nados. But if you like a laugh, a quick read, and steamy literature from time to time, "My Name is Will" is a great way to fill a few cloudy afternoons.

Andrew Sudano '10

W. CONTINUED FROM PAGE11

rassing moments of the Bush administration to highlight his obvious dislike of George W. Bush. Stone's inclusion of a scene depicting the famous incident when Bush choked on a pretzel only makes the President seem foolish and silly. The script also features many of the verbal slipups for which Bush's speeches and meetings are famous. Stone's most drastic criticism of Bush arguably comes in the form of Richard Dreyfuss's portrayal of the manipulative and ever-calculating Vice President Dick Cheney, pegged by popular opinion as the

"brains of the operation." Stone makes his feelings about Cheney clear in a scene in which Dreyfuss talks Bush into invading Iraq by likening Saddam Hussein to the lettuce in his sandwich.

While almost the entire movie is based on factual events, Stone takes some liberties in imaginging how the decision to invade Iraq played out. Using what are presumably his own assumptions about the conference between Bush and his advisers preceding the 2003 invasion, Stone depicts Cheney discussing the benefits of war in terms of oil reserves and the creation of a world empire. Bush's speech to the House and Senate is

juxtaposed with real-life clips of the reactions of John Kerry, Hillary Clinton, Nancy Pelosi and John McCain. Footage of "shock and awe," Fallujah, and Baghdad bring a note of finality and seriousness that the previous two hours lack.

Stone did an excellent job parading the familiar skeletons in George Bush's closet, and critics of the current administration will get a chuckle out of the spot-on impersonations of Bush and his cabinet.

Those looking for a more in-depth look at the convoluted life of the Commander of the Free World, however, will have to look elsewhere. "W" is playing now at Regal Cinemas on Cook's Corner.

If you could only listen to one album for the rest of your life, what would it be?

AS: Helloween's "Walls of

Favorite song to dance/rock out to when you think no one's watching? Elvenking's "Disappearing Sands."

If you were in a band, what would it be called, and what kind of music

would you play?

AS: Well, I am already in a band called Teratoma and we play melodic death/thrash metal. But if I could be in another band, we would be called Targaryen Plague and we would play atmospheric doom/death metal infused with electronic and European folk melodies.

Theme song during Ivies?

AS: Korpiklaani's "Wooden Pints." If you could meet any musician, dead or alive, who would it be and

AS: Shane MacGowan of The Pogues because he is the only person to fall into both categories. Also, he clearly has gone through a myriad of amazing and turbulent experiences in his life, all of which are reflected in his music, and you know by the intonations in his voice that he really feels what he sings.

Best new music you've heard lately?

AS: Swallow the Sun's "Plague of Butterflies."

If you could time travel back to any musical period, where would you go and why?

Brunswick Town Council - At Large

Dear Bowdom Students

If you are registered to vote in Brunswick, I encourage you to learn about the candidates running for state and local office and to become involved in the community. As someone who was born and raised in Brunswick and then attended Bowdoin. I know first hand that the College campus often feels separate from the rest of the Town. The decisions made by the Town Council, however, affect Brunswick as whole, including Bowdoin, and have the potential to influence the college experience of both current and future students.

I invite you to visit my website to learn more about me and to see a sampling of the people from the Town and the Bowdoin community who support my candidacy. Thank you for your consideration

State title returns home with men's XC

BY KEATON LORA

The Bowdoin Polar Bears defended their Maine State Men's Cross Country Title at Twin Brooks last Saturday, topping Bates and Colby amid a field of 10.

The key to the victory was team strength, said Coach Peter Sloven-

"Both USM and Bates have talented front-runners that match up well with us, so we knew it was going to be a very competitive race, he said. "We had to have a good race throughout the lineup to win."

Although Slovenski lauded top runners Thompson Ogilvie '10 (second overall), Colman Hatton '10 (fifth), and Stan Berkow '11 (sixth), he credited No. 4 and No. 5 runners Scot McFarlane '09 (10th), and Scott Longwell '12 (11th) for performing

"Scot and Scott both ran very smart races," he said. "They are physically gifted runners, but what sets them apart is that they are so mentally tough. They got faster at times when the pace and the course were the toughest."

The entire team seemed in top

form, Slovenski thought.
"Our depth made the difference today," he said. "We have a deep lineup of excellent college runners. and a lot of them had personal best performances in this race.

Ogilvie, who led all Bowdoin runners, ran particularly well.

"Very few college runners have 26:00 on that course," said Slovenski of Ogilvie's 25:57.01

The Maine State Meet serves as a warm-up for the NESCAC Championships at Bates on November 1.

The hilly course at Twin Brooks "was a great course for the state meet because it is similar to the courses we will run in the NESCAC and New England championships," said Slovenski

The Pineland Farms course in New Gloucester, Maine, location for the NESCAC Championships is the next challenge for this Polar Bear team, who placed eight of the top 16 runners at Twin Brooks and may be hitting its stride at just the

Men's soccer slides up to third

With two weeks to go before the NE-SCAC playoffs, the men's soccer team has finally turned into the team that everyone expected them to be at the outset of the season. After a tough start to the 2008 campaign, the Polar Bears have set a torrid pace of success throughout the second half of the season.

The Bears continued this success on Saturday against Trinity, beating the Bantams 2-1, in front of a host of alums who on campus to celebrate the 50th anniversary of the men's soccer program at Bowdoin College.

The game exuded caution and apprehension throughout the first half. Everyone on the field appeared unwilling to take a chance for fear of making a tly mistake that might drop his tea in the suffocating NESCAC conference. This tentative play continued until the 52nd minute when Trinity finally

scored a goal that would ultimately act as a wake-up call to the Bowdoin

The Bowdoin offense scored less than a minute later off a brilliant connection between two attackers, Bren-dan Mooney '09 and Nick Powell '12. Powell latched onto a vicious feed from Mooney to equalize the game and give the home crowd something to cheer for. Mooney continued his recent impression of Thierry Henry seven minutes later, as he took a pass from Carl Woock '10 and scored the game winner on a spectacular individual move. Mooney managed to control the pass from Woock, flick it up on his right foot and then hammer it into the bottom right hand corner of the net.

"No one on the field could believe the goal Brendan scored, it was as if he was possessed," co-captain Dominic Fitzpatrick '09 said.

Mooney's goal locked up a 2-1 victory and ensured that the Polar Bears of third place in the NESCAC confer-

From here on out, the final few games are all about jockeying for posi tion before the playoffs.

"The NESCAC is completely wide

open right now; a win or a loss could potentially move teams anywhere from first to eighth in the conference," Fitz-

This makes it that much more important that the Polar Bears extend their impressive four-game win stre against bitter NESCAC rival Colby. The game will be played on Saturday at 1:30 p.m. in Waterville, Maine.

The Bears will not have much time to recover as they travel to Boston to face a tough Babson team on Sunday. The next 72 hours could make or break the season for the Polar Bears. As Christopher Hickey '09 explained, "This weekend is crucial, we have to give it every-

Israeli pro basketball team signs alum Jordan Fliegel

BY PIPER GROSSWENDT **ORIENT STAFF**

Bowdoin basketball standout Jordan Fliegel '08 signed a contract with Hapoel Jerusalem, an Israeli Premier Division professional basketball team, on September 24.

Last spring, Fliegel found him self in the same boat as many of his classmates: figuring out what to do once he received his diploma.

Before graduating with a double major in government and philoso-phy and a minor in history, he had preliminary plans of either going to law school or finding a job in finance

or consulting.

However, Fliegel quickly moved those plans aside when sports agent Marc Simon of Astor Sports Man-agement in Philadelphia contacted him with an offer to play professional basketball in Israel.

Fliegel, who wrote in an e-mail to the Orient that he "was kind of in se-nior panic mode" when Simon con-tacted him, knew that a part of him wanted to "take some time off to travel the world" after graduation.

"I figured all the other stuff could wait," wrote Fliegel, "so I jumped at the opportunity to go [play basket-ball] overseas."

Fliegel mentioned that, being half-Jewish, he "was able to acquire Israeli citizenship under Israel's Law of Return," making him an especially attractive prospect. European pro-fessional basketball clubs, including Israel's, must abide by the "Russian Rule," which requires two national players on the floor at all times.

After spending the summer train-

ing and running his own basketball program for high school players in Boston, Fliegel traveled to Israel on August 31, "with a one-way ticket [and] a few tryouts," he said.

Fliegel wrote that he tried out with seven different professional

"[The process was] the most physically and mentally challenging experience of my life," he said.

Trying to make professional teams is not like playing in college," Fliegel said. "The guys that I went up against were fighting to keep their jobs and were certainly not o to make friends with me."

Nevertheless, the 6'6" Fliegel, who averaged 13.6 points, 5.3 rebounds, and 1.5 assists per game as a center his senior year, caught the eye of Jerusalem, the club Fliegel described as "one of the best teams in Israel...one of the top teams in the world outside the NBA."

Fliegal's performance during try outs prompted Jerusalem to bring him along on a weeklong preseason exhibition tour through Belgium. When the team returned to Israel, the club offered Fliegel a contract.

A press release from the Eurocup Web site, a transnational basketball league that Jerusalem competes in, said the team "hopes to have found a diamond in the rough with the signing of Jordan Fliegel."

While three other teams also offered him contracts, including another premier team and two teams second division, Fliegel decided on Jerusalem because of its

Women's rugby advances to NE quarters

BY CHARLOTTE RYAN

STAFF WRITER

Not many have noticed it, but the

women's rugby team is undefeated.

The team beat University of Maine— Orono 22-5 to add to its perfect season record. This is its first undefeated season since 1995. The Bears have outscored

their opponents 186-27 on the season. Bowdoin struggled with a few mental and mishandling mistakes in the begin ning of the match, but compensated with good defense and organized tackling to prevent Orono from getting on eboard

The first try was scored for the Bears by Loryn Fridie '11 off a short ball off a ruck. Maria Koenigs '09 scored the second try after she put a kick through to the end zone, chased it, and touched it wn right before Orono could get their hands on it. Becky Stevens'11 converted the kick, making the score 12-0 at half

"[We] put them under pressure in the beginning of the second half," Head Coach MaryBeth Mathews said.

The third try was scored off of a lineout on the wing. Stevens got the ball, broke several tackles and fed Jessica Walker '09 the ball. Walker proceeded the run the ball down the sideline and finally passed it off to Nylea Bivins '12 who scored the first try of her rugby

Their momentum began to slow down after a series of mental mistakes.

"Orono mounted a string of well supported attacks pushing us back, Mathews said. "We missed a couple of tackles and they scored."

To end the game Koenigs put a wide chip kick through and Danielle Willey '12 touched it down to reach the final score of 22-5.

The B-side team lost their game 32-0, though they were playing a more ex-perienced B-side team. "The work the B-side players have put in is really starting to show, they are understanding the ne." Wadsworth said.

Nicole Erkis '12 played a particularly good game.

"She was all over the pitch cleaning up everything," Mathews said.

The Polar Bears will play Williams at home at 11 a.m. on Saturday. A victory would earn the team a spot in the final four of the New England Champi onships, a goal they failed to reach last

Co-captain Alivia Moore '09 discussed what the team needs to do to prepare for the Ephs.

Defense needs to be our focus," she said. "For the level of play we're coming into at this stage in the season, we need to clean things up.

Volleyball bumps Bantams at home

The triumph of women's volleyball over Trinity last Saturday provided an uplifting contrast to Bowdoin's other face-offs with the Bantams that day. While football, women's soccer, and field hockey met defeat against Trinity, Bowdoin Women's Volleyball crushed the Bantams with a 3-0

cessful in last week's Friday evening loss to Weslevan and its Saturday afternoon loss to Connecticut Col

Wesleyan entered the Friday match with a strong 15-5 record against Bowdoin's then 13-10 standing. The Bears were unable to overturn the Cardinals' dominant position, falling to them 3-0 with successive sets of 25-19, 25-12, and 25-17. Throughout the game, Kelly Kopchick '11 and Gillian Page '10 each posted five kills and first year Kristin Hanczor's contributed six kills and three blocks. Page also added 11 digs, while Jenna Diggs contributed nine digs as well as 17 assists.

"Friday night was a tough match, and we weren't able to pull through," Hanczor said. "But afterand figured out what we needed to do to compete with Trinity and

Connecticut College."

Jillian Berkman '12 seconded Hanczor's optimism about the

"We went into the game with a lot of confidence, since Trinity had lost to Bates the night before," she

With set scores of 25-18, 25-20, and 25-23, the Bears were able to successfully transfer that confidence into effective offensive play. Page led the offense with 10 kills, while Hanczor contributed an additional nine. Their attacks built on the 25 assists of setter Jenna Diggs '10. On the defensive front, Diggs and Page also added a re spective 21 and 13 digs.

Berkman believes that Bowdoin's final 3-2 match of the weekend against Connecticut College was even more dramatic than its 3-0 victory against Trinity.

"Connecticut was the second ranking team in our conference, and we took them to five sets," she

The tightness of the five sets at 25-23, 21-25, 25-16, 20-25, and 15-9 attests to the intensity of the competition between the Bears and the Camels. Twice the Bears fought back in order to tie the game, but after snatching the fourth set they were unable to close with a victori-

Instead, victory against Con-necticut manifested itself in the strength of Bowdoin's individual

and team play.

Hanczor called the match "awesome" while Gina Lonati '12 mentioned the effort of the team despite the loss

"We played hard, hit hard, and had some big contributions from many players," Lonati said.

Among contributions were Han-zcor with 13 kills and five block assists and Diggs with 35 assists and

This weekend Bowdoin will compete in the Hall of Fame Tournament at Smith College. Friday evening sets them against Springbefore a to-be-determined match on Saturday.
"We are really looking forward

the tournament, where we are ranked seventh in the top eight of the pool against rivals Williams, Amherst, Springfield, and Wesley-an," Lonati said. "This is our weekend to make a statement about our team. It's exciting!"

Bowdoin will also face Endicott in an away game at 7 p.m. on Wednesday evening.

Average finish for Bears at Dartmouth regatta

BY CAITLIN BEACH

Although the weather is cooling down, competition is heating up for the Bowdoin Sailing Team. The team continued its mid-season momentum with a string of solid performances at four different regattas last weekend.

A team of four sailors competed in FJs at the Captain Hurst Bowl, where they placed 13th in a fleet of 20 teams. Dartmouth College hosted the competitive intersectional regatta on Mascoma Lake, where a prevailing northerly wind enabled a total of races in each division to be sailed. Sophomores Viktor Bolmgren and Coco Sprague finished mid-fleet in 11th place in the A-division, wh first years Alex Takata and Elizabeth Staudinger finished in 13th in the B-

Bowdoin sent two additional co ed squads to compete on the Charles River at invitational regattas at MIT and Boston University. Tom Charpentier '10, Charlotte Ryan '12, Katherine McNeil '12, and Leah Hughes '11 took eighth out of 19 in technical dinghies at the Saturday MIT Invite, while Jane Koopman '10, Audrey Hatch '10, Billy Rohman '11, and Caitlin Beach '10 finished seventh out of 17 in FJs at the Sunday BU Invite.

The women's team traveled to Massachusetts Maritime Academy, where they competed in the co-ed Great Herring Pond Open. At the end of competition on Saturday, the team of co-captain Doria Cole '09, Laura Heyl '10, Charlotte Williams '10, and Erin Taylor '09 finished 11th out of 18 teams. Sunday racing was canceled due to high winds in the region.

women's team, currently ranked 13th in the New England Intercollegiate Sailing Association (NEISA), recently qualified for the Urn Regatta at Harvard, which will be sailed in the beginning of Novem-

ber.
"The Urn will be a very competitive regatta as it is a qualifier for the women's Atlantic Coast Championships," said Cole.

The team now looks to further refine boat handling and speed in preparation for upcoming regattas in the remaining weeks of the season.

We have worked very hard this season on boat handling, which is so critical in college sailing," said Head Coach Frank Pizzo. "All of this work is really starting to pay off. We are not a heavily recruited team but everyone has been working hard and it is showing with our weekend results."

This weekend, the team will sail at the Oberg Trophy at MIT in preparation for the Schell Trophy the following weekend. The Polar Bears will also send sailors to the Wellhan Trophy at the University of Southern gatta at Boston College.

Women's soccer stumbles at Brandeis

After an upsetting Homecoming loss, 2-0 to Trinity, the Bowdoin Women's Soccer Team fought to return to a winning track, topping Husson on Sunday but falling to Brandeis on Thursday.

The Polar Bears traveled down to Brandeis for a late non-conference game on Thursday. Action not take long to develop as the Judges scored within the first two minutes of the game.

"After that [goal] we came out hurried and frantic, we had no time to get it back," Christina '11 said. "When we finally settled down we weren't possess ing and our first touches were off all night."

Despite outshooting the Judges, the Polar Bears couldn't find the

"It was a tough night finishing," Aceto said.

When all was said and done, the scoreboard read 3-0 in favor of Brandeis, and the Bears were sent home in despair.

At Sunday's game against Husson, the Bowdoin women proved that sometimes you do get what vou need.

Rebecca Levin '12 described the

spirit as the Polar Bears took to the

"We knew we needed a win," she

The women were able to come through, defeating the Braves 1-0.

From the start Bowdoin controlled the pace of play, doubling Husson's number of recorded shots (10-5) in the first half.

Although the Polar Bears seemed in control, they were unable to score. The second half proved to be more evenly matched though, as each team struggled to record a

Finally, it was Ellery Gould '12 who managed to find the back of the net. After carrying the ball into the box Gould shook a defender and delivered a volley to the far side of the net, giving the Bears what would prove to be the winning goal.

Keeper Kelly Thomas '09 had her fifth shout-out of the season, saving five shots.

The first part of the Polar Bear's double-header weekend was less successful as the Polar Bears fell 0-2 to Trinity.

"It was tough because we had been playing well in practice," Levin said

Initially, both teams battled evenly with little reward. Few shots

at the end of the first half, the Polar Bears had a 5-2 advantage in shots on goal over the Bantams, Much of the second half was the same fight, preserving the deadlock. Not until the final 20 minutes was a goal scored as Trinity capitalized off a low shot from the left that crossed the goal mouth and tucked just inside the right post. Bowdoin battled unsuccessfully to respond with a goal of their own.

"Our passes were not connecting," Levin said. The Bantams fitheir win with another goal, crafted from a counter-attack that resulted in the ball flying from the top of the box into the left corner of the Bowdoin goal.

Despite the disappointment, the Bowdoin women look toward the

Everyone is putting in an enormous amount of effort, and the drive to succeed just gets stronger every game," Anna Tachau '12 said The great part about the middle of the season has been that every-one knows each other pretty well."

The Bears hope this chemistry and renewed focus will enable them to defeat upcoming opponents, notably local rival Colby on October 25 and NESCAC opponent Tufts in a final home game on October 31.

STREAK CONTINUED FROM PAGE 1

Within two minutes of the start of the second half, Trinity was leading the Polar Bears 1-0.

Christine Mwatarura was able to slip behind the Bowdoin defense and redirect a shot from Payson Sword into the back of the cage.

After the goal, the Bantams played with a new sense of inspiration and confidence.

As opposed to their performance in the first half, Trinity was able to create odd-man rushes that yielded many scoring opportunities, and the fervent Bowdoin attackers were prevented from setting up in their scoring circle.

With 8:41 remaining in the game, Mwatarura clinched the win for Trinity with her second goal of

Again, Mwatarura snuck behind the Bowdoin defense where a rebound found its way to her stick for the easy stuff into the net.

"I believe that we can build off of what we learned during the game. We will have to continue to im-

prove our defensive communication as well as our offensive intensity," said McCullough '10.

With the loss the Polar Bears drop to second place in the NES-CAC and also relinquish their top ranking in the NCAA for the first time this season. Bowdoin is now ranked No. 2 in D-III. The Polar Bears will have the opportunity to get back on track this Saturday when they travel to Colby College to take on the Mules.

Colby is ranked No. 7 in the NESCAC with two wins and five losses in conference play.

FLIEGEL **CONTINUED FROM PAGE 13**

prestigious reputation as well as the opportunities being part of the club would afford him, including travel throughout Europe to compete.

"Although I am the 10th man on the team and only play a few min-utes a game, I knew that it would be an incredible opportunity to go up against great players every day in practice and learn from the best coaches," Fliegel wrote.

Fliegel is the first D-III American college basketball player to whom Jerusalem has offered a contract. Professional basketball in Europe is very different from the NESCAC style of play he knew as a Polar Bear.

"I'm still trying to make the adjustment to the game over here because the players are bigger, faster, and stronger and the rules and officiating are very different," Fliegel said. "It's professional basketball so the approach is very different. The guys on the team are in their later 20s or early 30s and know how to play the game at a high level. So the emphasis is not so much on going 100 miles per hour all the time like in college but on executing in different situations, understanding the different reads in our sets, and on not beating each other up too much in practice because it is a nine-month season."

"The coaches sometimes explain things in Hebrew, which things a little harder," he added.

This Saturday marks the first game for Jerusalem in the Israeli

Basketball Super League season (the country's equivalent to the NBA), but Fliegel has already put in some court time with the team in the league's preseason tournament, the

Winner's Cup, which they won.

According to the team's Web site, Fliegel scored five points during the semi-finals and was on the court for the last few minutes of the finals.

While not training with the team, Fliegel is finding time to adjust to life in Israel. Though he spent some time in the country on a birthright trip two summers ago, he wrote that the experience of actually living in a country is much different from just

"The rich history and culture and current political climate makes Israel a really interesting country to live in," Fliegel wrote. "My Hebrew is improving and I'm starting to get a feel for what true Israeli culture is like. Living in Jerusalem is not as scary as most Americans would think. There are some dangerous neighborhoods and you do have to be careful about where you go, but overall I get caught up in my daily routine here and don't think about the dangers of the conflict."

Though Fliegel is finding some similarities between his experience as a rookie with Jerusalem and his first year at Bowdoin, including "carry[ing] the bags in the airport and on the bus," he's quick to find the silver lining.

"Coming from four years at Bowdoin," Fliegel wrote, "it...doesn't hurt that Israel is warm and packed with beautiful beaches and an exciting nightlife."

Football loses 40-16 in Trinity rout

As every football fan knows, when you don't have the ball, you don't score. Bowdoin committed five turnovers on Saturday, and Trinity capitalized en route to a 40-16 thrashing of the Polar Bears.

A fumble on the opening kickoff set the tone for Bowdoin (1-4). Trinity took advantage of the Bowdoin miscue and marched 48 yards in nine plays to take a 6-0 advantage after a chdown and a missed extra point.

'Turnovers are one of the most important statistics in football," said quad-captain Gus Spaulding '09. "It's hard to win if you don't win the turnover battle.

The Bowdoin team responded with a 10-play drive to the Trinity five yard line and settled for a field goal by Nolan McNair '09 to halve the deficit. However, Trinity scored the next 34 points to put the game out of reach.
"We had people who played well for

us for short periods of time," said Head Coach Dave Caputi. "We had a couple lapses in plays. Six or seven times we won the 1st and 2nd downs, holding them to three yards or less, but they converted on 3rd downs. It happened

a couple of times and got away from us pretty quickly."

The Bantams (5-0) were able to amass over 500 yards of total offense in the game, while Bowdoin mustered 318. Trinity quarterback Eric McGrath passed for two touchdowns and ran in another, while Trinity running back Oliver Starnes scored twice.

After McNair's first-quarter field goal, Bowdoin was not able to put points on the board until the fourthquarter, when quarterback Oliver Kell '10 scored on a 15-yard scamper to make the score 40-10.

Running back James Lathrop '11 capped a late 73-yard Bowdoin drive with a five-yard scoring run to score the last points of the game.

Kell finished 17-29 passing for 238 yards while quad-captain Tim Kelleher '09 caught five passes for 89 yards to lead the offense. First year Chris Martin led the Polar Bear defense with 11 tackles.

The Polar Bears will visit Wesleyan (1-4) tomorrow and hope to right the ship against a struggling Cardinals

"We know that every team in the NESCAC is competitive," Spaulding said, "so we need to continue to work hard and get better. We just need to play our game, execute, and not stop

The team will look for big plays to jump start the offense and to create turnovers on defense.

"[The game] boils down to creating one more turnover on defense and eliminating one more when we're on offense," said Caputi. "We have to create one more explosive play on offense and eliminate one more when we're on defense. That's how we can win.

Caputi emphasized that the team has to come out of the gates focused and with energy if they are to win.

"I think every game in this league, particularly this year, is a battle," Caputi said. "You have to play with a little bit of a chip on your shoulder in every game, because if you lose just a little bit of your competitive edge and the game gets away form you early, then it's tough to re-adjust."

With three games left in the season, including games against arch-rivals Bates and Colby, the Polar Bears hope to win out and finish at a .500 mark for a successful season.

"You have to play with something to prove every time," said Caputi. "Every week we know that the previous week's game is a light year away. This game is real important for us."

'Elia '09 wins Morehouse award

BY EMMA POWERS

Sarah D'Elia '09 of the women's tennis team was honored with the Lindsay Morehouse award last week end, closing the fall season with a bang after the Polar Bears fought hard in the New England Women's Tournament Tennis (NEWITT) at Amherst.

D'Elia and Brett Davis '10 played together in the A-Flight bracket and reached the quarterfinals, where Am-herst defeated them. Rachel Waldman '09 and Emily Lombardi '12 also competed in the A-Flight and made it to the quarterfinals, ultimately losing to Wellesley. Stephanie Langer '11 and Hannah Hoerner '12 reached quarterfinals in the B-Flight bracket.

The team played in the tourna-ment's inaugural "Fed Cup" format, where players grouped into teams of two and competed in both singles and doubles matches.

cused on D'Elia's achievements than their performance in the tournament.

"The most rewarding part of the weekend was when Sarah won the Lindsay Morehouse award," Davis said. "I had a good feeling she would receive it because she really contains all the endearing qualities the recipient should have.

"Sarah is one of the least selfish people I know and always looks out for the interest of her teammates, friends, and family," Davis said. "However, when she gets on the court, she is a great competitor who manages to have fun while playing."

D'Elia expressed her appreciation after the tournament.

"I was very surprised to win the award," she said. "It felt good to be acknowledged for something not based solely on success in tennis, but recognized character on and off the court.

The award memorializes Lindsay Morehouse, Williams Class of 2000, who died in the terrorist attacks on September 11, 2001, and her positive

given every year to the player who demonstrates the sportsmanship, admirable character, and work ethic that Lindsay exhibited in her life.

But the glory this fall was not solely reserved for veterans; the season provided opportunity for first-year talent to shine

"We saw a lot of good things out of both of our freshman [Lombardi and Hoerner] who came up with some big wins in the fall," Davis said.

"I think the fall was a great building season for the spring," D'Elia said.

The Polar Bears will focus on maintaining their level of fitness in between seasons.

"During the off-season, the team is motivated to maintain our tennis skills as well as improving our conditioning with speed and weight training," Langer said. "After these matches, we know what we need to do to improve so that we can beat these teams when we face them in the spring."

A Devil of A Time

COLUMN LIKE SEE 'EM

BY CHRIS ADAMS-WALL
COLUMNIST

Here's one for your next game of Kings. Never have I ever met a Rays fan. And no, the vast majority of the 41,000 that filed into Tropicana Field Sunday night for Game 7 against Boston don't count (especially when you consider most of them probably discovered just this year that there was a professional baseball team in town). No, I mean to say that I have truthfully never met a Rays fan. I've met Royals, Giants, Rangers, Pirates, and even Nationals supporters for crying out loud. But never have I ever met someone who lived and died by Tampa Bay baseball.

But this fan—T. B. Ray we'll call him—has to exist, right? I mean, the franchise has been around for a decade, having joined as an expansion team in 1998 along with the Diamond-backs—who have since developed a robust fan base in Phoenix—so there was more than enough time. But did they? I mean, did Mr. Ray ever actually take the time to do so?

In all honesty, why would he? In their 10 years of existence the Rays were 645-972, their highest win total being just 70 in 2004, not to mention the fact that they were nearly contracted five years ago, all this under the umbrella of the corny ferocity of their conspicuously tide-dyed mascot, the Devil Ray, which looked more like the Ocean Spray logo. Year after year, failure after failure, the Trop began to feel more like a contaminated retirement facility than an ugly stadium home to a despicable baseball

Throughout history every franchise experiences its dry spells. But no team in the history of professional baseball has ever gone winless in every...single... year... of their existence. That is, however, with the exception of Tampa Bay. At the time of Tampa introduction, the only other team in all of Florida—the Marlins—had just captured their first World Series in only their fifth year in the league. So why would a Floridian baseball fan have any kind of rhyme or reason to change allegiances?

They wouldn't, which explains why the Trop was almost always empty. The Devil Rays were the laughing stock of baseball, and their biggest fan was nowhere to be found.

But then something happened—several things actually, but one in particular that got the ball rolling. Through a sick twisted, and seemingly delusional trade, the New York Mets acquiesced (somehow) to the shipping of their top pitch ing prospect Scott Kazmir to the D-Rays for the injury-prone Victor Zambrano, on a hunch that pitching coach Rick Peterson would be able to fix the erration right-hander. Let's just say that things didn't exactly work out for the Mets (Kazmir has 47 wins since the swap to Zambrano's 10-45 for his career). But it did for Tampa, who finally had a young driven southpaw to build on. It was GM Chuck LaMar who pulled the trigger on the deal, but even my old guinea pig Cedric would have had the brains to do so. LaMar was fired in 2005 after calling the shots for eight seasons in which the D-Rays went 518-777, and was replaced by Andrew Friedman-we'll call him

the catalyst... and the genius.

Friedman probably knew he had bis work cut out for him. Having finished last in the AL East every year but one (2004—4th), and with the Yankees and Red Sox having established themselves long ago as division bullies, Friedman's job was nearly impossible: Make the Devil Rays relevant, for the first time ever.

what he could, and chipped away at what he hoped would eventually become a Michelangelo-like sculpture. He first took a gamble and hired Joe Maddon as manager, who had never finished higher than fourth in two years experience in charge of the Angels. He imported infielder Akinori Iwamura from Japan when nobody else wanted him, and signed the faltering Carlos Peña for the same reason. He also acquired All-Star catcher Dioner Navarro from the Dodgers for throwaways Toby Hall and Mark Hendrickson, and was patient with the truculent B.J. Upton. But perhaps most importantly, he kept long-time employee Carl Crawford instead of trading away arguably the game's fastest player for unproven pros-pects. But those moves still yielded the ame results, as Tampa finished fifth in 2006 and again in 2007.

But finally (and this time I mean it), the Devil Rays thought outside the box, and going beyond roster moves and coaching personnel, utilized a tac-tic that has had immediate impacts on teams over the years from the see Titans to the Los Angeles Angels of Anaheim: They changed their team and their uniforms. No longer would the "Devil" be associated with the baseball franchise in Tampa Bay, nor would the repulsive shade of sea weed green that had plagued them for the last decade. And suddenly, just like after a good catharsis, the Tampa Bay Rays stepped into the spotlight, white and navy blue, anew. But there was still work to be done.

Friedman brought on declining vet erans Eric Hinske and Cliff Floyd, and dealt Delmon Young to the Twins in exchange for Matt Garza-excuse me, the 2008 ALCS MVP. And then, it just clicked. The Rays got off to a hot start and never looked back, going 97-65 worst to first-capturing their first win ning season, first division title, first trip to the postseason, first trip to the ALCS, and first trip to the World Series, after defeating the Red Sox in the most hardfought series victory in baseball history. I'll say it again: the most hard-fought series in baseball history. Sure, you can give me the 2004 ALCS won by the Red Sox against the Yankees, but I'll give you New York's rancid pitching staff that season. Or you could give me the 2003 NLCS won by the Marlins over the Cubs, and I'll give you...the Cubs.

When you consider the inexperience of this club, and the novelty and sheer inconceivability of their presence in the Championship Series, combined with their two thumpings of Boston at Fenway, only to cough up one of the worst blown leads in playoff history against the new Yankees (as I like to call them) in Game 5 and then lose again in Game 6, only to stand pat after conceding an early home run, and rally behind a brilliant pitching performance by Garza, to knock off a team that had won nine consecutive games when facing elimi nation coming into the decisive Game 7, even if you refuse to call it the most hard-fought series victory in baseball history, then you must at least call it the most significant series victory in baseball history.

The victory puts to bed this notion that bad teams can't suddenly get good, and eradicates every excuse that a losing team might protest including not having sufficient funds to produce a winning franchise, as well as the other teams in the division being too powerful to surmount. But most importantly, it gives each and every team in Major League Baseball—winners and losers—hope: It could get better. It can get better. It will get better. And because he deserves this the most, surely, wherever he is, T.B. Ray is smiling.

Women's XC takes 2nd in Maine

BY ANNIE MONJAR STAFF WRITER

With cross country alumni cheering, a course they had run on countless times before, and the state title they earned last year, the women's cross country squad felt right at home at the Maine State Championships this past Homecoming weekend.

"I think the fact that so many of us ran a personal best on a really hilly course shows that we were really ready and determined to take on this race," said Holly Jacobson '11. "Even though we lost to Colby, I think we all had a great day."

The Polar Bears finished with three All-State runners this year: Annie Monjar '09, who finished first in 18:40 over the 5K course, Christina Argueta '11 in fourth with a personal best of 18:56, and Courtney Martin '09 in sixth, who also ran a personal best of 19:10. Colby, however, managed to put six runners in the top 15 spots, edging out Bowdoin by 16 points.

Despite losing the state title, the feeling around Bowdoin's campsite at Twin Brooks Park this past Saturday was one of satisfaction.

The Bears have had two consecutive individual State champions, with Laura Onderko '08 finishing first at last year's Championship. Coach Peter Slovenski agreed with Jacobson's sentiment.

"We had a great day," he said.
"Our front-runners ran very well,
and we had a lot of personal best
performances throughout the lineup. The team showed a lot of pride
and determination this race."

After a less-than-satisfactory performance at Open New Eng-land's last weekend, Bowdoin was ready to give the State Championship all they had. Going out in a sub-six-minute mile—a zealous opening for such a rolling course—the Bears challenged Colby's frontrunners from the beginning.

"Annie set a very fast pace for the runners through the first mile," Slovenski recalled of the race. "Christina Argueta, Courtney Martin, and three other Colby runners [were] in the next pack."

Starting at a quick pace is a strategy the Bears were glad to practice with two important meets ahead: the NESCAC Championship on November 1 and the Division III New England Regional Championship on November 15.

At both these meets, the Bears face a number of very strong teams, some of whom finished in the top five at the NCAA Division III National Championship last year. With the competition heating up, the women will need to be ready to go out in hard, even with the course distances moving up to 6K.

Now that the Bowdoin women have raced against some of their toughest competitors, they are more confident and prepared to take on other NESCAC teams.

Edging out Bates at the State meet bodes well for the NESCAC Championship.

Also, vital to the race were Lindsey Schickner '09 in 17th, Anna Ackerman '12 in 18th, and Grace Kerr '11 in 25th.

Rounding out the team's top seven was Chantal Croteau '12 in 32nd, whose knee injuries sidelined her for Open New England's, but whose promising talent will be essential to the women's squad in upcoming championship meets.

With a little more experience under their belts, the Bears feel good about the position that the State meet left them in.

"Last week [at Open New England's], I felt like something was missing after I finished," said Argueta as she cooled down after last Saturday's race. "That felt great, though. I know I gave it everything I had, and that I left it all on the course."

Sports Shorts

Crew team takes fifth at Head of the Charles

The men's rowing team exceeded expectations at the 44th annual Head of the Charles Regatta this weekend, posting a fifth-place finish in the Collegiate Fours division.

The team, coxed by Shalmai Rivera '10, finished with a final time of 17:09.304.

The rest of the boat consisted of

Sam Read '09, Andrew Gallagher '09, Mikyo Butler '10, and Tommy Wilcox '09.

They finished behind the University of Michigan, Trinity College, Fordham College, and University of St. Thomas to claim the fifth spot.

Wilcox expressed how pleased the team was with the result. "We were thinking a really good

"We were thinking a really good race would get us a top 10 result, so top five was pretty awesome," he

On the women's end, the Polar Bears again did well in the Collegiate Fours. The team, of Anne Tolsma '10, Megan Rawson '10, Alaina Thomas '09, Caroline Ciocca '12, and cox Shamir Rivera '10 finished in eighth place.

The boat completed the race with a time of 19:45.273, just ahead of ahead of Wheaton College, who finished just over two seconds later.

Bowdoin sent two other boats to the regatta including a Club Men's Fours team, as well as a second Collegiate Fours Women, which finished in 22nd place.

-Compiled by Seth Walder

OPINION

BOWDOIN ORIENT

President Obama

ith less than two weeks until November 4, Senators John McCain and Barack Obama are both fiercely campaigning in an effort to sway undecided voters. As college students living in uncertain times, we feel certain that Obama is the best candidate for the presidency. Senator Obama, in addition to possessing the courage and intelligence needed to lead the country, has laid out policies that will benefit college students in the

Though discussion about education has taken a backseat in the months leading up to Election Day, Senators Obama and McCain each have laid out plans to address educational issues. Both candidates propose simplifying the financial aid application process-a wise decision, as any Bowdoin student who filled out the FAFSA can attest. However, the McCain plan fails to specify any key steps beyond that, while Obama addresses a number of other important issues

First, Obama would provide families with a tax credit of \$4,000 to help cover college tuition, in exchange for 100 hours of community service. While the money might not go far in covering the cost of Bowdoin, it will cover a large portion of tuition for students attending public universities or community colleges. In addition, Obama has pledged to expand Pell Grants-which more than 200 Bowdoin students receive—at the pace of rising college tuition costs.

For students worried about entering the job market in a turbulent economy, the Obama campaign has committed to expanding the number of Ameri-Corps positions from 75,000 to 250,000, as well as plans to double the number of Peace Corps volunteers by 2011. As has been discussed in the debates, Obama also intends to create five million new "green jobs." Bowdoin students have shown a clear dedication to this issue and would be well-prepared to tackle the issue of clean energy.

Obama has outlined extensive plans for a number of other contentious issues, and we encourage students to do their homework. However, with regard to issues that are crucial to our generation, Obama is the clear choice for president. We are lucky to have the educational opportunities that Bowdoin provides, and we ought to ensure that others have those chances as well. Obama provides the best shot at ensuring affordable higher education and a brighter economic future.

Though the focus of much media attention-and this editorial-has been on the presidential race, students ought not to ignore the other contests and ballot questions. The winners of the senate race between Tom Allen and Susan Collins, as well as the congressional race between Chellie Pingree and Charlie Summers, will represent Maine in Washington, and their votes there will have an impact on all residents of this nation. Therefore, we encourage students to vote in both these races, and to take advantage of upcoming opportunities to educate themselves about the candidates. We'll be at Studzinski for next Thursday's debate between Pingree and Summers, and we hope to see many of you there.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Mary Helen Miller, and Cati Mitchell.

I FTTERS TO THE EDITOR

New center will offer needed stress relief. not unecessary luxury

To the Editors

In last week's editorial ("Financial Fitness," October 17) the Orient's editorial board infers that Bowdoin College's commitment to a new Fitness, Health, and Wellness Center with facilities for yoga, meditation, Tai Chi, acupuncture, and massage is a luxury. I disagree.

I see students, faculty, and staff who are seriously in need of more effective ways to manage stress and anxiety. Meditation, yoga, and Tai Chi are mind-body and spirit practices that have been researched and shown to be effective in boosting the immune system, lowering heart rate and blood pressure, and in general invoking higher levels of wellbeing and happiness than found in individuals who do not engage in these practices.

While the costs of not dealing well with anxiety and stress increase medical costs in our society, the use of mind-body techniques can lower health care expenses. For these reasons, it is in my opinion an exceedingly wise decision on the part of the College to help students train their minds and learn to listen more fully to the intelligence of their bodies.

If students leave Bowdoin with nd, body, and spirit practice that they can take with them into their future endeavors in life, then the College will have succeeded in not only imparting knowledge to its students, but in also encouraging life changing wisdom that will help students be happier, healthier, and more emotionally intelligent. To me that is hardly a luxury.

Bernie Hershberger, Ph.D. Director, Counseling Services

'Mansion' defense does not consider impact of advertising

To the Editors:

I didn't feel as though the op-ed about the Mansion party last week tober 17) addressed the way that Ladd house promoted their party. It's all well and good that Ladd was attempting to "celebrate the Man-sion and not the contemporary magazine," but I am curious as to how that message was supposed to reach the campus when posters with the Playboy bunny on them were plastered all over the union.
Regardless of what Playboy and

the Mansion have been in the past, when people see a Playboy symbol nowadays, they immediately think of the reality TV show or busty women and not an "erudite celebra-tion of the cultured man." The attitude associated with the bunny is one that suggests that the size of a woman's breasts is more important than the size of her brain, and I honestly think it has no place hanging all over the student union of a coeducational college.

Plastering a poignant and, for many people, negative symbol across campus affects the entire college and any visiting prospective students. Social houses should be conscious of the fact that the only thing most people will know about their parties is the manner in which

they advertise them. Sincerely, Julia Bond '09

Bowdoin student vote significantly impacts municipal elections

To the Editors:

Your editorial on voter registration was spot on ("Voter registration," September 26). Remember the long lines in February? Please reregister.

Bowdoin is in two legislative districts; some of you will send Alex Cornell du Houx to Augusta. But Brunswick has seven municipal districts; four cover portions of Bowdoin. Two town council seats will be filled: an "at large" seat and the district 7 seat. As nearly onethird of the district 7 voters are Bowdoin students, your impact is

Should you care about municipal elections? Most of you will leave for good after four years. Perhaps you should leave the ballot blank.

At the same time, if you can cast an educated vote you should. Town and gown are inseparable. My neigh-borhood is filled with faculty, staff, and graduates. You are our fourthlargest tax payer, a huge employer, and a cultural touchstone. The Navy's departure provides Brunswick and Bowdoin an opportunity to grow together in ways not imagined when the class of 2009 first arrived.

My father, Edward Pols, taught at Bowdoin for nearly 40 years. My mother graduated at age 59 in 1979. I grew up on campus as a "rink rat" and best understand the important bond between Bowdoin and Brunswick. I'd like your vote. For more, see www.benetpols.org.

Benet Pols Brunswick, Maine

Endowment decisions should not be guided by student imput

To The Editors:

Your October 3 editorial cor-rectly notes that "the endowment plays an important role at Bowdoin, both now and in the future." Where it errs is in inferring from this that students ought to become more in volved with, and informed about, how the endowment works

As the agitations in 2006 over Darfur make clear, those students who want an increased say in the endowment's management are more interested in grandstanding about their pet political projects than in making sure that Bowdoin is financially well-positioned. And there is a good explanation for this: Because current students are unlikely to feel the effects of any impact they might have on returns on the

endowment's investment, they have little incentive to make their chief concern maximizing those returns (especially when the alternative is the warm feeling one gets from pre-

tend-combating genocide).

It is not in Bowdoin's interest to let its endowment (and, by implication, Bowdoin's ability to serve the common good) fall victim to a few sententious charlatans.

Sincerely, Miles Pope '09

Students voting in Maine should know local candidates, issues

To the editors:

On the heels of Amy Ahearn's timely and important letter ("Students voting locally need to know the ballot," October 17), I would like to encourage all students voting to consider the local candidates running for office on the Brunswick School Board and the Town Council. There are seats open in District 7 as well as at-large positions. The District 5 races are uncontested. The local papers (Times Record, Forecaster) have been publishing profiles of the candidates.

Students living on Belmont, Boody, Columbia, Spring, Coffin, College, Harpswell Place, Highrise Row, Maine, McKeen (MacMillan House), and South Streets are district 7 voters. You will be voting at Brunswick Junior High School, 65

To confirm your voting district and polling place, refer to http://www.brunswickme.org/clerk/elections.htm

Please take the time to vote in the local races.

Michele Joyce

Candidate for Brunswick School Board - District 7

Obama promotes middle-class economic growth

BY FAMONN HAR

Today, from the highest levels of business to the smallest local enterprises, there is concern about the future of the economy. People are afraid for their homes and employment, and are yearning for a leader who will take affirmative steps to address the crisis. That leader is Senator Barack Obama.

Republicans continue to push a widely discredited notion that massive tax cuts for the wealthy will somehow "trickle down" to the middle and working classes. No empirical evidence supports this, and facts suggest that in reality, economies prosper more when wealth flows to the middle class.

As reported in the New York Times, economists Alberto Alesina and Dani Rodrick completed an intensive study of many economies across the world and found that when wealth was concentrated at the top, economic performance as a whole suffered. At the same time, in systems where the middle and working classes had a greater share of the wealth, greater economic development occurred.

While Senator John McCain and his supporters continue to push the discredited notion of trickle-down economics. Obama understands that economies prosper from the bottom up, not from the top down. To this end, he has proposed a tax cut that would reduce the tax burden on 95 percent of working families. This will inject real money back into local markets and businesses, creating economic growth. That is a critical difference between the McCain and Obama tax plans. Real economic growth comes when the middle class has more money to spend. Obama's tax plan, according to the non-partisan Tax Policy Center.

would offer three times as much middleclass tax relief as the McCain plan. While McCain's corporate tax cuts might increase the profits of major businesses, it won't result in real economic growth.

McCain and his allies have denounced Obama's plans as being "socialism" Indeed, a recent opinion piece in this newspaper called the Obama plan "government oppression." This charge is baseless. There is nothing socialist or oppressive about giving money back to 95 percent of American families. This is the opposite of socialism, and anyone leveling that charge against Sen. Obama's tax plans is either misinformed or deliberately obscuring the truth.

On economic issues, Obama has consistently shown his judgment to be superior to McCain's. Even as we are trapped in a financial crisis largely brought on by market deregulation, Republicans continue to argue that the unregulated market will always produce positive results and that regulation is an unnecessary hindrance on prosperity.

While our economic system is marketbased, common sense regulation of these markets has long been considered an appropriate exercise of government power. This contradicts the claim that regulation is somehow a risky new liberal scheme. Policies such as the estate tax, designed to ensure that wealth may be earned by all, and not merely inherited by the few, find support in the writings of Thomas Jefferson and Adam Smith. These men were hardly "socialists." Corollaries of this notion include the Sherman Act, designed to prevent trusts, or as they are more commonly known, monopolies. Perhaps the best-known "trust-buster" of them all was Republican Teddy Roosevelt.

As today's economic crisis has demonstrated, unregulated financial markets do not always lead to growth and prosperity. The ability of lenders to pass on their risks led to a situation where individuals and organizations were largely shielded from the fallout from bad loans, and as a result, the housing market became grossly overvalued. The bursting of this bubble has yielded a financial crisis of the highest order. We cannot allow this to happen again. We need reasonable regulations such as the STOP FRAUD act (a bill Obama has pushed defining mortgage fraud and increasing enforcement and penalties) to address the current situation.

In this time of crisis, we need a president who has demonstrated that he will remain calm in the face of adversity, support policies promoting economic growth, and adequately regulate the financial industry. Obama's record on these matters, through his advocacy for middle-class tax cuts and common sense regulation, shows that he is qualified to handle a federal response to economic crises.

McCain has made a career as a deregulator and subscribes to discredited trickle-down economic theories. While he has tried to change his image, his actions speak louder than his words.

It is time to elect a leader who believes that the middle class is the economic engine of the country, and that investing in this area of society is the way to create growth. McCain promises more of the same economic policies that have resulted in the crisis we face today. The choice is clear. To get the economy back on track, cast your vote for Barack Obama on November 4.

Eamonn Hart '09 is a co-communications director for the Bowdoin College Democrats.

McCain and Palin's rhetoric hypocritical, inarticulate

BY HENRY LAURENCE

Re-reading George Orwell's classic 1946 essay "Politics and the English Language" with my Global Media se inar, I was struck by how closely his argument about the mutually corrupting relationship of language and politics fits the often incoherent sloganeering of the Republican campaign trail. Eu-phemistic jargon is still used to hide uncomfortable truth, as when torture is disguised as "enhanced interrogation techniques," and perfectly respectable words are still rendered meaningless by repeated misuse. For Orwell, "the term fascism has now no meaning except in so far as it signifies 'something not desirable." These days socialism is the meaningless all-purpose Bad Thing. Its recent reappearance perfectly illustra Orwell's dictum that just as foolish thoughts lead to inaccurate language, so inaccurate language makes it easier

to have foolish thoughts.

Neither John McCain, Sarah Palin, nor Joe "The Plumber" Wurzelbacher seem to have any idea what distinguishes socialism from progressive liberalism, communism, or for that atter 'compassionate Conservatism'. Nonetheless, Barack Obama's off-hand comment that it would be good to "spread the wealth around a bit" was all the evidence they needed to accuse him of being a socialist. Asked if this was a fair inference, McCain assented because spreading wealth around is a tenet of socialism. By the same logic, we might reach the absurd conclusion that John McCain is a Stalinist because he advocates a strong army, a tenet of Stalinism. But logic does not seem to operating here.

Sarah Palin elaborated: "Senator Obama said he wants to quote 'spread the wealth." What that means is he wants government to take your money and dole it out however a politician sees fit. But Joe the Plumber and Ed the Dairy Man, I believe that they think that it sounds more like socialism. Friends, now is no time to experiment with socialism."

with socialism. Compare Palin's definition of socialism with John McCain's description of his latest economic proposal, the Home Ownership Resurgence Plan, which will: "take some of the money that Congress has already committed to saving our financial system and use it to give millions of homeowners a new mortgage." The plan, (at an estimated cost to taxpayers of \$300 billion) "will purchase mortgages directly from homeowners and mortgage servicers, and replace them with manageable, fixed-rate mortgages..."

Got the picture? When Obama takes your money and doles it out as he sees fit, that's socialism. When McCain takes your money and doles it out as he sees fit, that's a great idea. When Alaskans receive approximately two dollars of Federal taxes for every one dollar they pay, Palin is all in favor of wealth redistribution.

It's easy to dismiss this as the routine hypocrisy of a hard-fought political campaign, but I think there's something

"Neither John McCain, Sarah Palin, nor Joe 'The Plumber' Wurzelbacher seem to have any idea what distinguishes socialism from progressive liberalism, communism, or for that matter, 'compassionate Conservatism."

else going on. To paraphrase Orwell, bad policies can be hidden by sloppy language, but the deeper problem that sloppy language can then lead to bad policies. Consider McCain's scattershot and contradictory responses to the financial crisis. One day he declared he would not support a government bail-out of A.I.G.. Next day he declared he would. He announced he would set up a commission to determine the causes of the crash, then immediately declared the causes to "greed and corruption" on Wall Street. But neither McCain nor his research team could come up with a single concrete example of corruption. And what, exactly does greed refer to? Defined as "an excessive desire to acquire or possess" it defines conservative economic philosophy. One might quibble about what's excessive, perhaps suggesting it means "acquiring more than one needs" but this comes from a man with seven large houses. The "greed and corruption" cliché is utterly meaningless, a stock phrase McCain pulled out, telling us less than nothing about the real crisis.

Palin is just as muddled. During the vice presidential debate she told us: "We need to make sure that we demand from the federal government strict oversight of those entities in charge of our investments." Within a few minutes she was demanding "Government, just get out of my way..."

Neither McCain nor Palin seem to have the intellectual tools to articulate a nuanced response to complex issues of political economy. This is not a matter of brains but of language. They have been repeating the mantra "Government is the problem!" for so long they are incapable of formulating ideas about the relationship between government, the people and the economy that go beyond empty slogans. As any Bowdoin Government major can tell you, there is a vast, rich literature on what governments can and can't do, but McCain and Palin are addressing college-level problems with an elementary school vocabulary.

The problem is not, of course, confined to Republicans or presidential candidates. We are all too often guilty of misusing language, pasting over our ignorance with empty, ready-made phrases and allowing others to do the same. As scholars at this great College, though, we have no excuses for so doing. It will be nice when the election campaign is over and we can, perhaps, begin to have serious discussions about serious national problems. In the meantime, I commend to you Orwell's timeless piece.

Economic crisis rooted in liberal legislation

BY STEVE ROBINSON

So last Friday I went to see Tom Allen in Smith Union. Afterwards I waited in line to shake his hand and meet him. Just as I began to speak to him, a woman shouted to Mr. Allen, "No, don't talk to him. He is a Republican!" Then Tom walked off without a word to me. Now I don't know whether she was an employee of the college, a Campaign staffer or merely a deluded transient woman, but I was shocked by her display of partisanship. The behavior of this woman was childish, but I am more disappointed that Mr. Allen completely disregarded me after learning I am a Republican. Susan Collins would never ignore a constituent because of his or her political beliefs and that's because she has integrity, something absent from the Allen campaign last Friday. Not absent from his Campaign were the usual economic scare ta tics used by Democrats to rally support for redistribution. Although Democrats and liberal pundits may assert that this is the worst economic crisis since the Great Depression, that is incorrect. It is actually the worst financial crisis since Jimmy

In 1977 President Carter signed into law the Community Reinvestment Act. The bill intended to address lending practices that many people thought were discriminatory against minorities in low-income neighborhoods. During the Clinton administration the act was expanded upon, placing even more pressure on banks to engage in risky and uneconomic lending. This was a further effort to reform traditional lending practices which were viewed as discriminatory. The new law required banks to consider extenuating circumstances when lending and told them that "lack of credit history should not be seen as a negative

factor." Banks were also encouraged to let low-income borrowers replace down-payments with loans from relatives, non-profits, and mumicipal agencies. The new law also required banks to consider any child support, welfare, or unemployment benefits as income. With these new conditions in place, it's no wonder so many loans were never paid back. You don't have to be an economics major to see that the actions of previous administrations set a financial time bomb for later presidents to handle.

Although this law sought to end dis-

criminatory lending practices, it ulti-mately forced banks to make decisions against their best interest. Community groups only increased the pressure on banks by threatening to cry racism if banks did not increase their sub-prime lending. Under extreme financial pressure the banks found a solution. As part e effort to make home ownership affordable, two government sponsored entities began buying the sub-prime loans from the banks. Now that the banks did not assume any risk from the unwise loans, they gladly complied with the gov-ernment's pressure by lending wildly. So who was buying up all these risky loans? None other than Fannie Mae and Freddie Mac, and they did so with zero risk because they knew they were insured by the federal government. Banks, mortgage lenders, and Wall Street investors quickly saw the opportunity to increase profits substantially with no risk and the executives of Fannie and Freddie raked in tens of millions of dollars in the process.

How did this problem go unaddressed? Well, just as private greed contributed to the problem, so did the greed of politicians who, under the guise of civil rights legislation, instituted policy that directly interfered with lending in the housing market. When federal regulators under the Bush Administration tried to bring this matter to the attention of Congress, they were met with contempt by Democratic members of Congress who vehemently defended the sub-prime lending as a service to minority communities in America. Just prior to the collapse of Fannie and Freddie, Democratic Congress members Barney Frank, Gregory Meeks, and Chris Dodd openly praised the institutions and testi-fied to the financial soundness of the two mortgage giants. Maybe it's just a coincidence that the politicians who received the most financial contributions from Fannie and Freddie were also the ones defending it so fiercely: Chris Dodd (D-\$133,900), John Kerry (D-\$111,000) and Barack Obama (D-\$105,189). Before entering the Senate, Barack Obama filed a class-action law suit against Citibank alleging that the bank was engaging in scriminatory lending.

It seems that Barack Obama and other Democratic Congressional leaders helped cause the crisis they are now vow ing to fix. Can we trust them? Apparently Democratic politicians have found something in the constitution that says every citizen has the right to home ownership. Intervention in the free market is what got us into this situation, not the Bush tax cuts. While the strain the Iraq war has placed on our economy cannot be ignored, neither can the selfish and corrupt behavior of Democratic members of congress. Although some may enjoy fanciful dreams of spreading the wealth, the proposed policies of Barack Obama and Congressional Democrats will only ensure that there is no wealth left to spread. Then again, maybe that is al. If we're all miserably poor, at least we'll all be equal.

Steve Robinson is a member of the Class of 2011.

Candidates' funding methods raise questions of campaign equality

RV MICHAEL EDANS

Barack Obama announced this week that his campaign raised \$150 million in September. Imagine the money rolling in: \$5 million a day; \$208,000 an hour; \$3,470 a minute; \$58 every second of the day. And keep in mind the context: Obama opted out of the public funding system, which would have given him \$85 million after his convention and limited him to spending that much for all of September and October. By contrast, McCain opted into the system, and cannot raise (with some exceptions) any money in the final eight weeks of the election. The imbalance in funds begs an important question: If Obama wins, could we say he "bought" the election?

The gut reaction to this might very well be disgust. McCain has been forced to watch the Illinois Senator pummel him on the airwaves and outspend him even in traditionally Republican states. McCain has even pulled his ads from several states to consolidate his efforts in key battlegrounds. According to a recent report from the Wisconsin Advertising Project, in the final week of September Obama outspent McCain on television advertising by a significant

margin (\$17.5 million to \$10.8 million). Moreover, Obama will address the nation in a 30-minute "ad" next week, an expenditure that could cost \$6 million. For many, such financial disparities are troublesome. Both candidates should presumably get equal access to voters. This was, after all, the original intent of the public funding provisions.

We can establish two important rebuttals, however. The first is an evaluation of each campaign's strategic decisions. Obama announced his plan to opt out of public funding in June, before McCain made his decision. This allowed McCain at least the opportunity to opt out as a tactical response. He could have said: "Because my opponent did this, I will as well. I don't want to, but in order to compete, I must have access to comparable resources." As a champion of campaign finance reform, however, McCain did not do this-a choice that reflects his convictions perhaps.

Should you worry, however, that McCain is being punished for sticking to his beliefs, keep in mind McCain's defense of his strikingly negative attacks on Obama's character. When Obama chose not to debate McCain in multiple town hall meetings throughout the

summer, McCain claimed that this set the table for a negative (and traditional) election canpaign. If McCain can avoid responsibility for mud-slinging (a style of campaigning that he has decried for years) on the basis of Obama's decisions, he could have surly taken the same tack in opting out of public funding.

The second rebuttal to Obama's

stronomical fund-raising is a reality check. Both candidates ultimately have roughly comparable resources if you factor in the Democratic and Republican Party fundraising. For example, Obama currently has about \$134 million in the bank, and the Democratic National Committee has about \$27 million McCain has about \$47 million left from the public financing grant, Republican National Committee has almost \$78 million. McCain's primary election account (which can be distributed to state Republican parties for the general election) additionally has nearly \$30 million. This means that both camps are about even in terms of available funds, as of October 1

Of course, if Obama raises the same amount in October as he did in September he could ultimately outspend McCain by a significant margin. But keep in mind: Both men have more than enough to

run a competitive contest. There are only so many TV ads that one can buy in the final few weeks of the election, and every campaign dollar spent in the extreme suffers from the law of diminishing marginal returns.

There is an important normative challenge in all of this as well. How, exactly, do we want to fund presidential elections? The current system is now essentially dead—no serious presidential candidate in 2012 will opt into the system as it exists.

So what next? If we fix the system and expand the grant, it would have to be doubled or tripled (to about \$200 or \$250 million per candidate) for the nominees to take it seriously. That would meet with some skepticism from those who want to limit money's influence.

If we make the increase too small, however, this will foster outside groups (many of whom can raise unlimited amounts in contributions) to ramp up their participation to help the candidates (as in 2004 when MoveOn.org and the Swift Boat Veterans spent tens of millions on TV ads).

The other alternative is to look to Obama's success and encourage it. The next Republican nominee will "According to a recent report from the Wisconsin Advertising Project, in the final week of September Obama outspent McCain on television advertising by a significant margin (\$17.5 million to \$10.8 million.)"

have access to this same cache of cash. Of course, such a recommendation is premised on the notion that we need not worry about the huge cost of campaigns. Shouldn't we be trying to limit the influence of money in elections? Perhaps, but I'm not so worried. Contribution limits keep huge checks out of candidate and party coffers, meaning there are no wealthy benefactors pulling the strings behind the scenes.

Fixing the money in politics question is far more complicated than a simple "less money is good" mantra. If we allow ourselves to see money as a form of free expression, for example, we can more easily accept Obama's fund-raising prowess to be less a reflection of the "problem" of money in politics and more a sign of the "vibrancy" of American elections.

Michael Franz is an assistant professor in the government department.

CAMPUS QUESTION

Are you satisfied with Bowdoin's social scene?

In the October 17 issue of the Orient, the Bowdoin community was asked to respond to the question, "Are you satisfied with Bowdoin's social scene?" The following replies were submitted.

Adairro Fuller '11

Bowdoin's social scene can be improved. During homecoming weekend, some alumni expressed that they wish Bowdoin still had fraternities and sororities, and many students on campus wish Bowdoin had these social groups as well. It is unfair that the Board permanently abolished such social groups because of "accidents" and segregation amongst students? It is unfair that we are dealing with the consequences, in which we did not create the problem? When we go to dinner do we still sit with a certain group of people or a person? Do students still drink so much that they pass out?

Little has changed since these organizations have been abolished, but what has changed is how more open-minded the students at Bowdoin have become. The students here are more accepting than past generations. It is tradition for some students to attend Bowdoin because certain

family members are alumni. It is also a tradition to belong to a particular sorority or fraternity that dates back generations in your family. So does the Board have the right to destroy certain family traditions?

Sophia Seifert '09, BSG President

I am really awkward. Sometimes, I'm really, really awkward. And I know I am not the only one on campus who behaves this way. In fact, many Bowdoin students take pride in their awkwardness, as though it marks them as a true citizen of our socially inept polar hear nation.

But I don't exactly enjoy being awkward. The times when I manage to behave like a normal, friendly person are way more fun than the times I spend avoiding eye contact.

Luckily I have a choice. I can continue to walk around paralyzed by social anxiety, and probably still have a great four years at Rowdoin

Or, I can take time to examine my behavior and think seriously about what triggers it. I can change these habits, and subsequently have an even better four years at Bowdoin. The same phenomenon applies to the larger Bowdoin social sphere. Each member of this community has attitudes, behaviors, and perceptions that contribute to the atmosphere of our campus. Too often we do not question our own conduct and thought processes with the same rigor we apply to our studies or activities.

Though we are privileged to live and study at Bowdoin, there is always room for improvement. And nowhere do we have the agency to affect change more than in our social sphere.

The Bowdoin Student Government has begun examining the forces that contribute to the social dynamics of our community. We have assembled a task force to engage the student body in frank discussion about how we live our lives so that the quality of our experience can improve.

The first step is simply to ask questions.

Here are some that we have begun to consider:

- What is the perception of sex and hooking up? Does it have to be a walk of shame?

-If everyone seems to criticize political correctness, why are we such a PC campus? -Where are there opportunities to actually meet new people at Bowdoin?

-Are we a tolerant campus? What's the difference between tolerance and support?

- - Why do students behave differently in class then out of class? Why don't class friendships seem to go anywhere?

-Are Bowdoin students really apathetic, even though they claim to be engaged?

We hope to discuss these questions, and others, with you soon.

Once we have a sense of your answers to these questions, it will be time to act. Do not complacently remain the awkward kid. Instead, join us in asking these tough questions and working to ensure the highest quality Bowdoin experience possible.

Chester Eng '11

Having been at Bowdoin for a year now, I would have to say Bowdoin generally has a great social scene. It is a small college, so there is the opportunity to meet lots of new, interesting, and smart people and really get to know them closely. It is very easy to see friends and spend time with them on a regular basis, something that is not

as possible at much larger schools. However, there are downsides as well. The student body seems to be divided in two ways that becomes most apparent on weekends: those who drink and those who do not. Drinking is a social activity that many students enjoy here (myself included), but it should not be used to define social groups on campus.

That being said, I also feel that there is tendency for the students on campus to be cliquey. Everyone here is generally friendly and outgoing, but at the same time, there does not seem to be much intermingling between social groups. There are groups of people who always seem as if they are always together, whether they are at parties or simply eating in the dining hall. Given the small size of Bowdoin, this dynamic makes me feel as if I am back in high school once in a while

These are merely observations that I have made and they do not reflect how I truly see Bowdoin's student body. I have lots of wonder ful friends who I enjoy immensely spending time with and probably would not be as close to at a place larger than Bowdoin. My statements could just easily be said at any other college or university.

SHOULD OUT-OF-STATE STUDENTS REGISTER TO VOTE IN MAINE INSTEAD OF THEIR HOME STATE?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu.

Several submissions will be selected and published in the October 31 issue.

WEEKLY CALENDAR

OCTOBER 24 - OCTOBER 30

WHAT WOULDN'T RANDY DO?: Tiffany Orué '11 tries to evade Anna Noucas '11 as referee Randy Nichols looks on during the 2011 Powderpuff Football Game

FRIDAY

LUNCHEON

Campus Conversation: Breaking the **Bowdoin Bubble**

Sponsored by BSG, this conversation aims to bring together students, faculty, and staff in a discussion centering on community perceptions and campus issues. Daggett Lounge, Thorne Hall. 12:30 p.m.

"Set in Motion"

The Bowdoin Ski and Ride Club will sponsor this screening of Two Plank Productions' newest ski film. Kresge Auditorium, Visual Arts Center. 7 p.m.

COFFFFHOUSE

"Smoke"

The Quill, Bowdoin's oldest literary arts magazine, will hold a coffeehouse to commemorate the release of its poetry pamphlet, "Smoke."

Quinby House. 7-9 p.m.

"Road to Morocco"

The Bowdoin Film Society will present this 1942 film, which stars Bing Crosby and Bob Hope as two castaways competing for the love of Princess Shalmar. Smith Auditorium, Sills Hall. 7 p.m.

"From Great to Small: Two Artists Explore the Islands of the Eastern Coast"

Alex Bassett '09 and Mary Helen Miller '09 will display works from the Coastal Studies Center on Orrs Island and the Bowdoin Scientific Station on Kent Island, where they spent time over the summer.

Fishbowl, Visual Arts Center. 7:30-9:30 p.m.

SATURDAY

Voter Registration and Early Voting

Students will have the opportunity to register to vote in Maine. The Bowdoin College Democrats will also provide ballots for those who wish to vote early.

Smith Union. 10 a.m. - 3 p.m.

Blue Heron Renaissance Choir

This performance will feature music from the English Renaissance. Chapel. 3-5 p.m.

"In This Skin"

Bowdoin alumna Jill Grunnah '06, as well as dancers Lona Lee and Audra Carabetta, will perform a show they choreographed. Kanbar Auditorium, Studzinski Recital Hall. 7 p.m.

"Road to Morocco"

Smith Auditorium, Sills Hall. 7 p.m.

Broken Social Scene

Broken Social Scene, a Canadian indie rock group, will perform in a concert free for Bowdoin students.

Farley Field House. 9 p.m.

SUNDAY

World Series Screening

The Coles Tower RAs will show Game 4 of the World Series. Drinks and snacks will be provided. Daggett Lounge, Thorne Hall. 8-10 p.m.

MONDAY

Breast Cancer Education and Awareness Luncheon

Wendy Sansone, of the Dudley Coe Health Center, will provide information on breast cancer and breast cancer selfexams during an informal lunch. This luncheon, sponsored by AmeriCorps, is open to all Bowdoin students, faculty, and staff members.

Hutchinson Room, Thorne Hall. 11:30 a.m.

TUESDAY

"Errant Behaviors: A Projection and Sound Installation"

Chicago-based visual artist Anne Wilson will speak. Wilson specializes in DVD stop-motion animation and sculpture. Kresge Auditorium, Visual Arts Center. 7:30-9 p.m.

WEDNESDAY

"Society Must Be Led: The Dilemmas of the Vanguard in Some Post-Independence Novels in India."

Delivered by NYU's Global Distinguished Professor of English Rajeswari Sunder Rajan, this talk will focus on Rajan's current work on South Asian writing that appeared after the internationally acclaimed literary work of postcolonial Indian writer Sir Salman Rushdie.

Lancaster Lounge, Moulton Union. 4-5:30 p.m.

Manufactured Landscapes: Dai Qing Lecture

Dai, an acclaimed Chinese journalist and outspoken

opponent of the Three Gorges Dam project, will give a talk titled, "On the Completion of the Three Gorges Dam Project and China's Environmental Crisis."

Kresge Auditorium, Visual Arts Center. 7:30-9:15 p.m.

THURSDAY

"Web 2.0 - Digital Marketing"

Bowdoin parent Tom Bedecarré, CEO of global digital marketing firm AKQA, will discuss his experience as a leader

Mitchell South Dining Room, Thorne Hall. 3:30-4:30 p.m.

PERFORMANCE

"The Play About The Baby"

Caitlin Hylan '09 directs this Edward Albee play, presented by Masque and Gown. Tickets are \$1. Wish Theater, Memorial Hall. 8 p.m.

College predicts tuition will grow at normal rate

BY NICK DAY

Despite grappling with a national economic crisis and an endowment that earned minimal returns this fiscal year, Bowdoin administrators said they do not predict a tuition hike larger than normal for the 2009-2010 academic year.

"We're hoping that Bowdoin isn't in that league of having to increase tuition [more than usual], and that we can stay in the 4 to 5 percent range," Senior Vice President for Finance and Treasurer Katy Longley said.

"We believe that we can fashion a financial model of operations for the school that will allow us to maintain our tuition increases at about what they've been in the past," said President Barry Mills on Thursday.

Bowdoin's comprehensive fee which includes tuition, room and

Poll: 84 percent support Obama

Orient poll shows overwhelming support among students for Democratic candidates

BY ADAM KOMMEL

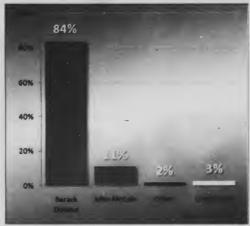

According to the latest poll, Barack Obama is now leading John McCain 84.3 percent to 11.0 percent—or at least he is among students at Bowdoin.

According to a poll conducted by the Orient last week, 2.8 percent of Bowdoin's likely voters are undecided for the 2008 presidential election, and 1.8 percent plan on voting for candidates other than McCain or Obama.

Of Bowdoin's 1,716 students, including students studying abroad, 872 responded to the survey, which the Orient advertised through e-mail and the student digest. Of the 872 responding students, 856 said they are eligible to vote, 845 said they have registered or plan to register by November 4, and 816 said they are "guaranteed" or will "likely" vote in the presidential election. Among registered students, 52.8 percent chose to register in Maine for this election.

In the race for Maine's contested U.S. Senate seat, Bowdoin's registered Maine voters support Bowdoin alumnus and Democrat Tom Allen '67 over incumbent Republican Susan Collins by a margin of 63.5 to 16.4 percent. Undecided voters make up 13.2 percent, and 6.5 percent of them do not plan to vote in the Senate race.

In the race for Allen's vacated seat in Maine's First Congressional District, Democrat Chellie Pingree has the support of 47.8 percent of Bowdoin's reg-

TOPHTLICKER THE BOWDOIN ORIEN

istered Maine voters, while Republican Charlie Summers trails far behind at 6.3 percent. An additional 28.0 percent said they are undecided, and 14.8 percent are not voting in the House race.

According to the latest national polls, Obama is leading McCain by about 6 to 7 percentage points, and in Maine he is ahead by 15 percent. For the Senate, Collins looks headed toward re-election, leading Allen by about 12 percentage points in recent polls. For the House seat, Pingree is leading Summers by 21 points, according to a poll released by Critical Insights last week.

The economy was identified by 37.3 percent of Bowdoin's likely voters as the

Pingree, Summers debate at Studzinski

Pingree leads race by 21 points according to recent poll

BY NAT HERZ

The race for Maine's first district house seat came to Bowdoin last night as the two candidates squared off in a wide-ranging fast-paced debate.

wide-ranging, fast-paced debate.
In front of an audience of some 55 students, staff, and community members, the two candidates—Charlie Summers, a Republican from Scarborough, and Chellie Pingree, a Democrat from the island community of North Haven—fielded questions on nearly far y major issue, from the economy and energy to health care and the Iraq war.

The debate was broadcast live on the Maine Public Broadcasting Network, which sponsored the event along with the College. Summers and Pingree are contesting the seat currently held by Rep. Tom Allen, who left his post to challenge Sen. Susan Collins for her seat in the U.S. Senate.

While the race does not appear to be close—a poll released last Thursday

FACE-OFF: Democratic candidate Chellie Pingree and Republican candidate Charlie Summers debated national issues in front of an audience at Studzinski Hall on Thursday night.

by the firm Critical Insights showed Pingree with a 21 percent lead—both candidates still seemed to engage in the debate, drawing sharp distinctions between each others' positions, especially on economic issues.

If elected, Pingree said that she

would try to erase the nation's budget deficit by voting for a rollback of the Bush tax cuts, as well as beginning withdrawal of troops from Iraq.

"I want to bring that money back

'Grey's' Dr. McDreamy sports Bowdoin T-shirt

BY CATI MITCHELL

Aspiring Bowdoin pre-med students have a new role model to look up do: Dr. Derek "McDreamy" Shepard.

In the October 23 episode of the popular medical drama "Grey's Anatomy," observant viewers might have noticed that Dr. Shepard—played by Lewiston native Patrick Dempsey—was shown wearing a grey Bowdoin T-shirt in the opening scene for exactly two seconds.

The Bowdoin "product placement" on the show came about as the result of a petition signed and submitted by more than 450 students—and President Barry Mills. The document, sent in the spring of 2007, included a list of the College's notable alumni and invited Dempsey's character to "join the more than 1,500 current Bowdoin alumni around the world in the health services and medical professions."

The idea was brought to campus by Cole Harris '74, who has spent years working in the entertainment industry and wanted to spread the good word about Bowdoin.

"I'm ecstatic that Bowdoin got itself on there," said Harris. "As a Bowdoin alum, I think that we all have to serve our college in any way we can."

our college in any way we can."
However, Harris did not see himself as the driving force behind the
project. "I give the credit to the students and to the legacy of the College.
In the end, because of the students
and because of what Bowdoin has
stood for in history made it possible,"
said Harris.

In addition, Harris credited Vice President for Communications and Public Affairs Scott Hood, as well as Mills, whose commitment "has just saturated every corner of Bowdoin College."

In early 2007, Harris placed the student petition in the hands of Amanda Dempsey, the actor's mother, who

TODAY'S OPINION

EDITORIAL. Thank you, parents. **Page 20.** CAMPUS QUESTION: Would Bowdoin students be motivated without grades? **Page 23.**

POLL CONTINUED FROM PAGE 1

most important issue in the presidential election. Foreign policy (including

the Iraq War) follows, at 24.9 percent.
Likely voters who named the economy as the most important issue are less supportive of Obama than the rest of Bowdoin's likely voters, giving Obama a 79.9 to 14.8 percent edge over McCain. Students who do not call the economy their top issue split 84.8 and 8.6 percent for Obama over McCain.

When asked how likely they are to vote, 86.6 percent of registered voters said they are "guaranteed" to vote, and 11.0 percent said they will "likely" vote in the presidential election.

According to a November 2004 Orient article, Bowdoin College Democrats polling found that "at least 81.5 percent of Bowdoin stu-dents voted in [the November 2004] election," although the then-College Democrats Co-President Alex Cornell du Houx "suspect[ed] the actual total was far higher.

Notably, 89.3 percent of Obama voters said they are "guaranteed to vote," while 83.0 percent of McCain voters said the same.

Thirty-four percent of registered voters said they have been following the presidential election "very close-56.9 percent said they have been following "somewhat closely," and 9.1 percent have been following the election "not closely."

Of students not registered with the two major parties, 75.6 percent reported for Obama and 13.1 percent for McCain.

Democrats were far more loyal to Obama than Republicans were to McCain. 96.2 percent of all Democrats selected Obama, while only 75.8 percent of Republicans plan on voting for McCain

Eight of the 504 registered Democrats (1.6 percent) selected McCain, while seven of the 66 registered Republicans (10.6 percent) are voting for Obama

College Democrats Co-President Max Conover, who is voting for Obama, said that he does not consider Democrats to be any more inherently faithful to their party than cans are

'I don't think it's a loyalty thing," he said. "I think it's choosing the best

Leading issues	%
Economy	37.3%
Foreign affairs (incl. Iraq War)	24.9%
Environment	9.6%
Energy/oil	8.6%
Health care	5.5%

candidate"

Of the presidential poll, College Republicans Co-President Jeff Jeng '09, who is voting for McCain, the results were predictable.

"I'm not surprised," he said. "The campus is Obama." overwhelmingly

Democrat Olivia Madrid '10 said the main reason why she is voting for Obama is his foreign policy.

"We need to be more aware of our place in the international community, and I think Obama is more capable of improving our standing," she said.

Democrat Hobie Kropp '08, who is graduating this December, already mailed in his vote for Obama to his home state of Missouri. For Kropp, the most important issue is the economy, but he said he would have voted for Obama based on his differences with McCain on other matters, as well.

"The financial crisis has made the economy the primary issue, and it has reinforced the decision that I already made," he said.

Katie Guttenplan '12, a Texas resident who is not registered with a party, said she voted for Obama in the Democratic primary, but is voting for McCain in the general election, a decision stemming from her distrust of big government.

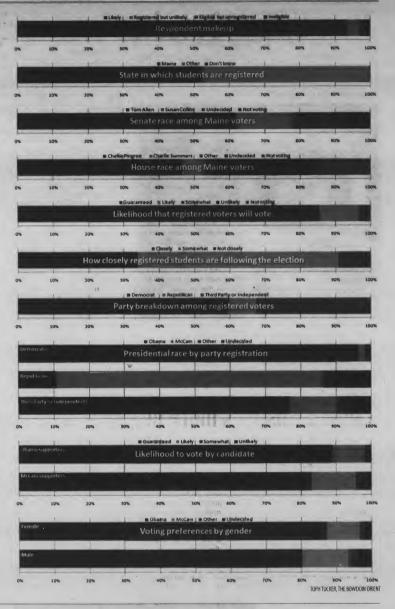

"I dislike both candidates and see this election as a lose-lose situation, she said.

Guttenplan said that because Republican president working with a Democratic Congress will get less done than a Democratic president would, McCain would "expand the government the least."

"Essentially," she said, "I picked McCain because I think he will do nothing."

State ballot questions address bottle tax, Maine casino

BY PIPER GROSSWENDT ORIENT STAFF

In addition to candidates for local, state, and national seats, this year's Maine ballot will feature referenda questions about drinking and gambling.

The first question, "The People's Veto," asks, "Do you want to reject the parts of a new law that change the method of funding Maine's Dirigo Health Program through charging health insurance companies a fixed fee on paid claims and adding taxes to malt liquor, wine and soft drinks?"

Question 2, entitled "Citizen Initiative," reads, "Do you want to allow a certain Maine company to have the only casino in Maine, to be located in Oxford County, if part of the revenue is used to fund specific state programs?

The final question is the "Bond sue," which asks, "Do you favor a \$3,400,000 bond issue to support drinking water programs, to support the construction of wastewater treatment facilities and to leverage

\$17,000,000 in other funds?"

Michael Franz, an assistant professor in the government department, explained the significance of the first referendum issue in an e-mail to the Orient.

Ouestion 1 concerns the beer, wine, and soda tax for funding the Dirigo Health Program," he wrote.

The issue is important because of the imposition of a new tax to fund a controversial program."

The Dirigo Health Program, ac-

cording to the program's Web site, was created by the state legislature "in 2003 as 'an independent executive agency to arrange for the provision comprehensive, affordable health care coverage to eligible small employers, including the self-employed, employees and dependents, and individuals on a voluntary basis.' The Legislature specified that 'Dirigo Health is also responsible for mon toring and improving the quality of health care in this State.

Co-Communications for the Bowdoin College Democrats Eamonn Hart '09 stressed that Ouestion 1 "isn't totally a referendum on Dirigo Health" itself, but instead "on how it's funded."

Franz wrote that "some oppose the tax for anti-tax reasons (arguing that we are heavily taxed already), while some are hoping eventually to force the health program to fail (with the argument that the program has not performed well)."

Steve Robinson '11, a member of the Bowdoin College Republicans, is voting in support of the question.

I disagree with the existence of the Dirigo Health Program in the first place," Robinson said. "I don't support the extension of government."

The question of how much the re sults of the voting on Question 1 will directly affect Bowdoin students remains unclear.

"If Question 1 fails, students, like all residents, will pay a small tax on beer, wine, and soda (5 to 15 cents), but that's it," Franz wrote.

Hart views the implications in a larger scope and said that Dirigo may be helpful for students who choose to stay in Maine after graduation.

"My health insurance is going to expire when I graduate," Hart said.

If approved, Question 2 would allow The Olympia Group, a Las Vegas-based company, to built a casino in Oxford County. The Olympia Group acquired the Portland based-Evergreen Mountain Enterprises LLC in eptember, which had first initiated the proposal.

Oxford County is located alongside the northern border between Maine and New Hampshire.

As outlined in the Proposed Ini-tiative Summary found in the Maine Citizen's Guide to the Referendum Election, if the question passes, "the gaming operator must pay to the State 39 percent of the total gross gaming device income.

This percent of the total gross would then be distributed to fund 22 different outlined purposes, ranging from education, transportation, and medical costs, among others

According to Franz, some people support the casino because it would lead to jobs and economic develop ment. On the other hand, he said that many people oppose the plan because the casino would be run by a Las Ve-

gas-based company. '
"Furthermore, the bill, as written, contains many controversial provisions (i.e., lowering the gambling age in Maine, giving the company a mo-nopoly on casino operations)," Franz

"The legislature has vowed to postelection fix the provisions that many find unsatisfactory, but that worries many voters. Ultimately, however, the proponents want the jobs, and argue that in these tough economic times we should not reject any economic opportunities," he continued.

Robinson wrote, "The casino would provide jobs and revenue in this state, both of which are desperately needed.

While television and radio advertisements, both in support and in opposition to Questions 1 and 2, have been widely broadcast in the weeks leading up to the election, Question 3 seems to have been largely ignored in local media.

According to an October 20 Associated Press article, "the bond proposal [Question 3] appears to have drawn no organized opposition."

More than 400 students cast early votes in Smith Union

Hundreds of Bowdoin students may not visit the polls on November 4 this year-and not because they are apathetic.

Last Saturday, 409 students cast their votes early at absentee voting booths in Smith Union, set up by the Town of Brunswick. Students made up the vast majority of the voters.

Town Clerk Fran Smith said she wa pleased with the number of people that voted on Saturday at Bowdoin.

'We thought...either five voters would come or we were going to be busy," she said. "I was happy with that, definitely worth the time to go

Voting early in Maine is considered absentee voting, according to Smith. As of Monday, October 27, a total of 3,500 people in Brunswick had already voted in the election.

According to Smith, the number is an increase from previous years. Four years ago, 3,400 people submitted absentee ballots in total, and eight years ago only 1,400 did so.

Smith said that because some students chose to use the e-mail method to request an absentee ballot, she estimated that 450 Bowdoin students had already voted.

Saturday was the first time that ab-

sentee voting was set up at the College. Smith said her office decided to come to Bowdoin because they were trying to figure out how to make the process

"It could be a win-win for the staff, students, and other voters," she said. Students seemed to be glad the polls

were set up. "It's more convenient," Sienna Kur-

land '12 said. "It's really nice that they're doing it for us."

Many students said they decided to vote on Saturday instead of November 4 so they wouldn't have to go to the

"[I came] mostly just to avoid the hassle of going into town and avoiding "Tom Delehanty '12 said.

Despite the convenience of the polls being on campus, some students were frustrated with the waiting time involved in submitting their absentee ballot.

"I figured it would be a shorter line than on election day," Rob Halliday '09 said. "But they are slowly but surely

proving me wrong."
Eric D'Elia '11 echoed Halliday's point, surprised at a line far longer than he had expected.

"I was anticipating a 10-minute wait, and when I arrived I was astonished at the line arching around the Union," he said.

Smith recognized that there were significant lines for those waiting to

vote on Saturday, but she explained that this was expected because of the extra steps it takes to cast an absentee vote compared to voting on Election Day. She did not think that any voters ould have to wait as long on Tues

day.
"I cannot imagine people will have to wait longer on election day just be-cause it takes longer for absentee ballots," Smith said.

Smith also discussed why students did not need any form of ID to vote. According to Maine State Law, ID is not required to vote, absentee or regular. However, photo ID is required when registering, which was true for those doing same-day registration last

While Smith recognized that voter fraud would not be very difficult, she said she was not worried

"We're a big enough community, but people do know people," she

On the whole, Smith felt that the entire process had been a success and that the Bowdoin students were pleasant to work with, and she wanted to remind them they can still vote absentee at the Municipal Building on Federal St.

Registrar of Voters in Brunswick Pauline Brillant concurred with Smith

"Things [ran] smoothly," she said.

ROCKING THE VOTE: Hoping to avoid lines and Election Day hassle, students turned out in droves at Smith Union last Saturday to cast their votes for president, as well as local candidates.

College absorbs more health plan fees for employees earning less than \$40K

Beginning January 1, employees who have been juggling rising food and fuel costs alongside medical bills may rest a little easier.

In the 2009 Benefits Announcement released this week, the College announced that in the upcoming year, it will cover more health care costs for employees earning a salary under \$40,000 per year.

According to Senior Vice President for Finance and Administration and Treasurer Katy Longley, employees eli-gible for the increased benefits will not experience any increase in their annual health care contribution. Employees who fall above the \$40,000 mark will have to pay a slight increase, due to increased health care costs in the area.

"Everyone else is getting an increase of 5 or 6 percent," said Longley. "We set the premiums each year to correspond what we need to pay claims."

The College will not impose this increase on lower-salaried employees, however, in order to ease some of their financial burden.

According to Director of Human Resources Tama Spoerri, about 350 employees at Bowdoin are eligible for the benefits given to those earning lower salaries, and about 300 of those employees are currently participants in Bowdoin's medical plan. Currently, the medical plan has just under 1,000 people enrolled, a number that includes retired employees.

"I think a lot of colleges and universities have tiered health plans so that they are often based on salary bands, and some are based on percentage of salary," said Longley. ours is kind of a combination of the two in that we're designating a cap of \$40,000, above which you pay the increase and below which you don't. President of the College Barry Mills

said that while Bowdoin is sympathetic to the growing burden of health costs on all employees, the cuts for lower salaried employees were made based on the fact that the higher wage-earning group "was a little bit better able to absorb the cost than the lowest-paid people at the College."

We already knew that our lowestpaid employees were being stressed and so we said as part of the benefits-and effectively total compensation-for those people, we won't pass along the increase to them," said

Mills. "The College will absorb it."

In addition, the benefits announce ment also states that all employees who earn below a \$40,000 salary will be entitled to a \$300 reimbursement of medical expenses. Though this amount, known as the deductible, is usually required to be paid to the College before an employee has access to the benefits of the plan, eligible emplovees are exempt from it.

According to Longley, the decision to cut the deductible fee for eligible employees was based on employee feedback.

"What we hear from certain employ ees is that the \$300 dollars out of pocket when you have gas bills to pay, when you have food costs to pay, have heating bills to pay, that \$300 can be very burdensome," she said. "The College is going to cover that first \$300, which we think will make the health care more accessible and affordable."

In addition, employees will now have to make fewer trade-offs when considering health care expenses.

"We realized that there ple making the choice of buying food versus taking their kid to the doctor e of the deductibles, so we took the added expense of eliminating the deductibles," said Mills.

Richard Hart, the Smith Union cash operations night coordinator, said that he will be able to put the additional

\$300 towards his daily expenses.

"Between the cost of fuel and the st of medications these days, that \$300 is going to be really good," he said. "I think everyone could use the \$300."

According to Longley, the \$300 will be made available to employees through a health reimbursement account in the form of a debit card.

"The card will look like a credit card and be available for use at doctor's offices, pharmacies, and hospitals," said Longley.

Last year, the College eliminated co-payments for all employees on mammograms and colonoscopies, two typically costly procedures.

"Every year they give us something," said Moulton Union Cook Marji Di-Vece, who has worked at the College for eight years. Though DiVece praised the generosity typical in the College's medical plan, she said that this ye she was especially surprised to see the elimination of the deductible fee.

"In the past, it was just a big deal to tell us the rate wasn't going up," said

"I had to read it twice to make sure I had read it correctly," added Hart. "It's going to be so much help."

Though Mills said that it is a fin cial burden to the College to absorb additional health care expenses, do-

ing so is an important priority.

"Health care for everyone is very expensive and Bowdoin pays a very high percentage of people's health care costs," said Mills. "That percentage is much higher than the average business-much higher-and higher than other colleges and universiti

"It's a burden we consider to be an appropriate one that we absorb,

DiVece said she is happy with the benefits that Bowdoin has provided through its health plan.

"At other jobs, there's no comparison to these benefits," she said.

DEBATE

here," Pingree said, referring to mon ey spent on the war. "I want to bring that money back to America now During their discussion of the

economy, Pingree frequently tried to tie Summers to the policies of current president George W. Bush, while linking her ideas with those of Barack Obama, the Democratic presidential

When Pingree pressured Summers about his support for the Bush tax cuts, Summers defended his position by saying that many of the recipients of the largest tax breaks were small business owners.

"In today's world, it's not difficult for a small business to have \$250,000 in income," he said. "I think it's important to keep the taxpayer burden low."

Summers also said that he supported a two-year moratorium on the capital gains tax, of which Pingree argued that 90 percent of the benefit would go to people making more than \$250,000.

"It would put money back in the hands of the individual and the people who earned that money," Summers said.

Other major differences between the candidates included their positions on health care.

Summers said that given the problems with current federal health programs such as Medicare and Medic aid, a "single-payer system is not the way to go

Instead, Summers said, he would support allowing small-business owners to decrease health care costs by allowing interstate competition tween private health insurers.

Pingree said that she would vote for a single-payer bill if one were present ed before Congress, but also added that she would support the hybrid plan proposed by Obama. This plan would give citizens the option of enrolling in an expanded government program or remaining in their private plan.

The candidates also tackled the is of the Iraq war, in response to a video question posed by Sean McElroy '11.

Pingree said she would have opposed the war from the start.

"I do not see us as an aggressor na tion that continually goes into other countries with a minimal amount of provocation," she said.

Summers, a veteran of the war, gave a more circumspect response.

"My feeling has never been stronger that war is always the last resort," he said. Summers added that if a similar issue were to come up again, he would be sure to ask about the "endgame" before becoming involved in a war.

The candidates also discussed issues surrounding higher education

Summers said if elected, in addition to promoting conventional ideas like increasing Pell Grants, he would propose a national service corps. As part of this program, young people would serve in organizations like the Peace Corps, Americorps, and the military—in exchange, the govern-ment could help pay for tuition.

In an interview with the Orient after the debate, Summers said that he would try to retain Maine's college graduates by encouraging new industries to move to the state

The state, he said, has to "foster an environment where the tax code is not confiscatory.

"We should offer tax incentives to companies that would come in and create new jobs," he added.

Pingree said that she would approve more funding for Pell grants, as well as more support to colleges and universities "so that they're not constantly increasing tuition rates."

Also, Pingree said that the student loan system is currently plagued by many of the same issues that resulted in the current financial crisis, and that it needs reform

"We cannot make a better investment in this country...and particularly here in the state of Maine," she said.

In an interview with the Orient following the debate, Pingree said that she supports the idea of Maine's coldents voting in state elections, even if their homes are elsewhere.

"I think it's fine while you're a resident of the state," she said. "It's part of getting people engaged in a state

After minor repairs, 10 Cleaveland St. 'safe'

BY NICK DANIELS

Though there won't be any raging parties at 10 Cleaveland St. this semester, student residents and visiting parents need not worry that the apartments are unsafe.

Director of Major Maintenance Programs Mike Veilleux said that the building is safe for occupation. Veilleux said that after apartment

Veilleux said that after apartment residents voiced concerns to Residential Life "about the building being a bit flexible," an engineer was brought in last week to evaluate the situation. Though the engineer found that the building was structurally sound, he did recommend "making improvements to the framing underneath the first floor," as well as to "the fire escape handrail since it was a bit flimsy."

"I'm taking this seriously," said Veilleux. "Everything [the engineer] suggested was completed. Is the building safe? Yes."

Evaluation of the structural integrity of campus buildings is not part of standard maintenance checks.

"We do regular maintenance walkthrough during the summer, during which we check for broken windows, leaky pipes, problems with electrical wiring, cracks in walls," Veilleux said. "We oftentimes assume a building is okay to start with."

It was the structural engineer who recommended the limitation on guests, since the building is lightly framed. "The apartments were constructed for single family living, but converted," Veilleux said. "Someone many years ago made the decision to house students in the building."

Director of Residential Life Mary Pat McMahon notified apartment residents of the situation by e-mail, writing that "each apartment in Cleaveland Street should limit visi-

MARGOT D. MILLER, THE BOWDOIN ORIEN

HOUSING REPAIR: Facilities employees made repairs to 10 Cleaveland St. this week following an e-mail that advised students that the building was unsafe for large gatherings.

tors to no more than 3 or 4 guests at any given time." The numbers were decided upon by Veilleux, based on the engineer's recommendation.

Until last week, students were allowed to register parties at 10 Cleave-land St. However, Veilleux said, the building "wasn't built with [partying] in mind." It is unclear why Residential Life was never informed of the problem with the design of the apartments; when asked why the office was not previously told of the framing issue, Veilleux replied, "I'm not sure."

Tony Perry '09, who lives in a downstairs apartment, said of the announcement, "It struck me as pretty random. If there was an issue, then it was an issue at the beginning of the semester, and it was an issue during the summer."

"Generally, I usually feel safe," he

said. "I never seriously considered my safety an issue. Besides, they pretty quickly made whatever changes they needed to."

Veilleux said that "this particular issue is prompting us to consider making inspections on other buildings." He stated that he preferred not to name any specific structures, but did say that he was concerned about certain "woodframed buildings" on campus.

"But just because a building is wood-framed doesn't mean it is a concern," he added.

As for 10 Cleaveland St., Veilleux said, "We will be keeping an eye on the structure for the rest of the year. It's a safe building, we just need to create limitations to be conservative about safety."

"This is the first time we've received complaints," he added.

BSG speaks with Judd; purchases movie tickets

ORIENT STAFF

Remarkable efficiency kept Bowdoin Student Government's (BSG) meeting moving this week as the body spoke with Dean for Academic Affairs Cristle Collins Judd. President Sofia Seifert '09 opened the meeting by welcoming Judd, who promptly launched into a description of her office's range.

According to Judd, she and her staff oversee all matters of academic import at Bowdoin. Three years ago, Judd arrived at Bowdoin after 13 years at the University of Pennsylvania with three core goals: to retain a faculty composed of the best teachers and scholars, to support a culture of academic inquiry among students, and to promote arts and culture on campus.

After providing this brief introduction, Judd opened the floor to questions from BSG members. Vice President for Facilities Mike Dooley '10, thanked Judd for making Arabic a reality and asked her what would happen next year with the program. Judd voiced her hope that 'there will be a second-year [course] offered next year," but cautioned, "It is a work in progress."

Questions soon moved on to the effect of the economic crisis on Bowdoin programs, a topic prevalent lately in campus discourse. In response to a question from John Connolly '11 on the issue, Judd said, "I don't see any scaling back. The place where we'll be cantious is adding new [faculty] positions."

She went on to explain that the College must take long-term financial projections into account when "First and foremost, what the faculty wants for every person here is a successful academic experience."

CRISTLE COLLINS JUDD
DEAN FOR ACADEMIC AFFAIRS

it hires a faculty member who could be employed—and seek to continue his or her research here—for as long as 30 years.

Throughout her conversation with BSG, Judd remained very cordial. As her visit neared its end, she said, "First and foremost, what the faculty wants for every person here is a successful academic experience."

After Judd's departure, a rare usage of public comment time followed from the Bowdoin Evergreens about their initiative to largely eliminate bottled water from campus. In a PowerPoint presentation, members underscored the fact that "there is no such thing as an Eco-friendly bottle of water." BSG plans to vote on officially supporting the Evergreens' initiative in the near future.

Also on Wednesday, BSG approved new Student Activities Funding Committee rules and discussed the creation of a liaison position to the Brunswick Town Council. Next week, the body plans to vote on initiating a Thursday night bowling bus or taxi service. In its final act of the evening, BSG approved the purchase of more discount student movie tickets since its supply has been exhausted. Next week, BSG plans to meet with President Mills during their Wednesday meeting.

TUITION

board, and a student activities fee—has increased at least 5 percent each of the last five years. For the 2004-2005 academic year, the comprehensive fee totaled \$39,680. This year's comprehensive fee totals \$48,570, representing an

increase of \$8,890 over five years.

Last spring, the Trustees voted to increase tuition at the College 5 percent, or \$2,310, for the 2008-09 academic year. The College sets tuition, as well as the annual budget, each spring when the Trustees convene on campus.

Mills said that even while factoring in the escalating costs of food and heating, tuition increases would likely stay consistent next year.

"I do think the [tuition increases]

"I do think the [tuition increases] we've had...over the last number of years is probably where we'll end up," Mills said.

The forecasts of Mills and Longley come during a time when higher education officials are expressing concern that steep tuition increases are imminent.

President of the American Council on Education (ACE) Molly Corbett Broad, in a response to a College Board report on tuition and financial aid released this week, articulated concern that tuition at public and private colleges across the country would increase because of the worsening economic crisis.

"Even with efforts by institutions to consolidate programs and control spending, I am concerned that we are entering a period—as we "I do think the [tuition increases] we've had...over the last number of years is probably where we'll end up."

BARRY MILLS
PRESIDENT OF THE COLLEGE

did following the recession of the late 1980s and early 1990s—when we will see a sharp spike in tuition prices at both public and private institutions," she wrote in a statement on the ACE's Web site.

"Private institutions...given the loss of endowment income and expected cutbacks in private giving, will likely be forced to increase tution at the same time they struggle to increase institutional financial aid," she wrote. "Presidents and boards of trustees will be reluctant to increase tuition, but they will likely have little choice."

David Warren, president of the National Association of Independent Colleges and Universities (NAICU), expressed more uncertainty on how the poor economic climate would affect tuition.

"The volatile nature of the stock market, and the unknown impact of the election outcome on the nation's economic path, makes forecasting college pricing decisions difficult," he wrote on the NAICU Web site, adding that "most private colleges set tuition for the coming year during the winter or spring."

If Bowdoin does decide to raise tuition at a percentage comparable to last year, the College will still need to offset the hike by also increasing financial aid. Last year, when the College increased tuition 5 percent, it increased the financial aid bùdget 6 percent.

Director of Student Aid Steve Joyce explained that this is because "tuition has increased at a rate greater than most family incomes."

"When families cannot cover the tuition increase with increased earnings, there is more need and more demand [on] College grant support," he said

Joyce said last week in an interview with the Orient that he "absolutely" expects the student aid budget to increase, though said it was too early to tell how large the increase would be.

Longley said that increases in tuition each year can generally be attributed to inflation and increases in payroll.

"I think primarily it's the function of payroll and faculty pay, which tends to outstrip inflation," she said. "To stay competitive, we pay our faculty competitively with our peers, many of whom are in urban areas." Mills said that beyond salaries and

Mills said that beyond salaries and benefits, the College is trying to keep operating expenses level. The 2008-2009 fiscal year operating budget for the College is \$140,848,000.

"Do I think that people will get salary increases this year? The answer to that is yes...Our staff I'm hopeful will get modest raises this year. But on the operating expenses beyond salaries and benefits, I'm hoping that they are going to stay flat," he said.

-Cati Mitchell and Gemma Leghorn contributed to this report.

COURTESY OF ABC STUDIOS

SNOOZIN' ON THE JOB: Patrick Dempsey's character on Grey's Anatomy sleeps while wearing a Bowdoin T-shirt in the opening scene of last week's "Grey's Anatomy" episode.

18-34 and had an estimated total audience of 14.21 million viewers," coming in ahead of Game 2 of the World Series.

Though viewers could only see the T-shirt for a few seconds, both Hood and Harris hope that this is just the

"Let's hope they continue to develop the relationship between the character and Bowdoin," said Hood.

Student purchases alcohol for minor, issued summons

The Brunswick Police Department issued a summons to a Bowdoin junior for furnishing alcohol to a minor last Friday.

According to Lieutenant Mark Waltz of the Brunswick Police, officers periodically visit Hannaford to specifically watch for alcohol violations. On Friday night, Waltz and another officer became suspicious after they observed the 21year-old student and a male sophomore enter the supermarket and exchange money

Director of Safety and Security Randall Nichols said that the student purchased a 30-rack of beer and carried it to the sophomore's car in the parking lot. Waltz approached and questioned the two students and then issued the summons to the older student. The younger student was not charged.

"I was immediately notified by

the officer," said Nichols.

When asked about the relationship between the Brunswick police and Bowdoin security, Waltz said that they "work together pretty closely," and Nichols agreed.

Just as police file reports on legal violations, so does Bowdoin Security. Nichols explained that in cases such as this, written reports are submitted to the Dean's Office. The Dean's Office then evaluates the situation and applies discipline as it sees fit.

"It's a little bit of a wake-up call

whenever something like this happens," said Nichols.

According to Waltz, there are about six furnishing cases each year. Nichols hopes that underage students will take into account the legal jeopardy they put 21-year-old students in when they ask for alcohol.

"It's the person doing the buy ing that is at the greatest risk," said Nichols.

The student will face the charge in a district court in December.

SECURITY REPORT: 10/22 to 10/30

Wednesday, October 22

Three Coleman Hall students failed to evacuate during a fire drill.

The students were located and required to leave the building.

Thursday, October 23

• A student who may have sustained a concussion during soccer practice was transported to Parkview Hospital.

A Burnett House student who failed to vacate the building during a fire drill was referred to the dean's

· A Stowe Inn student found in his room during a fire drill stated that he thought it was a false alarm. Note: Failing to evacuate College buildings when an alarm sounds is a policy violation

· A Ladd House resident violated College policy by covering a room smoke detector with a plastic bag. Friday, October 24

A student received facial injuries when the front tire of his bicycle fell off, propelling him over the handlebars on College Street. The student was treated at the health center.

• Brunswick Police issued a court summons for Furnishing Alcohol to a Minor to a 21-year-old junior at Hannaford Supermarket. The police observed the student purchasing beer for

Saturday, October 25

· A student reported the theft of a dark red Mongoose bike from the north side of Chamberlain Hall. The bike had been left unlocked.

· A student reported the theft of a blue Nishiki mountain bike from a bike rack at Moore Hall. The bike had been left unlocked.

Three Maine Hall students were cited for alcohol policy violations, including drinking games

 Four Moore Hall students were cited for alcohol policy violations, including drinking games and possession of hard alcohol.

· An intoxicated first-year student became sick and vomited at the Broken Social Scene concert at Farley Field House. The student was transported by Brunswick Rescue to Parkview Hospital and later released.

· An unregistered event was dispersed in Maine Hall and three room residents were cited for alcohol policy

Sunday, October 26

• Two Harpswell Apartments residents were cited for allowing drinking games at a registered event

 Security officers checked on the well-being of an intoxicated student in Appleton Hall. The student did not require medical attention.

· A small grease fire on a stove in Brunswick Apartments F set off the fire alarm. Brunswick Fire Department responded.

Monday, October 27

· A student with a general illness was taken from Osher Hall to Parkview Hospital.

Tuesday, October 28

 Steam escaping from a release valve in Lubin Squash Courts acti-vated a fire alarm. Brunswick Fire Department responded and Facilities

staff made the repair.

• A West Hall student in poss of a large beer funnel was cited for an alcohol policy violation.

· A student living off-campus reported to Security and Brunswick Police an encounter with a suspicious man on School Street.

Wednesday, October 29

· An ill student was transported from Pine Street Apartments to Parkview Hospital.

· A local resident returned a found student's bike that had earlier been reported stolen.

Thursday, October 30

A student reported the theft of a blue Giant mountain bike from inside Baxter House. The bike had no seat and two flat tires.

· A local woman fell and broke her leg while skating at Dayton Arena. Brunswick Rescue transported the woman to Mid Coast Hospital.

-Compiled by the Office of Safety and Security.

CORRECTION

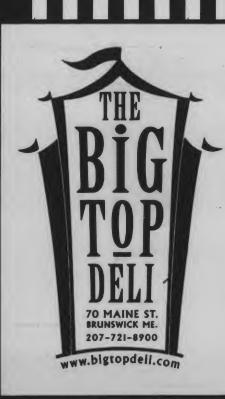

In the October 24 article, "Disorderly House Ordinance may affect students off campus," the article incorrectly explained that certain neighbors of 17 Cleaveland St. have been unsuc-cessful in attempts to label the building a boarding house. In fact, the neighbors have challenged the town's reluctance not to label the building a boarding house, and the issue is currently in litigation. These legal proceedings are

unconnected with the town ordinance introduced last year to limit the number of unrelated people from living together in Brunswick.

The article also incorrectly stated that

the fine that could be issued to landlords after a house has been classified as disorderly ranges from \$5,000 to \$10,000. The correct amount is \$500 to \$1,000.

The Orient strives to be accurate in all of its reporting. If you believe a correc-tion or clarification is needed, please email the editors at orient@bowdoin.edu.

Franz appears live on Al Jazeera, debates negative campaign ads

BY CLAIRE COLLERY

On Monday, an estimated 42 million viewers, rather than the 50 faces typical of a Government 150 class, watched Assistant Professor of Government Michael Franz talk politics.

Franz was interviewed on Al Jazeera, the independent Middle Eastern news station which serves both the Arab world and beyond.

Franz participated on the livebroadcast, current affairs show "Min Washington," which means "From Washington" in Arabic. The show was aired in Arabic at approximately 3 p.m. EDT Monday.

He went to Boston to film the interview, which was simultaneously telecast to the station in Washington and televisions around the world.

Franz was joined by host Abderrhaim Foukara and fellow political scientist Shanto Iyengar of Stanford University. He and Iyengar debated the effects that negative political ads have had over the course of the presidential campaigns that will come to a close on Tuesday.

Franz's research suggests that negative ads either increase or do not effect Election Day turn-out, whereas lyengar has long advocated that negative ads diminish voter interest.

Franz was a good candidate for Monday's edition of "Min Washington" because he has written extensively about how negative political ads are good for democracy. In 2007, he published a book entitled "Political Advertising and American Democracy."

Franz's interest in doing the show stemmed from his desire to "broaden outreach to so many people," which becomes possible when dealing with "such a major media outlet." "I don't think I would ever want to censor myself in which media I was talking to."

MICHAEL FRANZ
ASSISTANT PROFESSOR OF GOVERNMENT

Despite Al Jazeera's "complicated reputation," stemming from its broadcast of terrorist-produced videos, Franz said he decided that the interview was worth doing—especially in light of the fact that there was no discussion of the war on terror.

"I don't think I would ever want to censor myself in which media I was talking to," he said.

"Talking about the actual impact of negativity in American elections helps how we understand this presidential election," he said. "Being able to [do the show] was nice because it airs in a part of the world that might not understand everything about American democracy."

Franz called the experience "exciting, daunting, and humbling, but also

Franz said he felt comfortable participating in the talk-show format, but did mention at least one limitation: "the inability to get into an in-depth conversation." He contrasted his experience Monday with a longer radio interview he did with Maine Public Broadcasting Network's (MPBN) Jennifer Rooks.

"The ability to follow up on questions [made that format] better, or more comfortable," he said of his experience with MPBN.

Though he has done television interviews on other networks before, such as WCSH 6 based in Portland, Maine, this was the first time he had

MARGOT D. MILLER, THE BOWDOIN ORIENT

WORLDWIDE BROADCAST: Assistant Professor of Government Michael Franz debated negative campaign ads on the Al Jazeera show "Min Washington" on Monday. The show was telecast to the Al Jazeera station in Washington and televisions around the world.

been contacted by Al Jazeera. They reached him by e-mail last Thursday.

He described how he sat alone in a small room during the interview, with nothing but a camera in his face, a picture of Boston at his back, and an earpiece in his ear.

"The added burden was the translation in this one," he said.

Everything Franz said had to be translated from English to Arabic, for both the show's audience and host. Of course all the questions to which he responded had, conversely, just been translated into English. Because of these limitations, "there was no dialogue; it was basically just an interview," he said.

Franz said he found the broadcast to be non-partisan.

"In general the host was balanced. The tone of the interview was that McCain's advertising strategy has been too negative."

Franz countered the argument that McCain's campaign has aired a larger percentage of negative ads than Obama's, instead arguing that "Obama has run a very negative campaign, in terms of quantity." He cited the Illinois senator's bigger purse and subsequent ability to air more ads in total.

The effects of campaign ads have long been the study of political research, but Franz believes that they have played a more important role in this year's presidential race due to "the imbalance of ads in many states for Obama. This allows Obama to be the only one talking in certain states."

"Ads will matter a lot," he said.

"Ads will matter a lot," he said.

Ads "speak directly to the American
people," said Franz, an opportunity
not afforded too often to carididates.

"Twenty, 30, 40, years ago the media had a deeper coverage of campaigns that was more policy-focused," said Franz. Today, "politics have to compete with entertainment" and thus tend to focus more on polls than on policy.

Barack Obama, however, was

Barack Obama, however, was able to afford an opportunity to talk straight to America when he paid millions for an unprecedented 30minute infomercial which aired on national television Wednesday.

The move may not be just unprecedented but could prove unsuccessful. Franz thinks that "most American voters don't really want to get involved in policy," preferring instead, the "nugget information" so effectively delivered in an ad.

In the upcoming days, Franz is scheduled to provide election night coverage on WCSH.

BOWDOIN OTES 2008

AN ORIENT GUIDE TO TUESDAY'S ELECTION

POLLING PLACES

To find out where to vote, match your district (map on right) with the district number below.

- 1 Perryman Village Community Center: Cook's Corner-Rt. 24 Next to Lee's Tire
- 2 Brunswick Junior High School 65 Columbia Ave
- 3 Brunswick High School 116 Maquoit Rd
- 4 Municipal Meeting Facility 44 McKeen Street
- 5 Pejepscot Terrace Community Center-36 Pejepscot Terrace off Jordan Ave
- 6 Union St School 35 Union St-Corner of Union & Cumberland
- School 65 Columbia Ave

7 Brunswick Junior High

TRANSPORTATION

Between 8 a.m. and 8 p.m. on November 4, the College Democrats will have three vans running continuously to polling locations from the polar bear statue and Moulton Union.

VOTING RULES AND YOUR RIGHTS

Registration: U.S. citizens who will be 18 years of age or older on or before election day may register to vote up to and including Election Day. If you are registered in Maine but have since changed your address, you will need to update your registration. Be prepared to prove your Maine residency, e.g. with a Bowdoin Directory or utility bill.

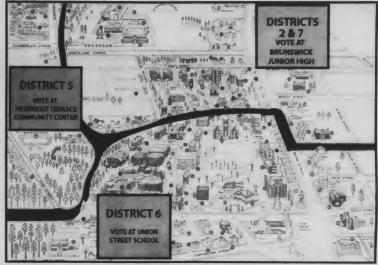

Hours: Polls open between 6 a.m. and 10 a.m. and close at 8 p.m. Under Maine law, you must be allowed to vote if you are in line by 8 p.m.

Districts: Bowdoin students living on campus are split between Districts 63 and 66 for the state election and between Districts 2, 5, 6, and 7 for the town election.

You may choose not to vote for a question or office by leaving those circles blank. If you make a mistake, do not erase; you may request a new ballot.

Legally, you may not be turned away! If your residency or identification is in question, you must be allowed to cast a challenged ballot.

Registering in Maine may affect state scholarship eligibility. If unsure, contact Rebecca Seigars (x3274).

BALLOT QUESTIONS

Question One: People's Veto

"Do you want to reject the parts of a new law that change the method of funding Maine's Dirigo Health Program through charging health insurance companies a fixed fee on paid claims and adding taxes to malt liquor, wine and soft drinks?"

Question Two: Citizen Initiative

"Do you want to allow a certain Maine company to have the only casino in Maine, to be located in Oxford County, if part of the revenue is used to fund specific state programs?"

Question Three: Bond Issue

"Do you favor a \$3,400,000 bond issue to support drinking water programs, to support the construction of wastewater treatment facilities and to leverage \$17,000,000 in other funds?"

FEATURES

As a sign of the times, Grand City closes its doors

"Where are we going to get our dollar-socks now?" asks Topsham asks Topsham resident and Grand City Variety patron Bonnie Wheeler as she sits enjoying her morning coffee at Grand City's restaurant on Tuesday.

Grand City Variety, a staple of one-stop shopping for Brunswick and Topsham residents for over 15 years, is closing in December.

Grand City's manager of 15 years Scott Fenwick understands the value that Grand City has for its customers, but says that two years of declining sales has forced him to close the store.

"We lost a substantial amount of money in 2007," said Fenwick, who bought the company from his father and his father's two partners when they decided to retire in 1993, moving Grand City Va-riety from its 17-year location in the Hannaford plaza to its current location on Maine Street. "I put funds back into the building this year just to keep it going. I have three kids and can't afford to fund my business any longer with no return." When Fenwick was offered a five-year renewal of his lease, he said he looked at declining sales, the economic downturn, and the closing of the naval air station as indicators that now was the time to close. He announced the decision in late September, and patrons have expressed their concern about what is to come.

"I've literally gotten some ques-tions up to 200 times, such as, 'What am I going to do now?' and 'Where are we going to go?' Most of my clientele is over 50 years old, and they're upset their place is be"Most of my clientele is over 50 years old, and they're upset their place is being taken away."

SCOTT FENWICK
MANAGER OF GRAND CITY VARIETY

"There's a wailing wall at Grand City. You just can't see it," added Wheeler.

A Community Staple
At 10:00 a.m. at Grand Variety, the smell of bacon and eggs mingles in the air with ceaseless morning chatter. Linoleum floors, vinyl-cushioned diner booths and chairs, coat racks, free coffee-refills and waitresses dressed in blue aprons give the restaurant the air of an old-fashion diner.

Toward the back of the restaurant, a group of six regulars sits chatting as they finish their "Tuesday-morning break vous" at Grand City. breakfast rendez-

"We've been meeting here for years every Tuesday," said Bruns-wick resident Virginia Anderson. "We had all lost our spouses a while back, so we came together to support each other. We meet here and brighten each other's souls—it's like we can fill a void with the store."

According to Anderson, the group includes a total of about ten Brunswick residents, some of whom have been friends since kindergarten, and others who met during high school or at the workplace.

"If one don't show up, we ask our waitress, Tina, to call them up on the phone, to make sure they're al right or if they just overslept," said Tony Gagne.

Tony said his favorite things

ONE-STOP SHOPPING: Grand City Variety in downtown Brunswick has been a local favorite for its convenient location, cheap prices, and community atmosphere. The store will close in December after 15 years at its location on Maine Street

about Grand City are the service and the parking.

"I come here and my spot is always waiting for me out front," said Gagne. "And then I come inside and the waitresses are all good-looking and know

how to make my eggs and sausage just how I like them."

Most customers agree that the conve nience and community spirit of Grand City are what bring them back.

The store has served as a gathering place for Brunswick and Topsham senior citizens, who come to Grand City Variety to shop, eat, and see familiar faces.

There are some customers who are in here every single day," said Annette Austin, who has worked at Grand City for two years and has been a Brunswick resident for 46 years. "For older ladies, they come in with a list of things to buy because it gets them out of the house and into an environment with lots

of friendly people."

Upstairs in the Ladies' Wear section, Phyllis Ouelette stands folding undergarments and helping customers, as she has during her 20 years working at Grand City. She agrees that the store offers a special sense of community, not only for its custom-

ers but also for its employees.
"It's very sad that the store's closing, and when Scott told us, we were all crying. The employees are almost all women, and we're like sisters," said Ouelette. "This store is really like a ministry for people-they sometimes come here sad and leave happy." According to Ouelette, "the economy is the culprit," but the change in clientele base has also impacted business.

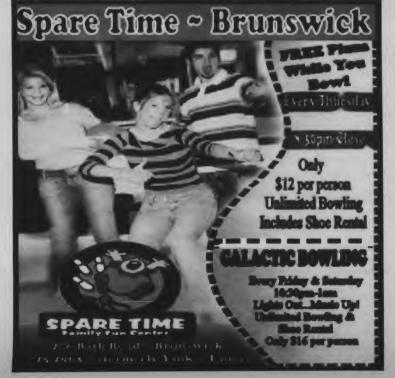

"A lot of our most loyal client-base has passed," Ouelette said. "Bowdoin students still stop by, though, and they raise the dick-ens in here, buying all sorts of odd things," she quipped.

Michael Rothschild '10, one of many Bowdoin students who has frequented Grand City in the past, said in an e-mail to the Orient that he has bought everything from shoelaces to tennis balls to an easy chair at Grand City

"Without Grand City, I'd have to go to Wal-Mart or Big Lots, which obviously isn't the most appealing thing to a lot of people," said Roth-schild. "I think losing the store would be a big loss for Brunswick and just drive more and more people to Cooks Corner and keep peo-ple off the downtown sidewalks."

Fenwick said he does not know what will replace Grand City and will be interested to see how the dynamic of downtown Brunswick, which is already "dominated by restaurants" changes after Grand

"[Grand City closing] is a sign of the times," said Ouelette with a sigh. "It's the end of an era."

Students 'dust off and don' Bean Boots once again

KIDNAPPED BY STYLE

Some may be familiar with a post made about a month ago on Curia regarding a very visible, if not hot, topic at Bowdoin: LL Bean Boots. The author speaks to the usefulness of these boots, but asserts that "there is no way to ever justify their ugliness outside the state of Maine." These ugly pieces of footwear, the author goes on to write, are indispensable pieces of the Bowdoin winter uniform—a winter uniform that each Bowdoin student proudly produces the moment the weather starts to turn for the worse. The author is right; now that the weather has worsened in recent days, Bowdoin students have dusted off and donned their Bean Boots.

Not that there's anything wrong with that. In my opinion, they're not that ugly. The Bean Boot is also the only shoe I've seen large enough to fit the Old Lady and all of her children, which has to count for something... and the lack of comments on the Curia post, despite the fact that all the other posts under the "Stuff Bowdoin People Like" section have at least one comment, indicates that the poster may have struck one of

those problems that everyone knows but no one wants to talk about: Bowdoin may have a Bean Boot obsession, but we're not going to do anything about it.

The Bean Boot does not go with everything, though. Carhartts and Bean Boots says rugged; skinny jeans and Bean Boots says confused. Also confusing: skirt-Bean Boot combinations. If you're very concerned about the warmth and dryness of your feet, you'll probably kick yourself when you realize you've completely ne glected the warmth of your legs and crotch. Or perhaps you're trying to make a fashion statement, in which case, I'm not buying what you're selling. Guys, the mismatching of the Bean Boot may not be as much of an issue on a day-to-day basis, but they are inappropriate for any level of dressiness at or above khaki pants and collared shirt. Honestly, despite the apparent ubiquity of the Bean Boot, there are other cold weather options for footwear.

Starting with any other type of boot. Of course, there are the other pieces of Bowdoin foul-weather footwear (speaking to mostly the women here), such as Hunter-type Boots or Ugg-type Boots. There is great variety just in these two categories—patterned wellies of different colors and heights, or variations on the Ugg styles. So much variety that I would question the purchase

of a "classic" dark shade of either of these boots. Still, these boots, while comfortable and warm when walking to class, are probably less comfortable and too warm when going out at night.

For both men and women, the better alternative for not-too-deep snow or not-too-wet weather would just be a switch to any high cut shoe of a fairly impermeable material. To me, there are few reasons (beside ethical) not to make that material smooth leather. It looks great, doesn't get ruined when wet, and can be quite warm. Salt and scuffing may discolor it, but a decent tin of shoe polish does not run more than \$5 to \$10, and can stretch the life of leather shoes and help you get your money's worth.

In foul weather, many are tempted to get footwear that they cannot ruin. The old sneakers and athletic shoes come out. Sneakers are perhaps at their worst in foul weather. The perforations in the already very permeable fabric, while comfortable in the summer or working out, can leave the foot cold, wet, uncomfortable, and unstylish. High cut leather shoes would both upgrade style and provide comfort as many of these shoes approach the comfort of sneakers.

Finally, footwear is never onesize-fits-all. The pressure to own Bean Boots is not productive if you

MARGOT D. MILLER, ORIENT STAFF

SPILLING THE BEANS: L.L. Bean Boots are the winter boot of choice at Bowdoin.

are more comfortable wearing something else. There's an old episode of "Doug" (continuing my trend of quoting Nickelodeon from the good ol' days) where Doug, the lovable middle school protagonist, wants a pair of Sky Davis Inflatable Air Jet basketball shoes. But Doug doesn't have the change to afford this new trend, and they end up in the hands of arch rival Roger Klotz. The shoes are obviously too large, but he buys them in the interest of competition and trend. In the end though, Doug meets Davis, after whom the shoes are named, and learns that even Davis doesn't wear the Sky Davis shoes; in fact, he wears the same exact shoes that Doug wears! Roger Klotz trips all over himself in his several-sizes too big Sky Davis shoes, making a fool of himself in front of the whole school. The moral of the story: Shoes should be practical, comfortable, and your own style. If they aren't, find another pair.

In defense of dating: Revitalizing real-world romance

MATTERS BY JULIA BOND

It's a sentiment that I've heard expressed throughout my three years at Bowdoin College. The academics are wonderful, the campus is beautiful, the people are friendly—but the dating scene sucks. Why is this? In movies and sitcoms, dates don't seem too scary. I know for a fact that my parents used to do it and I think that I am at least as brave as they are. Yet here we are, surrounded by interesting, intelligent, and passionate people, and we leave Bowdoin without ever getting to know them outside of class, Moulton, or the basement of a college house.

I think part of it is the fact that Bowdoin is such a small community. There are few opportunities ask someone out and not have to see them everyday for the rest of the year. Also, at Bowdoin, we vay too much about every one. Either you've met someone, or your friend knows them, or you just heard about them and person X hooking up last year. How can you ask someone on a date if you've sat next to them in two different classes? Or if you Facebook friended them a year ago and therefore know all their favorite movies, musicians and get a couple of e-mails from Newsfeed every time they sneeze

Here's the thing though: At its most basic, a date is a chance to get to know someone without a text-book or a Solo Cup in your hand. Sure, you sit next to someone in class but does that really mean that you can tell if you might like like them? Not really. In reality, all you know about them is that they use different colored pens, doodle pictures of puppies, and drool when

they sleep. Just because you know someone's name, where they live, and who they hang out with doesn't mean that you know whether or not the two of you would have a good time browsing pillowcases at Grand City.

The word "date" to our generation is like a loaded gun. It seems to be the social equivalent of holding up a bulletin board inscribed with the words: "HEY YOU. I LIKE YOU." This doesn't have to be the case, however. Asking someone on a date should be like handing them a nice greeting card that says: "Oh hey there. I noticed that you're in my Orgo class and seem intelligent. I'd like to talk to you a bit about your interests." It is okay to ask someone out when you're not 100 percent sure that you want to get with them. How else are you supposed to find out? Decipher their dinner tray? Attempt to translate their half-awake doodling? Spending time with someone in a situation where you are alone or in a small group and able to talk is a great way to learn more about them and whether or not you want to take things further.

Even if, at the end of a date, you decide you're not "romantically inclined," a date is never a loss. Sure, if one person has romantic feelings and the other person doesn't, things can get a bit uncomfortable. If you've only been dating for a short time, however, and you haven't been purchasing monogrammed towels together, there will probably be a way to remain friends. And now you have an interesting new friend.

So for these reasons, I am advocating a rejuvenation of the date this week. Gather up your courage and ask someone out. It's a good skill to practice for when you're in the real world and won't know when you might run into someone again. Go to Little Dog, the Station, or Frontier and have coffee. Walk to Evening Star and sit sort of close to each other on a couch. Sample some of Brunswick's restaurants and do your part to boost the local economyl Or just take a walk somewhere. We go to school in an uncommonly beautiful area and walking can be a wonderful way to enjoy the autumn air and someone's company. At Bowdoin, it's easy to get nestled into the tight-knit community and forget that knowing someone through class or parties or the grapevine is not the same as actually having a real conversation with them. It is definitely intimidating to put yourself out there, but people are typically flattered that you want to get to know them a little better.

And give yourself and your peers a bit of credit. Yes, romance and rejection can be awkward, but hopefully we're all mature enough to be able to handle a bit of discomfort in the big quest for love. You never know—that person in your Orgo class might have a totally different kind of chemistry in mind. They're just waiting for you to ask.

Benet Pols, For Town Council, District 7

Should Bowdoin students vote in local elections? Some say you shouldn't. Most of you will leave for good after four years. Perhaps you should leave the ballot blank.

But Brunswick and Bowdoin are inseparable. The relationship is more than 200 years old. My neighborhood is filled with faculty, staff and graduates. Bowdoin is our fourth largest tax payer, a huge employer, and a cultural touchstone. The Navy's departure provides Brunswick and Bowdoin an opportunity to grow together in ways not imagined when the class of 2009 first arrived. Decisions the town council makes may have little direct impact on your lives at Bowdoin, but they influence the relations between the college and town; they will affect Bowdoin students who come after you. Because of this, if you can cast an educated vote you should.

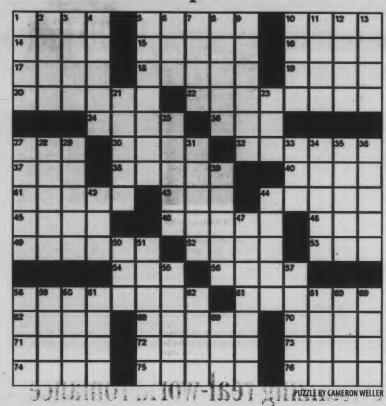

Raised in Brunswick, I grew up in the shadow of the college. My father, Edward Pols, taught here for nearly forty years. My mother graduated at age 59 in 1979 in the same class as one of my sisters. Among the district 7 candidates for town council, I best understand the important bond between Bowdoin and Brunswick. Please see my website www.benetpols.org, for more specific information. Thanks for considering me.

ARTS & ENTERTAINMENT

Broken Social Scene serenades some 1,100 fans

BY PETER GRIESMER

At one of the most successful concerts Bowdoin has held in recent memory, an estimated 1,100 people attended Broken Social Scène last Saturday. Students from Bowdoin accounted for roughly 60 percent of those who attended. The concert was sponsored by the College's radio station, WBOR.

"We've had some successful indoor shows but I don't think we've hit that number before," said Director of Student Life Allen Delong. "That's a good segment of a population to go to a concert."

According to WBOR Concert Director Micah McKay '09, doors were scheduled to open at 9 p.m. but WBOR decided to open doors at 8:30 instead because of the crowd that gathered outside Farley Field House well before 8. The Montreal-based group, Land of Talk, opened the concert around 9:30. Broken Social Scene followed at 11 and played until almost 1 a.m.

Most of the songs played by Land of Talk came from their newly-re-leased EP, "Some Are Lakes." When the main act took the stage a half hour later, the lead singer for Land of Talk, Elizabeth Powell, joined the band on vocals. Most of Broken Social Scene's songs came from their 2002 release, "You Forgot It In People," while a number of other songs came from their eponymous 2005 album. The group also played songs from albums released under the names of individual band members, including vo-

MARGOT D. MILLER, THE BOWDOIN ORIENT

BREAKING THE MOLD: The WBOR-sponsored Broken Social Scene concert was the most well-attended show in recent memory. Lead singer Kevin Drew (center) and his group played for two hours.

calist Kevin Drew's "Spirit If..." and Brendan Canning's "Something For All Of Us..."

Mikel McCavana '12 said he preferred Land of Talk.

"The lead singer/guitarist did a lot of interesting things with capos and chords," he said.

Other students enjoyed the main

act more.

"I liked Broken Social Scene a lot better. I thought they were just more fun to rock out to and they knew how to work the crowd a little bit better," Allie Foradas '10 said.

Overall, the concert was popular with students. According to Delong, the success of the event was due in

large part to the efforts of McKay and student members of WBOR

"The students from WBOR really did their homework in terms of which bands students are listening to and interested in seeing," he said. "There's not really a college student genre anymore so it's really hard to find a group that works across many

student groups."

The concert was the first Bowdoin has ever hosted in Farley Field House. Similar events are normally hosted in Morrell Lounge, a much smaller venue, or in Morrell Gym, currently under construction.

Burtynsky exhibit 'manufactures' environmental questions

BY RACHEL GOLDMAN STAFF WRITER

As the campus scenery dulls to muted whites and grays this fall, the Bowdoin College Museum of Art continues to provide members of the college community with other sources of aesthetic pleasure. This fall, one of these visual escapes is the photographic exhibit, "Competed Landscapes: Edward Burtynsky's Views of China." Burtynsky's large-format images, on display in the Center Gallery, reveal the environmental consequences of industrial-

Burtynsky's photographs capture the emergence of production facilities and housing projects that are replacing old factories, mines and shipyards in China, as well as disrupting the natural world and rural populations. Through his powerful depictions of China and the globalcrisis generated by international waste, Burtynsky "encapsulates the swift cycle of production and decay as it relates to a nation transitioning into a new industrial revolution," according to an inscription in the exhibit

The size of the images makes them particularly engaging. By providing these images in large-format, details that might be overlooked are enlarged and comprise a significant part of the image. Attention is drawn to every bit of debris and detritus as well as to the intricacy and expanse

MARGOT D. MILLER, THE BOWDOIN ORIENT

AN INCONVENIENT TRUTH: Edward Burtynsky's exhibit in the Walker Art Building chronicles the effects of industrialization on Chinese landscapes.

of the industrial cityscape

Burtynsky's exhibit is a central component to a number of campus attractions that are currently confronting the questions of industrialization and natural destruction. The opening of the exhibit corresponded most directly with filmmaker Jennifer Baichwal's visit to campus for the screening of her documentary "Manufactured Landscapes." This documentary for uses on Burtynsky's photographs and photographic experience in China. Baichwal's visit inaugurated a year-long series of public events entitled "Seeking the Common Good," presented alongside the Joseph McKeen Center for the Common Good.

Bowdoin College faculty gathered recently to present a cross-disciplinary lecture and discussion regarding Baichwal's documentary and Burtynsky's exhibit. Assistant Professor of Art Michael Kolster, Associate Professor of Asian Studies Schuchin Tsui, Professors of Sociology Craig McEwen and Susan Bell, and and Associate Professor of Film Studies Tricia Welsch engaged in the discussion. The cross-disciplinary nature of the provocative discussion emphasized the universality of the topic at hand.

"The lecture was an extremely productive exchange," Welsch said. "It pushed everyone to realize that there were so many different ways to enter this subject matter. Both speakers and people in the audience brought in ways to talk about the material that drew on the resources of their own disciplines."

The same can be said for the exhibit itself.

"Everyone can find something provocative that strikes them, be it from an environmentalist to a literary point of view," she said.

Burtynsky's work does not solely

Varieties of pumpkin ales provide festive Halloween brews

BY MAC EVANS COLUMNIST THE REER GEEK

In honor of Halloween and in the spirit of the falling leaves, I've decided to sit down and invest in a handful of pump kin ales before the snow hits. Pu ales are usually a seasonal beer, and are only released in conjunction with the changing color of the leaves. It is difficult to actually create a pumpkin taste in a beverage since pumpkin alone doesn't taste like anything, or at least anything interesting. Brewers, in order to circumvent this problem and create something that will sell, started adding cinnamon and nutmeg and other spices associated with the more distinctive (and delicious) taste of pumpkin pie. This leads to many different brews-more than 200 in the world I have a more humble selection of eight to drink and critique.

Shipyard Pumpkinhead Ale

This is a crowd pleaser-probably one of the most accessible and popular pumpkin ales available at this time. It s as if someone took some canned pumpkin pie mix and made beer from it. The flavor has its advantages and disadvantages. The beer itself is initially incredibly drinkable and delicious be cause it is, essentially, a liquid pumpkin pie. By the end of the beer, h feel that one's enough. It's good, but only in small quantities.

South Hampton Pumpkin Ale

This tastes very similar to Pump kinhead, but is a step up. I taste the same sort of pumpkin pie, but instead of brewing a canned mix, it seems as though South Hampton decided to add spices and a more bitter taste. The beer tastes of both pumpkin and spices, but neither element overpowers the other. It is the same concept as Shipyard, but more complicated.

Wolaver's Will Steven's

Pumpkin Ale This is a new one. It is an organic

MARGOT D. MILLER, THE BOWDOIN ORIEN

SPIG IT UP: Several different brewenes produce seasonal pumpkin ales in the fall. The wide array of different types of pumpkin beers give drink enthusiasts many options to choose from

pumpkin ale and tastes strongly of spices and earthy malts. Picture chopping a cooked pumpkin in half, adding some spice, and eating it; that's what this beer tastes like. It is different than the cookiecutter, pumpkin-pie-mix beers, and, as a result, might not be popular with some but could also be just the pumpkin ale you've been looking for if you haven't

Dogfishhead Punkin' Ale

There is something about this been that makes it very complex...and delicious. Instead of trying to emulate a pumpkin pie, this beer tastes more like an invitation of the pumpkin itself's taste, added to a solid brown ale with spices thrown in to make it even more lelightful. The taste and texture of the beer make it very drinkable. This iş my favorite one so far.

Harvest Moon

Now I like pumpkin, and I like Belgian White ale, and Blue Moon does a reasonably good job making white ales considering it's produced by The Man (Blue Moon Brewing Co. is secretly Coors). So why do I dislike the combination of the two? There is not much to say about the pumpkin or spice flavor, and I can't even taste it until a couple minutes of not drinking and taking in some

fresh air. The beer, however, seems to be banking on this liar-pumpkin-taste, leaving it feeling very empty. It's starting to warm now, which makes it taste more and more like vornit. I don't think

Smuttynose

At this point in the night, I can barely taste the pumpkin and spices as much as I taste the hops. The pumpkin and spices are in the aroma and the aftertaste of the beer I'm not that much of a hops fan, so I'm not much of a fan of this beer. But I am a fan of...your mom. No,

Weyerbacher Imperial Pumpkin Ale

Wow. I can already tell that this is the winner for me. A good blend of pump-kin and spice flavors that makes me feel like I'm drinking a homemade pumpkin pie! This is not just a great pumpkin beer, this is a solid beer overall. A good brew with a very appropriate blend of spices and flavors. I'm tempted to get another one right now. No? Okay.

Jack's Pumpkin Spice Ale

This tastes like Budweiser with a hint of pumpkin. Wait. Read the label. It is Budweiser with pumpkin taste...Let's

Art students push creative limits during 15-hour 'art-a-thon'

STAFF WRITER

While most Bowdoin students were snoozing on Saturday morning, a small group of art enthusiasts gathered at McLellan Building at 9 a.m. to embark upon an epic artistic journey. Students in Advanced Studies in Visual Art, a class taught by Visiting Assistant Professor of Art Anna Hepler, spent 15 hours com-pleting a studio marathon dedicated to whichever project they chose. Some students explored new ways of developing photography, some delved into the art of Chinese calligraphy, and some even used shoes as a medium for sculpture.

This was the second marathon of the ter. The first included visits from outside artists such as Haig Demarijan who provided inspiration and advice to Bowdoin artists. Demarjian, a Boston-based mixed media artist, currently teaches drawing at Salem State College

The marathon was a way for Hepler to allow her students to look at traditional mediums in new and complex ways

"The studio marathon stimulates the creative process by cross-pollination within the studio, that is, watching others work and being influenced by what is being made around you," Hepler said.
"Making things and being engaged as a
maker has a snowball effect. The more you do it, the easier it is, and the deeper

RUNNING WITH IT: Amos Fung '10 takes advantage of the art-a-thon on Saturday to work on a woodcut for his Advanced Studies in Visual Art class.

your ideas. I wanted to set the stage for that type of experience."

The opportunity for members of the class to offer input on each other's projects was another important aspect of the

"I was also interested in how the experience would change the group dynamic," Hepler said. "Specifically, I wanted it to be a bonding experience for

Jenna Breiter '10 was enthused at the length of time spent with her work.

Of course the long hours were draining, but the investigation is just as important under a tired state of mind as any other," Breiter said. "New things happen when you're tired that you may never have allowed yourself to do, but with a different level of energy and focus there are different options you find available to yourself."

Breiter used the first marathon to collaborate with others in her class to create a woodcut using ink and Color

Aid, a manufactured colored paper sup-plied by one of the visiting artists.

Although Breiter focused on one project, not all students used their time

'The marathon wasn't necessarily about completing projects but about being open to experimentation," Breiter

To strengthen the bond within the class, a number of Bowdoin art professors attended the marathon to provide guidance. Among the art department faculty present was Visiting Assistant Professor of Art Meggan Gould.

"It is rare, in my own studio, to have the opportunity to spend 15 uninterrupted hours with a specific project or projects, and it seemed like an amazing chance to spend a concentrated spuri of time on my work," Gould said. brought several projects-a few that I had intended to experiment with for months, another that has been in process for a while."

Gould appreciated the benefits of sive and time-consuming such an exte

"I think it is incredibly useful for the student participants to isolate themselves in their artwork for such a dedicated chunk of time," she said. "It intens sifies the process of working through, and moving on from, certain blocks in one's work."

The projects created by students in the class during the first studio marathon were previously displayed at the Visual Arts Center and the class's final project will be on display at Fort Andross at the

WBOR 91.1 FM DJ OF THE WEEK

Davia Steeley '11

If you could only listen to one album for the rest of your life, what would it be?

DS: Lauryn Hill's "The Miseducation of Lauryn Hill.

Favorite song to dance/rock out to when you think no one's watching?

DS: "Bombs Over Baghdad" by

If you were in a band, what would it be called, and what kind of music

would you play? DS: We would play R&B and the name would be "Soulful Sounds."

Theme song during Ivies? DS: "Can't Hide From Love" by Mary J. Blige featuring Jay-Z.

If you could meet any musician, ead or alive, who would it be and

DS: Marvin Gaye because he is awesome, his voice is unique, and he is a legend.

Best new music vou've heard lately? DS: Jazmine Sullivan's album "Fearless." Good-for-the-soul kind of music

If you could time travel back to any musical period, where would you go and why

DS: I would time travel back to the Harlem Renaissance during the 1920s so I could meet the greats like Duke Ellington, Ella Fitzgerald, Cab Calloway, and Billie Holiday, among many others. These people and the others of their era have set the stage for respectable, soulful music. They are each essential by providing a musical platform that has been the foundation for much of the music we listen to today.

Bands/musicans who have most influenced your musical taste?

DS: My musical taste has been most influenced by Mary J. Blige. I compare almost everything I listen to to Mary. Her voice and style of music is very compelling and puts me in touch with my emotional side ev-ery time I listen to any of her songs, whether it be the very first or 100th

"Your Word with DJ Davie D" airs Mondays from 9-10:30 a.m. on WBOR 91.1 FM or online at www. wbor.org

Guterson's 'Other' has 'Into the Wild' tones

COLUMNIST NOOK

People are never exactly alike and there are a number of quali-ties that might set them apart from birth-that's what makes things interesting. Someone might have a knack for languages, a feel for the piano, or an easy comprehenon and love of quantum physics. Others have an aptitude for art, or compassion, or problem-solving.

Wealth can be viewed as another of these gifts. This is a tricky attribute to possess as a birthright; it is not a talent, but sometimes it is an attribute that people inherit.

The protagonist of David Gut-erson's "The Other," John William Barry, spends his brief life fleeing the implications of his inheritance. His struggle prompts a question: Does one have a duty to make the best of one's gift, no matter what form it takes?

John William's story is narrated by his friend Neil Countryman. Somewhat predictably, Neil is the son of a carpenter and far less wellto-do than the Barrys. The boys meet at a track race and they con-Their friendship thrives and is solidified with hiking adventures through the wilderness

Although they both have a love for the outdoors, it soon becomes clear that John William has more complicated goals than a walk in the woods. He develops an intense disgust with the material world and distances himself farther and distances himself farther and farther from it. After finishing a year at Reed College, he abandons conventional education. John William's efforts to set himself apart eventually lead him to the moun-

is a pleasure to read. His descriptions are thorough and evoke the atmosphere and the singularity of woods that, to most readers, may be unfamiliar. His construction of the relationship between his protagonists is sensitive and wellwrought.

Neil and John William's relationship becomes more complicated as time passes and Guterson does a fine job of crafting a bond that stain the pressures of John William's persistent retreat from the world. The excellence of his writing far outweighs any flaws in logic or plot. Guterson tries to examine a challenging question from a point of neutrality and interested ncern.

There are tones of Jon Krakau-"Into the Wild" in Guterson's novel. John William is trying to escape society, trying to exist in accordance with an outmoded approach. He chips into the wall of a mountain, creating a cave to shelter him from elements; he gets rid of his car and tries to survive only on the land.

What is fascinating about his retreat into the wilderness is that he can't survive without the world he has abandoned. He is dependent on Neil's visits and his delivery of a variety of supplies, including company. Neil brings food and fuel, liquor and books.

This dependence casts John William's experiment in an almost ridiculous light. But again Guterson expresses John William's tortured need for separation in a manner that causes the reader to empathize with him, regardless of whether he she embraces his cause. John William feels the travesties of his present on a visceral level.

Instead of immersing himself in the implementation of change, he detaches. Neither Neil nor Guterson passes judgment on this choice. Neil even shares many of his friend's principles, which is one of the reasons he continues to supply him with things that will sustain his wild lifestyle.

Guterson does not come conclusion about John William's choice to defect. The reader is left with questions. Is there something selfish in his behavior? He forfeits participation in the woes of the world and, in doing so, also removes himself from its opportunity

There is the added caveat of John William's wealth and the ends to which he might have employed it. Neil is the eventual beneficiary of his millions-a worthy recipient, but also one less in need than others.

There is no formula for what makes a good life. Perhaps retreat is a sensible move. Perhaps sacrificing the world when one has access to it all is a great achievement. Perhaps there is no answer.

Regardless of these various possibilities, Guterson's novel is a terrific piece of work. His insights and characters resonate with subtlety and magnanimity.

with classical polyphony

STAFF WRITER

A community crowd created lively scene in the Bowdoin Chapel on Saturday when Brunswick residents, Bowdoin faculty, and students took leave from a breezy, beautiful fall day

to indulge in an afternoon of music As the Blue Heron

Renaissance Choir took the stage there were no doubts that the chapel was an appropriate habitation for 11 virtuosi, energetic and poised for performance

in a semicircle around the pulpit.

The program consisted of sacred and secular English song from the early 16th century. Elaborate polyphony thrived in the English Catholic tradition, but writses and Magnificats were destroyed in droves during the Protestant Reformation. This is why, according to the choir's director, Scott Metcalfe, sacred music from early Tudor period England is so rare and special.

The Boston Choir specializes in per-forming these lesser known works. On Saturday, the choir performed music from the Peterhouse partbooks, one of the main sources for religious music of

The concert opened with a work by Thomas Tallis (1505-1585). The vocalists, in pairs, entered in succession with marvelous clarity, their voices soaring to the back of the chapel. Clearly, there would be no hiding in the resonator would be no miniature cathedral. Each pair maintained true synchrony, and the sopranos' words were like the blasts of high, clear trumpets suspended in the upper reaches of the air.

The Tallis was a vivid demonstration of the harmonic sensibilities of the composer's era-foremost, a wondrous tonal ambiguity. At cadences, Tallis employs a slow trick of suspen-sion to throw off even the most stock progressions—a curious passing tone to preserve harmonic motion. Though sacred, his is an infinitely freer style than that of the refined madrigals of subsequent Italians

Afterward, secular songs by Robert Fayrfax and Edmund Turges showcased the brilliant register of a countertenor and the three other male vocal ists. During the Fayrfax, which opened in stunning falsetto, one willed away the world of true high vocal range ruled by women for the beauty and delicate mbre of the male soprano.

The next series of rounds, by lesser known composers Daggere, Cooper, and Kempe, were strung together with delightful choreography; each song brought an additional member to the stage who began to sing while walking to join the group. The rounds, chara terized by elegant hocketing and thirds, were lovely. Finally, a female soprano joined the group for William Cornysh's "Adew mes amours et mon desyre," a gem: bright and delicate for a moment.

Robert Jones' "Magnificat" brought the whole ensemble back to the stage It opened with plainchant in the tenor wed by a response by the choir alighted with heavy, holy chords. Then, a delicate, meslissmatic discussion in simple tonality by the male voices and a plainchant service call entered again; this was answered by the harmonies of angelic female voices. Then another round from the males-a see discussion between different levels of cosmological hierarchy. All the while, the dim paintings on the wall began to take rare significance and become alive amid the fanciful, sacred world. Bright hues of stained glass shimmered and Adam and Eve on the wall became mo mentarily animated: Eve's arm grabbed for Adam's broad soldier. Her face revealed an expression of deepest sorrow because she knows that she has brought brutal knowledge to the people of the

During John Taverner's "Mater Christi sanctissima" and throughout the performance, the full ensemble ed to settle into a particularly heavy dynamic, missing many opportunities to toy with the incredible carriage of sound in the chapel. At any moment, the group might have whispered and stolen the hearts of their audience. The omen also overwhelmed the ensemble in their highest range; one wished they would hold back at those crucial

Yet all the while, Scott Metcalfe directed the group with subtlety and immense energy. Even the slow numbers were endowed with a ceaseless deep duple vigor and the singers, though not flawless like the celestial characters on the chapel walls, provided beautifully educated and sensitive renditions of the

sacred and secular songs.

The performance closed with Hugh Aston's "Ave Maria." After an ecstation melismatic finale of incredible duration in preparation for the closing syllable of "amen," one forgot all punitive judgments collected prior to Aston's divine prayer, and felt simply thankful for the gracious gift of music given to some lucky listeners in Maine on a Saturday afternoon.

BURTYNSKY

depict a seemingly distant world in China; his images have a universal

"This is a major photographer, showing us things that without privileged access we wouldn't be able to see in our everyday lives," Welsch said. "And more importantly, they are images of a destruction that implicates us all. Looking at Burtyn sky's images you do feel yourself and your presence. Going to this exhibit is a fascinating and thought provoking opportunity to see things that uld never see yet that we have helped to make happen."

Fellow panelist Tsui echoed Welsch's sentiments.

We realize where our e-waste is shipped to and abandoned. In seeing this exhibit we realize that every single one of us is responsible for our environmental protection," she

Burtynsky's photographs deliver provocative depictions of the ways which global industrious actions leave an indelible imprint on the world. At their core they are disturbing images, but they are also incredibly beautiful, according to Welsch.

They are fascinating to look at," she said. "In their detail and in their enormity, Burtynsky captures the awesome scale of the impact we make on the planet. They are interesting and beautiful and endlessly fascinating.

"Competed Landscapes: Edward Burtynsky's Views of China" will show in the Center Gallery through December 23, 2008. The "Seeking the Common Good" series will con tinue throughout the school year.

Four voices grace chapel | Masque and Gown interprets Albee's 'Play About the Baby'

BY ANDY BERNARD CONTRIBILITOR

A month after Edward Albee graced Memorial Hall with his common hour lecture, his work will take the stage in Wish Theater as Masque and Gown presents his Pulitzer Prize-nominated "The Play About the Baby" tonight and Satur-

The play was written and first performed in England in 1998 and it premiered off-Broadway in the United States in 2001. It will have its Bowdoin premiere under the direction of Caitlin Hylan '09.

Hylan, along with about 30 other theater/dance students, met with Albee when he visited campus to speak at Common Hour one month

ago.
"He's not exactly an open book,"
she said of meeting Albee. "Of
course, he doesn't have to be. He's Edward Albee!

Despite his understated manner, Albee's presence still gave Hylan perspective on "The Play About the

"I'd be willing to wager that most or all of Edward Albee's plays are about Edward Albee," she said. "So that was, though I'm sure he had no idea, perhaps the most useful inwe garnered from our meeting with him," she said.

Hylan did research on the play before beginning work on the pro duction; however, Albee was quick to discourage any kind of research that might "tamper with [her] individuality and creativity," according to Hylan.

Hylan said that Albee also em phasized that each director should take his or her own approach to the play. Hylan took these words to

"I have never seen another production of the play. While I would like to for the sake of curiosity and

education, it's important that this production be our production," she

The idea of individualizing the oduction of plays works well in The Play About the Baby" because it involves 20-year-olds, their stories, and what developments and transformations they undergo as they enter adulthood

The play, which Hylan described as "absurdist," concerns a young couple, who, after having just had a baby, are visited by an older couple who initiate a strange turn of

Hylan mused on the irony of producing the play in a college con-

While on the one hand, a handful of 20-year-olds doing a play about how 20-year-olds are basi cally unprepared to take any sort of valid place in the real world is fairly absurd, I wanted a play that focused on young people—what their stories are, what processes they undergo in coming to adulthood," she said. "It's a useful, if potentially somewhat disheartening, I admit, meditation on where we are in are lives and where we intend to go."

While Hylan acknowledges the many challenges that she has faced along the way, she is pleased with how the process of directing the play has gone for her. Her cast is especially "intelligent and highly receptive," according to Hylan.

Although the cast only consists of four actors, it includes students from three different years: Kather-ine Sherman '09 as "Girl," Joseph Babler '10 as "Boy," Khalil LeSaldo '11 as "Man," and Christine Carletta '10 as "Woman."

"The Play About the Baby" will be performed on Friday and Saturday at 8 p.m. in Wish Theater and is open to the public. Tickets are \$1 and are available at the Smith Union Info Desk.

CONCERT

"It was an interesting space because it didn't have the same acoustics a normal concert would have. However, the sound came out just fine in my opinion," said Zach Levin '09.

Three students-Abriel Ferreira '10, Sean Weathersby '10, and Cris Hall '11-were asked to perform in the brass section of Broken Social Scene alongside two other members of the group.

"About two hours before the concert, the band taught us about seven or eight songs," she said. "I hadn't listened to the band before, and they really didn't know what songs they vere going to play in the concert, so they just taught us as much as they could. That was nerve-racking.

Nevertheless, Ferreira said she enjoyed playing with the group.

Toward the end of the concert, a minor incident occurred in which the lead singer, Kevin Drew, made a comment on stage that offended a group of Bowdoin students. Drew claimed that the students reacted violently and asked that they be removed from the concert. However, according to Bowdoin Security, the students did not behave violently and left the concert voluntarily.

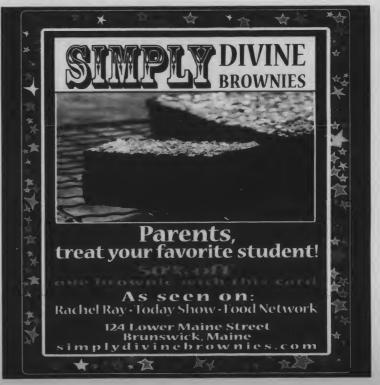

The singer's behavior affected the concert experience for several stu-

'The one thing that I didn't like was how the singer [Kevin Drew] was condescending to the crowd in a lot of ways," McCayana said.

"It's always an unsafe thing when a performer on stage uses a micro phone to engage the crowd in that way," Director of Safety and Security Randy Nichols said.

Despite the incident, Nichols was satisfied with the production.
"We were delighted with the event,

and whenever you have a rock concert, a number of incidents will take place. On other college campuses, it's not uncommon to see a number of arrests take place at a single concert," he said. "Students had a good time for the most part and were well-behaved"

SPORTS

Women's rugby wins, advances to NE semis

BY CHARLOTTE RYAN

With the start of the New England Rugby Football Union tournament at home, the Polar Bears stepped up big to come away with their ninth win of the season against Williams, 25-0.

"This was the best we've seen them play yet in terms of cohesive teamwork. They played up to a new level of teamwork support, defense, and communication," Coach Mary-Beth Mathews said.

The team scored in the first 10 minutes off of a broken play. There was a mishandling error and Anna Nicol '11 retrieved the ball off a bounce and passed it off to Maria Koenigs '09, who ran the ball all the way around the back, down the side-line, and into the end zone.

Williams put Bowdoin on the defense for the next part of the game. The women played patient defense and relieved the pressure with good tackles and good kicks from Becky Stevens '11, Nicol, and Koenigs.

To make the score 10-0, Carolyn Levin '11, the fullback, came crashing through the back line and took a pass from Koenigs to split the defense, which allowed her to score the second try.

Toward the end of the first half Nicol took a pass from Stevens and outran the opponent to make the score 15-0. Stevens then made a leftfoot conversion bringing the score to 17-0 before the end of the first half.

"[We] started out a little flat, almost half a step off in the second half, but quickly gained [our] presence back," Mathews said. Bowdoin took advantage of a Williams penalty and Stevens converted the kick, making the score 20-0.

The last try was scored off "a good series of maintaining possession through several phases of play on a break from Stevens," Mathews said. The ball was then passed out to Lizbeth Lopez '09 who, with good footwork, passed the ball off to Danielle Carniaux '10, who made the final score of 25-9.

"Throughout the game we capitalized on the fact that our back line was stronger than theirs and found success in getting the ball out to them," co-captain Hannah Wadsworth '09 said.

Mathews said both Lopez and Catherine Jager '09 covered the field well, made solid tackles, and got involved in the offense.

"Our fullback and wings did a great job of fielding and kicking balls, and our pack battled hard and held their own against a pack that out-weighed us by about 30 pounds per person," Wadsworth said.

The teamwork for this game improved dramatically, Mathews thought.

"The backs and forwards meshed really well to play a total game of rugby," she said.

Bowdoin will be hosting the final four of the New England Championships for Division II and will play University of Vermont on Saturday at 1 p.m. UVM has only lost one game this season

game this season.

"I know that if we play our game, make our tackles, and take care of our passes, we can take anything they give us and dish even more back out to them," Wadsworth said.

Field hockey takes back No. 1

BY KATHERINE POKRASS

Silencing all the rumors of being overrated and regaining their spot at the top of the national rankings, the women of the field hockey team trounced the Colby Mules last Saturday by the score of 8-1.

Senior co-captains Lindsay McNamara and Julia King only needed 90 seconds to quiet the crowd in Waterville, Maine. King smashed a ball from the top of the circle and McNamara, was positioned at the goalmouth for the tip behind Mules net-minder, Liz Fontaine.

Making the day miserable for Fontaine, the Polar Bear offense never showed any signs of mercy and sailed seven more shots past her during the course of the game

McNamara pocketed three more goals and an assist, bringing her points total for the game to nine. King also put up a multi-point performance with a goal and another assist.

Madeleine McQueeney '09 and Shavonne Lord '10 would also add their names to the score sheet as Mc-Queeney earned one goal and Lord netted two.

"Our team was able to convert intensity and a good week of practice into goals on Saturday against Colby. We worked on finishing all week prior to the game, and it definitely paid off," said Emileigh Mercer '09.

The final game of the regular season for the Polar Bears is today against the Tufts Jumbos under the lights of Ryan Field at 5 p.m. With a victory, Bowdoin

will earn the right to host the NESCAC championships.

Tufts is currently No. 1 in the NES-CAC standings and is the conference's only undefeated team.

The Jumbos have a potent offense that has out scored its opponents 59-10 this season. Their defense is just as strong, allowing an average of 5.6 shots per game.

The Polar Bears will have to keep an eye on Tamara Brown of the Jumbos. Brown has tallied 18 goals and two assists this season. The only NESCAC player to score more goals than Brown is McNamara with 25.

"Tufts will be our biggest challenge of the season to date," Mercer said. "From a disciplined defense to a productive offense, it will take an entire team effort to beat them."

Men's soccer to battle Tufts today

BY EREN MUNIR

Students and parents alike, clear your schedule this weekend. After all the turmoil in the 2008 men's soccer season, the team could have home field advantage in the NES-CAC playoffs. Maybe.

The Polar Bears are in a critical situation. If they manage to beat Tufts this afternoon here in Brunswick, fourth place or better and home-field advantage for the first round of the playoffs will fall into their hands.

If the men lose, they will almost definitely be sent packing to either Middlebury (who are the defending national champions) or Trinity. It's hard to imagine the last time the last game of the season had this much significance for the men's soccer team.

The Bears have a 4-1 record at home, compared to their 2-5 record on the road.

"The NESCAC conference has never been as wide open as it is now,

we need to win to stay alive," Chris Hickey '09 said.

Unfortunately, the Polar Bears enter this final weekend on the heels of a deflating span of back to back losses.

Head Coach Fran O'Leary will undoubtedly be looking to make a couple of changes to find the right formula, before the post season kicks off on Sunday afternoon.

Bowdoin suffered through a humiliating weekend with back-to-back losses to Colby and Babson last Saturday and Sunday.

The 3-1 loss to the Mules marked the first time Bowdoin has lost to its NESCAC arch nemesis since 1996, ending a span of 11 consecutive wins for the Bears.

Bowdoin was unable to convert on a 17-11 shot advantage.

"It was tough from the very beginning because we got ourselves in a 0-2 hole early. We did a good job trying to bring it back but ultimately we just didn't have enough time," co-captain Dominic Fitzpatrick '09 said. Ben Denton-Schneider '11 scored the lone goal for the Polar Bears off an assist from Eddie Jones '12.

Bowdoin returned home tired and with only a couple of hours to rest up before they left for Boston early Sunday morning to square off against a tough Babson team.

Sunday's 2-1 loss was competitive from whistle to whistle, but again, Bowdoin was unable reap the benefits of a distinct shot advantage. Jones, the bright spot in an otherwise gloomy weekend for the Polar Bears, scored the lone goal off a perfect through ball from David Shaeffer '11.

Throughout the 48-hour, twogame losing streak, the Polar Bears were only able to score two goals from 28 shots while opponents managed to make five goals off of 18

The Bears will need to figure this discrepancy out and improve on it if they want to make a strong push in the playoffs. The Bears kick off the crucial home game against Tufts at 2 p.m. today.

Football beats Cardinals 17-10, prepares for Bates

BY JEREMY BERNFELD

Buoyed by the NESCAC Offensive Player of the Week and three forced turnovers by its defensive unit, the Bowdoin Football Team won its second game of the season at Wesleyan on the road.

The 17-10 victory put the Polar Bears (2-4) in a position to finish. 500 and gives the team momentum heading into two tough games against rivals Bates and Colby that will decide the Colby-Bates-Bowdoin (CBB) Championship.

Junior Oliver Kell was superb at quarterback for the Polar Bears, amassing 342 of the team's 392 yards of total offense and winning Offensive Player of the Week for the second time in his career.

Kell rushed 30 times on Saturday and ran for 113 yards, both school records. He also ran for a touchdown and threw the winning score to senior Ian Merr

"Kell did a great job of leading the offense and making big plays when we needed them," said senior quad-captain Jack Dingess.

"He allowed us to stay in the game against Wesleyan," senior quad-captain Tim Kelheher said, "and then eventually picked the team up and scored the winning touchdown. It's great when you can look to a player to help pull out a victory in a close game like that."

The first half of the game was a defensive battle, and the defense was strong throughout the game to help secure the Bowdoin win.

"The defense played really well all game and kept us in it when our offense was struggling to finish drives in the first half," said senior quad-captain Gus Spaulding.

Bowdoin jumped out to a quick 3-0 lead after a 23-yard field goal by senior Nolan McNair. After keeping the Cardinals scoreless in the rest of the first quarter, linebacker Tyler Tennant '09 and defensive back Chris Martin '12 stopped a fake field goal attempt from the three-yard line early in the second quarter to preserve the Polar Bear lead.

With four minutes left in the first half, Wesleyan took the ball on its own 10-yard line and hoped to drive down the field to take the lead into the locker room at halftime. Instead, Bowdoin linebacker Damon Hall-Jones '09 intercepted a pass to swing the momentum toward the Polar Bears once again.

"Our defense played great as a unit all game," Dingess said, "but the performance of Hall-Jones was outstanding. His interception really turned the tide of the game."

tide of the game."

After Wesleyan tied the game on a 22-yard field goal in the third quarter, Bowdoin exploded for two touchdowns in the fourth. Kell hit Merry for a 19-yard touchdown with 13 minutes left in the game, but the

Cardinals tied the score again on the ensuing possession.

Never losing faith, Kell saved the day for the Polar Bears and ran in a 5-yard touchdown with under two minutes to play to put Bowdoin up for good.

"Kell had a very good performance," Head Coach Dave Caputi said, "and it was a great team win. We did some good things with the kicking game and defensively we played very well."

Defensively, sophomore Kevin Zikaris led the team with 11 tackles. Hall-Jones had nine stops and an interception, and Matt Leotti '10 and Tennant both had interceptions to stop Cardinal drives.

Tomorrow, the Polar Bears will take on rival Bates in their first leg of the CBB Championship. Bates beat Colby last weekend 31-21, in a turnoverfilled game, to open the CBB. Bowdoin hopes to put itself in the driver's seat with a win Saturday.

"Bates has a very opportunistic de-

weekend lineup against Middlebury on Friday and Williams and Hamilton fense and a 'wear-them-down type' offense," Kelleher said. "By making sure that our offense plays error-free football and our defense stays focused throughout the whole game, we will have the chance to beat Bates and setup a showdown with Colby for 'the CBB Championship."

Bowdoin hopes to duplicate the success it had against Wesleyan on Saturday

"We have to win the turnover battle and limit explosive plays," Caputi said. "They are a lot like us—a young, maturing team, and we have to do the things we did last week if we're going to win."

Make no mistake, the Polar Bears are gunning for the CBB title and a .500 finish for the season.

"The CBB means a lot, especially to the older guys on the team who have won it two years in a row," Spaulding said.

The Bears kick off against Bates at 12:30 p.m. Saturday at Whittier Field.

Volleyball upsets Endicott but goes 1-2 in weekend tourney

BY KERRY D'AGOSTINO

After coming in seventh with mixed results at last weekend's Hall of Fame Tournament, women's volleyball came back on Wednesday to sweep Endicott after having lost to the Gulls twice earlier in the season.

On Wednesday, hopes were high as Bowdoin worked toward turning the table on Endicott at long last. More than mere vindication seemed to rest on the outcome of the game.

"Thus far, we haven't really won a game where we were definitely the underdog, and we keep talking about wanting to pull a great upset to prove the kind of team we are," Gina Lonati '12 said prior to the game. "At Endicott, we want to finally put that talk into action and jake tough."

we want to finally put that talk into action and play tough."
"We want to let our play speak for our team, and not just talk about pulling the upsets," she added.

After their victorious set scores of 25-16, 25-19, and 25-16, no one can accuse Lonati or her teammates of their actions not speaking as loud as their words.

This time, their actions and their

skills were heard loud and clear as they not only cruised past the Gulls to victory, but in doing so posted an impressive 16 overall aces against them.

Gillian Page '10 led with six of these aces as well as eight kills and eight digs. Stephanie Drumright '11 also contributed eight kills, while Skye Lawrence '10 made only one error out of 24 total swings that resulted in an additional nine kills for the team. Jenna Diggs '10 supported the offensive front with 22 aceists

Bowdoin opened the Hall of Fame Tournament on Friday on a less positive note after being defeated by Springfield,

After losing the first two sets 25-14 and 25-14, the Polar Bears made a brief resurgence in the third set with a score of 23-25, but lost their edge in a 25-12 fourth and final set. Page again led the offense with 12 kills, while Lawrence, Drumright, and Kelsey Howe '10 each added six. Defensively, Anna Noucas '11 established a new team-high with her 18 digs.

After a 3-0 loss to Brandeis on Saturday morning, things were not looking much brighter.

Lawrence, Page, and Diggs were again effective with a respective eight kills, seven kills, and 19 assists, but the team failed to overcome set scores 25-19, 25-13, and 25-22.

The final match of the tournament against Smith began in promising fashion, with the first two sets awarded to Bowdoin at 25-16 and 28-26.

A surprising third set of 7-25 upset the Polar Bears' path to victory, but only briefly. They returned in a definitive fourth match to overcome Smith at 25-20.

Kristin Hanczor '12 took the lead for the Bears with 12 kills and five blocks, while Page posted a respectable 11 kills and 16 digs.

Drumright also contributed seven kills and six aces off of Diggs' total of 35 assists.

Lawrence made short of Noucas' 18 dig team-high against Springfield by launching a new one at 19 digs.

Page was named to the All-Tournament Team after achieving the greatest number of kills for the Bears over the weekend.

"Going in, we were very pumped and prepared, but the outcome was not

what we were hoping for," Lonati said.

"Despite the one win, our team definitely was not satisfied at the end."

on Saturday has potential for the Pola Bears.

With a conference record of 3-4 and

nitely was not satisfied at the end."

Having learned from the matches against Springfield and Brandeis and armed with the same attitude that finally brought Endicott to its knees, the

This weekend will determine how women's volleyball precedes in the season-closing championships.

Nick Livesay '98

Dear Bowdoin Students:

If you are registered to vote in Brunswick, I encourage you to learn about the candidates running for state and local office and to become involved in the community. As someone who was born and raised in Brunswick and then attended Bowdoin, I know first hand that the College campus often feels separate from the rest of the Town. The decisions made by the Town Council, however, affect Brunswick as whole, including Bowdoin, and have the potential to influence the college experience of both current and future students.

Brunswick Town Council - At Large

I invite you to visit my website to learn more about me and to see a sampling of the people from the Town and the Bowdoin community who support my candidacy. Thank you for your consideration.

- Nick

A Band of Brothers

JEREMY IS BERNING BY JEREMY BERNFELD

I'm not much of a crier, but the tears certainly have been flowing lately.

There comes a time in every athlete's life when he (or she, because admittedly 99 percent of the female athletes at this school are more athletic than me and could beat me in a fight) realizes that it's over and that his life will never, ever be the same again.

The pain of defeat and the joy of winning will be trumped by the pain in my back and the joy of sleeping in. Payday will be more important than game day and teamwork will exist only in a corny motivational poster on my boss's office wall.

I'm hanging up the cleats and turning in my jersey: the Bowdoin Men's Rugby Team played its final game two weekends ago. I'm as shell-shocked and in denial as I was when the Devil-less Rays vanquished my beloved Sox, and I'm sure I won't recover any time soon.

In sports, the best teammates are always the first ones to get to practice and the last ones to leave. But in college you don't just play with your teammates, you often live with them.

I've eaten hundreds of meals with teammates. I've partied with them dozens of times. We've played close to 40 games and been to over 100 practices. I've gone on road trips and bus rides, had all-nighters and sleepovers, been on field trips and movie nights. I know who will have my back in a fight, and who would give it a little massage too.

Absence may make the heart grow fonder of a loved one, but I'm pretty sure sweat, blood, and tears make the heart adore its teammates. I can remember every disagreement, every fight, every time I wished they'd just shut up and let me play, but I wouldn't trade any of them for the world. Maybe, just maybe, I would cash all of those memories in for one more game with them, but not for much else.

Some of us spent four years together. We've grown from scared little first years to strong and confident seniors. We've learned from our coaches, our opponents, ourselves, and each other. We've pushed ourselves to the limit because we knew that the guy next to us deserved nothing but our full effort. We've supported each other in good times and bad and we've seen the highs and the lows of college life.

I was lucky enough to be at the New Garden for the first game of the 08-09 NBA season when the New Big Three and friends raised a 17th banner to the rafters as the reigning world champions. We stood and cheered as the captain, Paul Pierce, took the Larry O'Brien trophy and raised it toward the ceiling in triumph—tears streaming down his face.

Obviously it was an incredible moment for Celtics fans—years of fidelity to terrible teams finally paid off, a franchise had been restored to former glory, and beloved superstars had finally added the final piece to hall of fame type résumés—but for fans of sport as well. Pierce cried, just as I did, because he knew that the team reached a higher level than he could have by himself.

College is a time for exploration. I'm grateful to Bowdoin for allowing me to grow in so many ways, and for supporting me in becoming the person I am today.

Although I may not yet be done, I've matured into an adult and learned about the world. But perhaps I'm most grateful for the school because it let me hold onto the most fundamental of passions: the bond between people working together toward a common goal and giving more from themselves than they have ever given before.

It's hard to describe how I felt as

It's hard to describe how I felt as I left the field after the final whistle of my final game blew.

It's impossible to sum up the emotions that were tearing my body apart in a race to reach my mouth first: sadness at the end of an era, gratitude to teammates, fear of the future, appreciation for all that the team has given me over four years.

I couldn't find the words to express my conflicted brain, but I don't think words were necessary.

I just stared out onto the field as my best friends were collecting pieces of themselves that they had strewn about over four years, and Levied

WHAT CAN BROWN DO FOR YOU? Junior defender Larkin Brown attempts to steal the ball from a Colby opponent in the Bears' 4-0 win.

Women's soccer dominates Mules

BY AILEEN TSCHIDERER STAFF WRITER

Molly Duffy '11 led a scoring frenzy as the women's soccer team came out strong last Saturday, crushing NESCAC rival Colby 4-0.

With this win, the Polar Bears improved their record to 7-3-3 on the season, 4-2-2 in the NESCAC. Bowdoin is currently ranked No. 4 in the NESCAC.

Saturday's win against Colby also improved Bowdoin's record against the Mules to 35-0-3 since 1979.

The game was marked not only by a high number of goals on behalf of the Polar Bears but, also a fresh set of contributors to the scoreboard.

Junior Dana Riker started off the goal scoring for Bowdoin as she connected late in the first half. It was her fourth goal of the sea-

Entering the second half with

the score 1-0 in favor of the Bears, the game could have been anybody's, but the Bowdoin women sent a definite message: This game belonged to the Polar Bears.

Duffy scored the first goal of the second half and the first of her season barely five minutes into the second half. Her unassisted shot upped the women's lead to 2-0.

The ensuing majority of the half was well fought by both squads, yet Colby could do nothing to chip away at the solid Bowdoin lead. Duffy, assisted by Kit Hamely '10, struck again, this time in the last five minutes.

"On her second goal off of a cross she had a really good run into the box," Christina Aceto '11 said. "It was great. It was just a great game for her."

"She had a lot of confidence going into the game," Aceto added.

Despite a solid 3-0 lead, the Polar Bears did not relent and in the waning minutes of the game first year Celeste Swain scored the fourth and final goal, assisted by the unyielding Duffy.

In addition, keeper Kelly Thomas '09 earned her sixth shut out of the year.

"We had a really good week in

"We had a really good week in practice leading up to the Colby game," Aceto said. "[In the game] we were possessing the ball really well, changing the point of attack, and we had a lot of quality chances."

The final regular season game for the women will be this Friday against Tufts at Pickard Field at 2 p.m. A win for the Polar Bears is critical.

Bowdoin is currently No. 4, with Trinity and Tufts in the Nos. 5 and 6 spots, respectively. Trinity will take on Amherst, who currently stand in second.

If Trinity loses, then the Jumbos and Polar Bears will face each other again in the first round of the playoffs. The winning team will have home-field advantage.

Takata, Hatch lead Bears to top-10 finishes in sailing

Bowdoin finishes in sixth place at regatta on Charles River

> BY CAITLIN BEACH ORIENT STAFF

Bowdoin sailors faced some big breezes and waves this weekend, but resulting top-10 finishes in three different regattas proved that they were

up to the challenge.

Headlining the weekend performances was Alex Takata '12, who won the C-division at the Rudolph Oberg Trophy at the MIT Sailing Pavilion

Takata, sailing with Audrey Hatch '10, overcame a 30-point deficit from competition on Sunday to win the division over 16 other schools.

Northeastern University hosted the 17-boat, three-division event on the Charles River with both FIs and

Bowdoin finished sixth overall, ahead of several top-ranked teams including Yale, Boston College, and the University of Vermont.

Sophomores Viktor Bolmgren and Coco Sprague finished seventh in the A-division, while seniors Pete Wadden and Meredith Steck placed 13th in the B-division.

Takata attributed the team's success

"While sailing this regatta we knew that we didn't need to finish first in every race in order to win, so we tried to sail smart and only take risks when we really needed to," he said. "Audrey and I decided we needed to sail our own race and were able to connect several good series [of races] together in order to ultimately win our divi-

Head Coach Frank Pizzo was

pleased with the team's performance at the Oberg, regarding the weekend experience as valuable preparation for the upcoming Erwin Schell Tro-

phy.
"The results of the weekend were a great confidence booster for our unofficial New England Champion-ship-the Schell-which will take place this upcoming weekend at MIT," he said.

Elsewhere, Bowdoin competed in 420s at the Wellehan Trophy at the University of Southern Maine in Portland. The team of Jane Koopman '10, Charlotte Ryan '12, Katherine McNeil '12, Leah Hughes '11, and DJ Hatch '11 finished ninth out of a fleet

"At the Wellehan, the team struggled in the heavy current but in proved throughout the weekend," said Pizzo.

The Polar Bears also sent a squad of sailors to the Central Series Six regatta at Boston College.

The team faced heavy breezes upwards of 20 knots in Boston Harbor, but was able to notch a mid-fleet finish, placing ninth out of 18 teams over the course of the two-day event.

. Sailing is now gearing up for two key end-of-season regattas this week-end: the co-ed Schell Trophy at MIT and the women's 43rd Annual Victo-rian Coffee Urn regatta at Harvard. The team looks to earn berths to

the upcoming Atlantic Coast Championships (ACC) through competition at these events.

A squad of first years, including Takata, will travel to the Nickerson Trophy at Massachusetts Maritime ny, where they will seek to qualify for the Freshman ACC Inter-

OPINION

BOWDOIN ORIENT

Thank you

ver the summer, the cost of one year at Bowdoin surpassed the median household income in the United States. This staggering statistic makes apparent what many of us already understand: sending a child to college is a huge sacrifice.

Yet here we are-and most of us have our families to thank.

There are a number of ways to understand where our tuition goes. Although the \$50,920 average cost of attendance is made up of a number of different components, most of us don't think in such fragmented terms. Instead, we tend to understand tuition as the cost of an entire experience. On one end, people understand tuition as the price tag of a Bowdoin diploma—something that will grant access to opportunities in the future. At the other end, Bowdoin's tuition can be thought to fund four years of a rich learning and growing experience. No matter where students and their parents fall on this spectrum, one thing is clear: These years at Bowdoin will change us forever.

The cost of Bowdoin is steep, and it would not make sense to pay for it simply for a monetary return. If families saw college solely as a financial investment, it may have been more logical to send their child to another college that was cheaper or paid for by merit-based scholarship. However, those who are paying for Bowdoin must believe that students here are gaining more than an impressive addition to a resume.

Higher education is a privilege, and one like Bowdoin's is an extraordinary privilege. Although personal accomplishments in high school may have earned us admission to the College, most of us have more than ourselves to thank for being here. Besides just helping to foot the bill, many of our families provide incredible moral support for our academic and extracurricular pursuits.

During our time at college, we're not necessarily contributing much to the larger society. We don't always have much to show for ourselves. We may find it difficult to explain, or even to understand, the importance of our passions, academic and otherwise. Yet, many of our families have faith that what we're doing here is worthwhile. They give us room to explore, even when our destination is unclear. What's more, they don't expect anything in return.

So, thank you, to our families, for seeing the value in giving us four years of space to explore and to learn.

I FTTERS TO THE EDITOR

Editorial endorsement ineffective, misplaced

To the Editors:

Last week's editorial ("President Obama," October 24) was ineffective because the reasons listed why we should vote for Obama are relatively minor considerations on the national agenda. A tax credit for students, more ace Corps and Americorps positions, and more "green jobs" are great initiatives, but in my opinion not as important as our agenda in the Middle East and around the world, the economic crisis, how we are going to deal with environmental degradation, national educational reform, health care, eliminating hunger, and more. Those are the issues that influence my vote, not whether or not Obama is going to make life slightly easier for college stu-

The editorial was also inappropriate because it did not give information about the candidates who will directly affect the Bowdoin community while it encouraged us to vote for those candidates. Voting in Brunswick is an important right we have, but it also carries with it an important responsibility: truly understanding local politics. We already have enough information about Obama and McCain; they've been on the headlines daily for months now. What about the Brunswick Town Council and the representatives that we will send to Augusta? Which candidates will have a positive influence on Bowdoin students and the Brunswick community? Those are the candidates that should be endorsed by a college paper, not national ones.

Sincerely, Ian Yaffe '09

Student vote counts, know local candidates

As a retired couple who has chosen to live in Brunswick, we are pleased that Bowdoin College students are taking a oughtful look at candidates for town offices. We refer to your editorial ("Voter registration," September 26) where you say that "it is important to recognize that our votes will impact Maine's lifelong voters."

Furthermore, in ("Bowdoin vote may determine local elections," October 24), Anya Cohen specifically reminds students that their votes will be significant in electing local candidates to Town Council and School Board. This is true. We applaud your in-

In District #7, where many of the college community lives, there are two contested races in which we are participating. Issues such as planning for the resuse of the air base and the development of Maine Street Station will greatly impact Bowdoin. We believe that our years of recognized community service in a college town in Pennsylvania will help us render quality service in the offices we seek.

We encourage students to registe consider candidates' qualifications, and vote.

Richard E. Visser and Carol E.

Candidates for District #7 Town Council and School Board Brunswick, Maine

Clarifications sought for ordinance article

To the Editors:

I offer two corrections to the article on the "disorderly house" ordinance that recently passed the Brunswick Town Council

The article claimed that the unsuccessful efforts of my neighbors and I to limit the number of students living together off-campus "would have quali-fied 17 Cleaveland Street as a boarding house and placed it in violation of District TR2's zoning laws." In fact, we believe that 17 Cleaveland Street is already operating as a boarding hous in violation of the Town's zoning ordinance. We have challenged the Town's reluctance to enforce the ordinance; that matter is currently in litigation.

The effort to limit large groups of students from living together off campus was intended to prevent other Brunswick residents from being surprised by similar changes to eighborhoods. If enacted, this would have no effect on whether 17 Cleaveland Street is determined to be a boarding house.

I also object to the words put into my mouth by the Orient reporter.

After more than a year of refusing to denigrate the student residents of 17 Cleaveland, it is unlikely I would do so now. I did not say that the class of '08 residents had been "rowdy" and "often disruptive" [words used in a para-phrase by the reporter], and I would like that noted.

Sincerely. Associate Professor of Film Studies

Endowment dialogue deserves student voice

To the Editors:

Mr. Pope's argument in last week's paper ("Endowment decisions should not be guided by student input," October 24) that students should be excluded from endowment decision suffers from two flaws in reasoning. First, Pope relies on the false prem ise that "current students are unlikely to feel the effects of any impact they might have on returns on the en-dowment's investment." As donors, many alumni have a strong interest in Bowdoin's financial (and dare I say moral) position regardless of whether they personally reap material benefits

from their donations.

Mr. Pope is also mistaken in suggesting that concern for such "pet political projects" as ending genocide is sufficient to disqualify students from having any involvement in the endowment. Is it so inconceivable that students could simultaneously care deeply about human rights and Bowdoin's financial well-being? In 2006, President Mills appointed an Advisory Committee on Darfur that involved students in the discussion of Bowdoin's investment policy, and issued a statement supporting a number of its recommendations. Did he allow Bowdoin's endowment to "fall victim to a few sententious charlatans"?

I am not suggesting that Bowdoin replace its highly talented and experienced chair and vice president for investments with a couple of idealistic first-years, but to deny students any role in the discussion seems almost as extreme. The Orient is right in advocating continued student engagement in an issue that will affect them far beyond their four years at Bowdoin.

Sincerely, David Aron '05

Broken Social Scene's behavior inappropriate

To the Editors:

Broken Social Scene seemed intent on breaking up the good vibes that flow naturally on a Saturday night at Bowdoin. As much as we like BSS's music they acted like a bunch of neurotic crybabies. Their continued insistence that they were being paid with our parent's money was not only untrue considering the 40% of stu-dents on financial aid and numerous townies who paid good money to get in, but also irrelevant to the fact that WBOR paid them to sing, not whine.

Similarly, their unenthusiasm for crowd-surfing (simply for the sake of the lead singer's teeth) made us won-der if BSS was truly here for a rock show, or more interested in lecturing us on behavior. Things only got worse when BSS sent their thug into the crowd to remove a Bowdoin student that smelled bad and had a creative vocabulary, and then proceded to call out Bowdoin Security for not being there to support the whims of an angry, nicotine-withdrawn ego. If there is one thing that Bowdoin students agree on it is that Bowdoin Security rules. While a short break seemed to cool off the band and led to an enjoyable finish to the set, in the future we suggest that at such times the best course of action may be for Security to forcibly remove such haughty mu-sicians and send them off in a whambulance to get their french cries with gravy back in Canada. Let's hear it for rock and roll!

Sincerely, Scot McFarlane '09 Luke Fairbanks '09

DISPLECT MITTH US.

Simpler process, stronger parties could increase voter turnout

BY MICHAEL FRANZ

I want to make a prediction. Barack Obama is going to win the presidency next Tuesday. Hardly earth-shattering, of course, but I'd like to make a very precise forecast on the number of Electoral Votes Obama will win. I'll say more on that below.

The prediction is more of a sideshow in this op-ed, though. As we prepare to head to the polls on Tuesday, my thoughts turn to voter registration and turnout. Policy-makers and activists have spent years trying to design methods of voting that enhance turnout. It's appalling that turnout in the United States is so low-lower than most industrialized countries. Much of the answer from the policy world, however, has been about easing registration require ments. We can now register at the DMV when renewing our driving license, and many states-such as Maine-allow voter registration on Election Day. The media's coverage of early voting this year is another example of an attempt to ease the burden on voters.

I think this is all fantastic, and there is good empirical evidence to suggest that eased registration requirements enhance turnout. On the other hand, such evidence is not overwhelming. Turnout has not sky-rocketed in the 15 years since we passed the Motor Voter Bill (50 percent of voting-age adults cast a ballot in 1988, and 51.3 percent did so in 2000. Some estimate turnout next week to be between 60-65 percent (a very high number), but that still means 35-40 percent of voters will stay home.

Perhaps the answer for turnout lies in how we approach representative democracy. Two changes would go far in enhancing turnout. The first is a scaling back in our democratic choices. We simply vote on too many things. Just look at Maine this year. We have vote on two important ballot referendums, which are very complicated. One is a People's Veto on the beer, wine, and soda tax. The other is a Citizen's Initiative for a casino in Oxford County. There is also a third question on a bond to support drinking water programs. More still, we are asked to vote for candidates in a variety of county and town positions, many of which nothing about. Some have called this hyper-democracy, and I agree. The problem is worse in other states. Colorado has 14

ballot questions; California and

I would push for an end to most if not all referendums in local and state elections, and I would consider seriously whether certain local and state offices are better served as appointed positions. Too often, citizens either skip voting altogether or skip voting for certain races (or ballot questions) because the informational needs for good decisions are too high. Less democracy is obviously controversial, but a simplified process should enhance voter interest.

Second, I would strengthen the Democratic and Republican parties. I know parties are often considered the boogeymen of American politics. If we changed campaign finance rules to enhance party organizations, however, I think we might see turnout go up. For example, we could provide free air time to the state and national Democratic and Republican parties. The airtime would be optional, and not take the place of purchased advertising, but the requirement on using the air time would be a discussion of the party's platform or agenda for the next two years. We could also mandate that the broadcasts feature the candidates

for statewide and national office, all in the same place at the same time. Finally, we could change the rules to allow parties and candidates to cooperate on fund-raising and messaging without expenditure limits (as currently exist).

The result might be a better sense that elections are about two teams, and less about the individual candidates. American politics has moved away from the idea that elections are about a choice between two broad ideologies, and candidates have often avoided their own party's label in running for office.

My recommendations are premised on the notion that democracy is enhanced when the choices are simpler. Ask yourself that when you get in the voting booth next week. Do I really know what Judge of Probate does? What are the consequences of the bond issue? Which candidates believe in their parties' general philosophy, and which are "mavericks"? The less we know, and the more that is asked of us, the more likely we'll choose to skip the process.

And now, back to my forecast. Using a model developed by others, and for presidential elections between 1948 and 2004, I estimat"Which candidates believe in their parties' general philosophy, and which are 'mavericks'? The less we know, and the more that is asked of us, the more likely we'll chosse to skip the process."

ed the relationship between the election outcome and the popularity of the incumbent president and the state of the national economy in the summer of the election year. The model predicts Barack Obama will win 393 Electoral Votes and 55 percent of the popular vote. These numbers seem a bit high, but not outside the realm of possibility. Furthermore, the results are based on Bush's popularity and the state of the economy in July of this year—an extremely simplified model.

If the numbers are right, or even close, that would imply that all of the excitement of the fall campaign (the conventions, the debates, the vice presidential selections, SNL skits, and the economic bailout) hardly mattered in influencing the outcome of the election.

Michael Franz is an assistant professor in the government department.

Obama 'deserves our support for president'

BY EAMONN HART

On February 10, 2007, Barack Obama announced his candidacy for president. On April 25th of the same year, John McCain followed suit. It has now been 20 and 18 months, respectively, since these announcements were made, and next Tuesday, America will make a decision.

The questions at stake are not trivial. Will we step forward and embrace the future with modern, forward-thinking government, or will we cling to a 20th-century philosophy of politics whose time is over? If we are to take on the great challenges, fight the hard battles, and look forward and not backward, the choice is clear: Barack Obama deserves our support for president.

Throughout the campaign, Obama has demonstrated his understanding of the critical issues of our time. From advocating for a middle-class tax cut to reignite the economy, to pushing for stricter scrutiny of culture of excess on Wall Street that has led us to the brink of economic disaster, to promoting a responsible plan to exit Iraq and shore up our security. Obama has shown leadership. When he ran for Senate, he strongly argued against the invasion of Iraq. The position was unpopular at the time, but history has proven his judgment and foresight to be

Obama's understanding of the middle and working classes as being the engine of economic growth in our society is not grounded only in academic knowledge (although no one would dispute Obama's credentials there) but in his personal experiences growing up in a middle-class, single-parent home, working as a community organizer in poor areas of Chicago, and striving to live the American dream.

The policies Obama advocates are forward thinking and comprehensive, rather than regressive and reactive. Consider his energy poli"John McCain and our current president, whatever subtle differences may exist, share the same governing philosophy that has failed America in the past and will continue to do so as long as its followers hold power."

cies. Obama recognizes the need for broad goals. His plan includes drilling, to be sure, but also involves expansion of wind, solar, hydroelectric, and other power sources. Additionally, it features investments in private-sector development of green technologies, which will reduce America's dependence on foreign oil (a necessity in a time of global tension) and create jobs at home that are sorely needed to shore up today's economy.

The Republican response of "Drill baby, drill" is simply not an effective and sustainable plan to secure our energy future. It is a 20th-century mindset, and the country needs a 21st-century energy policy. If campaigns reflect governing strategy, the differences are telling. Obama's campaign has been well organized, inclusive, and, innovative, while McCain's has been disorganized and reactionary. Most Americans would agree that the former traits are preferable when it comes to government.

John McCain has served his country admirably. No one questions his wartime dedication to America or disrespects the sacrifices he made. On the critical issues of our time, however, McCain's positions are flawed. He has tried to run a campaign based on frightening Americans with the prospect of "big government" when the American people know that it is not "big government" which is the problem.

Rather, the problem is a lack of "good government." We need a government that puts money back in the hands of the middle-class taxpayers who earned it, not in the 'hands of large corporations that donate to political campaigns. We need a government that is responsive to crises, both immediate and long term. Hurricane Katrina and the federal response to it demonstrated with tragic clarity the need for effective government not run by those with friends in high places, but by qualified individuals committed to public service. The modern Republican Party has demonstrated only a desire to squash government, not a plan to make it better.

We need a change of thinking in Washington. We need an Obama presidency, and we need to give him a functional majority in the House and Senate in order to achieve a better future. We need to support candidates like Tom Allen and Chellie Pingree, who have served Maine with distinction in the past and are ready to do it again. At this moment in history, it is the Democrats who have the right philosophy to lead America Groward.

While both parties have grand historical traditions, the sad reality of our time is that the contemporary Republican Party is not the party of Lincoln, but rather, the party of Bush. John McCain and our current president, whatever subtle differences may exist, share the same governing philosophy that has failed America in the past and will continue to do so as long is its followers hold power.

The choice is clear, and on November 4, we have the opportunity to demonstrate loudly and clearly we must return to government of the people, by the people, and for the people. As Obama put it, "This is our time." Remember to vote on Tuesday.

Eamonn Hart '09 is a co-communications director for the Bowdoin College Democrats.

Democrats and Republicans alike deserve blame for economic crisis

BY PATRICK RAEL

According to a recent Opinion piece in the Orient ("Economic crisis rooted in liberal legislation," October 24), blame for the current fiscal crisis can be laid at the feet of Democrats, who by loosening Pannie and Freddie's lending standards "forced banks to make decisions against their own best interests."

Let me see if I have it right: A concern for helping Americans (perhaps even unthrifty poor ones?) own a piece of the American dream is really to blame for our current economic debacle. Market titans and laissez faire ideologues had their arms brutally twisted by a federal regulations regime, which forced them to jettison self-interest to pursue some kind of dubious experiment in social engineering.

The truth is that mortgage companies willingly and enthusiastically embraced—and indeed lobbied for—loose mortgage standards in pursuit of more and faster profits. Conservative Fed and Treasury officials generally blessed them. The notion that the mortgage industry found itself compelled to act against its own wisdom is simply ludicrous. People who have that much control of government know how to protect themselves with it.

It is true that Democrats politicized Fannie and Freddie in ways that, when combined with many other factors, created this crisis. In doing so, they appropriated the ethos of corporate profit mongering at the heart of Republican efforts to de-regulate the financial markets over the last quarter-century, seeking to adapt it to their broad-based constituency. Shame on them.

But those interested in the policy sources of the crisis could just as easily look toward quintessential pieces of Reagan-era deregulation, such as the Garn-St. Germain Depository Institutions Act of 1982, whose unbridling of the savings and loan industry led to a huge crisis in late 1980s and the eco-

nomic recession of 1990-91. More recently, we should consider the Gramm-Leach-Biliey Act of 1999. This law, introduced by Republican Senator Phil Gramm (R-TX) and Representative James Leach (R-IA) in 1999, revoked New Deal protections by permitting new and unregulated forms of trading. Such measures were not inflicted on the finance industry, but actually written by their lobbyists—the same folks who brought you the securitization of bad mortgages, blatantly fraudulent accounting practices, unregulated derivatives trading, and the other vices that have led us to this point.

The point is not to lay the blame for the fiscal crisis at the feet of either party, for there is blame aplenty-and a useful lesson-for all. Both Democrats and Republicans have been shamefully beholden to corporate interests who have rolled back inconvenient regulation designed to protect average investors from a system that will not protect them on its own. But the philosophy that underlay these efforts-that markets work best when self-regulated-is a conservative article of faith that similar historical crises have repeatedly and blatantly exposed as fallacious. How many lessons do we need?

All markets need regulation. All markets are regulated. The critical question is, who benefits by the rule-sets imposed on markets through the political process? Those who already have, who have seen their incomes and wealth skyrocket through recent decades? Or the vast middle and bottom, who have paid for this affluence with declining real wages and an ever-widening wealth gap? In short, who is the system for?

Now, when that system is in crisis, is the perfect time to assess the causes of crisis—not to lay blame, but to rethink our priorities about whom government should serve.

Patrick Rael is an associate professor in the history department.

Campaign strategies differ, Obama's comes out on top

BY JOSEPH BABLER

What is this? Another Bowdoin student writing a pro-Obama piece in the hallowed op-ed pages of the Orient? Before you groan and go back to reading the security report, there are a few things you might want to consider before votting next Tuesday.

I want you to forget about policy or your political party for a moment. Hopefully, when you step into the voting booth, you won't. But, party allegiances aside, let's consider the implications of both candidates' campaign etiquette.

In vying for our nation's highest office, surely what a candidate says or does is pertinent in revealing what their administration might look like.

Obama, so I will argue, has run a more respectful, well-organized, and decent campaign than McCain. Mc-Cain has not only waged more unfair attacks, but also demonstrated a proclivity to make decisions based on political expediency. That is not to say that Obama has remained an angel above the fray, but his missteps were fewer and of lesser consequence.

Two of McCain's largest decisions during the election were clearly made primarily to curry favor. "Aren't all decisions made in a political campaign designed to curry favor?" you might ask. Well, yes. But presenting a tax cut you think might resonate with voters and selecting a VP that is not prepared for the national stage are two different things.

Why is Sarah Palin a bad pick? Briefly, because in an interview with Katie Couric she agreed that there was an inherent right to privacy in the Constitution when discussing Roe v. Wade, which is directly in opposition to her party. She didn't even understand what her words were implying. This is not the reason she is a poor choice but a symptom of what makes her a poor choice.

Perhaps I'm an idealist, but I want my potential VP (and President) to be so familiar with the Constitution that they have their favorite amendment framed and hanging on the wall. None of this is to say she isn't exceptionally charismatic or incapable of holding the position one day.

In fact, you might reasonably argue that she spent as much time as a Governor as Obama did as a senator before deciding to run for president. The difference? Obama has been a legislator for over a decade and has been refining his political positions for years in his preparation to run for president. No amount of folksy charm can compensate for having a meticulous understanding of national and international politics, and I don't want to wait for McCain to be in office for two years before Palin is ready to get on board.

Palin was selected to make the ticket exciting. Palin was not selected for her ability to immediately step in as president. Politics won out for McCain over practicality, all to show just how much of a maverick he is.

"McCain has not only waged more unfair attacks, but also demonstrated a proclivity to make decisions based on political expediency. That is not to say that Obama has remained an angel above the fray, but his missteps were fewer and of lesser consequence."

In his second major blunder, Mc-Cain again demonstrated his penchant for panache when he suspended his campaign as the stock market tanked. It was a bold move. The economy was sinking and a congressional bailout was the biggest headline. Nevertheless, here we are, several weeks later, and the economy is still in turmoil, bailout

It was undoubtedly a daring choice, attempting to convey how seriously McCain was taking the financial crisis. But, Obama went to the same meetings and made some of the same phone calls while continuing his run for president during the legislative troubles. The decision was a dramatic reaction to the week's worries; it was not the calculated response it should have been. It's the difference between saying you can lead and leading.

Finally, several ads by the McCain campaign made unfair character assassinations on Obama: accusing Obama of calling Palin a pig, asserting that Obama voted to teach kindergartners sex education, and insinuating that Obama is in some way a terrorist sympathizer. Politics needs less maligning of character and a more rigorous debate of ideas (besides those that are typed up as talking points for the day).

Obama has not been faultless though. He reneged on his promise to use public financing; however, as Assistant Professor of Government Michael Franz pointed out last week, McCain could have also opted out of public money. Will candidates in the future be more inclined to abandon public financing?

Furthermore, Obama had his own misleading ads and botched statistics. But most often his attack ads were on policy and substance. Never once did Obama change his strategy, even as he sunk in the polls and party leaders and pundits called for a game-changer. The message was always that McCain was too much like the last eight years to fix the problems America is facing.

None of this is an attempt to completely invalidate McCain. The difference is what seems to be just another presidential candidate and a candidate that has remained collected and focused regardless of the headlines. I have no idea if Obama can maintain the level of composure he's had through the election cycle. Perhaps he's just a great campaigner. But what if it's more than that? What if his administration is as alert, poised, and responsible as his campaign has been? I'd really like to find out.

Campaign strategies differ, Obama's past with far left raises concerns

RY REN STERN

The election of a president is an unusual decision in an American's life. Most important decisions are made regarding certain interests in the hopes of achieving some certain path-who we date, what career path we take, etc. And, further, we make these decisions as an individual with a great deal of autonomy. A presidential election is different. Each person's vote is one nong millions. We have relatively little control over the outcome, and although the actual election is quickly determined, the conse uences cannot be evaluated for decades. In short, the most American behavior is also the most speculative. My gut tells me to vote one way, but as Rob Gordon famously said in High Fidelity, "My guts have shit for brains." We cannot possibly know for whom we should vote.

So, how the hell do we vote? Good question. Many Americans vote along party lines. For a one-issue voter, party loyalty works; for others, it doesn't. The Republican Party of today, which has expanded the Executive significantly and practiced a wholly anti-isolationist foreign policy, looks nothing like it did even 20 years ago. Parties change, and party loyalty ultimately has little to do with liberal or conservative ideology. So, I will first suggest that if you vote entirely along party lines, do so by accident.

Next, I will contend that "issues" are also a problematic justification for a vote. Consider Al Gore. The 2000 champion of nation building has been an outspoken critic of the largest exercise of nation building ever. Candidates, like any person, have one position among friends, another in primaries, another dur-

ing the campaign, and still another in office. Voting on the positions listed on a candidate's web site is not a great basis for deciding one's vote.

What we must do, instead, is consider what policies the candidates hold most deeply, because these will serve as the grounds for action while in office. Before a person expresses a view, unless he is terribly imprudent, he considers his audience. A person will be most candid when among friends and family. Accordingly, we ought to consider the home and social life of a candidate above all else when judging his actual beliefs.

Let's apply this rubric to the fo-cal point of this election, Barack Obama. Obama's moments of candor are notably few and far between. He considers his audience. His books leave out whole years of his life, and they have a massive audience. It is difficult to consider his books as a genuine window into the man's soul. At the University of Chicago, Obama was notorious for not taking a strong position, for he is a prudent man indeed. In Hyde Park, Obama associated with members of the far left, attending meetings, dinner parties and banquets with various problematic figures. The McCain campaign has famously said that he "pals around with terrorists." I would hardly call these incidents "palling around." For such a prudent man, we can safely assume that Obama did not sit around making Molotov Cocktails with Bill Ayers.

What we can assume, however, is that Obama has some affinity for the far left. Obama clearly did not consider these men too radical, too distasteful, or too unreasonable. Perhaps he does not think they are radical at all. His whole adult

life has been spent in the company of academics and far-left liberals (often a hazy distinction). He has sympathies for these views, which means he, at least in part, agrees with them.

We ought to consider statements about redistribution of wealth, statements about the value of making up for mistakes in Iraq, and loyalties to anti-American (Ayers, Wright) radicals quite seriously. The McCain campaign has failed miserably to show the relevance of these associations. But they are the most relevant source for judgment on Obama.

Having endured this evaluative procedure, I will offer just another voter's conclusions. Obama is not anti-American. Bill Ayers and Reverend Wright are. One can consider their ideologies without absorbing them, but sympathy for such extreme views makes less radical views seem reasonable, even true. A pro-American but still far left ideology can be bad for America, its future, and for the world. This writer's contention is that Obama, deep down, holds such views.

We could dismiss this argument if Obama had actively dissented from the out-of-touch and extreme liberalism of academia or these radical associates, but he hasn't. He is poised to become the most American president with a wholly Democratic Congress. A serious evaluation of far left ideology is impossible here, but I will venture to say that it will be radical change; change is not in itself good, and this could become quite clear in the years to come. should absolutely esteem Obama and honor his accomplishments... all while voting against him.

Luckily, the election will be over soon enough

A SOJOURN IN CIVILIZED LIFE

BY ANNIE MONJAR COLUMNIST

I still remember the first time I ever told someone I was thinking about writing a column for the Opinions section of the Orient. I proposed the idea over brunch in January of my sophomore year, and my friend said in a distinguished tone, "Ah, yes—perhaps an exposé on the state of the war in Iraq?"

The first column was about coming back to campus early for preseason. The following about comment cards in the dining hall.

They're telling us that this is a terribly frightening time to be a young adult. That fallen into our hands is a laundry list of major domestic and geopolitical issues that will come to define us as an era.

A professor I had last year put it most aptly: "When people read our literature hundreds of years from now, they will see two things: war and carbon."

It comes as no surprise then, that on college campuses—always hotbeds for political and social activism—students are packing their newspapers with articles and editorials aimed at addressing such pertinent issues.

For the past couple of weeks, as the 2008 presidential election approaches, the Orient's opinion pages have been stocked with intriguing letters such as "McCain's Economic Plan Values-Liberty" and "Obama Promotes Middle-Class Economic Growth." If you chose to gloss over the "Ladd Mansion Party" controversy that lit up last week's "Letters to the Editor" section, you might, in fact, be tempted to answer a past week's "Campus Question"..."Is Bowdoin an Intellectual Campus?"—in the affirmative.

But then you would see a headline just beneath that section, "Assassin II: Bowdoin becomes a polarbear-eat-polar-bear campus," and you might start to wonder.

I've always avoided any hint of political sentiment in my columns, if for no other reason than to avoid embarrassing myself.

embarrassing myself.

I'm probably more qualified to write a column about skate fishing than I am to write about this election. If, for some unimaginable reason, someone were to examine my column for notes of the social forces at work in the early 21st century, they would see not war and carbon, but Watson anxiety and comment cards.

It is exciting, though, to think that this is my last column before what I'm told is a watershed election will take place. Years from now, I will look back into the Orient archives to see what I had to say on this threshold of American politics, perhaps looking for youthful idealism and vivacity.

"I'm probably more qualified to write a column about skate fishing than I am to write about this election."

But I can't lie to my future self, nor to everyone else. I can't &&\tilde{\tilde{K}}\sigma\$ wait for this "\tilde{\tilde{G}}\sigma\$!" election to be over with. I stopped reading the news long ago partially because cryptic graphs with steep, downward sloping lines and dramatic photos of stock traders clutching their hair were unsettling to look at over my pancakes. In large part, though, I was sick of reading tedious and obvious headlines like "Candidates Contentious at Debates" and "McCain Disagrees with Biden's Policy Ideas."

Now before I open my door to find concerned-looking activists bedecked with pins and clipboards, let me clarify: I'm going to vote. I promise. Nor am I completely indifferent to who wins this election.

But I think it's worth noting that even the most active campaigners are relieved to see the light at the end of the tunnel.

This election, both because of the length for which the campaigns have been drawn out and for the captivating candidates—Obama and Palin, for obvious reasons, have more sex appeal and intrigue than Gore and Bush did back in 2004—is starting to feel a little sensationalist.

CAMPUS OUESTION

Should out-of-state students register to vote in Maine instead of their home state?

In the October 21 issue of the Orient, the Bowdoin community was asked to respond to the question, "Should out-of-state students register to vote in Maine instead of their home state?" The following replies were submitted.

Tom Charpentier '10

When I first got to Bowdoin I was somewhat surprised to learn that I could vote in Maine as an alternative to voting in my home state. That January, a bill came up in the state legislature that would revoke my newfound right.

I'm not the most politically active member of campus, but I felt strongly about this issue and turned out to be the only Bowdoin student to go to Augusta and testify against the bill (which ultimately failed) in a legislative committee.

Whether you vote in Maine or not is your choice, but I can tell you why you should be allowed to yote here.

One of the main arguments against allowing college students to vote here is that we are a transient group. We're only here for four years and then we head somewhere else, leaving behind the consequences of our vote in Maine. It's a good argument, however, that same logic could be used to argue against allowing you to vote in your hometown as well. I would venture to say most of us will not be

returning to the same hometown, and certainly not the same address, for any appreciable length of time after graduation. Even when we strike out on our own, we'll probably move around a bit before we settle down. Do we need to sign contracts agreeing to stay put for a few years before we are allowed to vote?

Even if we do not pay taxes directly to the community (the taxation argument is illegal anyway, since it essentially amounts to a poll tax), we are a huge part of the state and local economy, and as such we have the right to have our interests fairly represented in elected government.

The bottom line is this: You should think long and hard about what you're voting for in whatever election you decide to vote in. Know every race or issue on the ballot you plan to vote for, and if you don't know enough to make an informed decision about voting for an issue or candidate, then leave it blank.

Educated voting is a fundamental duty of every citizen in a republic, but uninformed voting is irresponsible and harmful.

Whether you choose to vote in Brunswick or in your hometown, remember that you are an educated and freethinking adult. Make sure your intelligence is reflected in your ballot.

Mike Wolovick '09

If you are a Maine purist, you may think it is unfair for out-ofstate students to vote in Maine's election. You may feel it is somehow inauthentic, that those carpetbagging outsiders are taking advantage of this state's lenient election laws and insulting good, ordinary Mainers. However, as an out-of-state student who has already voted in Maine, I ask you to look at things from my perspec-tive. Thanks to America's outdated Electoral College system, people who live in either solid blue or solid red states have essentially no vote in the presidential election.

I come from New York, whose 31 electoral votes are guaranteed to go to Barack Obama this year. That means that, were I to vote in my home state, my vote would be essentially meaningless (especially since neither of New York's senators are up for reelection this year). By voting here in Maine, a state that has both the potential to be a swing state and an active senatorial campaign, I am giving myself a voice in American democracy. If I were to vote in New York this year my voice would be effectively silenced.

Hillary Hooke '09

I am from Maine, and I have voted by absentee ballot twice since coming to Bowdoin. I care deeply

about the issues affecting the community I grew up in, a community that is still my home, despite an ever-growing affection and appreciation for Brunswick, and its surrounding towns, and that is why I will not register to vote here. Because however much I enjoy living in Brunswick now, I know that I do not have the same investment in and knowledge of this area as those have lived here for many years.

My home is only two hours to the northwest of this campus, in another small, rural town, but the issues and problems concerning my family and neighbors are unique and important, just as they are in Brunswick. When I vote at home, I feel like I am voting with a clean conscience, because I am informed and therefore prepared to deal with the consequences of my decision.

I encourage everyone to vote (I don't think anyone at Bowdoin needs to be told how crucial this coming election is), but if you are a student from out of state, why not vote in your hometown by absentee ballot?

I personally would not want to become disenfranchised in the place I consider home, the place where my family must continue their daily lives in my absence, only so I could vote in a community I may not be a part of for more than four years. And anyone who

votes in Brunswick believing they will have little effect on the results of the local or state elections need look no further than last week's edition of the Orient to learn that the student voting bloc may prove the deciding factor for these elections.

So if you're time in Maine isn't going to extend beyond your time at Bowdoin, I think you should reconsider registering to vote here. Good or bad, you aren't going to be living with the consequences of a your vote; you may not even have the same definition of "good" or "bad" as the people who will be dealing with the results of your decisions for years to come. Register where you know the issues, and they affect the people you care about most. I did

Kaitlin Daley '09

I think that out-of-state students should consider voting in Maine because there is a greater likelihood that they will actually vote; student activity groups make it really easy to register and even provide transportation to the polls. But if convenience isn't a factor (a.k.a. you have no problem getting an absentee ballot and will actually send it in), then voting "in" your home state is great because you probably have stronger opinions about more local-level candidates and policy issues.

WOULD BOWDOIN STUDENTS BE MOTIVATED WITHOUT GRADES?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu.

Several submissions will be selected and published in the November 7 issue.

STUDENT SPEAK

Who will you vote for in 2012?

Houston Kraft '11 "You betcha not Palin, eh."

Darren Fishell '09 "Mike Julian."

Danny Chin'12 "Tina Fey."

Isaac Cowell '09
"Samuel L. Jackson."

WEEKLY CALENDAR

OCTOBER 31 - NOVEMBER 6

FRIDAY

COMMON HOUR

Student Performances

Bowdoin student groups will present a cappella, dance, and poetry performances to kick off Parents Weekend. Morrell Gym. 12:30 p.m.

ACADEMIC AWARDS

Sarah and James Bowdoin Day Exercises

This ceremony recognizes the academic achievements of select Bowdoin students. Brown University Provost David I. Kertzer will deliver the keynote address titled, "The Perils of Anti-Intellectualism."

Morrell Gym. 4-5 p.m.

"The Shining"

Jack Nicholson stars in this horror classic, based on the Stephen King novel. Smith Auditorium, Sills Hall. 7 p.m.

PERFORMANCE

"The Play About the Baby"

Student theater group Masque and Gown presents this Edward Albee play, directed by Caitlin Hylan '09. Student tickets are \$1.

Wish Theater, Memorial Hall. 8 p.m.

COMEDY

Rob Riggle

Riggle, a former Saturday Night Live cast member and current Daily Show correspondent, will perform. Tickets are available at the Smith Union Information Desk. Morrell Gym. 8-9:30 p.m.

SATURDAY

Discussion with President Barry Mills

President Barry Mills, Dean for Academic Affairs Cristle Collins Judd, and Dean of Student Affairs Tim Foster will lead a question-and-answer session concerning the academic year and student life.

Daggett Lounge, Thorne Hall. 9-10:30 a.m.

Bowdoin College Chorus Chapel. 3 p.m.

"The Shining"

Smith Auditorium, Sills Hall. 7 p.m.

SUNDAY

PERFORMANCE

"Friends - Part 1"

The Bowdoin College Concert Band, directed by John Morneau, will perform in concert. The performance will feature tenor and Bowdoin voice coach Timothy Johnson. Kanbar Auditorium, Studzinski Recital Hall. 2 p.m.

PAWAT SERITRAKUL FOR THE BOWDOIN ORIEN SETTING SUN: Shadows lengthen as bare trees and freezing temperatures arrive

MONDAY

"Air, Sea, and Ice: Studying Climate at the North Pole Environmental Observatory"

James Morison, the principal oceanographer at the University of Washington at Seattle's Polar Science Center, will discuss his research on climate shifts in the region surrounding the North Pole.

West Conference Room, Hubbard Hall. 7 p.m.

TUESDAY

Voter Shuttle

The Bowdoin College Democrats will have three vans running continuously between the Polar Bear Statue, Moulton Union, and local polling places. Polar Bear and Moulton Union. 8 a.m. - 8 p.m.

ELECTION '08

Election Coverage

Assistant Professor of Government Richard Skinner and other members of the department will analyze and discuss election results as they arrive. There will be a big screen and refreshments.

Shannon Room, Hubbard Hall. 6 p.m.

ARTIST TALK

Abby Manock

Manock, a performance and visual artist based in Brooklyn, New York, will give a lecture.

Beam Classroom, Visual Arts Center, 7 p.m.

WEDNESDAY

"Reconstructing Cornerstones of a New Nation: Kazakh Women in Soviet and Post-Soviet Film"

Gulnara Abikeyeva, artistic program director for the Central Asian Film Festival and one of Kazakhstan's leading film critics, will deliver this lecture in conjunction with Professor of Russian Jane Knox-Voina.

Beam Classroom, Visual Arts Center. 7:30 p.m.

"From Math Major to Google: An Afternoon with Michael Kleber"

Michael Kleber, who currently works for Google, will share insights about career opportunities open to math and computer science majors.

Reception: Room 214, Searles Hall, 3:45 - 4:10 p.m. Talk: Room 223, Searles Hall. 4:15 p.m.

THURSDAY

OFFICE HOURS 5 769

Dean of Student Affairs Tim Foster Information Desk, Smith Union. 4 - 5 p.m.

"Tiger: The Death Chronicles"

This film focuses on the current crisis facing Indian tigers and the evolution of tiger conservation theory over the past

Kresge Auditorium, Visual Arts Center. 7 p.m.

DOCUMENTARY

"MAOism to MEism"

This is the second installment of former "Nightline" anchor Ted Koppel's series on China titled, "The People's Republic of Capitalism." In this episode, Koppel investigates the mass peasant migration to China's cities that is currently underway and its impact on prevailing values and habits. Quinby House. 7:30 p.m.

ARTIST TALK

Lewis deSoto

Mr. deSoto, whose "Paranirvana/Self-Portrait" is on display in the Museum of Art's Rotunda, will deliver a lecture. Room 315, Searles Hall. 7:30 p.m.

LECTURE

"Visually Constructing the Mexican

Elena Albarran, Assistant Professor of History at Miami University of Ohio, will discuss nation building and children's popular culture during Mexico's revolutionary period. Beam Classroom, Visual Arts Center. 7:30 p.m.

"Measure for Measure"

This complex and mature comedy by William Shakespeare was directed by Associate Professor of Theater David

Pickard Theater, Memorial Hall. 8 p.m.

Students rejoice in Obama victory

Hundreds of students cast ballots in election for national, state, and local candidates

BY MARY HELEN MILLER

"Yes we can! Yes we can!" These words were chanted by a pontaneous rally of some 200 students that formed on the Quad after president-elect Barack Obama's vic-

tory speech on Tuesday night. Shortly after 11 p.m. on November 4, when the networks began to announce Obama as the projected winner, screams of joy reverberated across campus. Students darted out of dorms, sprinting around the Quad, jumping, yelling, and climbing trees.

Later, after Obama's victory speech from Grant Park in Chicago, a core of about 10 students carrying noise makers and tiki torches formed on the Quad, chanting slogans from the Obama campaign. Soon, students began to pour out of the first-year dorms to join in the celebration.

"Before we knew it, there was an incredible crowd of people," said senior Shelly Barron, one of the initial participants in the rally.

The group, which eventually turned into the 200-person rally, marched from the Chapel to H-L library, then

- Approximately 200 students marched on campus and in town to celebrate Obama's victory on Tuesday night.

Health insurance company remedies billing mistake

Due to an IT glitch, more than 30 Bowdoin students who had waived the College's health insurance were mistakenly charged for it this summer.

Bowdoin provides an insurance plan to students through a third-party administrator, Gallagher Koster. Last year, insurance companies Gallagher and Koster merged, and subsequently created a new Web site to improve customer service.

However, Margaret Hazlett, senior ssociate dean of student affairs, noted that "there were some glitches."

According to Student Health Insur-ance Coordinator Leslie Nuccio, the Web browser didn't capture the information when people submitted the waiver to be exempt from Bowdoin health insurance. Though Gallagher Koster was able to contact most of these people, more than 30 families were inadvertently charged for the health insurance by the College.

Since Bowdoin requires that all students have health insurance, they have a hard-waiver policy, which au-tomatically enrolls all students in the Gallagher Koster plan unless they go online and waive the policy. According to Nuccio, about 90 percent of colleges utilize the hard-waiver policy.

"It is the most efficient and effective way to ensure all students have health insurance," said Hazlett.

"They had to do the work to resolve it, but it certainly created more work for myself and the Bursar's office."

> **LESLIE NUCCIO** STUDENT HEALTH INSURANCE COORDINATOR

About 25 percent of Bowdoin students purchased the Bowdoin insurance plan last year. The annual cost of the plan for a student in 2008-2009 is \$1,050.

As of now, all families that Bowdoin has been in contact with have resolved the problem with Gallagher Koster.

They had to do the work to resolve it," said Nuccio, "but it certainly created more work for myself and the Bursar's office."

The Bursar's office, Hazlett explained, has been working to make certain that people weren't being billed or credited wrongly.

On Wednesday, Gallagher Koster representatives met with Hazlett, Nuc-cio, Director of Health Services Sandra Hayes, and Jim Kelley, who works in the Treasurer's office as the procurement and risk manager, to discuss the

Faculty diversity to remain a priority despite strains on current budget

ORIENT STAFF

The country's downward-spiraling economy will not hinder Bow commitment to enhancing faculty diversity through new hires.

Earlier this year, the Com Earlier this year, the Committee on Governance and Faculty Affairs, chaired by Professor of Sociology and Anthropology Scott MacEachern, as-sembled a working group on Faculty Diversity. This followed recommendations of an ad hoc committee of professors that was formed last year to discuss ways to increase faculty diversity.

The newly-created working group consists of co-chairs Dean for Aca demic Affairs Cristle Collins Judd and Professor of Economics John Fitzgerald, along with eight other professors who represent a range of academic departments.

The group's written charge authorizes it to formulate "specific recommendations for enhancing faculty diversity at Bowdoin," to be introduced by the beginning of April, 2009.

At its first meeting later this month, the group "will discuss the charge, consider ways to implement special opportunity hires in light of cha ircumstances, and develop a plan for determining best practices for increasing faculty diversity," said Fitzgerald.

"The committee will be concerned with improving the diversity and

"We still have hires that we are making this year. Part of the working group's charge is to help us understand what hiring practices are most successful."

> CRISTLE COLLINS JUDD DEAN FOR ACADEMIC AFFAIRS

quality of candidate pools for faculty recruitment," he said. "In addition, the committee will consider issues of faculty retention."

In an announcement on the College's Web site, "The Economy and Bowdoin," President Mills said that the College "will hire new faculty only when we have new endowment to support them. This will likely mean a slower pace for new faculty positions in the foreseeable future."

However, Judd noted that this is not a change in Bowdoin's policy.
"We just anticipate that raising such

endowment will be challenging in the present economic climate," she said. Co-chairs Judd and Fitzgerald both

emphasized the distinction between 'new faculty lines' and 'new faculty' in existing lines.

"I believe there will be hiring of new faculty into existing lines that have been vacated by retirements, people leaving, etc.," said Fitzgerald.

making this year," Judd said. "Part of the working group's charge is to help us understand what hiring practices

According to Judd, the College has already begun searching for several replacements and visiting positions this year. Open tenure track positions include Africana Studies (Africana thought); Music (Ethnomusicology: Latin America and/or Africana); Creative Writing; History-Asian Studies (Chinese history); Anthropology (First peoples); Economics (Open Economy Macro); and Visual Art (Printmaking).

Three of these are new positions funded through the capital cam-

Additionally, Judd said, Bowdoin will continue to participate in the Consortium for Faculty Diversity, an association of liberal arts colleges that sponsors a program of pre- and post-doctoral fellows. She anticipates the presence of at least four fellows through this program next year.

'We hire many faculty each year; the basic question at hand is how to make sure that our searches produce sufficiently deep pools of qualified candidates," said Judd. "Our continued work with the Consortium for Faculty Diversity is just one way that we know we will contribute to a more diverse faculty."

HISTORY IN THE MAKING: Students watched election returns on Tuesday night in the Shannon Room.

VICTORY CONTINUED FROM PAGE 1

was "significantly higher than the 500 [who voted absentee]."

The College Democrats ran shuttles from campus to the polls on Tuesday. Co-president Claire Cooper '09 said that the organization lost count early in the day of how many students they transported, but she estimated that the number was more than 100.

"We were busy starting at 8 a.m.," Cooper said.

According to Smith, the total number of people who voted in Brunswick was just three more than it was for the 2004 presidential election. This year, just under 12,000 people voted in Brunswick. She said 5,000

people voted by absentee ballot, up from 3,400 in 2004. The total number of voters represents about 75 percent of registered voters in Brunswick.

Smith said that this election and the 2004 presidential election saw a larger voter turnout than in previous years

"If I look back historically I would say [the voter turnouts for 2008 and 2004] are pretty high over time,"

"I don't believe anyone waited, even in the rush hour, more than half an hour," she said. Smith explained that short lines at the polls may have resulted, at least in part, from a higher number of absentee

voters this election.

"I went at 11:30 [to vote], and there wasn't really a line at all," said Carina Sandoval '10, a Florida na-

tive who voted at Brunswick Junior High School. "Some of the local candidates were outside shaking our hands."

For the fifth presidential election in a row, Maine's Electoral College votes went to the Democratic presidential nominee. Republican incumbent Susan Collins defeated Democrat Tom Allen, a member of the Bowdoin Class of 1967, in the race for U.S. Senate. Maine voters from the first congressional district also elected Democrat Chellie Pingree to represent Maine in the U.S. Congress. Michael Michael was re-elected to represent the secand district of Maine

On the state ballot, Maine voters came out in favor of Question 1, rejecting parts of a new law that would have changed the method of funding the Dirigo Health Program "through charging health insurance companies a fixed fee on paid claims and adding taxes to malt liquor, wine and soft drinks."

Voters came out against Question 2, which asked: "Do you want to allow a certain Maine company to have the only casino in Maine, to be located in Oxford County, if part of the revenue is used to fund specific state

Finally, the third ballot question, which concerned a \$3,400,000 bond issue that would support drinking water programs, was approved.

Alex Cornell du Houx, a member of the Bowdoin Class of 2008 and a veteran of the Iraq War, was elected to represent District 66 in the Maine Legislature. Cornell du Houx ran as the Democratic candidate for the office and defeated Republican Jonathan Crimmins and Green Independent David Frans

"I will be working to bring jobs and economic development through the Brunswick Naval Air Station redevelopment," Cornell du Houx said.

He added that quality health care, tax reform, spending control, and environmental sustainability were among his other top concerns.

Student Involvement

According to an article published in the New York Times on Wednesday, the youth turnout for this election was up by 2.2 million from 2004. Furthermore, it reported that "young people voted overwhelm-ingly to send [Obama] to the White

Since the beginning of his campaign, Obama has found particular support at Bowdoin. In July of 2006, Merry Segal '08 started a petition on Facebook to encourage Obama to run for president. By February 2007 when O announced his candidacy, more than 50,000 people had joined the Facebook

group. Segal became the executive di-rector of the official student wing of the Obama campaign, and she later became one of fewer than 15 national

co-chairs for Obama's campaign. Now that the election is over, Cooper said that the College Democrats plan to take the rest of the semester easy. She said that her organization will start planning for next spring, maybe trying to bring a speaker to campus

Jeff Jeng '09 said that the College Republicans plan to continue to "do what we usually do."

"We're going to invite speakers to the campus and continue to provide a different view and diversify the political dialogue," Jeng said.

Jeng said that he and the other Col-lege Republicans were not surprised by Obama's victory.

"I personally didn't find it too surprising; we were expecting that Obama would win, and we were somewhat surprised that McCain didn't lose by that much, in terms of the popular vote," he said. "We're also glad that we've maintained the filibuster in the Senate."

Obviously we're not happy about it, but it wasn't the worst-case scenario by any stretch of the imagination on our side," Jeng said.

Reflecting on Tuesday evening, Brianna Cornelius '09 said "There was a lot of emotion that night."

"As an African American, and as an American citizen, to see history change and to see how far we've change and to be able to be a part of it was really exciting," she said. Cornelius said she has high expec-

tations for Obama's presidency.

"I am hoping that not only can he bring this country back to where it needs to be economically, but that he would genuinely instill a sense of hope," Cornelius said.

Essentially, [I hope] that he could bring us all together and that we could be a real America," she said.

MARGOT D. MILLER, THE BOWDOIN ORIENT

OPEN FOR BUSINESS: Though Scarlet Begonias manager Doug Lavallee said that he his restaurant has been impacted by rising gas prices and has seen a rise in costs, he is hopeful that the economic recession will run its course quickly.

BUSINESS

look like it's an inviting, full place to

look like it's an inviting, full place to come to," Harrison said.

Doug Lavallee, the manager of Scarlet Begonias, also said he has observed a recent decline in sales. Like Harrison, he remembers it starting last winter, though the restaurant has felt the effects of the economy's downturn in different ways than Little Dog.

For one, Scarlet Begonias keeps a very low inventory of long-keeping items, instead relying on frequent deliveries of fresh supplies. According to Lavallee, most of the produce Scarlet Begonias uses is not local, and thus has become costly as gas prices stay high.

Nevertheless, Lavallee said that he has been lucky enough not to have to

cut staff. He also said he thought the economic downturn wasn't affecting Brunswick as strongly as other parts of the country.

"Hopefully this is a short-lived recession, if that's what they're calling it," he added.

Like Harrison, Dave Hunt, the owner and sole employee of Vinyl Haven Records, recognized that his business is at least partly fueled by the desire to escape the concerns of daily life.

"A lot of people come in here just to look around and they're going down memory lane," said Hunt. "They laugh and show each other covers and talk about what was going on in their lives [when the record they found was popular]."

Hunt has repaired and refurbished high fidelity supplies in different places for over 40 years. His experience makes him confident that, in addition to the nostalgia his business provides, the nature of its services keep it fairly safe from the hits the market is taking.

the market is taking.
During the last large-scale recession in the 1970s, Hunt said he and his business were "insulated from real economic downswing," because people are more likely to "bring something in to be fixed than buy something new."

"I don't think I've seen a general downturn in business," said Hunt.

The recent news that Grand City Variety on Maine Street is closing in December was sobering for many small business owners in Brunswick, though many remain optimistic and prepared to endure the uncertain times ahead.

"You've just sort of got to take it month by month," said Harrison.

BSG meets with Mills in 'executive session'

BY ALEX PORTER

Bowdoin Student Government (BSG) held a closed-door meeting with President Barry Mills on Wednesday evening before launching into a discussion with the Bowdoin Evergreens about bottled water on campus.

When Mills arrived, the body quickly voted to go into Executive Session, which lasted for the duration of his hour-long talk with BSG. During Executive Session, non-BSG members must leave the room.

Mills said afterwards he "had a great conversation [with BSG]," adding that the decision to move into Executive Session "wasn't so much about me being afraid of not saying what's on my mind," but rather in deference to "some people who might be afraid of asking questions."

afraid of asking questions."

Mills also said after the meeting that with respect to the current financial crisis, BSG "does have a role [in providing advice and input] to the extent that this is a representative organization."

BSG President Sophia Seifert '09 echoed Mills's sentiment, writing in an e-mail to the Orient "We are going to have to establish our priorities and I think it is crucial to include students in this process." She suggested that Bowdoin seek to cut electricity and heating costs by installing motions detectors on lights and insulating windows during the writing.

windows during the winter. Seifert added that BSG plans to co-host an economic discussion with Mills on November 17 titled, "Is Bowdoin Broke? A Fireside Chat with Barry Mills."

After the Executive Session, the Bowdoin Evergreens returned to make their final pitch to BSG for a bottled water-free campus.

Evergreen member Emma Cape
'09 said, "We want to get some input
from [BSG] as to how this can be implemented on the Bowdoin campus."

BSG members themselves voiced many questions about the outright removal of bottled water from campus. Some supported the idea, while others cautioned that education was necessary before changes could take effect.

"We need an education campaign [about bottled water], and a massive one," Vice President for BSG Affairs John Connolly '11 said at the meeting.

"The best way to go along with this would be an incentive program," Class of 2009 Representative lan Yaffe said. "People need to be able to make a choice—we've got to keep that option open no matter what."

"A lot of people don't understand why we have to get rid of everything," echoed Class of 2012 Representative Branden Asemah.

BSG plans to vote in the near future on officially supporting this initiative.

Discussions surrounding BSG's ongoing investigation of the Health Center concluded Wednesday's meeting.

SECURITY REPORT: 10/30 to 11/5

Thursday, October 30

 A student reported a suspicious man near Pickard Theater handing out flyers promoting an off-campus Halloween party.

Friday, October 31

 An officer responding to a noise complaint at Stowe Inn dispersed an unregistered event.

Saturday, November 1

A student flagged down a security vehicle to ask for assistance for a friend who had been drinking and was feeling sick. The woozy student got into the security vehicle and immediately vomited on the floor. That made the student feel much better.

made the student feel much better.

• A family living in the Meadowbrook area adjacent to the Farley athletic fields was awoken at 3 a.m. by an intoxicated student wearing a Where's Waldo Halloween costume banging on their front door and singing loudly. The Brunswick Police and Bowdoin Security checked the area and located the student walking on Coffin Street. The student explained that he got lost returning from an off-campus party on Harpswell Road and was simply attempting to inquire of the neighbor the best directions to campus. The matter was referred to the Dean of Student Affairs.

 A Harpswell Street resident complained that exhaust fumes from team buses left idling at the Farley complex were making her laundry hanging on the line smell like diesel.

 A security officer checking Ladd House noted that some fire exits were blocked by the set-up for the Haunted House on Friday night. The exits

check us out online:

were cleared

 A student fell and injured his shoulder on Maine Street while giving a piggy-back ride to a friend.
 The student was treated at Parkview Hospital.

 A glass exterior door at the main entrance to Osher Hall was smashed. A student was found responsible for causing the damage and a report has been sent to the Dean of Student Affairs.

Sunday, November 2

 Students in Howard Hall asked for a well-being check of an intoxicated student. The student, who had been drinking a combination of hard liquors, was transported to Parkview Hospital by Brunswick Rescue.

 Brunswick Police detained a student downtown for littering and consumption of alcohol by a minor. The student was not charged, but the matter was turned over to Security.

• A female Appleton Hall student called Security at 4 a.m. to report that a strange man was outside the dorm yelling and throwing rocks at her window. Security responded and questioned the man, who turned out to be an acquaintance of the student. The man, who was identified as a local resident, was ordered to leave the campus.

leave the campus.

• A local resident returned a found wallet belonging to a student. The student was notified.

The student was notified.

• A faculty member reported losing a wallet at the Farley athletic complex. The wallet was later found by a staff member and returned.

 An ill student was transported from West Hall to Parkview Hospital.

 A local resident reported the theft of a lime green T-Mobile Sidekick cell phone from Sargent Gymnasium.

Monday, November 3

 Information Technology reported that a Dell laptop computer that had been signed out by a student was lost or misplaced somewhere on campus. The laptop has a bar code sticker bearing the number 15863.

 Brunswick Rescue transported an ill student from Farley Field House to Parkview Hospital.

Tuesday, November 4

 A student reported the theft of a silver Marin bicycle that was locked to a bike rack outside Moore Hall.

 A student reported the theft of a silver Marin Fairfax bicycle from the south side of Sills Hall. The bike had been left unlocked for three days.

 A student reported the theft of a silver, blue, and purple Next mountain bike from the north side of Moulton Union. The bike had been locked to a tree with a combination cable lock.

Wednesday, November 5

 Shortly after midnight, groups of jubilant students on the Quad celebrated the election of President-Elect Barack Obama.

 A fire alarm was activated in Winthrop Hall at 5:12 a.m. resulting in an evacuation of the building. Brunswick Fire Department responded. Smoking in a dorm room was the apparent cause of the alarm.

Students are reminded that the Americans with Disabilities Act requires clear access to hand railings at campus building entrances and exits. Bicycles that are locked to railings may prevent people who need the assistance of a railing from using them. Please keep this in mind and lock your bike to a bike rack. Thanks for your help.

IT secures Polar server

ORIENT STAFF

In response to a security breach last year, Bowdoin's Information Technology (IT) department has tightened access to the Polar server The server is used to host student and campus organization Web pages and other data.

In April, personal student information including Social Security numbers and health insurance records were discovered unsecured on a different Bowdoin server, available to anyone with a Bowdoin e-mail account.

IT Security Officer & Systems Consultant Steve Blanc said that after the breach, "we made several immediate changes to how we protect our systems. We started a security assessment with Forrester Research, and we are working with their recommendations to remove any sensitive data from the system."

In an e-mail to students, Blanc wrote that "first steps are being made to increase the security of Polar," one of the items Forrester identified as insecure. He listed three changes, the first being that "anonymous File Transfer Protocol (FTP) access is being turned off."

"Previously, anyone from the internet could log onto the server with anonymous credentials," Blanc

said. Now, those seeking to gain FTP access to Polar must input their Bowdoin username and password in order to be logged on.

According to Blanc, the second change "was to disconnect file systems that weren't being used," specifically the scratch and department drives. Though these locations will no longer be accessible from Polar, they will be available through other servers.

The third security change Blanc described limits access to the network from the Internet, so that access off-campus must come through Bowdoin's Virtual Private Network (VPN). He said that previously, "anywhere from the internet, you could access Polar. There was a provision in our firewall to allow that."

Blanc said the change would be beneficial, "since VPN encrypts all the information."

"The server itself is not heavily used," he added. "We identified everyone who had used the server in the last 30 days...and notified approximately 30 accounts of the changes."

"We are actually going to be replacing Polar soon, which is a Unix shell server, with a Linux shell server," he added. "The server is at least 10 years old...and it's difficult to maintain patch updates."

TEAMS CONTINUED FROM PAGE 1

number of players that get to travel.

Dom Ridgard '11, a defensive end on the football team, said that he noticed that the team's travel situation had changed.

"Beginning of the year, we had two different coach buses and everybody got to travel, but now we only have one bus and three or four vans that the freshmen ride in and that our coaches drive," he said. "Also, not everybody gets to travel because there

isn't enough space."
Ridgard said that he didn't think the lack of some players traveling hurt the team too much, because the majority of players who did not travel were injured.

Bishop, however, was more upset with the new policy.

"Coach said if we were going far away we might have to leave some players behind if they were injured, which is just wrong, because they're still part of the team," he said.

Ward said the main reason for the cutbacks did not stem from the current economic crisis.

"Our tightening comes from not anticipating growth in costs like we should have," Ward said. "The things we're doing we actually projected to do before the market took a dive. [However], because of the economic meltdown we're probably going to have to do it a little longer than we would have liked to."

longer than we would have liked to."

Ward also indicated that the funds spent on training coaches was being reduced.

"We've cut in half the amount of money for professional development," he said.

Men's Ice Hockey Coach Terry Meagher said he has coached at Bowdoin during two previous economic crises, one in 1987 and one in the mid-90s. "Our tightening comes from not anticipating growth in costs like we should have. The things we're doing we actually projected to do before the market took a dive."

JEFF WARD
DIRECTOR OF ATHLETICS

He said that so far, he thinks the College has dealt with the matter well.

"[We need] leadership that is trans-

"[We need] leadership that is transparent and honest, and that has happened through [President Barry] Mills and Jeff [Ward]," Meagher said.

Meagher warned that the College has to be careful not to cut back too drastically. He said that during the scare in the 90s, the "long-term vision" was not kept in mind, and there was significantly more budget cutting, which he felt hurt athletics at the College.

"You have to be really careful to prioritize your commitments, look at better pricing, squad size, and alternative sources of income," Meagher said.

Meagher said that while travel limitations do not affect his team much since there is a limit on the number of players he can dress, other coaches will face a more difficult task.

"Coaches are going to have to articulate, what is a competitive number to bring on the road," he said.

Meagher was cautiously optimistic about the current situation, but stressed safety should never be compromised and that cutting back too far could be detrimental.

"The most important thing, and I feel strongly about this, is you have to be reasonable, but you don't want to be at a competitive disadvantage," Meacher said.

CORRECTION

Due to a reporting error, the October 31 article "College absorbs more health plan fees for employees earning less than \$40K" incorrectly stated that insurance deductibles are paid to the College. They are paid to health providers.

Argueta investigates violence of Guatemalan Civil War

BY CAMERON WELLER
ORIENT STAFF

Senior Michelle Argueta's honors project has led her straight back to the country where she was born.

Argueta, who was born in Guatemala to a Guatemalan father and a Mexican mother, has been researching the Guatemalan Civil War as part of her project titled, "Tortillas and Tear Gas: The Role of Women in Guatemalan Urban Resistance."

Argueta said the conflict, which lasted from 1960 until 1996, has had a "tremendous impact on everybody" in Guatemala, but has not been studied sufficiently.

"Guatemala has been one of the greatest victims of violent repression in Latin America," begins the second paragraph of Argueta's honors project prospectus. Argueta said she hopes to use her honors project to shed light on underrepresented factions of society that played an important role in the overall revolutionary movement in Guatemala during the civil war.

Her project focuses on the time period starting with "the CIA-backed coup in 1954 that led to the overthrow of democratically elected Jacobo Arbenz [that] launehed Guatemala into a 36-year-long civil war. This war cost over 200,000 lives and resulted in volumes of human rights violations, especially during the 1980s with the reinvigorated effort to quell all opposition and establish 'stability," according to Argueta's proposal.

After deciding last spring to pursue the honors project, Argueta chose to work with Professor of History Allen Wells as an adviser and applied for the Latin American studies department's annual research grant. As one of the two recipients of the grant, Argueta was able to spend the month of June living with relatives in Guatemala City and doing research focused on the urban guerrilla movement. Argueta said that her family has

Argueta said that her family has been deeply affected by the war.

"When the war comes up, my family definitely gets depressed, because it's just not a happy memory," said Argueta. "It definitely affected ORIGINAL RESEARCH
This is the first article in a series
that highlights original research
being done on campus.

my dad's family a lot and marked his childhood, because his family had to go into exile in Guatemala City once the repression started."

Argueta said her family in Guatemala was very supportive and served as a valuable resource for her research.

"One of my uncles who's a journalist was especially helpful in connecting me with some of the rebels involved in the guerrilla movement during the war, because he went to school with a lot of people who were involved with the leftist cause," said Argueta.

Argueta said she interviewed a total of nine individuals, some of whom were ex-guerillas, while others were women active in the movement.

"The most important leader I interviewed was Cesar Montes," said Argueta. "He was one of the original guerrilla leaders during the first uprising in 1960, and he has gone on to publish a book."

The research Argueta did in Guatemala was substantial, but it was only her first step. After returning to Bowdoin in the fall, Argueta said she did as much reading on the topic as possible before writing a prospectus for her project. This proposal was then presented to a committee that Argueta chose whose members include Associate Professor of Romance Languages Enrique Yepes, Associate Professor of Sociology and Anthropology Krista Van Vleet, and Wells. This committee approved her prospectus at the beginning of the semester.

"The committee will serve as a kind of support group along with Allen Wells to help me edit my writing and make sure I'm not leaving out information or misinterpreting anything," said Argueta. "It's helpful in providing well-rounded

MARGOT D. MILLER, THE BOWDOIN ORIENT

FAMILY TIES: Michelle Argueta '09 is currently working on an honors project with adviser Allen Wells about the Guatemalan Civil War. Argueta spent a month last summer with relatives in Guatemala City doing research for her project.

feedback on my writing."

Argueta plans to complete a total of three chapters for her project. The first chapter, which focuses on chronology, background information, and the cooperation of rural and urban insurgents during the war, is due at the end of this semester. The second chapter will be devoted to urban student movements, while the third will examine the role of women during the war.

Argueta says Wells has been very helpful as an adviser.

"I think the fact that Allen Wells is my adviser will help to guarantee that the project becomes an honors project, because he's so dedicated," said Argueta. "If I give 100 percent, he will too, and he definitely puts a lot of effort into all that he does."

Argueta said that it is often "hard to wake up in the mornings and have to head straight to the library," but added that she is motivated to complete the project because she sees how the war has directly impacted not only her family, but also an entire generation of Guatemalans.

"When you're driving in a car with someone in [Guatemala City], they'll point out places or things that relate to the war or the rebellions," said Argueta. "The war has made everyone a lot more paranoid now, and some theories claim an increase in drug trafficking and gangs is a result of the war."

Argueta, who does not have concrete plans for when she leaves Bowdoin, said that completing the honors project will undoubtedly give her skills for the future.

"Whether I end up going to graduate school to continue researching or working with a human rights organization, completing this project is training me to be an overall more independent worker," said Argueta. "I think I will be better off now no matter what I end up doing."

Time for a change: Current definition of sex too exclusive

SUGGESTIVE

COLUMNIST

Americans made history on Tuesday. We showed up to the polls in record numbers and we made a difference. But, to be honest with you, if you had asked me how I felt about the election while I was standing in line waiting to vote I probably would have shrugged and given you some sort of witty and indifferent response. Or maybe I would have said, "Remember when President Clinton 'did not have sexual relations with that woman'?

What I find interesting about the Clinton-Lewinsky scandal is not nec-essarily the fact that the American President was sexually involved with an intern (partially because I think it's none of my business, and partially because if I wanted to be entertained by sexual drama I'd buy a tabloid), but rather the idea that President Clinton was able to find refuge in the arguably problematic definition of "sex English language to defend the veracity of his statement.

According to the Oxford English Dictionary online, "sex" is defined as, "physical contact between individuals involving sexual stimulation; sexual activity or behaviour, spec. sexual intercourse, copulation. to have sex (with):

to engage in sexual intercourse (with)."

I must say that this is perhaps the most inclusive definition I've encountered with regard to the word "sex." More typically, I've found sex defined in a much more limited sense. For instance, Dictionary.com defines "sex" as, "the instinct or attraction drawing one sex toward another, or its manifestation in life and conduct." or "coitus"-which is further defined as "sexual intercourse, esp. between a man and a woman.

the Kenneth Star investigation apparently uncovered, it seems that the only way Clinton could have honestly denied having had "sexual relations with Lewinsky is if he defined "sex" exclusively as the act of penetrative vaginal intercourse between a man and a woman. I find it very difficult to believe that an intelligent man and powerful head of state such as Clinton would argue that heterosexual intercourse is the only type of intimate relation that falls under the category of sex. However, his statement did serve to privilege heterosexual intercourse above the many other forms of sex available to human beings. To make heterosexual inter-

course into the de facto definition of sex implies that all other forms of sex are, in some sense, less legitimate. But then, we must ask what exactly makes one form of sex more legitimate than another? If we are judging the situation based on physical intimacy, I would argue that there are few things more intimate than oral sex-I mean, it's literally right in your face. Perhaps penetration could be used as a standard for legitimacy—but that would mean that strap-ons and anal sex would be considered legitimate. How about if any sex between partners of opposite genders were considered legitimate?—No, wait, that would legitimize BDSM.

What I'm trying to get at here is the radical exclusiveness of the definition of "sex." In a culture that worships shows like "Sex and the City," "Californication," and "Gossip Girl," sex inevitably becomes a significant component in one's identity. So, it would be nice if our definition of sex were a little bit more inclusive, so as not to alienate those people who prefer to do things outside of the missionary position. Furthermore, when heterosexual intercourse is given primacy in the cultural understanding of sex, there is occasion for misunderstandings during the consent process and devaluation of individuals if any sort of forced or coerced situation should arise during a sexual encounter.

There are few better examples of the over-valuation of heterosexual intercourse in the definition of "sex' than the Clinton-Lewinsky scandal. This has become an iconic moment in America's recent cultural past, and for good reason. As a result of the problematic definition given to the word "sex," Clinton was able to deny brought against him-effectively defaming and devaluing Lewinsky on

live television aired nationally.

It's now been almost a decade since the Clinton-Lewinsky sexcapades, but definitions are still up in the air. America still can't seem to decide on the definition of marriage, and questions continue to arise with regard to when exactly life begins in the womb. Political debates regarding "sex" are never

ue, and perhaps change, throughout the Obama Presidency. All I can say is that sex is a powerful thing—it can convey feelings of ro-mance and intimacy, confer legitimacy, and bring pleasure, pain, or confusion. So, no matter who's in the Oval Office, try to remember all of the things that sex can be to you before you try to define it, and always leave a little room for those things you haven't tried yet.

THE ROBERT DAY SCHOOL CLAREMONT MCKENNA COLLEGE

MASTER'S PROGRAM IN TINANCE

. A new approach, a new program.

An innovative one-year degree program for students with strong leadership potential beginning Fall 2009. Highlights include:

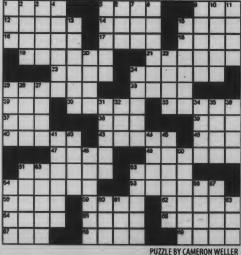

- Generous funding for merit-based scholarships
- Dedicated career services specialist and extensive alumni network
- Excellent faculty with experience both in academics and industry
- Intensive Finance curriculum completed in one year
- Co-curricular program designed to enhance leadership and communication skills, as well as provide access to speakers, conferences, alumni and employers.

For more information, or to apply, please visit

www.claremontmckenna.edu/rdsgraduate, or contact us at rdsadmission@claremontmckenna.edu.

ARTS & ENTERTAINMENT

Theater department highlights political tension in 'Measure'

BY RACHEL GOLDMAN STAFF WRITER

On the heels of a week of political anxiety, emotion, and change, the Department of Theater and Dance appropriately presents William Shakespeare's "Measure for Measure." One of Shakespeare's dark and complex comedies, "Measure for Measure" explores probing human questions of power, authority, and responsibility that are par-ticularly relevant in light of the recent presidential election.

"Measure for Measure" focuses on the relationship between political life and society in Vienna, Austria. After 14 years of neglectful rule, in which cor-ruption and decadence have flourished in the kingdom, the Duke of Vienna puts an austere Puritan, Lord Angelo, in power to rectify the situation. The severity of Angelo's rule sets the stage for several subplots through which Shakespeare explores the ways in which human laws and natural laws, spiritual purity, and physical desire conflict.

According to Associate Professor of Theater Davis Robinson, who directed the play, "Measure for Measure" asks probing questions: Does absolute power corrupt absolutely? And, when you have power, how do you use it or

At its root, "Measure for Measure" is a play that abounds in contradictions nd deftly blurs the line between good and evil.

"No one can be all good, and that is apparent here," Robinson said. "For that reason, there are contradictions here that you can't explain away because no without a conscience."

"This is a very mature piece of Shake-speare's work," he added. "It is very dark and tragic, and then also very humorous in places. It is a dark comedy and

MEASURING UP: "Measure for Measure" cast members Kathleen Lewis '10 and Sam Plattus '12 engage in a heated discussion on Thursday at Pickard.

then some very unusual things happen that illustrate how life doesn't have a neat and tidy ending."

Robinson began preparing for "Meaare for Measure" last summer and worked with the text in order to compress it. The first week of the fall semester, he cast the play with Kathleen Lewis 10, Sam Plattus '12, and Derek Brook 12 in the leading roles. According to Robinson, "Measure for Measure" is an "in-house production." Aislinn Curry '09 is the stage manager and Susanna Kimport '09 is the light designer.

Róbinson chose a Shakespeare play

for the fall production because of the experiences and opportunities the Bard's plays hold for both actors and audience members.

"For actors, Shakespeare is the best training there is," he said. "Because of the language, and because of the bold physicality and emotionality of it. And for the audience, there is a major cumulative effect that happens. As a member of the audience, you might not understand everything but you get caught up in it emotionally. By the end of the evening, you feel like you've been through this journey, that you've lived something. It's transformative for both the cast and for the audience."

Of Shakespeare's plays, this one is particularly evocative because of its "minor nd because it is a "very conflicted and dark, but beautiful play," according to Robinson. It is also the closest that Shakespeare came to Theater of the Absurd. Over the years, it has been attacked because of its frank discussion of sex, prostitution, and pregnancy out of wedlock. Now, however, there are more possibilities for discourse around this subject matter.

"I think we now live in a time where

'Measure for Measure' are much more timely and ready to be heard," Robinson

To draw this parallel on an aesthetic and visceral level, Robinson has chosen to make this version of "Measure for Measure" contemporary in set design and costume.

"We're not trying to draw exact parallels to the contemporary politi-cal scene we're in now," Robinson said. "But it's about bigger human questions that apply to everyone in a way. Making this play visually contemporary helps you to see yourself in certain moments and places

"Because we've all been guilty of being in places where you see abusive power and you don't know what to do about it," he added. "And because we're all tempted and we've all fallen and we've all risen. In the end, this play is a beautiful expression of how we live through these decisions and contradictions on a day to day basis.

After a tumultuous and tense political week, "Measure for Measure" is a play that falls right into the milieu.

I knew for the fall play we would need something meatier, something shadier, and something more complex," Robinson said.

want this to be a community event that is somehow celebratory because it is election week. This play is provocatively in tune with what's going on both nationally and locally on campus," he added. "This is a very interesting and very appropriate play to do right now as it magnifies the ambiguities and contradictions of how to govern and how

"Measure for Measure" will show to night and on Saturday at 8 p.m. in Pickard Theater. Tickets are free and available at the Smith Union info desk.

'bluegrassical' on latest folk albums Stand-out Thile invents

THIS WEEKS **REVIEW** BY LOUIS WEEKS

About seven years ago, I was thumbing through the folk aisles of the local record shop and came across a record that made me laugh. It was a cruel sort of laugh, born out of my own pubescent insecurities. On some level I knew this, but I laughed anyway. The disc was plucked from its spot far back on the shelf: a spot that no artist wanted, no record-store clerk could ever find to restock, and no customer would entertain. The disc was placed face up, resting next to its old home. I didn't even have to listen to it. On the cover, smiling up at me, was a portly young boy hovering over the home plate of Wrigley

It gets better. He was dressed in a Chicago Cubs uniform with his mandolin cocked behind his head in a batter's stance. At first, I found this hysterical. Then I grew perturbed. The instant pleasure that I drew from this wicked humor was instantly spoiled by a sudden real-Somebody had found this first, found it funny first, and left it for me: the table scraps of so else's good find. At this age, I hated

nothing more than following trends Look at me. I had refused Barnes and Nobles and chosen the hipster record store. I resented the top shelves, and frequented the most hipster of all genres: folk. It had never occurred to me that the hipster before me had left the album out for any other purpose besides sheer mockery. I was laughing, so he had to be laughing as well.

At some point, I listened to it. stopped laughing. I feverishly ecked the cover then the disc, then the cover again, thinking that in some mix-up, the disc that I was was not this chubby, 11year-old boy in a Cubs uniform. But it was. It sounded like nothing I had ever heard before. He was a freak of nature: a man-boy of the mandolin, playing with the confidence and bravado of a seasoned vet. The absolute virtuosity of Chris Thile couldn't have hit me with that first listening. However, standing in my highly cal culated outfit, in the hipster record store, I was hit by an entirely different sensation. I was, all at once, enraged the unfairness of his skill and grateful to have been lucky enough to catch it. I laughed then, but he is ing now.

The last four years have been good to Chris Thile. Very good. As the front man of Nickel Creek, he found a new and creative way to infuse rock

and bluegrass by playing his mandolin much more like a guitar than a mandolin. He finds a way to get more sound out of his instrume anyone else in the genre. In 2005, Nickel Creek produced "Why Should the Fire Die," their masterpiece. Featuring producers and writers like the famed Gary Louris, "Why Should the Fire Die" is a haunting work of genius that infuses the technical skill of trio and the harmonic quirk of Thile. Unlike other Nickel Creek albums, this album boasts a harmonic weirdness that jettisons it out of any one genre. 'Eveline," the album's seventh track, is a fusion of American bluegrass and Whitacre-esque chorale chords, while "Scotch and Chocolate" (instrumental) is exactly what you'd expect of the prodigy: awe-inspiring bluegrass solos. The album never feels pretentious or stilted, because beneath all of its weirdness and technicality are beautiful melodies with lyrics to match. Although the album was completed five years ago, it pre-dicts Thile's musical departure from his pop style into a sound that is all

In 2006, with a new band and a new suit, Thile released "How to Grow a Woman From the Ground." His band, the How to Grow a Band, consists of some of the best bluegrass players in the country. The bigger band and the new album showcased Thile's brilliant arrangements. Hidden between the entertaining bluess covers of White Stripes and The Strokes songs are the beginnings of Thile's brainchild. "The Beekeeper" and "Cazadero" are the prototypes of what is now being called "American country-classical chamber music," or as I like to call it, bluegrassical. These tracks are highly complex instru-mental pieces that showcase both the simple beauty of traditional Amerifolk melodies and the brilliance of Thile's writing. In this recording, he has not altogether abandoned his pop sensibilities. Tracks like "How to Grow a Woman from the Ground' and "You're an Angel and I'm Gunna Cry" are throwbacks to his Nickel Creek days.

The last two years have seen Thile's brainchild come to complete fruition. In 2007 he and his band. renamed Punch Brothers, debuted Thile's four-part suite, "Blind Leaving the Blind." Thile, after working us into it for four years, now has no problem calling a spade a spade and giving us his unadulterated bluegras sical chef-d'oeuvre. The result is as-tounding. Thile has, with this piece, changed bluegrass and folk music forever. Although this specific piece may not hold much historical sway, it has proved American folk mus

"Blind Leaving the Blind" argues that bluegrass and folk possess the intricacies and complexities of any other form of performance mu-Two weeks ago, Edgar Meyer, world-famous bassist, and Chris Thile released their collaborative effort "Edgar Meyer and Chris Thile." This all-instrumental album takes Punch Brothers' suite concept one step further. This album pushes the harmonic limits of the bluegrassical genre. Its uncommon time signatures, tone clusters, and difficult harmonic structures suggest that the bluegrassfolk style is more flexible than anyone could have imagined. Even with all of its astylar folk qualities, the songs of Edgar Meyer and Chris Thile are all reminiscent of their bluegrass ancestors in melody and instrumentation. If "Blind Leaving the Blind" aligns itself with a more traditional form of classical music, then Thile's latest album is the modern music equivalent

Thile's work is remarkable in its skillfulness and prodigality, but is genius in its concept. He has transformed an American past time into high art and is decades ahead of his time. I predict that within 30 years, the genre of blue-grass-folk chamber music will become a national treasure like jazz, the Statue of Liberty, and the Chicago Cubs.

Morell '77 creates 'obscured' images through photography

ORIENT STAFF

Abelardo Morell '77 is transforming the way people look at the world, one

photograph at a time.

Though the renowned photographer v travels the world to take pictures and explore new ways to use them, his career as an artist started at Bowdoin.

Morell arrived in the United States from Cuba in 1962. He came to Bowdoin in 1969 speaking broken Eng-Photography allowed him to cross the linguistic divide.

"When I was at Bowdoin, I was still pretty young and my language was not great," he said. "But I had kind of an urge to express stuff in pictures.

He took a photography class from w-retired Associate Professor of Art John McKee and found his passion.

Without him, I don't think I would have become a photographer," Morell said of McKee. "He basically saw that I had a little talent and gave me a green light. He was trusting of what I was doing and that was really important."

Although Morell cites McKee as his mentor, McKee hesitates to accept the

"I didn't teach him anything. He came with it. He has it. He knows, he sees, and he does," McKee said.

Still, McKee taught Morell much about the elements in photography that crossed boundaries into other areas of

"He played music, read literature, and showed how photography was embedded in a lot of other interesting stuff," Morell said. "It was a really neat way of opens a window. It was interesting to we the creative element of photography linked to other ways of expression."

And Morell has been opening windows ever since.

He graduated from Bowdoin in 1977 d received a Master of Fine Arts in 1981 from the Yale School of Art. His work has been on exhibit at the Museum of Modern Art, the Whitney Museum of American Art, and the Metropolitan Museum, all in New York, and abroad, He received an honorary Doctorate of Arts from Bowdoin in 1997. He currently teaches at the Massachusetts College of Art and Design. Last year, a documentary about his life, "Shadow of the House," premiered in Boston.

He is best known for a process called mera obscura—Latin for "dark chamber." It involves covering all the windows of a box or room with dark plastic. He then makes a small hole, half an inch in diameter, which produces an upside down image of the outside into the room or box. The development process takes between six and eight hours and results in a clear picture on the wall of the room or box opposite the hole.

Currently, he is creating camera obscura photographs in color and reversing images so that they are now rightside up.

"Color changes everything," Morell said. "The idea of the world looks more like the real thing. The whole thing is becoming a little more naturalistic. It looks more normal in a way but is still quite weird," he said.

Morell has also started scanning his negative film, which allows him to print large as four by five feet. Many of these prints are on display at his latest show in New York at the Bonni Benrubi Gallery. It includes a picture of Central Park that he took last summer.

Morell is now waiting for fall to set in at the park so that he can take another picture from the same perspective.
"I'm waiting for the colors to change

so I can do the same apartment in the fall, then the winter, then the spring," he

Monet's serial paintings of the Rouen Cathedral inspired Morell to undertake the project.

"One subject can say many things depending on the weather and time, he said.

The show in New York also features Morell's photographs of money—much of which he traveled to a Swiss bank to photograph. In one image, he photographed gold bars worth \$79 million.

It's interesting to portray the fantasy in photography, the tactile thing," he

The next set of pictures in the show comprise his work as an artist-in-residence at the Yale University Art Gallery.

"They asked me to react to the place," he said

Morell was interested in the idea of art being photographed, and in some cases, asked the curators to move sculptures closer to paintings so that the two pieces looked as if they are part of the same work when he photographed them.

Finally, Morell created cliché verre, or "glass picture," prints. Cliché verre was a method developed in the 1850s by artists after photography was invented.

IN THE EYE OF THE BEHOLDER: Abelardo Morell's photography hangs in Daggett Lounge

"I thought I'd update it a little," Morell said. He covered glass with ink that, when it dried, cracked in abnormal

Once it dried, I carved out the shape of the continents," he said. "The next process was to take that glass thing and in the dark room, sandwich it with photographic film so I can get a negative of that glass. Once I get that negative, what I print becomes a positive.

Assistant Professor of Art Michael Kolster met Morell at the Massachusetts College of Art and Design during the early 1990s and has been a friend and

"The purpose of a liberal arts education is to view a variety of subjects through different lenses and look for possible connections between them. I think Abe's work is an exemplar of that kind of thinking," he said. "He doesn't have preformed ideas but he has an extremely rich engagement with his process.

According to McKee, the process is innate in Morell's being.

"It's in his nature to see things, to notice things-things which many of us overlook.

Lecture presents women's role in Soviet and post-Soviet eras

BY ANDY BERNARD CONTRIBUTOR

Professor Jane Knox-Voina, chair of the Russian Department, and Gulnara Abikeeva, a leading film critic in Kazakhstan, hosted a presentation about visual media portrayals of the iconic Soviet and post-Soviet woman on Wednesday night. The presentation covered photography, painting, and film of the 20th century that worked both as manipulated propaganda and as enlightening documentary in shaping the heroic Soviet woman.

Knox-Voina kicked things off with egments of a film by Russian Sergei Eisenstein in which he traveled to Mexico to show the post-Aztec Mexican "soldaderas," the wives of soldiers who, according to Eisenstein, "were to be to [the Soviets] a symbol of Mexico itself. Eisenstein was one of the first to transfer the idea of heroic women who were supportive, motherly, and strong-oftronger than the men themselvesback from Mexico to the Soviet Union.

While the old cultures [Aztec and Soviet] celebrated death, the new Soviet society as well as the new Mexican so-ciety would be aimed at life, the future,"

Knox-Voina also flashed images such as a reinterpreted Soviet version of the and full of color than earlier Madonnas which were portrayed as sad, delicate, and ferninine. These modern works were often saturated with the three pri-mary colors: blue to symbolize hope, red for energy, and yellow for vitality of

"The new culture stressed happiness rather than suffering," Knox-Voina said. "The Soviets took the [Madonna]

and twisted it to make a new kind of

She summed up the newly acquired power of Soviet women by recounting a game played by Soviet men and women of the time in which "the man tried to catch the woman, but if he failed, the woman, armed with a whip, had a chance to come back around and whip

Abikeeva took the stage next and began by showing part of a 1975 Uzbek film entitled "The Veil," which, through the juxtaposition of veiled and unveiled women, illustrated the profound effect that the garment had on the mentality and image of Soviet women.

Abikeeva stressed the significant role that early films depicting strong Soviet women played, on the national level and beyond

"Images of women and the family became like the stones, building the na tion," she said.

Earlier films, however, were limited propaganda material. Although the films improved women's media image, they presented too idealized of an imbeing heroic in the areas of work, home. and motherhood was not as easy and morous as popular films depicted.

The presentation was the first of a four-part series, "Visual Reconstrucof Citizens and Nations Through Art: Mexico, Kazakhstan, and Siberia." which lasts from November 5-9.

Tonight, the Oscar-nominated film "Mongol" will show at 7 p.m. at Smith Auditorium in Sills Hall. On Sunday, the Khatylaev duo from the Republic of Sakha will perform "The Art of Mag nificent Siberian Music" at 1:30 p.m. in the Studzinski Recital Hall at Kanbar

The album never feels pretentious or stilted, because beneath all of its weirdness and technicality are beautiful melodies with lyrics to match. Although the album was completed five years ago, it pre-dicts Thile's musical departure from his pop style into a sound that is all

In 2006, with a new band and a new suit, Thile released "How to Grow a Woman From the Ground." His band, the How to Grow a Band, consists of some of the best bluegrass players in the country. The bigger

band and the new album showcased Thile's brilliant arrangements. Hid-den between the entertaining bluegrass covers of White Stripes and The Strokes songs are the beginnings of Thile's brainchild. "The Beekeeper" and "Cazadero" are the prototypes of what is now being called "American country-classical chamber music," or as I like to call it, bluegrassical. These tracks are highly complex instrumental pieces that showcase both the simple beauty of traditional American folk melodies and the brilliance of Thile's writing. In this recording, he has not altogether abandoned his pop sensibilities. Tracks like "How to Grow a Woman from the Ground and "You're an Angel and I'm Gunna Cry" are throwbacks to his Nickel Creek days.

The last two years have seen Thile's brainchild come to complete fruition. In 2007 he and his band. renamed Punch Brothers, debuted Thile's four-part suite, "Blind Leaving the Blind." Thile, after working us into it for four years, now has no problem calling a spade a spade and giving us his unadulterated bluegrassical chef-d'oeuvre. The result is as-tounding. Thile has, with this piece, changed bluegrass and folk music forever. Although this specific piece may not hold much historical sway, it has proved American folk music

stage. "Blind Leaving the Blind" argues that bluegrass and folk possess the intricacies and complexities of any other form of performance music. Two weeks ago, Edgar Meyer, world-famous bassist, and Chris Thile released their collaborative effort "Edgar Meyer and Chris Thile." This all-instrumental album takes Punch Brothers' suite concept one step further. This album pushes the harmonic limits of the bluegrassical genre. Its uncommon time signatures, tone clusters, and difficult harmonic structures suggest that the bluegrass-folk style is more flexible than anyone could have imagined. Even with all of its astylar folk qualities, the songs of Edgar Meyer and Chris Thile are all reminiscent of their bluegrass ances tors in melody and instrumentation. If "Blind Leaving the Blind" aligns itself with a more traditional form of classical music, then Thile's latest album is the modern music equivalent

Thile's work is remarkable in its skillfulness and prodigality, but is genius in its concept. He has transformed an American past time into high art and is decades ahead of his time. I predict that within 30 years, the genre of blue-grass-folk chamber music will become a national treasure like jazz, the Statue of Liberty, and the Chicago Cubs.

Morell '77 creates 'obscured' images through photography

ORIENT STAFF

Abelardo Morell '77 is transforming the way people look at the world, one photograph at a time.

Though the renowned photographer now travels the world to take pictures and explore new ways to use them, his career as an artist started at Bowdoin.

Morell arrived in the United States from Cuba in 1962. He came to Bowdoin in 1969 speaking broken English. Photography allowed him to cross the linguistic divide.

"When I was at Bowdoin, I was still pretty young and my language was not great," he said. "But I had kind of an urge to express stuff in pictures."

took a photography class from now-retired Associate Professor of Art John McKee and found his passion.

"Without him, I don't think I would have become a photographer," Morell said of McKee. "He basically saw that I had a little talent and gave me a green light. He was trusting of what I was doing and that was really important."

Although Morell cites McKee as his

mentor, McKee hesitates to accept the

"I didn't teach him anything. He came with it. He has it. He knows, he sees, and he does," McKee said.

Still, McKee taught Morell much about the elements in photography that sed boundaries into other areas of

"He played music, read literature, and showed how photography was embed ded in a lot of other interesting stuff," Morell said. "It was a really neat way of opens a window. It was interesting to ave the creative element of photography linked to other ways of expression."

And Morell has been opening windows ever since.

He graduated from Bowdoin in 1977 and received a Master of Fine Arts in 1981 from the Yale School of Art. His work has been on exhibit at the Museum of Modern' Art, the Whitney Museum of American Art, and the Metropolitan Museum, all in New York, and abroad. He received an honorary Doctorate of Arts from Bowdoin in 1997. He currently teaches at the Massachusetts College of Art and Design. Last year, a documentary about his life, "Shadow of the House," premiered in Boston.

He is best known for a process called nera obscura—Latin for "dark chamber." It involves covering all the windows of a box or room with dark plastic. He then makes a small hole, half an inch in diameter, which produces an upside down image of the outside into the room or box. The development process takes between six and eight hours and results in a clear picture on the wall of the room or box opposite the hole.

Currently, he is creating camera obscura photographs in color and reversing images so that they are now right-

"Color changes everything," Morell said. "The idea of the world looks more like the real thing. The whole thing is becoming a little more naturalistic. It looks more normal in a way but is still quite

Morell has also started scanning his negative film, which allows him to print large as four by five feet. Many of these prints are on display at his latest show in New York at the Bonni Benrubi Gallery. It includes a picture of Central Park that

Morell is now waiting for fall to set in at the park so that he can take another picture from the same perspective.

"I'm waiting for the colors to change so I can do the same apartment in the fall, then the winter, then the spring," he

Monet's serial paintings of the Rouen Cathedral inspired Morell to undertake the project.

One subject can say many things depending on the weather and time,

The show in New York also features Morell's photographs of money-much of which he traveled to a Swiss bank to photograph. In one image, he photographed gold bars worth \$79 million.

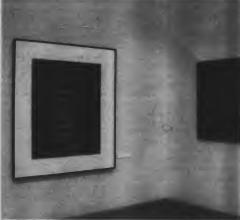

It's interesting to portray the fantasy in photography, the tactile thing," he

The next set of pictures in the show comprise his work as an artist-in-residence at the Yale University Art Gallery.

"They asked me to react to the place," he said

Morell was interested in the idea of art being photographed, and in some cases, asked the curators to move sculptures closer to paintings so that the two pieces looked as if they are part of the same work when he photographed them.

Finally, Morell created cliché verre, or "glass picture," prints. Cliché verre was a method developed in the 1850s by artists after photography was invented.

IN THE EYE OF THE BEHOLDER: Abelardo Morell's photography hangs in Daggett Lounge

"I thought I'd update it a little," Morell said. He covered glass with ink that, when it dried, cracked in abnormal

"Once it dried, I carved out the shape of the continents" he said. "The next process was to take that glass thing and in the dark room, sandwich it with photographic film so I can get a negative of that glass. Once I get that negative, what I print becomes a positive."

Assistant Professor of Art Michael Kolster met Morell at the Massachusetts College of Art and Design during the early 1990s and has been a friend and

"The purpose of a liberal arts education is to view a variety of subjects through different lenses and look for possible connections between them. I think Abe's work is an exemplar of that kind of thinking," he said. "He doesn't have preformed ideas but he has an extremely rich engagement with his process.

According to McKee, the process is innate in Morell's being.

"It's in his nature to see things, to notice things—things which many of us overlook."

WBOR 91.1 FM

DJs OF THE WEEK

Maggie Brenner '10 and Alyssa Phanitdasack '10

If you could only listen to one album for the rest of your life, what would it be?

MB: Spoon's "Kill The Moonlight," followed by a close second of The National's "Boxer."

AP: Alanis Morissette's "Jagged Little Pill."

Favorite song to dance/rock out to when you think no one's

watching?

MB: "Toxic" by Britney. It never gets old.

"You're Unbelievable" by E.M.F. and "The Rockafeller Skank" by Fatboy Slim.

If you were in a band, what would it be called and what kind sic would you play?

MB: The Half Sours. It would be the love child of Of Montreal and War.

AP: I'm in an air cover band called Blink 5. We're reinventing the genre.

Theme song during Ivies?

MB: "In the Summertime" by Mungo Jerry.
AP: "The Lovecats" by The Cure, "Electric Feel" by MGMT,
and "La Vie en Rose" by Louis Armstrong.

If you could meet any musician, dead or alive, who would it

MB: Nico. She was connected to such a crazy group of peo-ple with The Factory and The Velvet Underground. Or maybe Elliott Smith so we could sort out his whole "suicide."

AP: Dylan, because he spits hot fire. Best new music you've heard lately?

MB: Gossip. I saw them this summ er. The lead singer was totally crazy, but still amazing.

AP: Fleet Foxes. They're brilliant.

If you could time travel back to any musical period, where would you go and why?

MB: Absolutely late '60s and '70s. Woodstock. Then I could make the jump from classic rock to Arena Rock, besides the

clothes and political angst.

AP: Probably the late '60s and early '70s. I'd lie on the grass, we some lemonade, and listen to music when the price of admission wasn't absurd.

Bands/musicans who have most influenced your musical

MB: TV On the Radio, Arcade Fire, Wolf Parade, Feist, Elliott Smith, Cloud Cult.

AP: The Beatles, The Strokes, Simon and Garfunkel, Jobim, Gilberto, Getz, The Cure, Belle and Sebastian, Bob Dylan, and the soundtracks to all of Wes Anderson's films.

"Burner and Skip Hour Mystery" with Maggie and Alyssa airs Thursdays from 2-3 p.m. on WBOR 91.1 FM.

Lecture presents women's role in Soviet and post-Soviet eras

BY ANDY BERNARD CONTRIBUTOR

Professor Jane Knox-Voina, chair of the Russian Department, and Gulnara Abikeeva, a leading film critic in Kazakhstan, hosted a presentation about visual media portrayals of the iconic Soviet and post-Soviet woman on Wednesday night. The presentation covered photography, painting, and film of the 20th century that worked both as manipulated propaganda and as enlightening documentary in shaping the heroic Soviet woman

Knox-Voina kicked things off with segments of a film by Russ ian Sergei Eisenstein in which he traveled to Mexico to show the post-Aztec Mexican "soldaderas," the wives of soldiers who, according to Eisenstein, "were to be to [the Soviets] a symbol of Mexico itself." Eisenstein was one of the first to transfer the idea of heroic women who were supportive, motherly, and strong-ofronger than the men thems back from Mexico to the Soviet Union.

While the old cultures [Aztec and Soviet] celebrated death, the new Soviet society as well as the new Mexican society would be aimed at life, the future,"

Knox-Voina also flashed images such as a reinterpreted Soviet version of the more androgynous, happy, and full of color than earlier Madonnas which were portrayed as sad, delicate; were often saturated with the three primary colors: blue to symbolize hope, red for energy, and yellow for vitality of

"The new culture stressed happiness rather than suffering," Knox-Voina said. "The Soviets took the [Madonna] and twisted it to make a new kind of

She summed up the newly acquired power of Soviet women by recounting a game played by Soviet men and women of the time in which "the man tried to catch the woman, but if he failed, the woman, armed with a whip, had a chance to come back around and whip

Abikeeva took the stage next and began by showing part of a 1975 Uzbek film entitled "The Veil," which, through the juxtaposition of veiled and unveiled women, illustrated the profound effect that the garment had on the mentality and image of Soviet women.

Abikeeva stressed the significant role that early films depicting strong Soviet women played, on the national level and beyond.

"Images of women and the family became like the stones, building the na tion," she said.

Earlier films, however, were limited propaganda material. Although the films improved women's media image, they presented too idealized of an in oviet women soon realized that being heroic in the areas of work, home, and motherhood was not as easy and glamorous as popular films depicted.

The presentation was the first of a four-part series, "Visual Reconstruction of Citizens and Nations Through Art: Mexico, Kazakhstan, and Siberia, which lasts from November 5-9.

Tonight, the Oscar-nominated film "Mongol" will show at 7 p.m. at Smith Auditorium in Sills Hall. On Sunday, the Khatylaev duo from the Republic of Sakha will perform "The Art of Magnificent Siberian Music" at 1:30 p.m. in the Studzinski Recital Hall at Kanbar

Sedaris lacks usual laughs

THE BOOK
NOOK
BY FRANCES MILLIKEN
COLUMNIST

David Sedaris's essays about life in France and the various bruises he acquired from the language in "Me Talk Pretty One Day" have established him as a renowned comic and have sent his readers into ferocious bouts of laughter. However, Sedaris's most recent collection, "When You Are Engulfed in Flames," did not always have me rolling on the floor.

Readers of "The New Yorker" might be familiar with many of the pieces in this collection. They revisit the impeccable landscape of France: the food, the language, and the strange encounters Sedaris manages to collect. Hugh, Sedaris's partner of many years, makes frequent appearances and, as always, appears almost perfect. Hugh is an excellent cook, a wonderful host, and a levelheaded foil for his anxious partner's irrational fears and peccadilloes.

Despite the recurrent presence of Hugh and a variety of other characters, it is through David that the reader views the world. His eye is sharp, and his wit is often biting. Sedaris unflinchingly delves into the darkness of family and extracts the comedy—a strategy that has elicited some familial backlash. It is interesting to consider what inspires this approach to the world in Sedaris.

The shadows behind the comedy of his family are clear in some of his earlier work, but there are fewer anecdotes about the Sedaris family in this collection. I admit this was some-

thing of a relief. In his last collection, "Dress Your Family in Corduroy and Denim," the essays were often hard to read. Making mincemeat of your family for laughs is ethically questionable and at times the reader felt implicated in the pleasure derived from the jabs at Sedari's caricatured family

This collection focuses more on Sedaris's own adventures. He relives and jokes about the time of shoddy apartments after college, coming out, and his various addictions in a candid, off-hand manner. The butt of the joke is more often Sedaris than not, and he seems to have developed an ability to view himself without the lens of his family.

Sedaris deals in punchy sentences and even the most grotesque scenes are described without fanfare. He clings to comedy, though he is capable of sentiment, and at moments his essays take a surprisingly moving turn. The essays in "When You Are En-

gulfed in Flames" are fairly short, perhaps because they have made previous appearances in magazines. The triumph of the book is the final piece, "The Smoking Section," in which Sedaris travels to Tokyo to quit smoking. Cigarettes are almost as ubiquitous in Sedaris's work as laughs, and his riddance of the vice involves an abundance of hilarious exchanges. Sedaris hypothesizes that one needs to start fresh in order to eliminate a habit like smoking, but he speaks even less Japanese than he does French and tu out to be a particularly awful student. Though the earlier stories roused me to an occasional grin, it was only this last piece that had me chortling in public, wishing the story would never

'Zack and Miri' explores concepts of sex

STAFF WRITER

These days, everyone is struggling to make ends meet. Zack and Miri, two best friends who have known each other since first grade, are having just as much trouble as everyone else in the film "Zack and Miri Make a Porno."

First, the water in their apartment goes off, then the power, and barring any really creative and exotic moneymaking schemes, their apartment will no longer be theirs.

However, a creative and exotic moneymaking scheme is exactly what Zack comes up with: He and Miri can make a porno!

So Zack (Seth Rogen) and Miri (Elizabeth Banks) do just that. Along with a couple of female strippers, two young men with "special talents," the camera-weilding goalie on Zack's hockey team, and Delaney (who you will recognize as Darryl Philbin from "The Office"), the duo begin to make a porno using "Star Wars" as their inspiration; you can imagine the shenanigans that ensued.

However, these original plans get foiled and Zack is again convinced of his failure as a human being because he can't even make a porno. However, while sitting with the rest of his dejected cast and crew in the coffee shop where he works, Zack comes up with a brilliant plan to make the movie there with a cappuccino storyline.

After a hastily written script, the porno project is up and running again.

The conflict in the story is apparent from the title and opening scenes. Zack and Miri are best friends and have long lived in peaceful cohabitation without romantic relations of any kind. Now, in order to produce their movie, they have to have sex together for the first time.

Zack reassures Miri that it's "just sex," like "the kind you'd have with a stranger from a bar that you bring home." But the filmmakers subtly alert the viewer that it won't be "just sex" like the rest of the characters are having in front of that handheld camcorder. When Zack and Miri make their debut in front of their co-stars, the music and mood change and it's a scene that you would expect in a movie like "Titanic," rather than in a Seth Rogen film.

"Zack and Miri Make a Porno" is very explicit, as the title would suggest. If you are going to watch this movie, you must understand that its barely passable "R" rating was earned only after the directors had made significant cuts.

Beyond this though, the movie

is a funny and poignant mix of friendship, love, and sex, with a couple of potty-humor scenes thrown in for an extra laugh (and you will laugh).

Seth Rogen and Elizabeth Banks do an excellent job in the title roles, mastering their transition from friendship to "something else" as the movie progresses.

The other characters provide a funny background for Zack and Miri's story. The interactions between these other characters and the scenes with Zack and Miri also expertly highlight the difference between having sex and making love.

A friend, who I went to see the movie with, said that she thought Zack and Miri would be the perfect date movie: "You have the dirty stuff for the guys and the heartwarming romance for the girls."

While I don't quite think that Zack and Miri would be your best bet for a date, I do think it's a great movie to see.

I can guarantee you'll never think of Starbucks the same way again.

SPORTS

Win over Bobcats places field hockey in semifinals

BY KATHERINE POKRASS

This past week's field hockey action featured both a regular-season heartbreaker and a decisive postsea-

The field hockey team fell short in its game against Tufts, losing the right to host the NESCAC Championships. However, the team's first-round victory over Bates in the NESCAC tournament was critical to jump-starting the team's postseason journey.

journey.

The Polar Bears came out strong for their NESCAC quarterfinal game against Bates last Sunday. Kara Kelley '10 drove a shot into the back of the cage off a penalty corner from Leah Ferenc '09 and Kristen Veiga '09 just 2-06 into the game.

To keep the momentum with Bowdoin, Madeleine McQueeney '09 slammed home a rebound 47

Shavonne Lord '10 netted the third unanswered Polar Bear goal from Julia King '09 at 21:46 of the first half. Waiting at the left post, Lord was the final recipient of a string of nifty short-distance passes between Megan McCullough '10, Lindsay McNamara '09, and King that left the Bates defense confused and out of position.

However, the Bobcats refused to go into halftime quietly. Morgan Maciewicz was able to sneak a deflection into the cage from Annie Wilson at 20:00 for the first Bates goal.

The Bobcats also started the scoring off in the second half when Abby Childs '09 scored off a pass from Jenna Dannis '12 during a penalty corner opportunity at 22:09.

While Bates was able to pull within one tally of the Polar Bears, both McNamara and Lord were able to find the back of the cage behind the Bobcats goalkeeper. Both goals, scored in the last 15 minutes of the game, came off of assists from Kate Gormley '09.

The 5-2 victory earned Bowdoin a trip to Medford, Massachusetts, to play in the NESCAC semifinals on Saturday afternoon against Middlebury. A win against the Panthers

would mean the Polar Bears play for the NESCAC championship on Sunday

The last game of the regular season was a fast-paced nail-biter down to the final whistle. The No. 1 spot in the NESCAC and the right to host the championships was on the line in last Friday's game against the lumbos.

Again Bowdoin was rewarded for starting the game with intensity as Lord tipped a rocket of a shot from King past the Tufts goaltender at 29:11 of the first half.

The Jumbos responded with three goals to put the Polar Bears at a two-goal deficit with 3:57 remaining in the half.

Gormley ignited the Polar Bear bench and cut the Tufts lead in half when she buried a pass from King inside the left post with 2:16 remaining before halftime.

Roxanne Tully extended the Tufts lead by scoring its fourth goal of the contest after collecting a pass in her defensive end and charging down the left side of the field for the shot 12 minutes into the second half.

Bowdoin played hard for the rest of the game but was only able to net one more goal before time ran out. King converted on a penalty corner opportunity from the lower left side of the scoring circle off the pass from Veiga at 28:06 of the second half.

The 4-3 loss placed the Polar Bears in second place heading into the first round of the NESCAC playoffs.

The Bears now look to their Panther foes on Saturday. In regular season play Bowdoin defeated the Panthers 2-0, with both goals coming from McNamara.

"The NESCAC tournament is always exciting and competitive, especially this year because all four of the teams are in the top ten of the national poll," said McNamara. "We are definitely focused on Middlebury and look forward to putting together our best 70 minutes of the season."

With a victory on Saturday, the Polar Bears will advance to the championship game on Sunday and face the winner of the Trinity-Tufts match in hopes of capturing their fourth straight NESCAC title.

EVERYDAY I'M HUSTLIN': Senior defender Alex Von Gerichten races a Tufts opponent to a ball in the Bears quarterfinal win on Sunday.

Aceto kicks soccer into semis

BY AILEEN TSCHIDERER STAFF WRITER

As Christina Aceto '11 lined up for the penalty kick that could lead the her team to the NESCAC semifinals, adrenaline rushed to her head. Nonetheless, Aceto settled herself and cooly buried the ball in the bottom left corner of the net. Her shot is sending her and the rest of the women's soccer team to next round of the tournament, battling No. 1 Williams. But their road to victory has not been smooth.

The roller coaster ride began Friday, when then No. 4 Bowdoin took on No. 5 Tufts in the last game of the regular season. Both the Polar Bears and the Jumbos looked to win in order to have home-field advantage entering the upcoming playoffs.

The first half of play demonstrated the passion of each team, with the ball penetrating the deep corners of both sides' defense. Finally, in the 34th minute, Celeste Swain '12 volleyed a serve, courtesy of Ellery Gould '12, past the Tufts keeper and into the lower right corner of the goal.

Although Tufts outshot the Bears 7-3

Although Tufts outshot the Bears 7-3 in the first half, Bowdoin still held their 1-0 lead at halftime. Unfortunately for the Bears, Bowdoin's intensity dropped significantly in the second half of play, according to Swain. Barely 15 minutes into the second half, the Jumbos scored. The ball eluded keeper Kelly Thomas '09, as it ricocheted off the post and was sent to the back of the net by a Tufts forward who was ready in the center of the goal box. With the score tied 1-1, the Jumbos wasted no time, and just three minutes later, they struck again, capitalizing on a breakaway shot. Bowdoin failed to recover and fell 2-1.

The loss robbed the team of the chance to play at home, but it ignited the fire of revenge in the Bowdoin women. They were determined as they entered Sunday's playoff game at Tufts's Kraft Field.

"We really wanted to win," Swain said.
"We knew we could beat them."

Although Tufts outshot Bowdoin 24-8, the Polar Bears drew the Jumbos into double overtime and after 110 minutes of scoreless play, into penalty kicks.

A first-round shot by Lynne Tempest '09 glanced off the post and just barely fell wide of the goal. Tufts, however, was able to net their first attempt and took the lead. Swain scored on her next shot and keeper Thomas saved the second Tufts effort. Both teams scored on their third attempts and, with the score even at 2-2, Gould was able to give Bowdoin the 3-2 advantage.

Tufts sent its next shot high and then came Aceto, who buried not only her shot but Tufts's hopes, as she advanced the Polar Bears to the NESCAC Final Four

For her efforts during both regular play and the penalty kicks, Thomas was named the NESCAC Player of the Week. She had a career-high 15 saves in Sunday's game. Thomas averages 6.15 saves per game and has a .913 save percentage. She leads all NESCAC keepers in minutes played.

The next playoff game will be held tomorrow and will undoubtedly prove to be a challenge for the Polar Bears. The team will face tournament host Williams, who boasts an 8-0-1 record on the season. In preparing for their future, Bowdoin must again overcome their past: The team faced the Ephs in last year's final round but fell 4-0.

"We know they are ranked No. 1 in the nation, but we also know we can play well against them," Swain said.

No. 2-seeded Amherst will face No. 3-seeded Middlebury and the semi-final winners will advance to the championship on Sunday, November 9.

Men's soccer falls 3-0 in first round

BY EREN MUNIR STAFF WRITER

This time of year is difficult for fall-season athletes at Bowdoin. It is a time of transition into the unknown. For many, the playoffs bring a particular sense of urgency, a need to continue with their campaign.

The men's soccer team went into Sunday's game against top-seeded Middlebury as the eighth seed in the NESCAC playoffs, an unenviable position, considering Middlebury's title as reigning NESCAC and Division III champions.

The Panthers scored early and

often, with two goals in the first 30 minutes of play and a third before the end of the first half. The quick start did not dampen the spirits of the Polar Bears though, as the players ignored all of the signals and continued to fight until the end. "The team's showed their resilence in the second half. Peter Mills '09 and Sean Bishop '12 led the team with two shots on goal each, helping the Bears hold a 7-5 lead in shots on goal in the second half.

However, the increased offense was not enough to pull out a victory and move on to the semifinals. Bowdoin left Middlebury with a 3-0 loss and the five seniors had the

long bus ride home to think about the end of an era.

Despite the loss of five graduting seniors—Harry Ashforth, Dominic Fitzpatrick. Chris Hickey, Mills, and Bendan Mooney—the team can be confident about the prospects of next year's edition.

Coach Fran O'Leary is blessed to welcome back mainstays in the starting 11: Players like Ben Denton Schneider '11, Tom Wakefield '10, Tim Prior '11, Eddie Jones '12, and Dan Hicks '11 give the Polar Bears a solid base to 'grow from. Next year, they will surely look to avoid the types of losses that plagued their season this year.

SHOTGUN: The offensive line sets up during the Polar Bears' 55-14 win over Bates last Saturday.

FOOTBALL CONTINUED FROM PAGE 1

Tomorrow's game will be the last for the Bowdoin seniors. When they were first-years in 2005, the team finished 6-2, but has won only eight games since. In light of this record, they especially hope to end their career with a win.

The game on Saturday is, for us seniors, the most important game we have played in during our col-lege career," Dingess said. "It will define our career as either a success or a failure."

Last Saturday's convincing 55-14 thrashing of the Bobcats put Bowdoin in a position to win the CBB.

Deadlocked at seven halfway through the first quarter after a score by sophomore running back James Lathrop early in the frame, the Polar Bears ripped off 35 straight points to put the game out of reach of the Bobcats.

Junior quarterback Oliver Kell scored on a seven-yard touchdown run and also tossed a 53-yard scoring strike to senior quad-captain Tim Kelleher. Junior running back Nick Tom scored twice on 18-yard and 31-yard runs, and first year Ian Vieira plunged in for a threeyard score. Senior Nolan McNair added two fourth-quarter field goals to cap the scoring for the home team

Kell finished 14-23 with 254 yards through the air and led Bowdoin to 595 yards of total offense, just five yards shy of the school record. Juniors Kevin Zikaras and Tyler Tennant and senior Ben Shulman paced the defensive unit with six tackles each. The defense held Bates to only 178 total yards of offense.

McNair also won NESCAC

Special Teams Player of the Week honors for his efforts as kicker and punter. He was a perfect 7-for-7 on extra points and hit field goals of 20 and 32 yards, scoring 13 points, a school record.

"Our entire team played great," Spaulding said. "In a game like that you can't highlight just one person because it was a huge team effort."

"It was going well and just kept getting batter—it snowballed," Head Coach Dave Caputi said. "We jut fed off each other's confidence and kept rolling."

The Polar Bears hope to turn some of that momentum into a win against Colby tomorrow.

Playing in the Colby-Bowdoin rivalry, I think we're fairly lucky to finish the season with our own playoffs," Caputi said. "The games against Bates and Colby always have great value in ending the season on a strong note."

Women's XC finishes 7th at NESCAC Championship

As the Polar Bears started on the 2008 NESCAC Cross-Country Championship trail last Saturday morning, they passed the third mile marker grinning confidently.

The Bears had come to Bates home course, Pineland Farms in New Gloucester, the previous weekend in preparation for the race. Pineland Farms had also been the site of the 2007 Maine State Championship 5K course.
The NESCAC Championship,

however, marks the point in the season at which races increase to six kilometers.

Having scouted out the new course, Bowdoin knew that their competitors were in for a surprise at mile three: a long, gradual, cline with no relief until the final 400 meters of the race.

"We had such an advantage by knowing the course well beforehand," said co-captain Courtney Martin '09. "We knew runners would be falling back that last

The Bears used this knowledge to their advantage as they ran the

The women placed sixth overall, just nine points behind fourth place finisher Tufts, and only five points behind fifth place team Amherst—the 2007 NCAA Division III Champions.

The NESCAC is a notorious

powerhouse of Division III women's cross country, with Middle-bury boasting four NCAA titles in the last eight years, and Williams

Knowing the fierce competition they faced, the Bears resisted the urge to be swept into an aggressive first mile by the rest of the field, saving their energies for a strong

In the last mile of the race, the women passed several runners each, shaving points off the team

Annie Monjar '09 crossed the finish line first for the Bears, taking fourth place to earn All-NES-CAC honors.

Christina Argueta '11 came in 22nd overall, Martin in 36th and Lindsey Schickner '09 in 42nd, with Grace Kerr '11-rounding off the scoring team in 49th.

Anna Ackerman '12 and Holly Jacobson '11 completed the top 7 finishers, placing 60th and 63rd, respectively.

Christina Argueta had a great race," Head Coach Peter Slovenski said. "She passed eight runners in the last mile. She always had a lot of endurance, but she is showing some very good speed, too."

In addition to Argueta, Schick-ner and Kerr also had breakthrough races on the torturous

Their places helped accomplish the team's goal of having five runners in the top 50, and bode well for the Division III New England Regional meet on November 15.

The meet will determine whether or not the Bears will be able to receive a bid to compete at the NCAA Division III Championships on November 22. Having made the trip last year, Bowdoin is determined to repeat the perfor-

Rugby's first loss comes in NERFU final

BY CHARLOTTE RYAN STAFF WRITER

Women's rugby saw its fall season come to an end last Sunday with an 8-0 loss to Stonehill College in the NERFU (New England Rugby Football Union) Division II tournament finals. The loss dashed the squad's hopes of making it to the Northeast Regionals.

Bowdoin hosted the tournament last weekend, where they beat UVM 17-0 on Saturday before falling to Stonehill. Although the top two teams advance to the Northeast Regionals, the second spot is decided by point differential.

The team needed to lose to Stonehill by less than six points in order to qualify for the postseason tourna-

"Defense won the UVM game for us," Head Coach MaryBeth Mathews

In the beginning of the game, Anna Nicol '11 fielded a kick and with lots of speed ran it down, but before she could hit the end zone she pulled her hamstring, which put her out of commission for the rest of the

Forward Danielle Carniaux '10 scored the first try by supporting the back line, which created an overlap, allowing her to touch it down in the corner. The kick was not converted.

Becky Stevens '11 recovered the

ball off of a scrappy play, snuck around the base of the ruck and brought the score to 10-0 before half

"As good as UVM was they never really looked to threaten us and our defense just kept taking away their momentum." Mathews said.

Carolyn Levin '11 took a pass from Hannah Larson '10 from the outside of the back line and sprinted 60 meters into the end zone. Stevens made the conversion shutting out UVM 17-0

Nylea Bivins' 12 had a particularly good game.

"She was all over the field, made good tackles, set up well defensively, and popped up in places she was needed. For a rookie she had a great season," Mathews said.

Bowdoin went into the final with two big setbacks. Both Nicol and Levin couldn't play due to injuries. "To start the championship final without those two was tough—they're hard to replace," Mathews

Stonehill played a quick continuous game and Bowdoin's game plan-was to slow down their game and interrupt their possession

Stonehill got ahead late in the first half. In a scrum five meters from the Bowdoin end zone the ball was kicked out of the scrum into our end zone. When a Stonehill player jumped on the ball, Stonehill took the lead, 5-0.

With nine minutes left in the game, a penalty was called on Bowdoin, allowing Stonehill to score on a pen-alty kick, making it 8-0. This ended the Polar Bear's hopes of making it to the Northeast Regional tourna-

After the penalty Bowdoin was also forced to play a man down for 10 minutes. Even while outnumbered, Bowdoin kept Stonehill from

They had the best total defensive performance I've ever seen in rugby and they should be proud," Gary Devoe, USA Level 1 Referee said of Bowdoin's performance. "They never gave up and kept up the relentless defensive pressure, hitting the tackles and rucks with a ferocity I've rarely seen at any level. It's too bad only two teams go through, because on balance I think that Bowdoin was the second best team last weekend."

Stevens was selected as Most Valuable Back for the tournament by referees and tournament administrators. Unfortunately, in the last 10 seconds of the Stonehill final game, Stevens tore her ACL.

The team finished its regular season having only given up 35 points. "There was a spirit about the team that was special. They played for each other and for the love of the game; they should be very proud of themselves," Mathews said.

Sailing finishes mid-fleet at two regattas in Boston

BY CAITLIN BEACH

The Charles River can either be a sailor's best friend or his worst nightmare: Its shifting, fickle winds create tough conditions that are sometimes reward-ing, but nearly always challenging. Bowdoin sailing grappled with light

and shifty weather on the Charles at MIT and Harvard this past weekend, ultimately finishing mid-fleet at both

The women's team sailed to a 12th place finish out of a fleet of 17 at the Victorian Coffee Urn Regatta

Harvard University played host to is Atlantic Coast Championship (ACC) qualifying event. In the A-division, the team of Doria Cole '09 and Laura Heyl '10 finished in 11th, two points behind top-ranked Boston Col-

In the B-division, Charlotte Williams '10 and Erin Taylor '09 put up a similar performance, finishing in 12th place.

Over the course of the two days, the women were able to surge ahead of nationally ranked teams, including Old Dominion, Coast Guard, and Dart-

Additionally, the team's performance at the Urn enabled Bowdoin to rise to a No. 12 spot in the weekly New Engollegiate Sailing Associatio

Nearby, a group of co-ed Bowdoin ilors competed in FJs and Techs at the

Erwin Schell Trophy at MIT.

The team of Viktor Bolmgren '11, Coco Sprague '11, Pete Wadden '09, Meredith Steck '09, and Alex Takata '12 struggled at the Schell, finishing a disappointing 17th out of 18 teams after the first day of competition.

"Saturday was a tough day for the co-ed team," said Head Coach Frank Pizzo. "The breeze was very light and spotty out of the north, which made sailing

However, a strong performance on Sunday under more consistent breeze enabled the team to rise to a 14th place finish overall.

Bolmgren and Sprague finished 14th in the A-division, while Wadden, Takata, and Steck placed 15th in B.

"That 14th place spot is where we want to finish in overall rankings," said

Bowdoin sailing faces a busy schedule of competition this upcoming

The co-ed team will travel to Newport, R.I. for the Rhode Island State Championships at Salve Regina, while the women's team will compete in the Horn Trophy, a team race at Harvard.

The co-ed team will also travel to MIT to compete at a Saturday invitational as

to compete at a Saturday invitational as well as a Sunday Crew's Regatta. Additionally, the Polar Bears will send an another squad to compete in 420s and Ynglings at the non-collegiate Leafer's Regatta, held at Sail Maine in

Volleyball set for playoffs

After a challenging weekend, wom-en's volleyball will enter this weekend's NESCAC conference tournament as the No. 7 seed.

Last weekend, the Polar Bears finished 1-2, with a victory over Hamilton but losses to Middlebury and Williams The games took place as part of a NE-SCAC meet hosted by Colby. Bowdoin began the meet with the Friday night face-off against Middlebury. The Po-lar Bears held their own throughout the match, finishing the three sets with close scores of 25-23, 25-17, and 25-22. Even though these scores culminated in a 3-0 Middlebury win, the Bears had their moments of triumph. Kristin Hanczor '12 led the offense with 11 kills, while Gillian Page '10 came in right behind her with 9 kills. Jenna Diggs '10 supported the offense with a team-high 26 assists while additionally contributing 17 digs.

In the morning match against Williams on Saturday, Bowdoin fared slightly more successfully as it managed to snag the first set at 25-22. However. the Ephs came back with a vengeance to sweep the next and final three sets with increasingly decisive scores of 25-18, 25-15, and 25-13. Page and Hanczor built on their momentum from the previous night by posting a respective 12 and 11 kills off of Diggs' 34 assists. Defensively, Skye Lawrence '10 estab-lished the second team-high statistic of

the weekend with 18 digs.

But the Bears were able to transfer their frustrations into effective and dominating play against Hamilton in Hanczor, and Diggs were once more key figures in leading the team to a 3-0 sweep of the Continentals. Page continued to dominate with 13 kills against Hamilton; Hanczor again notched 11. Diggs persisted with a valuable 27 assists and 9 digs while also contributing

The Hamilton win, however, did little to comfort the Bears.

"Going 1-2 for the weekend was disappointing for the team," Head Coach Karen Corey said. "We have been playing at a high level of volleyball but lack confidence against the 'traditionally' strong programs."

Williams volleyball took the 2007 NESCAC Championship title. Gina Lonati '12 recognized the sig-

nificance of statistics and records, but said that it was important to focus or the greater significance of successful team play in the coming matches.

"It's finally time to show how hard we've worked and improved," she said. We're going to go out this weekend without thinking about other teams records, ranks, or reputations and we're going to play our game, and end the with hard work, determination, cohesiveness, and energy during the playoffs."

We have a very talented group of players, and if we can get our mental ne under control, we will rival the best in the region," Corey said.

The Bears have the chance to do so this weekend against No. 2-seeded Wesleyan in the opening round of the 2008 NESCAC Tournament. The match will take place today at Tufts, the host for the tournament, at 5 p.m.

Hatton leads men's XC to seventh

Bears need to push at regionals to qualify for **NCAA** Championships

> BY NATHER? ORIENT STAFF

Behind strong performances by sophomore Colman Hatton and senior Scot McFarlane, the men's cross-country team took seventh at the 2008 NESCAC championships.

On a hilly 8K course at Pineland Farms in New Gloucester, Hatton ran to 16th place, with a time of 26:23. McFarlane was just behind at 26:37 in 25th place.

Competing without one of its top runners, Thompson Ogilvie '10, the team relied on its depth to place ahead of rival Maine schools

Bates and Colby.

A group of three Polar Bears—
Colin Ogilvie '12 and sophomores Sam Epstein and Charlie Berdahl-

worked together throughout the race, taking 40th, 45th, and 50th places, respectively. Stan Berkow '11 followed up in 68th place.

The team now looks to regionals, which will be held at Williams on November 15.

A strong result there would qualify either the entire team or top individual finishers for NCAA Division III championships, held at Hanover College in Indiana on November 22.

The A-Wall Curse

COLUMN LIKE I SEE 'EM BY CHRIS ADAMS-WALL COLUMNIST

While I do not claim to be an eminent predictor by any means (I'm pretty sure I picked the Mets to win the World Series this year), I do not consider myself to be an abomination to the field either (I'm pretty sure the title of one of my article's last year was "Why the Giants will win Super Bowl XLII"). However, when it comes to forecasting the NBA's regular/postseasons, for whatever reason, I struggle mercilessly. Just before I started writing this week's column. I went back in time-to the Orient archives, that -to assess my two-year basketballprediction portfolio.

And inexplicably, I discovered that I have a very big subconscious (although clearly quite conscious) crush on the Milwaukee Bucks. In my first year, I wrote that Michael Redd would win the scoring title and MVP (Michael Redd?), and last year wrote that the Bucks would be a dark horse (a horse?). But don't worry-I won't let my secret infatuation with them somehow seep into this year's issue. Mostly, because like the rest of my NBA predictions, they hardly ever come to fruition: "Kobe will be traded to the Wizards," "Ray Allen will get MVP," "The Suns will win the Finals," to name a few of the less embarrass-

But this year is different; this year the sports gods have given me a break. Had I been at Bowdoin this semester and remained a weekly columnist, I would have probably written this ar-ticle last week and stuffed it with each and every one of my fantastical prophecies. But you see, because I am in Spain, I only have to write one article every two weeks, which gives me ample time to discern the news I acquire via ESPN.com, and still formulate my sometimes nonsensical opinions.

Luckily for me, this season has already tipped off, so any preconceived notions that I had coming into this year (Greg Oden will be an unstoppable BEAST!) were immediately vanquished on opening night. Therefore, there is absolutely no reason as to why all 10 of these predictions below shouldn't come true. Except, of course, when you consider who's mak-

10. The Celtics won't repeat.

Oh, cry me a river, Boston. To be sure, last year was incredible. I remember. You remember. We all remember. But each of the Big Three are a year older, they've lost some of their cohe siveness in sharpshooter James Posey, and they will run up against resurgent foes that will be more determined to beat them than ever before (You think LeBron won't want a little revenge?).

They are still my favorite to win the owever, and even though back to-back Finals appearances would drive me crazier than the first five des of "The Office" this seasons, watching their starting lineup intro-duction rerun with "Ayo Technology" blasting in the background is enough to appease any fan. That is, until it

9. Marc Gasol will win Rookie of

In just his fourth professional game Gasol exploded for 27 points and 16 rebounds with 3 blocks in a 90-79 win over the Warriors. The 7'1", 265 lb. center is already starting for a team that is has created the illusion that his bro Pau never actually left the club.

8. New sounds in Salt Lake and

The Jazz and Hornets and their respective front offices figured out three or four years ago the recipe for success in the modern game: having an intelligent, pass-first point guard who can run, combined with athletic big men, who, too, can run... it also helps to have a shooter, which both clubs now have in Kyle Korver and James Posey. Of course, these two teams live and breathe under the leadership of Deron Williams and Chris Paul, who have become arguably the best two point guards in the game, not to menon the hungriest for success. Expect Utah and New Orleans to take a giant step forward into the ranks of the elite this season...if they haven't already

7. Al Jefferson will become a house hold name.

Here's something I'm now ashamed to admit: I never thought that Jefferson would ever amount to much. He just seemed so incredibly average in his days with the Celtics, that when he was shipped off to Minneapolis in the KG trade, I don't think I expected to hear his name again anytime soon (I mean, how many players went to Minny in that deal? Nine?). How

AJ is becoming one of the most versatile power forwards in the league, and he's still only 23 years old. One columnist even had him inside his top 25 players list, and with numbers like 22.3 and 12.3 (1.5 blocks, too), I don't see how anyone could leave him off of any list. Maybe Kevin McHale knew was he was doing after all.

6. People will come to like the Oklahoma City logo.

I don't think I've ever heard more complaints about a sports insignia— but why? Do you know how hard it is to draw THUNDER?! I'll give you a blank piece of paper and some crayons so you can try your own hand at it for five minutes, and when you come back with a lightning bolt etched upon the page, I'll call you an idiot. Trust me: you'll learn to like the logo, because it was the best they could have done...idiot.

5. Richard Jefferson will be the missing piece in Milwaukee.

There's just something about those Milwaukee Buc-I mean...never

4. The Iverson experiment will fail Boy, Joe Dumars must really be sick of winning. Why else would he decide to give away the cornerstone of their franchise, Chauncey Billups, away for the worst teammate this side of Kobe

in Allen Iverson If anything has been clear throughout the former Hoya's Hall-of-Fame career, it is that very few, if any, can play alongside him. It's what first ran him out of Philly, and now Denver To be sure, Detroit will still make the playoffs, but won't be that same perennial threat in the spring that we are now so accustomed to seeing. For the Nuggets, this was a steal.

3. Amaré will win MVP. By far the most athletic big man in the league, the 25-year-old Stoudemire is only beginning to come into his prime. And with Shaq's presence to remove pressure down low, not to mention the lingering craftiness of veteran Steve Nash that will still create plays to run specifically through No. 1, the 2003 Rookie of the Year will earn his first MVP in just his seventh

2. The Spurs will win the Finals.

I was mistaken last year when I picked them, but that was only because did not take their championship-every-other-year pattern into account. I'm not quite sure how this team managed only one win in last year's Western Conference Finals against the Lakers (Let's be honest: Brent Barry was definitely fouled on that play), but rest assured, Gregg Popovich will have the league's most experienced squad even more prepared this time around. It will also help if Tony Parker continues to drop 55 a night; and if it wasn't before, his emblazonment on the cover of NBA Live 09 is now more

1. The Knicks will make the playoffs. You didn't think I could go a whole NBA preview without this one did you? The way Mike D'Antoni and Don-nie Walsh have handled the Stephon Marbury situation is both baffling and irresponsible. While I have never been a fan of the belligerent point guard, it does not take away from the fact that he is still the best player on the team. and he's not playing

Surely, New York has a much better chance of winning games with Starbury running the point, rather than Chris Duhon. But D'Antoni says he isn't playing for now, he's playing for the future. Well thanks a lot, Mike. I can't think of a more unfavorable decision. Who plays for now anyway? And ironically, Marbury has handled all of this with patience and class...class! I for one hope he starts playing again soon, but it really won't make a whole lot of difference as the Knicks will miss the playoffs once again. I almost miss Zeke...okay, that's a HUGE lie.

OPINION

BOWDOIN ORIENT

It's not over yet

hough election season seemed to drag on forever and campaigns turned nasty toward the end, there is no doubt that the 2008 election brought out the best in Bowdoin students. From those who rallied around a candidate more than a year ago to the masses that gathered to celebrate Barack Obama's victory on Tuesday night, this election has sparked a spirit of political engagement and activism on campus that we should be proud of.

In recent weeks, the Opinion pages of the Orient have been filled with election-related contributions from both students and professors. We've heard from conservatives, liberals, and moderates. Contributions have been frequent, and debate has been lively.

We've seen campus groups collaborate and participate in important conversations. We've argued with each other, but we've seldom squabbled. Students have gone out into communities across the state and country to work for causes they believed in. People have devoted hours, and even entire semesters, to volunteer for various campaigns.

And on Tuesday evening, we saw something truly spectacular: Twohundred students gathered on the Quad in a spontaneous rally.

Just because the election season is over, however, does not mean that we can relax—the real work is just beginning. Our country is stuck in a messy financial crisis, thousands of our peers are still at war in two far-off countries, and global warming threatens to destroy our environment.

Though many students have been involved and engaged over the last few months, a disturbing number have been out of touch over the last few years, disconnected from politics and current events. When politicians got us embroiled in foreign wars and infringed upon our individual rights, a few of us protested, but most of us stuck to our schoolwork, social lives, and sports.

Though the election of Barack Obama is a start, it will not bring about change by itself. Over the next four—or eight—years, it will be our responsibility to hold Obama to the promises he has made over the last two. Read the newspaper every day. Write letters to lawmakers. Work for a non-profit, or even for the government. Do your civic duty—it extends much further than simply casting a vote. We owe no less to our peers, ourselves, and our country.

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Mary Helen Miller, Cati Mitchell, and Nat Herz.

LETTERS TO THE EDITOR

Bowdoin experience worth cost to parent

To the Editors

I appreciated the editorial thank you ("Thank you," October 31), but you're right, we parents don't expect anything in return for our impover-ishment beyond the joy and thrill of watching you "become."

I fit on one end of the "education market spectrum" you identify, and I'm a very satisfied customer. I'm not buying a degree or a credential. I'm buying a process and an environment in which students are regularly challenged to produce their best efforts, often exceeding their self-imposed limits in the process, and in which thinking, questioning, growing, exploring, and experimenting are encouraged and facilitated. Bowdoin students appear to be fully engaged in this process and, despite your doubts, have quite a bit to show for themselves, including generally understanding their passions and their importance.

While many business majors are suddenly regretting the "waste" of their college years, your education will give you a head start in real life and will continue to pay dividends throughout your lives no matter what inevitable surprises the future holds. Go ahead, take guiltless advantage of the incredible opportunities available to you in class and out, and don't forget to have fun, too. You'll find your individual destinations, although it may take longer than you'd like. Just don't drink and drive along the way.

Sincerely, Jeff Bernfeld Parent '09

Obama's victory yields optimism and concern

To the Editors:

I too am optimistic about the future and excited at the prospects of having Barack Obama as the next president of the United States. Tuesday night represented the opening of a new chapter of history both in the U.S. and around the world. While now we have the difficult task of creating change instead of just talking about it, it's hard not to feel a sense that things are going to get better rather than worse in the com-

Perhaps the most important component of our republic is that we have, for the past several hundred years with one notable exception, tended to accept significant changes in power without violence or abandonment of the country. So to people who talked about leaving the States if Obama didn't win, keep in mind that you don't see Republicans talking about doing that. McCain graciously accepted defeat and the Republican Party is committed to working within the Obama presidency to advance their vision for the United States.

I am concerned, however, at the amount of responsibility we've placed in the hands of just one person and the fact that people's faith in government is restored by just one person. This is not to diminish the incredible ability of Obama to unite the nation, just to reflect that his ability to do just that resides in the strength of our form of government which didn't go anywhere over the past eight years. It's interesting that our campus feels it's acceptable to be patriotic today, but denounced our entire government and presidency just

last week. So as we look optimistically forward to the future, remember that it is where we stood on November 4 that allowed us to get there.

Sincerely, Ian Yaffe '09

Continue political activity post-election

To the Editors

Just last week, a group of student activists and myself were sitting at our weekly meeting, bemoaning the lack of action on this campus. Sure, people were vaguely concerned with the common good. Maybe they even participated in one of the many community service options available through the McKeen Center. But generally, some Bowdoin students have struck me as largely apathetic to many current critical socio-political, environmental, and economic issues.

Tuesday night I saw something different. I saw a fire in the student movement on this campus. After Senator Obama's victory speech, an intimate group gathered on the quad to celebrate this incredible moment in our nation's history. And I was struck: hundreds of students came to join us, to rally, to march and cheer, despite repeated threats from various authority figures. I want to thank you for sharing the most exciting mobilization I've ever seen from Bowdoin students.

I urge us all to hold onto this surge in political concern; don't let the momentum dissipate without some action. Pursue an issue, connect with a campus or local group, and keep this fire burning.

Sincerely, Shelley Barron '09

STUDENT SPEAK

What was your favorite part of the election?

Charles Meyer '11 "The debates."

Amie Corso '12
"Running around town in my socks screaming 'yes we can!"

Katherine Gribble '09
"The CNN holograms."

Isa Abney '11
"Watching Jesse Jackson cry."

Compiled by Piper Grosswendt

Alcohol policy and role of college houses hypocritical

College houses were introduced to Bowdoin as a replacement to fraternities, assuming the former fraternity roles both of providing housing to students but also of serving as a space for social gathering—including the social consumption of alcohol. The College's policy on this aspect of the House system is flawed.

While I am not privy to the inner workings of Residential Life or the motivations of its staff, I will propose two hypotheses that I expect are acceptable to the Bowdoin community at large and hopefully, Residential Life.

First premise: Students under the age of 21, and most importantly first-years, enjoy consuming alcoholic beverages and are going to consume them regardless of college alcohol policy.

Second premise: While the Col-lege cannot control whether or not idents choose to drink, it can reasonably influence the manner in which they drink and their safety while drinking by providing a nonexclusive, College-sponsored venue in which alcohol consumption can be controlled and monitored-for example, a college house.

While these two premises may seem easily acceptable, in stating them we have already run astray of college policy, which on the one hand "is committed to enhancing the development of responsible attitudes and behavior regarding the consumption of alcoholic beverages and to devising policies and providing the information education that will reduce dangerous drinking," but on the other hand states that "Bowdoin College students must comply with Maine state laws regarding the consumption, sale, purchase, and delivery of alcohol," laws that set a clear 21 year-old drinking age and there-fore clearly ban those under the age of 21 from drinking in college

"But wait a minute," you say, "upper-class students don't go to college house parties, they are full of first years!" Now the hypocrisy begins. My fellow Ladd house members and I, all of whom are under the age of 21, gave our affiliate first years a talk at the beginning of the year that I heard last year as a first year and every other house gives its affiliates except for Howell House. That talk is the "put your cups down if Security comes'

We reassure the first years that even though we put X's on their hands to identify their underage status (never mind that all of us also have X's), they still will be served beer at our parties. The X's are only there so we, as a house, and Residential Life and the College as a whole, can pretend that it is following Maine state law.

Now, in theory, I don't have a problem with this practice. The College is placed in an impossible bind by the disparity between the law and real life. If it wants to pursue its goal of providing a construc-

social rather than binge drinking it has to break the law. Perhaps this should have encouraged the College to consider the Amethyst initiative, but that is beyond the scope of this piece.

The problem with the College alcohol policy with regard to college houses is that it transfers the burden of blame with regard to underage drinking from the College and Residential Life to the residents of the college houses and the alcohol hosts at their parties.

Make no mistake about it, the College wants first years to be served alcohol at college houses—it knows that they would all just take shots in their rooms before they went out to off-campus houses if we didn't give them beer. "

Alcohol hosts for these parties are put in the impossible position of being told through official College policy in the alcohol hosting sessions they attend every semester that they are only to serve students who are 21 while at the same time understanding the nature of a college house party-that they are fully expected to serve alcohol to anyone who requests it. Despite this expectation, they are still liable for anything that goes wrong at the party. This is evident every time Security comes through a party at one of the houses.

Security doesn't try to bust underage drinking, they go straight to the kegs and talk to the alcohol host. If they are truly concerned that the first years are too drunk,

"The College is placed in an impossible bind by the disparity between the law and real life. If it wants to pursue its goal of providing a constructive environment that encourages social rather than binge drinking, it has to break the law."

they don't get the first years in trouble, they get the alcohol host or the house as a whole in trouble.

Bowdoin has cleverly found a way to foster an on-campus venue at which first years can drink that has a built-in group of people to blame if something goes wrong that are outside of official college

Finally, and possibly most importantly, the College has also somehow fully extricated itself from any of the financial burden of this system

Fraternities, which existed outside of college control, could charge money at the door or use any manner of methods to raise money to host parties with alcohol. This was a terrible system that further violated liquor laws.

However, the College has re-placed fraternities with college houses, taking underage drinking into full college control, without addressing the issue of the funding of this drinking.

Where does this funding come from? Of course, the same people the College blames if other things go wrong: the college house residents. We are forced to collect money from House residents if we want to have a party with alcohol, alcohol that will be consumed by a majority of first years.

Alternatively, we can go under the radar and try to raise money from our affiliate first years, a practice to which the College seems to

turn a blind eye.

Bowdoin is shirking responsibility and placing an unfair burden on its college house residents with this practice.

Because the College would like to promote a safe social environment that includes responsible drinking, why should the alcohol for much of the campus on a given weekend come out of the pockets of students?

The College needs to step up to the plate and complete the process that the move from fraternities to College Houses started-a process of internalizing and opening up underage drinking to College con-

trol and monitoring.

They can do this by purchasing the alcohol used in registered College House parties. This is not an entirely outlandish idea, in fact, it is done by many fine institutions including Yale University and the Claremont Colleges in California.

These practices could be em-braced at Bowdoin as well, and at the very least they should start a campus dialogue on the role of college houses and alcohol on campus.

Wes Fleuchaus '11 is the programming director of Ladd House.

CAMPUS QUESTION

Would Bowdoin students be motivated without grades?

In the October 31 issue of the Orient, the Bowdoin community was asked to respond to the question, "Would Bowdoin students be motivated without grades?" The following replies were submitted.

Mike Wolovick '09

Would I be motivated without grades? Yes, but not for every class. The simple fact of the matter is that me courses are more interesting than others. If I had the freedom to divide my effort without regards to grades, I would assign the lion's share of it to those classes that excited me, while those classes which bore me would get next to nothing. This would no doubt give me a less well-rounded education, but it would also be a powerful incentive to professors to make their courses more engaging. I personally believe that any subject can be made interesting if it is taught the right way;

unfortunately, many professors are either unable or unwilling to put in the effort to explain their material in clear language or to understand why students do not understand why what is being taught is actually interesting. While the vast majority of Bowdoin professors are competent and talented individuals, some lack the ability to explain what they are teaching directly, or to use a new approach when a student's questions reveal that he or she is not getting the material.

That being said, I am sure that nobody is actually considering abolishing grades at Bowdoin. I assume, therefore, that this question is actually a stand-in for the debate on Credit-D-Fail. On this I have one thing to say: Don't get rid of Credit-D-Fail, get rid of those crazy distribution requirements. The purpose of Credit-D-Fail is to students to branch out into

subjects which may not be their strong suit without fear of harming their GPA. Making this branching out mandatory defeats the whole purpose of intellectual exploration, and makes it inevitable that students view their non-major subjects as a chore rather than as an opportunity to advance themselves. In addition, the Orwellian names of the distribution requirements are a dead giveaway of their pointlessness: Do the empty phrases "exploring social differences" "international perspectives" really convey more meaning than the old, straightforward "non-Eurocentric Studies?" I doubt it.

Hannah Jones '12

I would be motivated to learn without grades. I would be able to put more of my focus on learning and less on grades; I would enjoy learning and what I learn more,

and I would probably be more laid back and less stressed about it. In the subjects that interest me, I would probably get more out of them because I could spend more of my time truly understanding the material or learning it more deeply or thoroughly than I might if I had to worry about grades. In classes struggle in, I might be more motivated to improve because I wouldn't be discouraged by the

Chester Eng '11
I do not think I would be wrong if I were to say that grades are very important to a great majority of students at Bowdoin. There are many reasons why we spend many hours studying for exams, writing papers, and doing prob-lem sets. It is clear that Bowdoin students take pride in their work and want to do the best they can

in their classes. However, I have little doubt that the elimination of grades would have an adverse effect on students' motivation concerning their schoolwork.

One of the characteristics of Bowdoin that I truly appreciate is that I have not met anyone on campus who likes to talk about how high his or her GPA is. We know that we are all bright people and we do not use a number or letters to judge each others' levels of intelligence. A key reason why we are at the College is that we all have a love for learning and want to grow intellectually, socially, and spiritually as people. I feel that Bowdoin students have genuine interest in academia and have enough pride in themselves to do their best, even if their work is not being evaluated in any sort of manner. Grades are not the most important thing in college anyway, right?

HOW DOES STUDENT EMPLOYMENT AFFECT CAMPUS CULTURE?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu. Several submissions will be selected and published in the November 14 issue.

WEEKLY CALENDAR

NOVEMBER 7 - NOVEMBER 13

FRIDAY

RECEPTION

Dr. Herman White

White, a particle physicist with Fermilab National Accelerator Lab in Chicago, will discuss science education, particle physics, and physics research. Room 313, Searles Science Building. 3:30 – 4:30 p.m.

LECTURE

"Why Do People Think Science and Faith Are Incompatible?"

This talk, given by Boston College Professor of Philosophy Patrick H. Byrne, will be the second of three parts in the colloquium "Faith, Reason, and Evolution." Room 151, Cleaveland Hall. 4 p.m.

FILM

"Mongol"

The Bowdoin Film Society presents this Oscar-nominated film, which details the early life of Genghis Khan. A discussion led by film critic Gulnara Abikeyeva and Professor of Russian Jane Knox-Voina will follow.

Smith Auditorium, Sills Hall. 7 p.m.

VIDEO GAMES

Wii Tennis and Mario Kart Racing Tournaments

Entry fees are \$7 for Wii Tennis and \$5 for Mario Kart.
Prizes will be awarded.

Sargent Gym. 7:30 - 11 p.m.

PLAY

"Measure for Measure"

This complex and mature comedy by William Shakespeare is directed by Associate Professor of Theater David Robinson.

Pickard Theater, Memorial Hall. 8 p.m.

SATURDAY

SYMPOSIUN

"Conservation As If People Mattered: Indigenous and Community Conserved Areas Around the Globe and Here At

Speakers and panelists will discuss local and international conservation issues. Co-Chair of the International Union for the Conservation of Nature Ashish Kothari will deliver the keynote address. Registration is required.

Smith Auditorium, Sills Hall. 9 a.m. – 4 p.m. Keynote Address, 9 a.m.

FILM

"The Proposition"

The Bowdoin Film Society presents this movie, in which a lawman attempts to force an outlaw to kill his own brother. Smith Auditorium, Sills Hall. 7 p.m.

PLAY

"Measure for Measure" Pickard Theater, Memorial Hall. 8 p.m.

MARIEL BEAUDOIN, THE BOWDOIN ORIENT

A SEAT AT THE TABLE: Seated from left, seniors Lara Lorn, Ikumi Crocoll, Maude Paquin, and Meredith Borner chat during the Career Planning Etiquette Dinner held on Tuesday. The Career Planning Center and Karen Mills, venture capitalist and wife of President Barry Mills, hosted the event.

SUNDAY

CONCER

Music from the Republic of Sakha

Introduced by Eduard Alekseyev, an ethnomusicologist specializing in Türkik music, this concert will feature musicians Kladvia and German Khatyaev in a performance of music from Russia's far east.

Kanbar Auditorium, Studzinski Recital Hall. 1:30 p.m.

WEDNESDAY

READING

"Signals from the Past"

English Department Adjunct Lecturer and writer-in-residence Jane Brox will read from her book "Clearing Land: Legacies of the American Farm." Shannon Room, Hubbard Hall. 4:30 p.m.

MONDAY

LECTURI

The Future of Environmentalism: Protecting the Earth in a Technological Age

Paul Wapner, Associate Professor and Director of American University's Global Environmental Politics Program will speak about shifts in the environmental movement toward technological solutions.

Shannon Room, Hubbard Hall. 7:30 p.m.

TUESDAY

ARTIST TALK

Astrid Bowlby

Maine native and visual artist Bowlby will discuss her work.

Beam Classroom, Visual Arts Center. 7 p.m.

FILM

"Narmada: A Valley Rises"

On Christmas Day 1990, 6,000 farmers began a 200-km march to protest a dam project in India. This film, presented by the Evergreens, chronicles the peaceful protest.

Room 111, Adams Hall. 8 p.m.

THURSDAY

GALLERYTALK

"The Bowdoin Family: Old Friends and New Discoveries"

Given by Consulting Curator of Decorative Arts Laura Fecych Sprague of the Bowdoin Museum of Art, this talk will focus on the current exhibit "James Bowdoin III: Pursuing Style in the Age of Independence."

Shaw Ruddock Gallery, Museum of Art. 4 p.m.

I FCTURI

"Gender and Women in the Workplace"

Anita Hill, Professor of Social Policy, Law, and Women's Studies at Brandeis University and controversial figure of the early 1990s will deliver this talk. Tickets are required. Pickard Theater. 7 p.m.

....

"The Fast Lane"

This is the third installment of former "Nightline" anchor Ted Koppel's series on China titled, "The People's Republic of Capitalism." In this episode, Koppel investigates the effect of China's increased consumption and use of cars on its environment and population.

Quinby House. 7:30 p.m.

ELECTION '08

Obama win spans globe

International students and those studying abroad react to Obama's presidential win on Election night

> BY GEMMA LEGHORN ORIENT STAFF

Rather than spilling out onto the Quad as the returns from the election rolled in, some Bowdoin students watched the events among strangers thousands of miles from home.

Juniors studying abroad this semester, however, said that celebrations up to and following the announcement of Obama's presidential win rivaled those in the United States.

In an e-mail to the Orient, Matt

Yantakosol '10 described the scen Copenhagen, Denmark, where he is studying abroad this semester.

There were events at bars, hotels, and privately organized gatherings," he wrote. "People were celebrating all over the city until we received the results at around 5 a.m."

Americans were not the only ones to become emotional as the news

"One girl said that the Danish people she was with started crying when Obama won," said Yantakosol. There were also stories of Danish people congratulating the American students after Obama's victory."

According to Matt Bowers '10, who is studying in Tanzania, finding a place to watch returns come in was no trouble at all.

Field hockey downs Tufts to win NESCACs

BY KATHERINE POKRASS

Despite its loss to top-seeded Tufts earlier in the season, the Bowdoin Field Hockey Team rallied in the NESCAC tournament behind junior Kara Kelley, beating Tufts 1-0 and winning its fourth consecutive NE-SCAC championship. The Bears also took care of Middlebury 4-0 in the semifinals of the tournament.

"This past weekend was pivotal for

our team. Facing two of the toughest teams in the league forced us to elevate our own play to a new level," said goalkeeper Emily Neilson '11.

In their previous meeting this season, the Jumbos defeated the Polar Bears on Ryan Field to earn NESCAC hosting honors. However, Bowdoin was able to step up its level of play and return the favor in the championship game last Sunday, ending Tufts's 13game win streak.

The lone goal in the victory came

Endowments fall among peer schools

BY ADAM KOMMEL

Across the NESCAC, the global financial crisis has propelled endow ments downward.

Amherst's endowment has fallen by 25 percent since June 30, while Colby's endowment is down at least the same percentage. Williams has estimated a loss of about 28 percent, and Trinity has calculated a 16 percent lo

Bowdoin administrators with knowledge of the endowment chose not to comment on the College's performance

"The investment committee has an established policy that we do not discuss interim unaudited numbers," said Senior Vice President for Investments Paula Volent.

'I regret to say I have no comment on the state of the endowment," said President Barry Mills.

"My public release a couple of weeks ago states our public position," Mills added, referring to an October 23 camwide e-mail titled, "The Economy and Bowdoin." In the e-mail, Mills called the College economically "secure," but also announced that the College will slow its spending.

Moody's Investor Services has proected that college endowments will have fallen an average of 30 percent this fiscal year, which stretches from July 1, 2008 to June 30, 2009.

Amherst disclosed its loss in a letter to the campus on October 28.

ACADEMIC AFFAIRS

Policy nixed that bumped some from first-choice fall courses

ORIENT STAFF

For Spring 2008 course registration, which began Thursday, students will no longer be bumped from firstchoice classes in order to increa the enrollment of under-enrolled second-choice classes. Such a policy was implemented during registration for Fall 2008 courses, which took place in May for upperclassmen. It aimed to prevent some courses from being canceled due to an enrollment of fewer than five students, and it affected 23 students' course schedules.

"We talked to a number of people about it, and it seemed, most fundamentally, to undermine the process," said Sam Dinning '09, Bowdoin Student Government (BSG) Vice-President for mic Affairs.

"I think generally around campus there was a lot of uproar," Dinning said.

According to Dinning, after course registration in the spring, BSG passed a resolution against the new policy.

The resolution outlined the reasons that BSG believed the policy was "illogi-cal and ineffective." BSG reasoned that the policy causes students to be "intentionally deceived," and "that it would encourage students not to apply for second-choice classes and discourage them from applying for second-choice classes that are unlikely to be popular. Finally, the resolution argued that dents will simply switch classes during Phase II or add/drop."

Dean for Academic Affairs Cristle Collins Judd, who was unavailable for an interview but responded to the Orient in a detailed e-mail, wrote, "Our intention in the fall semester was to take account of both the maximum and minimum class size restrictions and to

COURSES CONTINUED FROM PAGE 1

achieve the most first choices for the most students."

However, according to Judd, the registration for Spring 2008 courses will continue as it has in previous years, without intervention during Phase I. When student demand for first-choice classes exceeds the number of spaces available, students will be placed in the course according to a randomization algorithm. After Phase I, the Office of the Dean for Academic Affairs will determine whether to cancel courses with fewer than five students enrolled.

Judd explained that the increase in the number of faculty in recent years has resulted in an increased breadth of course offerings, which she wrote "comes into consider ation of how to meet student and faculty preferences."

"In trying to respect both faculty and student preference, along with all of the other constraints (class size, schedule, major requirements, etc.) we have one of the most complicated registration processes of any of our peers," Judd

This year, the Curriculum Implementation Committee (CIC) is examining the issue of respecting both fac-

ulty and student preferences, and it will ke a recommendation of how to best accommodate both. Unless the CIC decides to re-implement the policy used during registration for Fall 2008 courses, course registration will continue as it has in recent years.

Another change made in course registration this year affects placement in first-year seminars. Firstyear seminars, which are capped at 16, have been a graduation requirement since 2005. In the recent past, first years have registered by ranking number of courses by preference. However, this year's first-year class was asked to select four courses without ranking them by preference.

"This change in practice was insti-tuted to expand the nature of the advising conversations about how students choose these seminars." Judd wrote.

She added that the change also encourages students to recognize that the importance of the first-year seminar is not "primarily dependent on discipline

Finally, she explained that the change also helps to "distribute students across a range of seminars in an effort to ensure that as many students as possible are able to enroll in a seminar that has critical mass."

-Claire Collery contributed to this report.

MARGOT D. MILLER, THE BOWDOIN ORIENT

A CLASS ACT: Unlike the Fall 2008 semester, students will not be bumped from their first-choice classes in order to increase enrollment in second-choice courses. Twenty-three students were bumped from classes during registration last May.

OBAMA CONTINUED FROM PAGE 1

"We all watched on a communal TV near our hotel," Bowers wrote in an e-mail. "Other Americans watched at the embassy, but most TVs in shops and squares had it on."

Though Maxime Billick '10, who is studying in Vietnam, said that she was traveling at the time of the election, her friends watched the returns with other American Obama supporters. She said that the reaction to Obama's remark alluding to McCain's service in Vietnam was particularly interesting.

'A bunch of my friends were at an Irish pub in Ho Chi Minh City, and when Obama gave his acceptance speech and mentioned McCain having done 'all the great things for his country, the whole room became silent," she wrote. "I guess it was eerie hearing Obama say that about Mc-Cain, and being in the country where it all went down

Though the majority of students studying abroad found support for Obama, Eric Reid '10 said that China did not react to the outcome as much as other countries did.

"I don't think the reactions over here have been that extraordinary," he wrote in an e-mail. "Overall, the reaction in the media has been very bland."

Though coverage was neutral, Reid noted that the media was interested in Obama's race.

"One interesting thing is how all the media here is very conscious of Obama being a black man," he added. "I think it's especially intriguing...because Chi-na is an incredibly ethnically homogeneous country, and the idea that someone of a different race could become president wouldn't happen over here."

Global Support

Miguel A. Reyes-Zaragoza '12 of Mexico said his country's reaction to Obama's win "is very positive."

"There is a saying in Mexico that goes 'When the U.S. sneezes, Mexico gets a cold," he said. "That refers to the economy. When the U.S. economy goes down, the effects are felt so much more steeply in Mexico because so much of it depends on you guys."

According to Reyes-Zaragoza, Mexicans hope that Obama will be

able to revive the U.S. economy, and consequently, help Mexico's economy as well.

"I don't really know why there's this perception that Obama will be the one to fix the economy, but peo-ple think Obama will be better at it than McCain," he said.

In addition, Reyes-Zaragoza said that Mexicans view Obama's character and way of conducting his politics as a departure from Senator McCain Mexico's overwhelming support for Obama stems from the fact that Obama does not fit the typical mold of a U.S. president.

I think it has a lot to do with that reaction to that old, Anglo-Saxon, really 'tough guy' President that just bullies the world around. It's really an attitude that nobody in the world likes," said Reyes-Zaragoza. "At least for Obama, we don't think he'll do that. We hope for the best."

Students studying abroad observed that the foreign countries' natives were often equally as invested in the election as they were.

Yantakosol said that when Europ ans learned that he was from the U.S.. they were interested in which candidate he supported.

When I was on a train from Paris to Vienna, the British couple that I was sitting next to questioned me about the election," wrote Yantakosol. "I said that I supported Obama and they got all excited. Overall, Europe ery happy with the outcome.

Bowers also found that many people in Tanzania asked him about his candidate of choice.

"Before the election, the question I could always count on getting af-ter saying I was from America was whether I liked Obama or McCain," said Bowers.

According to Bowers, Tanzania kept with the global trend of having any more Obama supporters than McCain supporters.

"Almost everyone here supports Obama," Bowers wrote. "There is a tree in one of the gardens in Stone Town called Obama corner. The concrete path and tree are painted red, white, and blue with huge paintings of Obama and his name on the tree

Now, whenever I walk around, most people just shout 'Obama!' because they know I'm an American student," he added.

Holland resident Abriel Ferreira

'10 said that her family was also happy about the election's outcome.

"My sister, who just moved to the United States this year to attend Simmons College in Boston, called my parents as soon as she heard Obama won-at 4 a.m. their time!"

Parents Eileen and Victor Ferreira said that Obama's presidency is a step towards reestablishing the Dutch re-lationship with the United States.

"The Dutch are America's oldest allies dating back even before John Adams, who was the first ambassador here. We pride ourselves on this special relationship, but the Bush administration has not always treated us with as much respect as we feel we deserve, given our loyalty and contributions to NATO and other organizations in which we share responsi-bilities with America," they said in an e-mail to the Orient.

The Ferreiras said that Obama's political personality is much more agreeable to the Dutch than Bush's was.

"People here do not like confrontational politics, so Bush's style never has gone down well," they wrote.
"With us or against us" is not the Dutch way. Obama seems much more of the type that we Dutch can work with. He seems to think before speak ing or acting and also seems to look for consensus and compromise."

Though the Ferreiras said that they do not expect him to solve every problem the United States faces, they believe that he will reaching out to other countries for help.

We do know that he is more apt to seek council from his friends-that's us-and has the practical wisdom to know that he or the U.S. can't solve the problems we all face in this financial crisis alone...Of course, being typically Dutch, we are still not sure he can come through with the goods, but at least now we are hopeful and have a renewed faith in America," they wrote.

International Concerns

Despite widespread support for Obama around the globe, Bowdoin students from several countries are concerned that his foreign and economic policies may affect their countries for the worse.

South Korea resident Jessica Song '10 said that her parents expresse concerns about the their country's future in global trade.

"When I was on a train from Paris to -Vienna, the British couple that I was sitting next to questioned me about the election. I said that I supported Obama and they got all excited. Overall, Europe is very happy with the outcome."

MATT YANTAKOSOL'TO

"From an economic perspective, they were really worried about the FTA trade because Obama is against outsourcing," she said. "I don't know if it was rumor or something that was announced that he wanted to rework a lot of FTA stuff, especially importing Korean car companies to the states, so people were kind of worried."

First year Octavian Neamtu from Romania said that while he sup ported Obama, his home country did benefit from Bush's policies.

"Romania benefited from the Bush administration just because of the military incursion in Iraq, and that funded some of the American military bases in Romania," he said.

Reyes-Zaragoza said that Mexicans are concerned with the future of the North American Free Trade Agreement (NAFTA).

"Obama really wants to change NAFTA and a lot of people in Mexico believe that would be positive," he

Current NAFTA regulations allow easy trade between the U.S. and Mexico.

"NAFTA makes it so certain United States products can go into Mexico without any challenges from local businesses," said Reyes-Zaragoza,

While some people in Mexico sup-port the NAFTA as it stands, others, especially farmers who lost money when U.S. equivalents began to flood Mexico, would like to see changes to the act. "They want it either to disappear

entirely, or provide them with more leverage in the form of union protection," said Reyes-Zaragoza
"Unions in Mexico have a lot more

clout in Mexico than they do in the U.S.," he added.

Reyes-Zaragoza expressed skepticism, however, as to whether or not Obama's green agenda associated with NAFTA regulations would help Mexico in the long term.

"He wants to enforce the NAFTA in such a way that makes Mexican economies greener," he said. "That would adversely affect Mexico and poorer countries."

Another Country's President

Though Obama's historic election was known around the globe, some international students said that their families are more concerned with their own government, rather than with U.S. politics

Song said that liberals supporting Obama in South Korea were criticized for their enthusiasm

"There were kind of a lot of criticisms about how liberals in Korea were going crazy about it," she said. "I think the general opinion toward liberals in Korea was they were over-reacting and it wouldn't affect us in any significant way."

That's some other country's president, and we don't really know how that's going to affect our economy," she added. "It wasn't as relevant, and it's not like because Obama won that the Korean policy is going to change any one We have our own government

Although Neamtu said he rooted for Obama, a more pressing concern for him is the government of his home country.

"It doesn't really matter for people back home who gets elected," said Neamtu. "Romania has enough internal problems of his own

"Some of my friends were saying the whole world must be celebrating, but in fact people outside the U.S. don't care as much as people in the U.S. might," added Song.

Mexico, however, given its close proximity to the United States and

the strength of the relationship between the two countries, does care about the Obama win.

Reyes-Zaragoza said that though Mexico is sometimes criticized by Latin Americans for being America's "lap dog," the weight of the United States's influence, coupled with its close prox-imity, make this unavoidable.

"My answer has always been that [they're] not the ones living with {the United States} right next to them," he said. "Because of that, we care. Whether it's a positive or negative caring, it's really important to Mexico how the U.S. is doing."

Nichols meets with BSG, urges safety

Director of Safety and Security Randy Nichols has a mantra. Asked to divulge it by Class of 2012 Bowdoin Student Government (BSG) Repre-sentative Nyle Usmani during a visit to Wednesday's BSG meeting, Nichols stated, "Number one, you've got to care." During the 40 minutes that he spent with the BSG, Nichols offered a verbal report of the state of the College's security situation.

Most questions posed to Nichols on Wednesday evening involved the mpus's alcohol policies. Vice President for Student Government Affairs John Connolly '11 began this line of inquiry with a question regarding Nichols's stance on the Amethyst Initiative, a movement among college presidents to suggest that the drinking age should be reconsidered. Due to his experience as a police officer, during which he saw too many young "wrapped around trees after night of drinking," Nichols voiced his support of President Barry Mills's decision not to sign the initiative.

Nichols understands, however, that legally prohibiting the purchase and consumption of alcohol by those under the age of 21 will not preven minors from consuming it. Indeed, he acknowledged, "Many of our stu-dents are going to choose to drink underage." Throughout his discusunderage." Throughout his discussion with BSG, Nichols emphasized the importance of personal responsibility, especially when it comes to the welfare of others.

"I never want a student to get busted for calling me," he said. "If somebody's afraid to call, that's a recipe for disaster."

SAFETY FIRST: Director of Security Randy Nichols discusses Security's role on campus with the BSG alongside VP for Facilities Mike Dooley'10 and Programming Co-Chair Derek Brooks.

Nichols said that students can also contribute to the general welfare of the community by alerting security to the presence of suspicious persons. Community members have received several security alerts throughout the year warning about potentially threatening individuals. Allaying fears yet advising vigilance, Nichols said that, "It's a safe community. We have to always be on the alert."

Before Nichols's arrival and after his departure, BSG discussed several other business items. Following up on the Government's discussion with the Evergreens, Vice President for Facilities Mike Dooley '10 announced that BSG will throw its full support behind the group's initiative to reduce the amount of bottled water on campus. Also, members voted unanimously to approve a change to BSG bylaws establishing a li-

aison position to report on the activities of the Brunswick Town Council.
Upcoming legislation includes

changes to student education procedures regarding judgments of the Judicial and Sexual Assault and Misconduct Boards. Members plan to vote on an opinion suggesting that the Boards provide a public report containing specific details of cases and judgments rendered on a semiannual basis. The opinion will also encourage the Boards to release these reports in the Orient and on the Bowdoin web site as well as through the current system of delivering copies to Smith Union mailboxes and via e-mail.

Next Wednesday, BSG plans to meet at 8:30 p.m. in 208 Adams Hall to continue discussion of the I-Board opinion and its Health Center

'Faith, Reason, and Evolution' series concludes with Humes

AND LAUREN XENAKIS

Irish bookmaker Paddy Power made headlines last week for offering 4-1 odds on the existence of God. In October, plans for an atheist ad campaign on London buses attracted similar attention; the proposed posters read, "There's probably no God. Now stop worrying and enjoy your life." Today, the lecture "Talk Radio Evolution: The War on Science and the Second Coming of Scopes," featuring Pulitzer Prize-winning journalist Edward Humes, aims to take a more reasoned and in-depth look at one of the most hotly debated issues of our time.

This is the third and final lecture in the "Faith, Reason, and Evolution" lecture series, conceived of more than a year ago by Professor of Biology Bruce Kohorn, Associate Professor of History Dallas Denery, and Professor of Philosophy Scott Sehon. It will be followed tonight by a panel discussion, moderated by Kohorn, featuring Humes along side Professor of Biology Nathaniel Wheelwright, Professor of Government Paul Franco, and Associate Professor of Biology Michael Palo-

"Especially in this era of sound bites and quick dismissal of opposing points of view, we thought that it would be good to have a substantive and civil discussion of these issues," Sehon said.

Edward Humes began his writing career as a journalist. In 1989, he won the Pulitzer Prize for his work about the military. According to Humes, it was "the fifth-best thing that has ever happened" to him as well as "thrilling" and "humbling."

He then went on to write non-fiction, starting with true crime books. He began to look more at the justice system in the United States. This trail led him to the 2005 case of "Kitz-miller v. Dover" in Pennsylvania, a trial which examined "whether the alternative of evolution known as intelligent design is appropriate for public school science class or represents an unconstitutional intro duction of religion into the public schools," Humes said.

Last year saw the release of Humes's ninth book, "Monkey Girl: Evolution, Education, Religion and the Battle for America's Soul," a work about the trial in Pennsylvania, which, according to Denery, inspired his selection as a speaker.

Concepts of evolution and intelligent design are at the center of 'Monkey Girl."

"It's wonderfully well-written, but what I liked in particular was Humes's attention to the local details in Pennsylvania, among the teachers and members of the school board, that exacerbated the controversy over in-telligent design," Denery said.
"My approach in writing 'Monkey

Girl' was to strive to be fair in representing all viewpoints and characters involved in this case. Emotions ran high in Dover, where this issue divided a school, a community, and even members of the same family. So I worked hard to create a wellrounded portrait of the people and the ideas at issue," Humes wrote in an e-mail to the Orient.

"Given that the first two meetings of the colloquium concerned sor of the big ideas and intellectual problems behind current debates, it "A lot of the debate arises from people who say, 'My belief in creation is exactly the same as your belief in the big bang, or evolutionary theory."

DALLAS DENERY PROFESSOR OF HISTORY

seems like a natural to focus in on the specific ways those problems actually took root in a specific com-munity," Denery added. "It is amazing to learn how little some of the people who were central to the controversy actually understood about evolution and intelligent design.

Kohorn noted that, however polarized the debate may seem, there is "a continuum. And you can't draw lines between [the extremes]."

"If you don't know the answer to something, people like me are quite happy to say, 'I don't know the answer.' Other people may say, 'Yes, we don't know the answer, but since I believe in God, I know there is an answer." In between, "There are people saying, 'I have no idea whether there's a god," Kohorn added.

The three lectures in the series follow an intentional progression. In the first, Professor Jon D. Levenson of the Harvard Divinity School explored "Genesis and the Creation of the World." Because Genesis is "the book that generates all the controversy," and because "a lot of people don't know what it says," it was a fitting place to begin, accord-

ing to Denery.

Last week, Professor Patrick H. Byrne of Boston College presented the second lecture, "Why Do Peo-ple Think Science and Faith Are Incompatible?" Byrne addressed the ways the two are alike and how they are different.

"What's the difference between religion and a scientific belief?" was the question that provided the foundation for the talk, according

"Do they use different kinds of evidence? A lot of the debate arises from people who say, 'My belief in creation is exactly the same as your belief in the big bang, or evolutionary theory," Denery added.

Above all, the lecture series emphasizes understanding and open discussion across the board. Kohorn believes that young people today have "access to far more infor-mation and far more explanations of how things work than previous generations." However, "the interpretation is harder because there's more of it and it's more complex. So the job of science is to be able to present it in an understandable fashion to non-scientists," he said.

"It's okay to have a belief and be able to accept scientific concepts," Kohorn added

Kohorn hopes today's discussion will carry on, but sees it moving in

a different direction.

"I think it's got a lot of people talking and thinking, which is great—that was the intent," he said.

"Just the ability to explore and have people decide for themselves."

"Talk Radio Evolution: The War on Science and the Second Coming of Scopes" is scheduled for 4 p.m. in Cleaveland Hall, Room 151, followed at 7:30 p.m. by the panel discussion at Kresge Auditorium in the Visual Arts Center.

FALL

"Even with our relatively strong investment management, the endow-ment has lost roughly a quarter of its value since June 30," wrote Amherst

October 18.

"It's hard to keep up with that endowment valuation, but we're in excess of

In an interview with the Williams President Morton Schapiro estimat ed Williams's endowment at "probably \$1.3 [billion]," down from \$1.8 the Williams endowment loss at al-

Trinity Vice President for College Advancement Ron Joyce told the Orient that from July 1 to the end of October, the Trinity endowment lost "approxi mately 16 percent" of its value, though Trinity has not publicly released an official figure. The Standard and Poor's 500 index lost 24.3 percent of its value during that period. From that time to the market close on Thursday, November 13, the S&P 500 has fallen a further 5.9 percent, for a total drop of 28.8 percent ince June 30.

Other schools have not reported exact numbers, but several NESCAC administrators have commented on the general state of their endowments.

Tufts President Lawrence Bacow told the Tufts Daily for its October 22 issue, "Everything is down; our endowment is down as well."

Wesleyan President Michael Roth, in his official blog, was not specific about the endowment number, but he wrote in an October 15 post, "Our endowment,

already down last fiscal year, has taken a hit in the first quarter of this one," and in an October 7 post, he called the first-quarter results "dismal."

Whether or not the colleges released figures for their endowments, the majority have announced budget freezes or cost-cutting measures

At Middlebury, in a mid-October memo, President Ron Leibowitz announced a hiring freeze on "all but the most essential staff positions," noting that although Middlebury is wealthier than most colleges, "no-

At Bates, President Elaine Hansen e-mailed the Bates community in late October to address the financial crisis's effect on the college, writing that Bates is "not immune to declining markets, higher costs of borrowing, the potential impact on giving, and the economic effects on our students and employees and their families."

However, Bates Director of Alumni and Parent Programs Kimberly Hokanson said that a drop in the endowment is not as damaging to the college as similar drops would be to peer schools.

'We are less reliant on income from our endowment as a percentage of our budget than other colleges with larger endowments, such as Bowdoin and Colby," Hokanson told the Bates Student.

Only 11.6 percent of Bates's income for current operations comes from the endowment, according to Hokanson In contrast, 24 percent of Bowdoin's operating budget was drawn from the College's endowment in the fiscal year ending June 30, 2008.

In recent years, the Bowdoin en-dowment has risen 1.3 percent (2007-2008), 22.9 percent (2006-2007), 16.5 percent (2005-2006), and 12.4 percent (2004-2005).

BOWDOIN BRIEFS

64 ninth graders to visit Bowdoin

Senior Rob Halliday's Arabic 101 class will have a couple of unfamiliar faces in class this morning two ninth graders from local high schools.

"It might be a little intimidating for them, but hopefully they get ex-cited," Halliday said.

Sixty-four visiting ninth graders from Mid-Coast Maine will be participants in a larger, day-long pro-gram called "Aspirations in Maine: A Taste of College." Run through the Center for the Common Good, the day's events include meeting students, attending classes, and hearing from officers in admissions and student aid. Thirty-five Bowdoin students will serve as hosts for the visiting students.

Youth and Education Coordinator

at the McKeen Center Jessica Horstkotte '08 said that the day is "tailored to students who are on the cusp of attending college."

"It's not a recruiting visit. It's a way to let them experience college," Hal-

SECURITY REPORT: 11/6 to 11/23

Thursday, November 6

· A student requested a wellness check on an intoxicated student in Moore Hall. The officer assessed the student's condition and medical transport was not required.

Friday, November 7

- · A student reported that her bike was stolen from outside of Searles Hall one week ago. The bike is a blue Schwinn Varsity 15-speed with curved handlebars. It bears Bowdoin bike reg-
- · A student with abdominal pains was transported from Hyde Plaza to Parkview Hospital.
- A staff member's three-year-old child pulled a fire alarm at 30 College Street
- A non-student from Bath sprained his ankle while playing basketball in Sargent Gymnasius
- · Brunswick Police issued a summons for civil possession of alcohol by a minor to a college visitor walking on Maine Street with an open container. A 21-year-old student walking with the minor was given a warning for having an open container.

Saturday, November 8

- An officer found a storage room and door lock damaged in the base-ment of Baxter House. The room had been entered and vandalized with spray paint graffiti on the walls, ceiling and floor. Indications of marijuana use were found in the room
- A beer keg that had been left for several days in Baxter House was confiscated and later returned to the alcohol host who was responsible for the keg.
- · A student in Winthrop Hall who injured a knee in a fall down a set of stairs was taken to Parkview Hospital.

Sunday, November 9

- Two students on the 12th floor of Coles Tower took responsibility for holding an unregistered event.
- · Someone maliciously pulled a fire alarm in Brunswick Apartments U that resulted in a fire department response.

 • A high school student visiting the
- campus reported that her wallet was lost or stolen at Jack Magee's Pub. The wallet is described as small and black with a white Playboy bunny on the front. It contained personal identification, the student's green card, and a small amount of cash.
- · Vandalism was reported in the first floor men's room at Smith Union. A soap dispenser and paper towel dis penser were ripped from the wall, and the men's room sign was taken.
- · A fire alarm was caused by a faulty smoke detector in Brunswick Apart-
- · A member of the West Point women's rugby team received a neck injury on the rugby field. Brunswick Rescue took the athlete to Parkview Hospital.

- Tuesday, November 11

 A student fell off his bicycle while riding on Park Row near Brunswick Apartments. Brunswick Rescue transported the student to Parkview Hospital with head and hand injuries.
- · Dust from construction activity at Sid Watson Arena activated a fire

Wednesday, November 12

· A bicycle theft was reported at Stowe Inn. A blue Fuji Sport 12-speed road bike was left unlocked on Saturday and was discovered missing on

Sunday. The bike bears Bowdoin bike registration 02760. (This bike was recovered with damage the following day on nearby railroad tracks.)

• A student reported that his vehicle was damaged when it was struck by another vehicle while parked between MacMillan and Quinby on or about November 11. The blue Acura was dented in the right rear quarter panel.

Thursday, November 13

- · A fire alarm was received from the basement of Gibson Hall, the result of a malfunctioning detector.
- · A faculty member at the Visual Arts Center reported the theft of an iPod and speaker dock from the north studio on the third floor. The theft is believed to have occurred between Monday and Wednesday.
- · A security officer on patrol observed that an abandoned collegeowned house on Harpswell Road was forcibly entered and property, including copper pipe, may have been stolen. The incident remains under investiga-
- · The Coles Tower south elevator malfunctioned and a housekeeper was briefly stuck on the eighth floor. The elevator was placed out of service for
- · A staff member reported a delusional elderly male on the corner of Coffin and Longfellow Streets. Brunswick Police responded. The man had been reported missing earlier in the

Crosley delivers lecture on writing, publishing

For writer and publicist Sloane Crosley, as one door closed when she locked herself out of her apartment, another one opened: the world of published writing.

Crosley, who will deliver today's Common Hour lecture, published essays titled "I Was Told There'd Be Cake," in April. HBO recently acquired the rights to turn the essays into a television series. Her writng has appeared in The New York Times, Salon, the Village Voice, and many other noted publications.

With comparisons made to the writing of David Sedaris, Dorothy Parker, Chuck Klosterman, and Sarah Vowell, Crosley's essays are simultaneously witty and light-hearted, indulgent and genuine. The stories tackle a diverse range of topics, from a childhood obsession with the early computer game "The Oregon Trail," to her experience baking cookies for an intimidating boss, in the shape of the boss's head.

Crosley, who graduated from Connecticut College in 2000 with a degree in creative writing, told the Orient her path to writing narrative nonfiction was unintentional.

"I sort of fell backwards into it," Crosley said. "One day, I was moving apartments in New York, and I managed to brilliantly lock myself out of the first apartment, because my roommate had switched the lock.

After hiring a locksmith, she "managed to lock myself out of the second apartment that I was moving to-and actually the same locksmith came to bail me out, which was very

Crosley sent an e-mail chronicling the misadventure to a group of friends, including one who worked at the Village Voice. He encouraged her to expand the story into a finished essay, and it eventually got published in the Voice. As a result, Crosley got a job writing situational comedy stories for the Village Voice and discovered that she loved the

In addition to writing and her work as a publicist for the Vintage Books division of Random House, Crosley is an active advocate for literary non-profit organizations, including the New York Public Library's Young Lions Committee and The Moth, a story-telling organization in New York.

Her advice to students interested in writing, or any arts field, is to not let their young age and inexperience discourage them from pursuing a career in their desired field

"You don't really have to wait to be great, or to do what you want to do," Crosley said. "I think that one of the best things I ever did was really complete an intensely terrible novel as an undergrad, which will never see the light of day-but I'm glad I did it so I know that I can at least start and finish, maybe to a more quality effect later."

FEATURES

Curia: Bowdoin's hotspot for blogging, dialogue

ORIENT STAFF

The age of blogging, gossip, and Internet activism has taken online reporting to a whole new level, and Bowdoin's Curia is stepping up to the challenge.

the challenge.

Launched in January 2008 by William Donohoe '08, Bowdoin's online blog Curia (bcuria.com) is accessible only from computers on campus. According to its "About" section, Curia aims to provide a space on campus "for organized cultural critique." With content ranging from timely reporting of news on campus to lighter features pieces, the Web site also allows viewers to comment on stories, either under a registered user name or anonymously.

Donohoe was a first year at Bowdoin the fall that the Facebook craze swept through college campuses across the country. He recognized that Bowdoin students were eager to connect online. Taking into account the "Bowdoin Bubble" phenomenon that leaves students feeling isolated, he wondered if students would engage with a Bowdoin-localized Web site.

In January 2007, Donohoe launched Overheard at Bowdoin (overheardatbowdoin.com), a Web site where students can anonymously submit humorous conversations they overhear on campus.

Donohoe said that the success of Overheard at Bowdoin answered his question, "Will Bowdoin students ever congregate at one Web site, and interact with one another about something humorous?"

"Curia was the next step," he said.
"Will they interact with actual news?"

According to Donahoe, the name of the Web site was inspired by the ancient Roman word curia, which describes a meeting place for tribes or senate leaders coming together to discuss their affairs. The Curia Web site serves an analogous purpose for Bowdoin students.

The premiere Curia post, "Why

Bowdoin needs Curia," made by Donohoe on Jan. 29 2008, noted a trend of passivity among the student body in relation to campus affairs that was moving away from the school's progressiveness.

"We were one hell of a school back in the day. Less than 20 years ago grades weren't letters here," Donohoe wrote. "When Barry [Mills] was a student, he got plus or minus for his courses and there was no GPA. The first female president of a fraternity reigned over Quinby. Once, Bowdoin was absolutely revolutionary and a hotbed of cultural change."

As Donohoe graduated in the spring, Curia is now under the guidance of two editors-in-chief, Darren Fishell '09 and Hannah Scheidt '10, who were both involved with its inception.

Fishell called Donohoe "the architect" of Curia, while he and Sheidt are now "the keepers of the flame."

Scheidt and Fishell said the Web site also depends on the contributions of 10 staff members from the sophomore, junior, and senior classes, many of whom contributed through posts and comments last year before expressing interest in being more invoked with the Web site this year.

This year the Curia staff has worked to increase traffic on Curia by making digest posts that link to either articles on the site or Curia-exclusive coupons, to Brunswick restaurants and coffee shops popular among Bowdoin students. Additionally, Scheidt and Fishell said that word-of-mouth advertising is especially valuable.

vertising is especially valuable.
"Like any real, authentic, kind of fringe organization, [Curia] sort of spread through the word, the capital Word," Scheidt said. "I think the momentum has to be organic for something like this."

The increasing awareness of the Web site on campus is evident from the recent commenting explosion that occurred in response to "Social Activism on a Saturday Night?" The

COURTESY OF DARREN FISHELL

SPREADING 'THE WORD': Curia staff (top, from left) Phil McLaughlin'11, Kristina Goodwin'10, Sean Campos'11, Hannah Scheidt'10, (bottom, from left) Y.P. Peralta'11, Darren Fishell'09, Jessica Lian'09, and Angela Fabunan'11 serve as reporters, writers, and columnists for the Web site.

post was a reflection on the "Mansion"-themed party at Ladd House on October 5 and the protest in opposition to it. The piece, written by Sean Campos '11, provoked a heated string of commenting, totaling 48 posts.

Fishell cited a "collision of fimeliness, original reporting, and a higher awareness of Curia itself" as the key factors in what made the debate about the Ladd House party a lively discussion.

"There were definitely two sides [to the mansion piece], Scheidt added. "There was a challenge and a defense, and I think that both parties got involved which made it a productive discussion."

"I think it's important to realize that [Curia is] not limited by deadlines or space," Fishell said.

Speaking to what sets Curia apart from other student media on campus,

he added, "Since there's no publication date we're reaching for, timeliness isn't relative to any date of publication, timeliness is only relevant to true timeliness. We're truly timely."

In addition to the news pieces, Curia publishes a range of items, from reviews of restaurants and other establishments in downtown Brunswick to live blogs of events on campus like the '80s party at Quinby House and the recent Broken Social Scene concert.

It also conducts polls that have fielded questions both serious and fun, including "Where have you registered to vote?" as well as "What is your favorite muffin Bowdoin dining makes?"

Fishell said that they have amassed a "steady group" of contributors that he and Scheidt meet with regularly to discuss story ideas for Curia. Donahoe said that he is planning on redesigning the Web site over Winter Break with Fishell and Scheidt and that the campus can expect to see a "new look" to Curia when they arrive back on campus in January. Scheidt said. 74-think overy part

Scheidt said, "h-think every-part of the Bowdoin community wants to see students more engaged, wants to see what natural dialogue among students looks like. I think that having Curia as something anyone can read and comment on—but provided with [it] being within the safety of the Bowdoin campus, because it is a closed Web site—opens possibilities for that kind of discussion."

"Voyeurism is easy, we've got a lot of silent watchers. It's walking out onto that limb that I think makes people look down, turn around," Scheidt added.

Dress like your inner rock star, and bring on the clash

KIDNAPPED BY STYLE

> BY DAVID YEE COLUMNIST

Today, I clash. With my pants patterned subtly plaid, shirt pressed with opposing stripes, suit jacket suitably unsuitably matched, I am a body carrying an array of textures in seemingly gross disharmony when described. But the actual phenomenon is not gross disharmony, but desirable disharmony that comes off as potentially overthe-top, but tasteful. This is how I might describe myself: at times crass, but never classless. Sometimes, it's okay to classh.

A lot of the time, the overarching question many have about style is, "Do these things go together?" And sometimes, the answer is easy. For instance, the time-old adage that the belt should match the shoes is useful. The TV show "30 Rock" recently used the concept of

the "uncanny valley" to describe the creepy sensation created when something humanoid, like a robot, approaches human likeness, but does not quite get there. The brown belt, black shoe combination (or vice-versa) creates a similar, not quite there, discomforting feeling, to me, at least. But more often than not, the decision is much harder than it appears, because some-times the clash is desirable. Once the bounds of what matches and what doesn't are broken, then each person can explore individual style more closely. A clash in the outfit creates some vibrancy to the outfit, and the intentional choice of clashing clothing can indicate an individual sense of style.

There are several ways to clash. I will provide two primary ways, and one smaller way. First, color, and then what doesn't work regarding it. This is the most apparent 'matching' question. Does blue go with green? Does brown go with red? I don't really know—it's really case-by-case. It's not even as simple

The intentional choice of clashing clothing can indicate an individual sense of style.

as to say black goes with everything because it doesn't; black and yellow are a sweet combination only if you like honey. Black on black, fortunately or unfortunately, summons up images of funerals (or maybe weddings). White doesn't go with everything—especially more white. The all-white suit has its place, sure, but it also, beyond evoking John Travolta or Tom Wolfe, conjures feelings that are alternatively mesianic or cult-ish, and I can think of very few instances where either of those feelings is good.

The overall problem, in my mind, with many of the problematic color circumstances outlined above is this question: If the person chooses to wear this combination, what does it say about their personality? Funerals, bees, cults, John Travolta—all these things send negative messages

about the personality of the person in question. The question, "Does that heinous shade of blue sky match that watermelon shade of green?" does not have such associations, or any associations beside the inference that the wearer likes bright colors. So as for potential color matches, as long as the clashes of colors do not have any specific implications, they should be explored.

Second, as exemplified in the first outfit example I gave, differing patterns may be explored in juxtaposition to each other. Stripes, polka dots, checkers, herringbone patterns-all of these things may be put together in an effort to create texture in an outfit. Texture itself is worth exploring, especially as the weather grows colder. Many different materials are used in the quest to keep the body warm. Woven wool used in sweaters differs from the denser wool used in jackets and overcoats. Cable knit and ribbed sweaters provide some variety in the upper body, while corduroy offers some texture for pants. Even within jeans, the different washes create different effects. A word of warning: Vertical/horizontal stripes and diagonal stripes probably won't work together as they would create an "uncanny valley" experience similar to the black/brown combination. A second word of warning: One should probably pick either color or pattern to clash, because the combination of both may prove altogether too overwhelming.

Finally, here's one last reason to clash. At Bowdoin, time is at an eternal premium. Worrying about what to wear causes anxiety in a schedule that already contains too much. Doing laundry is often two-plus hours of borrowed time, so making things happen without doing laundry is key. It would be fair to ask, "Who are you to say it's okay to mismatch?" It would be fairer of me to say, "why not, especially if it's easier?" Try out a combination, even if it is born out of the dire necessity to do laundry, or a potential way to relieve wardrobe anxiety. It may work better than world think.

TROUBLE CONTINUED FROM PAGE 1

Many of the lobstermen who are still fishing have payments on their boats to pay off.

"People have to pay the bills, they have to go out," said Andy King '08, who works as a sternman in Harpswell. If lobstermen can't make payments, they lose their boats."

"Plenty of boats have been under foreclosure," Dennen said. Like other older fishermen, Dennen owns his boat and gear and is not as vulnerable to the ups and downs of the market. The younger guys are the ones most at risk of being squeezed out of the market, they're the ones who should stick around because they're the next generation."

Both Hayden and Dennen agree that the problem stems from a lack of control over the situation. Lobstermen cannot set the price of their inputs, bait, and fuel, or their output, lobster. As the prices of fuel and bait skyrocketed this summer, they had little choice but to pay.

"You either buy it or you don't fish," Dennen said.

Adding to the strain created by high overhead costs, the price of lob ster plummeted this fall. The forces at play that contributed to the drop in price extend well beyond the Maine coast. Hayden explained the process as a two-part problem.

Firstly, in recent years, improve-

ments in technology have allowed lobster meat and live lobsters to be shipped farther than ever before. Lobsters have become popular in Europe and Asia, and, as a result of the new markets, demand has increased. While lobstermen formerly relied on mostly domestic markets, they now make most of their money in sales to Canadian processors who ship the lobsters around the world. The Canadian processors buy most of their lobsters in October; as a result lobstermen depend on fall sales for most of their income.

In a confusing series of interactions that illustrate the dependence of lobstermen on financial institutions they never interact with, Canadian processors get most of their credit from Icelandic banks, many of which have taken a serious hit in this fall's financial crisis. Consequently, the banks are unwilling to lend as much or as easily as before, and the Canadian processors can no longer get loans to buy lobsters from people like John Dennen. When they stopped buying, the market was suddenly flooded with lobster and the price plummeted.

"Dealers in Maine started telling fishermen not to go out because they won't make up fuel and bait costs, Havden said

Secondly, domestic demand for lobster has dropped as well.

"The perception is that lobster is a high-end, luxury item," Den"Dealers in Maine started telling fishermen not to go out because they won't make up fuel and bait costs."

. ANNE HAYDEN COASTAL STUDIES SCHOLAR-IN-RESIDENCE

nen said. Even though the price of lobster is around \$3.00 a poundabout the price of chicken—the perception that lobster is expensive has kept sales low.

The Orient found that the price of lobster at some local restaura is still high, a phenomenon Hayden called the "lag-affect in lowering called the "lag-affect in lowering prices." Joshua's Tavern in Brunswick charged \$19 for a lobster roll. However, a lobster dinner at Something's Fishy in Brunswick costs \$10.99 and \$18.95 at Cook's Lobster House on Bailey Island. A Cook's employee said normally lobster dinners cost \$28.95 but "we're trying to sell more to help our lobstermen out.

According to Hayden, it makes ense that the problems facing the lobster industry are largely of external origin, as the Maine lobster fishery has a reputation of being one of the best-managed fisheries in the world. Long before federal regulations were implemented, lobstermen managed the fishery themselves. Many lobstermen and scientists say locals managed the fishery better on their own than with government oversight.

LOST LUXURY: Lobstermen are struggling to deal with the decrease in demand and simultaneous increase in supply that has led lobster's price to drop to the price of chicken.

The interference of the Feds has not helped at all," said Dennen, referring to regulations that limit the amount of traps each lobsterman can have. "They think the fishery is over-fished but there is no evidence that's true." He cites the statistic that lobster landings, or the amount of lobsters caught every

year, have stayed stable for the past 60 years. Hayden explained that statistic by arguing that lobstermen have adhered to local regulations on their own

"How does this happen?" Hayden asks, referring to the sustained lob-ster yields, "Well, the lobstermen know what they're doing.

Head, shoulders, knees, and toes: 'Anything can be erotic'

SEX MATTERS

RY HH IA ROND COLUMNIST

When we think about sexual activity, there are a few body parts that are generally understood to be key players. These are typically the body parts that will bump a movie's rating from PG-13 up to R. These are also body parts that are typically (somewhat) covered by clothing. The fact that these areas are considered inappropriate for children under 17 gives them a special status not enjoyed by the other 97 percent of our bodies. I mean, can you imagine television stations censoring out hands? Elbows? Ears? But just because Hollywood has decided that these body parts aren't "special" doesn't mean we have to forsake them, too.

As a neuroscience major, I can say with some confidence that the brain is capable of interpreting sensory input from more than simply the mouth and genitals. In fact, a much larger portion of the brain is devoted to interpreting sensory input from the hands or lips than from the genitals. This realization doesn't mean that the genital region isn't important, but it leaves an opportunity to get creative. Realistically, any body part can be turned into an erogenous zone, but for the sake of space we'll focus on a few.

Fingers: These overwhelmingly useful digits are incredibly sensitive, a fact that can be exploited in situations other than testing whether or not the burner is hot. Try sucking on your partner's fingers, one at a time, and coupling that with genital touch ing. You can experiment with timing and synchronize what you're doing with your fingers with what you're doing to their fingers. Try grabbing your partner's hand and moving it over areas of your own body. This way you can both experience light, sensual touching in a way you might not have before. Incorporate a hand massage,

which can feel especially nice after taking a long essay test.

Ears: Ears are a very sensitive part of the body that are generally introduced to the sexual arena with the concept of whispering "sweet noth-This is probably because people don't generally care for that not-sosweet something (saliva) pooling in some of their most sensitive sensory organs. There are ways around this, owever. Try sucking and nibbling on the earlobe, and then licking behind the ear. You can also trace the edge of the ear with your tongue. Some people like having a tongue stuck in their ear, some definitely don't. It's probably best to ask, or at least go slow, to give people a chance to make their preference known. Breathing softly into the ear can be sexy, especially when you've just oistened the ear with your tongue, but yelling, loud moaning, and panting are not so hot. No one wants to explain to their doctor that they're going deaf because their boyfriend keeps hyperventilating into their ear.

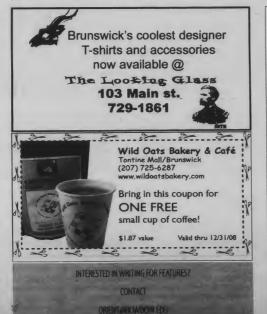

Elbows and knees: I know it may sound gross, but the skin in the folds of your elbows and knees is really sensitive. It can be a nice place to lick or kiss. Also, kissing the inside of the elbows leaves you in a nice position to lick up the arm and to the collarbone, which is a sensitive area. The knees give you a nice trajectory to the inner thighs, serve some attention before you wind up a little further north. The inner thighs are very sensitive, and nibbling and kissing there can be a great way to increase your partner's anticipation before you get to the groin.

Feet: Feet are tricky because people eem to either love them or hate the However, don't discount how nice it can feel to have a foot rub, especially during some licking/kissing of the is ner thighs and genitals. Some people also like the idea of having their toes sucked on, so that might be something to ask about if you know your partner's feet are clean. Be wary of ticklishness, though. Nothing ruins the mood faster than a swift kick in the face.

Abdomen and bellybutton: Kiss ing and licking a path between the belly button and the nipples can be a

sitive zones while also including the abs. Go a little lower, too, and explore the creases between the hips and the groin. This can be another great way to build anticipation for oral sex.

When it comes to sensual touching, the body is, literally, your canvas. most anything can be made erotic when you're in the mood. Exploring under-appreciated areas of the body can be fun and invigorating. Just bear in mind: Moaning is a good sign, as are sighing and the exclamations "yes" or "oh my God!" Demonic, uncontrollable laughter or wild thrashing on the other hand? Probably best to stop before your partner punches you or pees in your bed.

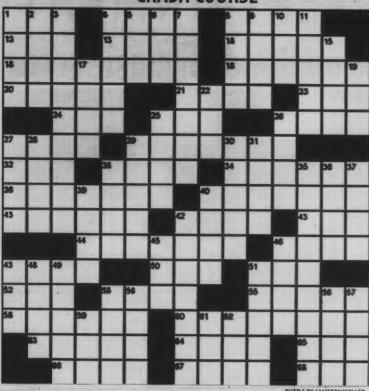

The Jacob Hiatt Center for Urban Education, awarded the 2007 Richard Wisniewski Award by the Society for Education Professors for contributions to teacher education, is dedicated to preparing outstanding urban teachers. The Master of Arts in Teaching program is yearlong, with a full academic year internship in one of the Hiatt Center's partner schools in the Main South area of Worcester, Massachusetts.

We seek students who enjoy young people, are reflective, have strong academic backgrounds, collaborate well with others, and believe in and want to become great teachers for urban youth.

The next full-time program year begins in late May 2009 and ends in May 2010. For information contact the Jacob Hiatt Center for Urban Education at (500) 793-7222 or mahenard @clarku.edn. Visit our website at www.clarku.edn/densertmento/education. Applications for 2009-2010 program year are due by January 15, 2009. Minorities and women are strongly ancouraged to apply. ons for the

Student bands tune up Bowdoin music scene

STAFF WRITER

Though pounding hip-hop often blasts at Bowdoin parties each weekend, occasionally these manufactured beats are replaced with live music from Bowdoin's several campus bands.

Perhaps the most well-known Bowdoin band is The Milkman's Union, which formed two and a

Members include Henry Jamison-Root '10 on guitar and vocals, Akiva Zamcheck '11 on guitar, Sean' Weathersby '10 on bass, and Peter McLaughlin '10 on drums.

The band is popular for their self-proclaimed indie rock sound, and McLaughlin cites Radiohead, Grizzly Bear, and Blonde Redhead among its many influences.

The Milkman's Union often makes on-campus appearances and members revealed that the band is currently working to immortalize its sound with its first

"We are in the process of recording our full-length debut as a band in Studzinski Recital Hall," McLaughlin said. "It should be released this spring, if not before."

One of the most regularly playing non-cover bands at Bowdoin, with four shows each semester, many members of The Milkman's Union plan to continue in their musical pursuits after graduation.

"At least three members of the band are pursuing serious careers in music, so hopefully the future holds something," McLaughlin

"We'll starve if we have to," he added.

An equally unique Bowdoin band is the metal group Teratoma headed up by lead singer Andrew

PRACTICE MAKES PERFECT: Members of The Milkman's Union Akiva Zamcheck '11, Sean Weathersby '10, Henry Jamison-Root '10, and Peter McLaughlin'10 prepare to jam in a practice room in Smith Union.

Made up partially of Bowdoin students and Brunswick residents, Teratoma boasts Lauren Marshall '10 on the drums, Fred Cantu '12 on the guitar, and locals Jared Moreneau on guitar and Steve Frost on bass.

While broadly classified as a metal band, its members "incorporate a lot of melodic death and thrash elements, perhaps with hint of metalcore in there as well," according to Sudano

While they don't play on campus often, Teratoma is hoping to play a

show by the end of this semester. They also plan to record an EP or demo CD next summer in Brunswick.

Although some Bowdoin students might hesitate to attend a metal show, Sudano encourages people to attend the band's performances.

"If we're playing on campus, come. I don't care if you hate metal. We've got some surprises planned for our live shows and I guarantee that you'll be entertained," he said.

Influenced by bands like Slayer, Iron Maiden, and Children of Bodom, a Teratoma show would provide a different musical experience for Bowdoin students.

While both The Milkman's Union and Teratoma play their own original music, newly formed cover band Mr. Suds offers a more recognizable set list.

Made up of lead vocalist and keyboard player Brian Wu '11, gui-tarists Sam Epstein '11 and Bryce Lednar '11, bassist James Carney '11, and drummer Andrew Cole man '11.

Mr. Suds is already establishing its presence on campus. Debuting MacMillan House in October, Mr. Suds went on to play at a Halloween party at Pine Street Apart-ments and will perform again at Quinby House later in the semes-

Although Mr. Suds members have been content playing covers, they hope to expand and play their own material.

"We're heading in that direction", said Carney. "We hope to have one and maybe two original songs the next time we play live."

Considering the youth of the band and the number of live shows they have already played, Mr. Suds

may become a staple of Bowdoin events in the coming years.

Members of the largest student band on campus, Eleven, play covers as well as original music. Seven musicans currently comprise the group: Nick Lechich '10 (percussion and vocals), Alexi Thomakos '10 (guitar and vocals), Jamie Nadeau 10 (percussion), Sammie Francis '09 (keyboard, guitar, vocals, and flute), Emily Schonberg '10 (keyboard, guitar, and vocals), Max Taylor '10 (bass and vocals), and Matt Bowers '10

"The band is all about high energy and spontaneous metal jams in drop D. We feed off of each others love for the music and prolonged synth intros," Thomakos said of the group's character.

"When focused, we'll prepare an upbeat set with a mix of and originals. We have a ridiculous amount of singers and a broad in-strumental knowledge that allows us to experiment with a wide variety of tunes," he added

The group cites Dave Matthews Band, U2, Coldplay, and Joni Mitchell among its influences.

Eleven plays an average of two shows each semester, and will perform its first show this fall on Saturday at 11 p.m. at Quinby House.

The band has yet to record an album, but plans to enter the recording studio in the near future, according to Thomakos

Although these bands have acquired varying levels of success here t Bowdoin, there is plenty of room for new upstarts and an audience to receive them, according to Sudano.

"There are a good number of people at Bowdoin who like more eclectic things," he said.

ALL SMILES: Members of Eleven (from left): Emily Schonberg '10, Sammie Francis '09, Jamie Nadeau '10, Nick Lechich '10, and Alexi Thomakos '10, take a practice break. "The band is all about high energy and spontaneous metal jams in drop D," Thomakos said.

Shipyard Prelude a spicy complement to winter festivities

THE BEE

COLLIMNIST

Shipyard Prelude is terrible. Not only does it not live up to the standards of a decent winter ale, it is simply an unacceptable beer.

It is formed from the scum of beer making, and only the scum of beer drinkers would dare to admit that they like this travesty. Were I to go to a friend's party and find a 12-pack of Prelude purchased in an attempt to class up the party from the 30-rack of PBR next to it, I would politely say my goodbye, go home, and de-friend that person on Facebook.

That's a flat-out lie.

But it's worth a shot to discourage you from purchasing it so as to leave more for my roommates and me to drink

Prelude became Shipyard's official winter beer last year due to its immense popularity, and the brewery revamped the packaging and extended its season of availability. It's a shame that it's only a seasonal beer because it outshines some of Shipyard's other flagship brews.

Prelude is a Christmas Festival in Kennebunkport, Maine, that was started in 1982 by businesses to give thanks to their residents. To this day the festival includes tree lighting ceremontes, art and craft fairs, programs from the historical society, meals at multiple venues, and Santa arriving by lobster boat escorted by "lobster elves."

In 1993, Federal, Jack's restaurant and Brew Pub introduced the Prelude Special Ale to celebrate the holiday season, named after the celebration. Kennebunkport Brewing Company, which would become Shipyard in 1994, either brewed the

HOLIDAY CHEERS: Prelude is Shipyard's winter ale. As a popular complement to the holidays, it is currently available at most local grocery and liquor stores

original batch or continued to brew the beer once Shipyard was fully operational. In 15 years it has become a classic, and last year Shipyard made it its official whiter seasonal ale, sporting a Maine artist's painting of Kennebunkport in the winter.

The beer smells...good. You can tell that you're in for a combination of a nice dark beer with spices

of Christmas. The beer pours a dark clear and amber color, like cola with grenadine. It tastes malty, nutty, and like a nice, full-bodied English. Ale, It has accents of cookies and a finish of hops, which is not overpowering. There is nothing offensively extreme in this beer, but has a nice blend of flavor to keep it interesting. I also feel warm as I drink this beer, which

makes it really taste like watching a winter day from the inside.

This beer is the adult alternative to hot chocolate on a cold de as satisfying. It is a great accompaniment to the snow about to fall, the progressively colder winter nights, or another freak snow day (if we ever have one). If you've had Shipward before, you'll be impressed with

the execution of this beer. Because it is Shipyard, a local microbrew from Portland, it is very affordable and very easy to find. The season for this beer has just started, so it can be found at Hannaford or any of your favorite local beer stores. Pick up a six-pack or even a 12, if my friends and I haven't already cleaned out the

Miss Maine 2008 to showcase musical talent in Studzinski

BY RACHEL GOLDMAN STAFF WRITER

While many may have preconceived notions about national talent pageants, Adrienne Watkinson, Miss Maine 2008, will put the rumors to rest when she performs a violin concert at Studzinski Recital Hall on Saturday.

Watkinson, originally from Topsham, was urged to run for Miss America after Charlie Lane, owner of Maine Sound Stage, saw her performing in Brunswick in 2007. According to Watkinson, she laughed at the idea because it wasn't anything she'd thought of doing before. Lane urged her to consider Miss Maine, however, because the talent portion of both the Miss Maine and the Miss America pageants was a huge component of the competi-Considering her violin talent and the \$10,000 scholarship awarded to the winner, Watkinson decided to give it a shot.

In her first time running in 2007, Watkinson received second runner up. In 2008, when she decided to run again, Watkinson won Miss Maine. She will use the scholarship to return to school to receive her masters in music performance at DePaul University School of Music in Chicago.

After winning Miss Maine, Watkinson has spent the obligatory year of community service performing on the violin in hospitals and nursing homes around Maine. Her community service was part of the platform of music awareness upon which she is running for Miss America. Specifically, she is attempting to show the benefits and necessity of music therapy.

"Music is so helpful for people who are sick," Watkinson said. In addition to her various performances around Maine, Watkinson also performs weekly at the Barbara Bush Children's Hospital.

The violin has always been an integral part of Watkinson's life. She began playing when she was eight years old, and after completing middle school at Mt. Ararat in Topsham, she attended high school at the Walnut Hill School for Performing Arts in Natick, Mass. While Watkinson was there, she played consistently in the New England Conservatory of Musical Orchestra program. After years of dedication, practice, and musical passion, Watkinson said that one of the most rewarding parts of being Miss Maine is her ability to influence and encourage future generations of young musicians.

"When I travel to schools I ask, 'How many of you are in orchestra and band?" Watkinson said. "And when a lot of kids raise their hands I tell them that when I was there age, I was just one of not so many. Then, it wasn't the cool thing

to do, it was just something I loved so I stuck with it. I want them to know that it's OK to be an outsider—you just have to be determined and practice. Because later in life, if you stick with it, it'll all come back to you."

Watkinson said that her experiences as Miss Maine have been unique. Learning to walk in heels and to engage in a 10-minute interview where contestants are questioned about current events, personal beliefs, and more philosophical questions was "challenging," Watkinson said.

"They really try to get to the core of you and see how 'with it' you are with the world around you. It's nothing I'd ever encountered before in the practice room," she added. "A lot of times pageants have a stereotype that it's a bunch of beauty queens. It's not just about beauty or the surface, it's about what's inside as well."

This is especially important for Miss America, who has to travel more than 25,000 miles each year and is constantly in the public eye.

"Miss America has many different hats," Watkinson said. "But her primary job is to talk to different groups about the Children's Miracle Network, an organization for which the Children's Hospital raises money."

Please see MISS MAINE, page 10

DURTESY O FDELMAR SMALL

MAINE-IAC: Adrienne Watkinson is Miss Maine 2008 and a concert violinist currently studying music performance in Chicago. She will perform on Saturday at Kanbar Auditorium in Studzinski Recital Hall.

Mainers and lessons of life abound in 'Olive Kitteridge'

NOOK

BY FRANCES MILLIKEN COLUMNIST

The infamous crotchety nature of Mainers is treasured by those who can proudly call the attributor their wn, as well as by those who have encountered it. Olive Kitteridge, in Elizabeth Strout's novel of the same name, is one of these ornery folk She is a retired math teacher and well remembered by her students, o never fail to mention her intimidating presence.

Stout renders Olive with a keen eye and a type of admiration. Olive is olid presence with no pretensions and a straightforward approach to life. She has found residency in her corner of Maine and is unwilling to participate in the worldly changes to which she is occasionally exposed.

Olive's husband, by comparison, lives with optimistic innocence. He is the first character into whom the reader is given insight. Initially, Olive appears on the outskirts and it is unclear what makes her tick. As the book progresses, more as a collection of vignettes than a novel, the

layers of Olive are slowly revealed.
The youths of Olive and Henry are only seen in hindsight. Olive's story is one of middle and advancing age Strout handles the isolation of each spouse within the marriage with delicacy. Henry and Olive both have interior landscapes of their own and Strout does not place the weight of the marriage's success on either of their shoulders. She deftly constructs the map of connections, which link the two Kitteridges despite their dif-

For a middle-aged to old couple in Maine, Henry and Olive have a substantial quantity of adventures. They are held hostage in a hospital by reckless young men, forcing them to examine themselves and their relationship in light of the trauma. Olive is often on the periphery of other people's catastrophes and for all her cantankerous qualities, she is a grounding force for a number of people at sea.

As life continues for Olive after Henry passes away, Strout looks with sensitivity at the segregation and loneliness of the elderly. She loses her only son to an awful wife and then a different country. She is astonished to discover that her beloved child has an entirely different interpretation of her place in his life as his mother. He speaks with fright-ening calm about her erratic moods and the effects they have on others. He speaks with the learned jargon of a therapist. Olive is of another generational breed entirely and has little patience or belief in the dissections of her son. She merely feels unanchored and left with few people to

The compassionate scrutiny that Strout brings to the narrative is essential to "Olive Kitteridge." She doesn't overlook the sentiments of even the most peripheral of characters and these gentle amplifications of what drives or burdens these people strike a resonant chord.

Strout makes a crosscut into the lives of ordinary people in a small fown in Maine and brings to light the delicate grain of life, which is patterned with instinct to survive and the triumphs and catastrophes that accompany it.

Gregory Brothers to play eclectic grooves at Mac

Mac House will provide tonight's venue for The Gregory Brothers, a Brooklyn-based-band originally raised in and influenced by the "creeks and crawdads" of their home state of

The Gregory Brothers band consists of brothers Andrew (guitar, bass, and vocals), Evan (keys, drums, vo-cals), and Michael (keys, drums, vocals), and Sarah Fullen (guitar, bass,

Andrew describes their style as ilar to "The Band, [but] with more

"Otis Redding singing John Prine ongs with Bonnie Raitt singing lead and back-up-all on steroids!" added.

The Gregory Brothers fuse a variety of styles, largely due to the musical

taste of the group's members.

Michael Gregory has recently made a name for himself on the Web with a torrent of election-themed anthems that are as catchy as they are hysteri-

One of his most popular Youtube videos features Michael as Barack Obama in a presidential debate, responding to questions in auto-tuned song and dance as Jim Lehrer and John McCain look on in disbelief.

"I like to cut right to the chase when

answering tough/easy questions and thrust my shoulders or pelvis to drive points home that otherwise might not register," Michael, as the jokester of the group, says in the song.

Andrew, in addition to touring with his brothers and Fullen, has been pursuing a solo career, the most recent project of which is an album titled "The Color Red and Other Songs About the Power of Love." His tone, reminiscent of the collective sound of The Gregory Brothers, tends to be especially acoustic, soulful, and ex-

Sarah Fullen is the "soulstress" of the group, a powerful soul/R&B/folk singer who has toured with a number of groups over the past few years.

She began touring with the Gregory Brothers in the summer of 2007, and since then, she has developed her own sound and style, creating "repertoire of tell-it-like-it-is knock-em-sockems," according to her MySpace page.

Put all these ingredients together, and The Gregory Brothers present an exciting synthesis of genres that lights up any crowd they perform for.

On Friday, students can expect to hear music that jumps and sways, laughs and wails, and delivers a moddose of southern-style soul

The Gregory Brothers will per-form tonight at 11 p.m. at MacMillan

WBOR 91.1 FM DJ OF THE WEEK

Will Cogswell '11

If you could only listen to one album for the rest of your life, what would it he?

WC: Animal Collective's "Strawberry Jam.

Favorite song to dance/rock out to when you think no one's watching?
WC: "So Haunted" by Cut Copy.

Nothing's better than minor-key gui-tar riffs and gorgeous synths. If you were in a band, what would

called and what kind of music would you play?

WC: The Yellow Linguistics. Against our better judgment, we'd turn Robert Hass poems into lo-fi, punk-ish bites.

Theme song during Ivies? WC: Either "Here Should Be My Home" by No Age or The Hold "Cattle & The Creeping Steady's

If you could meet any musician, dead or alive, who would it be and

WC: Miles Davis without a doubt-one of the country's greatest musical minds of all time.

Best new music you've heard late-

WC: No Age. Musically literate lofi punk-pop straight from LA. Their freshman full-length "Nouns" is one of the best things to hit the shelves

If you could time travel back to any musical period, where would you go

WC: Probably the '50s and early '60s. I couldn't imagine huddling over a turntable listening as Miles Davis and his compadres changed modern music as we know it with every record they released.

Bands/musicans who have m fluenced your musical taste?

WC: Discovering Radiohead opened a whole new world a few years back, but Guided By Voices and Animal Collective inform a lot of the music I listen to now

"Magical Mystery Tour" with Will airs Mondays from 2-3 p.m. on WBOR 91.1 FM. or online at www.wbor.org.

Women's soccer falls in NESCAC semifinals

Bears end season with 6-1 loss to Williams

> BY AILEEN TSCHIDERER STAFF WRITER

Williams College defeated the Bowdoin women 6-1 in the semifinals of the 2008 NESCAC Women's Soccer Championship, bringing the season to a close for the Polar

The Ephs came out firing in the first two minutes of the game, as midfielder Jackie Russo slotted a ball past keeper Kelly Thomas '09. The goal was the second fastest to open a game in NESCAC tourna-ment history.

Fifteen minutes later, another opportunity appeared for Williams and the ball slipped past Thomas

The next goal was a mere 52 seconds later as Williams took a 3-0 lead with just under thirty minutes remaining in the first half

However, with ten minutes left,

Ellery Gould '12 played a ball to Anna Tachau '12 on the top of the

Tachau managed to slip the ball under the cross bar and narrow Williams' lead to two.

"We changed our formation to adapt to theirs, and I think there was confusion and a lack of communication on our part," Tiernan Cutler '11 said. "It seemed like

there were always people open."

The second half started much like the first, with a swift attack by the Ephs.

In the second minute, Williams scored, bringing the game to 4-1. Two late goals brought the final tally to 6-1.

Williams went on to down Amherst in overtime, 3-2, to win the NESCAC championship.

"It was more frustrating than anything, because we were playing with them for almost the whole game, but they would capitalize off a single mistake we would make and they would score," Cut-

THREEPEAT: Sophomores James Lathrop (No. 30) and Paul Hinman (No. 32) tackle a Colby player during the Bears' 20-6 win over the Mules

Football takes care of Colby 20-6, wins CBB for third straight season

RY IFREMY RERNEELD

STAFF WRITER

There's nothing like going out on top. The Bowdoin Football Team did just that, winning its final three games of the season, including Saturday's 20-6 win over archri val Colby that clinched Bowdoin's third-straight Colby-Bates-Bowdoin Championship.

Junior quarterback Oliver Kell shined in the win, amassing 244 yards of total offense himself-23 yards more than the entire Colby team combined. Kell finished 17-27 for 152 passing yards with a touchdown and an interception. He also had 30 carries for 92 yards on the ground.

"Ending our careers with threestraight wins and three-straight CBB championships is great," said senior quad-captain Gus Spaulding. "It makes all the hard work we have put in over the last four years entirely worth it."

After Colby scored on its open-ing possession and missed the extra point to take a 6-0 lead, the Bowdoin defense took charge. A second quarter interception by Matt Leotti '10 put the Polar Bears on the Mules' 22-yard line and senior Nolan McNair halved the lead with a 34-yard field goal.

Later in the quarter, Bowdoin took the lead for good on a dominating nine play, 58-yard drive that resulted in a four-yard touchdown reception by senior Michael Welsh with just 25 seconds left in the half.

In the fourth quarter, Bowdoin

17-play, 80-yard drive. After leading the team to three third-down conversions and one fourth-down try, Kell capped the drive with a six-yard touchdown run to put the Polar Bears up 17-6. McNair added another field goal in the fourth quarter for the final score of the af-

Senior linebacker Damon Hall-Jones won NESCAC Defensive Player of the Week honors for his sensational play in the Polar Bear win. Hall-Jones recorded nine tackles, seven of them solo, including three for a loss and one sack. He finished the season with 58 tackles on the year, good for second on the team, and led the league in tacklesfor-loss with 15.

College football is known for its rivalries and although Bowdoin plays in Division III, ending the year with two wins over rivals Bates and Colby is enough for most to call the team's season a success. In addition, it is the team's first .500 or better finish since the 2005 season.

"All week we said that this was going to [be] the most important game of our careers," said quad-captain Jack Dingess '09. "To go out and beat a good Colby team, win the CBB, and finish .500 was the realization of all the work we put in over the last four years. It was great."

Many believe that the 4-4 record the team posted this season does not accurately reflect the team's inseason growth.

"The most important thing that happened was that our defense matured a lot in the last half of the year," Dingess said. "We had freshmen and sophomores playing in every position group, and as those guys gained experience we started playing up to our potential. In the beginning of the year, we knew our offense would be able to put up a lot of points, but it took our defense some time to catch up."

Kell's quarterback play was out-standing for most of the year, and his performances helped the team immensely.

"Obviously, Oliver Kell had a great season," said quad-captain Tim Kelleher '09. "Hopefully he can build upon this year's fundamentals and apply them to help the Polar Bears win next year."

"On offense, Oliver Kell became one of the best, if not the best, quarterbacks in the NESCAC," Dingess said. "On defense, three players stand out to me: Kevin Zikaris '10 had a great year, Damon Hall-Jones '09 lead the league in tackles-for-loss, and Ben Shulman '09 dominated every offensive linemen he played against, and was the key component in our defense all year," said Dingess. "He deserves all-league honors."

In all, the Polar Bears surprised a lot of people and surpassed expectations by finishing .500 this year.
"When we were 1-4 after Home-

coming, a lot of people counted the season as a failure," said Dingess. But the guys on the team stayed strong, never let the negative criticism affect them, and ended up winning out and finishing up with a CBB title and a .500 record. I think that showed strong character, and I'm proud to have been a part of it."

Volleyball's season ends with first-round defeat

BY KERRY D'AGOSTINO STAFF WRITER

The women's volleyball team closed out its 2008 campaign on Friday, suffer-ing a 3-1 loss to Wesleyan.

The seventh-seeded Polar Bears be-

gan the game on a high note, holding a five-point lead at 15-10 only to fall to the second-seeded Cardinals in the first set, 25-21.

After reaching 15-14 in the second set, however, the Bears refused to re-linquish their lead. Eventually they triumphed with a 25-21 final score that would signal their last set victory of the season. In the third and fourth sets, the Cardinals came back with a vengeance to finish the match at 25-17 and 25-18

Gillian Page '10 continued her solid play over the last several games with eight kills and 12 digs, while Kristin Hanczor '12 posted a team-high nine kills. Setter Jenna Diggs '10 made such offensive strategy possible with her 29 total assists Defensively, Anna Noucas 10 notched a team-high of 16 digs in addition to contributing two service

Kelsey Howe '10 joined the ranks of the team leaders for this last match, with an impressive seven kills and seven total blocks. Four of these blocks were against Wesleyan's Lisa Drennan, who was recently named 2008 NESCAC Player of the Year for the second time in

three years.

"It was amazing to see Kelsey so strong and aggressive in her blocking."

Head Coach Karen Corey said. Corey and her team named Howe the MVP for the game.

Howe is not the only member of the 2008 Polar Bears who should be proud of what she has accomplished this sea-

son. • "Despite the earlier ending to our

season than we all hoped for, we're all proud of how much we have grown as individual players and as a team," Hanc-

At the conclusion of the season, Hanczor, Page, and Diggs have each entered themselves into the Bowdoin record books for single-season performance: Hanczor now ranks fifth in kills with 319 and fourth in blocks with 93; Page ranks third in attacks; and Diggs ranks third in both assists and digs with respective totals of 974 and 441.

Page, Diggs, and Stephanie Drumright '11 also have also placed themves in the career records books. Page leads in attacks with 2875 while coming in second with kills at 928 and third with digs at 1017.

Diggs achieved a similar triumvirate of standings; she leads in digs with a 1281 total, second in assists with 2375, and takes third in aces with 145. Drumright claims second place for blocks with her 183.

Gina Lonati '12 said that the .500 winning percentage might not fully represent the Bears' strength, and felt that the team had "pushed each other as well as ourselves, and, in the end, learned a lot about playing hard, staying mentally

strong, and working together."

The team will be at an advantage next year since it will not graduate any

seniors this spring.
"Not many teams get this kind of second chance," Hanczor said. "Not many teams get to come back with the same

group and change what we want."
For Diggs, the impending change is

"If we work hard in the off season and motivate ourselves and our teammates to give one more inch, to get that much better," she said, "we will be very suc-cessful next fall and will surely avenge the losses we faced this past season."

Sailing has strong results in Rhode Island, Cambridge

Bowdoin Sailing Team braved the cold and wind to enjoy several respectable finishes at recent weekend

Members of the co-ed team traveled to Newport, where they sailed to a 10th place finish at the Rhode Island State Championships. Salve Regina played host to the 17-boat event held in 420s on Narragansett Bay. Although Saturday racing was canceled due to heavy fog, sailors enjoyed blue skies and big breezes on Sunday.

Skipper Alex Takata '12 sailed with crew Erin Taylor '09 to post several top-five finishes to finish fourth overall in the A-division. In the B-division, seniors Pete Wadden and Meredith Steck placed 12th

"Newport was an exciting venue," said Taylor. "The big breeze and chop was at first daunting, but [Alex and I] focused on keeping our boat flat, working through the waves without taking on water, and pinching slightly to de-power and point better than our competition."

"Overall, we were able to sail a

great regatta, staying consistent de varying conditions," added Takata

The Polar Bears also sent an all-fenale squad to compete in FJs at the Horn Trophy Team Race at Harvard. The Horn is one of the few team race events sailed during the fall season, which primarily focuses on fleet racrece: Bounding hymiati

ing. Skippers Doria Cole '09, Charlotte Williams '10, and Katherine McNeil '12 sailed to an eighth place finish overall, posting a 7-8 win-loss record over the course of the twoday event

Head Coach Frank Pizzo noted that the Horn was a good opportuni-ty for team racing, which is the focus of intercollegiate sailing during the spring season

"Overall, I think the Horn was a great experience for all of us and got us really excited about the upcoming team racing season," said Williams.

Two additional coed teams also traveled to the Boston area over the weekend to compete at MIT in single-sail technical dinghies. On turday, Andrew Howard '09, Caitlin Beach '10, Jeff Goodrich '12, and William Ho '12 finished third out of 25 teams at the Professor Noringer Trophy at MIT.

The team of DJ Hatch '11, Leah Hughes '11, Ben Berg '12, and Katharine O'Brien '12 posted similarly strong results on Sunday at the Crews Regatta, finishing fourth out

The Crews Regatta is an annual end-of-season event that provides an opportunity for sailors who normally crew to take the helm and skipper.

For the final weekend of the fall season, the sailing team will compete in FIs at the Atlantic Coast Tournament, a two-day championship intersectional held at Harvard.

"At the ACTs, we hope to finish the season strong and move up in the coed rankings," said Pizzo.

Titans to follow Obama's examp

RERNING

COLLIMNIST

We may have just finished an exhausting election season, but now it's time to ramp up football season.

The Tennessee Titans are a surprising dark horse if I've ever seen The infamous and annoyingly undefeated '72 Dolphins squad must have thought that they could break the champagne early this year while watching Tom Brady writhe in pain on the Gillette Stadium greenway. But heading into Week 11, the Titans are a smooth 9-0 to lead the

With a tenacious defense led by DI. Albert Haynesworth (he of stomping fame) and linebacker Keith Bulluck, and a consistent offense with Kerry Collins at the helm, the Titans have been getting it done. And they don't have the toughest schedule from here on out with Detroit, Cleveland, and Houston in the coming weeks. I'm not saying they'll challenge the '72 Fish for an undefeated seaso but-aw, what the heck, YES WE

The New York football Giants currently play the McCain to Tennessee's Barack and I'd put them as the odds-on favorites to sweep both red and blue states on their way to another Super Bowl title. They're in a red state this weekend, but they're no lock for a win against an always stingy Baltimore defense. Next week, however, they'll look for a win in McCain's home state of Arizona, and then they will try to lock up the NFC East the next weekend in-where else-D.C.

The Titans' running-mates hail from the same state as Obama's and from another Pennsylvania steel town with as hardscrabble a reputation as that of Scranton's. The Pittsburgh Steelers will make a strong challenge for the AFC title in the weeks ahead. Just like Biden, they're just happy and somewhat surprised to be in the conversation after devastating injuries to many offensive starters, including runningbacks Willie Parker and backup rookie sensation (and Bernfeld fantasy draftee) Rashard Mendenhall, Even with Parker's imminent return, the Pittsburgh Bidens will find it tough to replace Tennessee as the AFC's Super Bowl nominee because of tough upcoming games against San Diego, New England, Dallas, Baltimore, and

Just as Sarah Palin came out of virtual obscurity and was catapulted to the height of the Republican party, the Packers are an exciting surprise from the NFC. Quarterback Aaron Rodgers is the real deal, and they have four very winnable home games left. The hockey moms out there will be happy to hear that Green Bay is sticking around and will make a strong push in the NFC. But, like Palin, I don't think this is their year.

Everyody in Dallas is thinking "Maverick," but not because their team is a front-runner for first place. They're all just ready for the NBA season even after Romo finishes nursing his injured pinkie. Just like Hillary, the New England Patriots will stick around just long enough to build up and then destroy their fans' hopes,

and like Ralph Nader, Indianapolis can do enough damage to a title con-tender (like, say, their AFC South-rival Titans) but don't have enough in their own tank to win. Gosh, another Made in Tennessee disaster.

It's incredibly tough to predict the NFL postseason (see: 2007-08, Super Bowl), but the coming weeks will shape the picture up nicely and the favorites are settling into view.

New York will rely on its dominant defensive line to carry them, but their campaign has a brutal schedule. They have three games in three weeks against divisional opponents, with games against NFC West-lead-ing Arizona and NFC South-leading Carolina at the bookends.

Tennessee will have to win against swing-states Florida (Jacksonville), Ohio (Cleveland) and Pennsylvania (Pittsburgh) to win the Conference. But, like the Presidential race, I believe the harbinger of success or failure runs through Indiana (India-

As the days get shorter, the NFL only gives us more reason to stay in-doors and live by artificial light from the tube. As always, we're in for an exciting conclusion to the football season and every playoff spot is up

Who will stumble toward the end and who's in for a ticker-tape parade? I don't need holograms to project your playoff teams. New York, Caro-Arizona, Green Bay, Atlanta, and Philadelphia will represent the NFC. In the AFC. you'll see Tennessee, Pittsburgh, New England, San Diego, Indianapolis, and New York.

Whatever happens: Hail to the Chiefs, just not in Kansas City.

MARGOT D. MILLER, THE BOWDOIN ORIEN

DEFENDING CHAMPS: Emily French '12 prepares to hit the ball in practice on Thursday in anticipation of the Bears' NCAA second-round matchup Saturday.

NESCACS

With the win, Bowdoin defended its NESCAC title and earned a berth to the NCAA tournament, held this weekend on the home turf of Ryan Field. The

Bears had a bye in the first round.

After the Bears' championship win, a number of individuals on the Bowdoin team received individual awards. Lindsay McNamara '09 received the NES-CAC Offensive Player of the Year and a spot on the NESCAC All-Conference First Team. McNamara won NESCAC Player of the Year in 2007.

Joining McNamara on the All-Conference First Team was fellow senior Julia King. Kelley received NESCAC Player of the Week for her tournament efforts.

Before the Polar Bears were able to play for the championship, they had to take on the Middlebury Panthers in the

NESCAC semifinal game last Saturday.
The rivalry felt between these two field hockey giants never produces a game short of extraordinary, and the postseason atmosphere added to the

Bowdoin dominated the first half of the contest, scoring two goals and keeping Middlebury from recording a single shot on net.

The first Polar Bear goal came off a penalty corner opportunity with 10:58 remaining before halftime. King fed a hard pass to McNamara positioned just off the left post for the stuff between the legs of Panthers goaltender, Caitlin Pen-

Insurance came with 4:55 left in the first half. Shannon Malloy '11 drove a free hit into the scoring circle where King was anchored between defenders for the deflection into the back of the cage.

With a two-goal advantage and momentum on their side, the Polar Bears started off the second half with a level of intensity that Middlebury was unable to

It took just under four minutes for Bowdoin to extend its lead to three. Madeleine McQueeney '09 tipped a ball into the air toward the front of the goal and McNamara knocked it into the up-

per portion of the net.

The final nail in Middlebury's cof-

fin came 10 minutes later. McNamara hustled after a loose ball and just barely saved it from crossing the end line. The ball snuck between the post and the Middlebury goaltender and stalled on the goal line until McQueeney poked it into the cage.

Bowdoin is now 8-0 against the Panhers over the last four years, outscoring Middlebury 20-7.

This Saturday the Polar Bears will face the Stevens Institute Ducks of Hoboken, N.J. at 11 a.m. on Ryan Field. The Ducks are 19-3 on the season and have four forwards in the Empire 8 conference's top-10 goal scorers.

On Sunday, the winner of the Bowdoin-Stevens contest will face the winner from the Middlebury-Lebanon Valley game and play for a ticket to the 2008 NCAA Division-III Final Four,

hosted by Ursinus College.
"We are obviously delighted to be hosting the second and third round games at Bowdoin," said Head Coach Nicky Pearson. "There will be four talented teams here, including three from last year's Final Four, which should provide some exciting field hockey."

Sports Shorts

Bowdoin to end fees for hockey game tickets

The Bowdoin Athletic Department has decided to remove fees for tickets to Bowdoin regular-season ice hockey games.

The only exception, however, will be January 16-18 when the Bruns-wick High School Girls Ice Hockey Team will sell tickets to the last two home games at Dayton Arena as a fundraiser.

The Bowdoin Men's Ice Hockey Team will play Middlebury in its last game in Dayton, Friday, January 16 at 7 p.m. The women will follow, competing against Wesleyan at 6:30 p.m. on Saturday, January 17.

Tickets for these games will cost \$5 for adults and \$2 for children.

Individuals can pick up tickets in advance at the Athletic Department offices in Farley, at Bowdoin hockey games, or at Play It Again Sports and

Warming's Market in Brunswick. Tickets are also available for the opening of the Sidney J. Watson Arena Sunday, January 18. Tickets are free, but required for admission to the event.

The women's ice hockey team will play at 2 p.m. against Hamilton, with a dedication to follow at 4 p.m. The men's team will play at 5 p.m. against Williams.

The men's ice hockey team will begin its season Friday, November 21 with a home game against Babson. The women's team will play its first home game Saturday, November 29 against Mount Allison University.

OPINION

BOWDOIN ORIENT

Endowment disclosure

uring the current economic downturn, administrators at many colleges and universities across the country have informed students, employees, alumni, and parents as to how the global economic crisis is affecting their school. Bowdoin is no exception: Several weeks ago, President Mills sent an e-mail to the campus titled, 'The Economy and Bowdoin." In the letter, Mills emphasized that Bowdoin is well-positioned to withstand the current economic crisis. What Mills failed to mention in the note, however, were any specifics on the current state of Bowdoin's endowment.

The College's endowment was valued at \$831 million as of June 30, 2008. But this figure—a fiscal snapshot taken several months before the stock markets plunged—is outdated. And despite the reassurances of administrators, the Bowdoin community has no idea of the actual financial losses that the College has since incurred.

Williams has reported an estimated loss of 28 percent to its endow-ment. Amherst and Colby have each reported losses of approximately 25 percent. However, Bowdoin has been far less forthcoming about its endowment losses.

The College's Investment Committee, comprised of six trustees and a faculty member, has a policy that interim, unaudited numbers per-taining to the endowment are not discussed publicly. We have never questioned this policy when economic conditions were stable. But given the extenuating circumstances of the current financial crisis, it is essential that the administration informs our community of where

If students and employees had a clearer understanding our losses, we would be more willing to scale back and accept budget cuts. Employees have already been urged to reduce spending in their departments, but they may take such requests more senously if they had a better grasp of the College's current financial standing. Informing alumni on the state of our endowment could also prove to be in the College's best interest; potential donors would be more willing to give College's losses were not merely an abstraction.

By keeping us uninformed, the administration seems to insist that the endowment-and the financial vitality of the College-is their problem. But this is misplaced; we are, after all, in this together.

Speak with us

or the past 137 years, the Orient has been the primary news source for Bowdoin College. As student press, the Orient has usually enjoyed unique access to administrators, faculty, and staff on campus. Such access to Bowdoin sources has not always extended to outside media reporting on the College. However, the Orient's mission of acting as a responsible campus news source depends on its ability to talk directly with those who make decisions for the College or have valuable insights on issues relevant to Bowdoin.

It has recently come to our attention that certain administrators at the College have been encouraged not to hesitate in redirecting Orient reporters to the Office of Communications. If employees of the College don't have time to speak with us, or if they feel uncomfortable or unqualified doing so, they have been told to channel Orient reporters to those who manage the College's public relations.

While the Office of Communications can be—and has been—a

valuable resource for us at times, we urge members of the Bowdoin community to make the time to talk with us. Whenever possible, our reporters set up appointments to meet with administrators ahead of time. Only on rare occasions, when the urgency of a story calls for it, will a reporter attempt to meet with an administrator without prior warning. Such cases usually involve late-breaking stories that we feel warrant comments from certain employees of the College. We hope that our reporters do not unnecessarily interrupt employees who are busy at work, but if such situations do arise, we urge those people to communicate directly with the Orient editors about the problem.

Today, the Orient has a larger readership than ever. Since the creation of its Web site in the late 1990s, the effects of Orient reporting have become far more consequential than when the newspaper was limited to on-campus circulation. We understand that such a reality may be worrisome to those concerned with the College's image, as well as to those who are quoted on the record. Orient articles enter the public sphere in the truest sense, and we take our responsibilities as student press extremely seriously.

We understand that some people on campus may feel nervous talking to the Orient about sensitive subjects. But we expect employees of Bowdoin to feel confident in the decisions that they make, and we deeply hope that they feel comfortable in expressing their opinions

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Mary Helen Miller, Cati Mitchell, and Nat Herz.

Tap water: A smarter choice than bottled water

Fiii Water, Smart Water, Dasani, Aquafina, Poland Springs; thirsty students passing through the Student Union have a huge variety of options to quench their thirst.

But what stops students from considering the cheaper alternatives of going right past the C-Store and using the water fountain, or simply filling up their own reusable water bottles?

The bottled water corporations are misleading people into thinking that bottled water is better than tap water. Both Aquafina (Pepsi) and Dasani (Coca-Cola) have recently admitted that they bottle tap water and sell it back at a price higher than gasoline. An estimated 40 percent of all bottled water is tap water.

Unlike municipal water, which is regulated by the EPA, the bottled industry is regulated by the FDA. There is less than one person at the FDA dedicated to overseeing the entire industry in the US.

Municipal water is tested for bacteria hundreds of times per month, hile bottled water is only required to be tested once a week, before it is even bottled.

Furthermore, chemicals that can be leached from plastic bottles have been linked to hormone disruption and an increased risk of cancer.

Bottled water is not any safer or cleaner than tap water, and it has negative environmental effects. According to a study by the Pacific Institute, more than 17 million barrels of oil were used in plastic bottle production in 2006, not including transportation costs.

"The bottled water corporations are misleading people into thinking that bottled water is better than tap water. Both Aquafina (Pepsi) and Dasani (Coca-Cola) have recently admitted that they bottle tap water and sell it back at a price higher than gasoline. "

Bottling water produced 2.5 mil-lion tons of carbon dioxide that same year. It takes three liters of water to produce one liter of bottled

Of course the bottled water companies are jumping on the greenwashing bandwagon, but 30-percent less plastic in a Poland Springs bottle, or buying carbon credits to offset the carbon emissions from bottling and shipping water from Fiji, isn't as good as not bottling water at all. There is no such thing as "green" bottled water.

Corporate control of water resources is also cause for concern. Nestle's Poland Springs claims to be a great corporate neighbor, but they don't seem to be too popular here

Many towns have put moratoriums on any further water extrac-tion due to fears that Nestle is more concerned about meeting share-holder demands than sustainable

Nestle has been trying to build a truck loading dock in East Frye-burg, even after the Planning Board ruled numerous times that the hundreds of trucks coming in and out every day do not meet the town's requirements for a "low-impact business."

The company has sued (and appealed) the town five times. They

lost four times, and the fifth suit is currently pending, however the town is rapidly running out of money to cover their legal expenses. What a good neighbor.

Water is not a high-priced luxury commodity; it is a basic human right. The \$15 billion spent on bottled water in one year in the US is enough to provide clean drinking water to the 500 million people in the world currently without it

The more those who can afford bottled water depend on bottled water, the harder it is for communities to muster political and financial support for urgent upgrades to public water systems that most people depend on to provide safe, affordable water.

All of these reasons are why The Evergreens are organizing a Take Back the Tap campaign at Bowdoin. Over the next several months The Evergreens will encourage students to sign onto the pledge to choose tap water over bottled water, host Tap Water Challenges to see if peo-ple can tell the difference between bottled and tap water, and educate students, faculty, and administrators about what we can do to decrease bottled water usage and support public water instead.

Abriel Ferreira '10 is a co-president of The Evergreens, an environ-mental activist student group.

CAMPUS OUESTION

How does student employment affect campus culture?

Orient, the Bowdoin community was asked to respond to the question, "How does student employ-ment affect campus culture?" The following reply was submitted.

Kristina Ng '09

Student employment subtly affects campus culture and intrastudent perceptions at Bowdoin. Those students who are not employed on campus may not realize that others work as part of their financial aid benefits (which in itself. has socioeconomic class complications). When I work on campus, I try to be friendly and helpful but

I have encountered disrespect on many occasions over three years of employment.

This does not mean that the majority of students who are not employed on campus are incapable of showing respect and common courtesy. Most people can muster up a "Hi" or "How are you?" and most of all a simple "Thank You." However, that does not always

Things not to do: for instance, when you're at the C-store, do not throw your ID card down on the table, and go talk to your friends about how much you love Smart-Water or Odwalla, or babble about

which mixers you are going to purchase before you head to a pregame your crush is hosting-("I know what drinks he likes, therefore, I know him better," in a fight over one Bowdoin man), without acknowledging the person who is ringing up your items as a person and as a fellow student.

I have to put up with mindless conversations while students ignore me and throw down their key cards or cash (including change) and yet expect service with a smile. We should treat all people with respect. I'm still a student, just earning extra money on the side.

People may naively believe that

we're at a very liberal institution where socioeconomic status does not make a difference. Attitudes and behavior toward student employees (and toward staff) are too

often negative.

According to Professor of Sociology and Anthropology Joe Bandy, "The cleaning staff, dining service staff, and mailroom staff cite how students (sometimes or on occasion) treat them as merely hired help, people who have no other function than to serve. This suggests that campus services are viewed as consumer items-and how easy it is to be inattentive to the campus as a community where

Schools like Bowdoin are places that draw from, and contribute to, professional middle class ranks (or higher) of our class hierarchy but sometimes reproduce class inequalities despite our best inten-

Whatever our backgrounds, we need to take into consideration the broader message of respect for members of our communities inside and outside of Bowdoin.

Insight from conversations with Professors of Sociology Craig McEwen and Susan Bell was included in the writing of this response.

ACADEMICALLY, ARE BOWDOIN STUDENTS MORE COMPETITIVE OR COOPERATIVE?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu. Several submissions will be selected and published in the November 21 issue.

ResLife's alcohol policy effective, appropriate

The way I see it, Bowdoin's alcohol policy does just what the school wants it to do, and what it should. It keeps students out of the hospital. Compare the number of alcohol-related hospital transports at Bowdoin to say, Bates. Sometime earlier this year, Bates had a weekend with 21 transports. One weekend! Bowdoin will barely have that many in a de-cade at this rate. We've all heard how we have the lowest transport rate in NESCAC

I would credit Randy Nichols, the director of safety and security, directly with this success. His policies work. I see calmer drinking of hard alcohol on campus than I believe we would if it were allowed. People understand the risks they put themselves in when

they bring it out, so it stays low key. Say hard alcohol was allowed on campus, just as beer is now. That means that at social house parties, it would be fair game for someone to wander around with a shot glass and a handle, giving out drinks. It hap-pens at many a "state school" party. That seems far, far more dangerous than the current policy. It also puts more responsibility on the alcohol host to watch out for overly inebriated students.

The suggestion that we use college, aka tuition, money to pay for boozing is ridiculous. With the current economic downturn many families are already having trouble affording the huge tuition bills. How anyone can suggest that we put some of that mon-

ey towards drinking is beyond me.
If you're saying, "We don't have to
spend more money, we'll just use the
existing College House budget," then you haven't done the math.

As it is now, alcohol money comes from house and affiliate dues. The age house member pays around \$150-\$200 in dues for a year. For a house with 20-25 members, that is \$3000-\$5000. Add in the roughly

"Saying that ResLife is being hypocritical by registering or encouraging parties that involve underage drinking is just biting the hand that keeps you out of jail."

\$1000 from affiliates, and you're spending between \$4000 and \$5000 dollars on alcohol. Considering each house only receives \$6500 each year, that's roughly between half and threequarters of the budget. Without an increase in the House budgets, intellectual programming would suffer

This is not to say the system is not without its inconsistencies. Making Houses drop nearly \$100 on food per party that just gets dumped on the floor or gobbled by drunken party goers seems unnecessary. Six Oreos are not going to slow down someone's drinking, though a full dinner might. Does it encourage chem-free students to come to parties? Not unless they have a love for crappy tortilla chips and Wal-Mart brand soda. They'll come if they enjoy the party, not for

Saying that Residential Life is being hypocritical by registering or en-couraging parties that involve underdrinking is just biting the hand that keeps you out jail. Imagine if the college publicly encouraged or condoned underage drinking. Students may think that the school can't stop them from drinking, but the Brunswick Police sure can.

We would have BPD watching campus consistently if it weren't for our administrators. As it stands, alcohol hosts can get in trouble for a number of things involving campus security, but these only really go as far as social probation. With the BPD, College Houses would be in for a much greater level of punishment.

LECTURE

"Talk Radio Evolution: The War on Science and the Second Coming of Scopes"

In the third and final lecture of the colloquium "Faith, Reason, Evolution," Pulitzer Prize-winning journalist Edward Humes will discuss the current conflict regarding religion, science, and evolution. A panel discussion titled "Religion and Evolution" will follow.

Lecture: Room 151, Cleaveland Hall. 4 p.m.
Discussion: Kresge Auditorium, VAC. 7:30 p.m.

FILM

"There Will Be Blood"

This movie stars Daniel Day Lewis as an unscrupulous oilman at the turn of the 20th century. The film, presented by the Bowdoin Film Society, is loosely based on Upton Sinclair's book, "Oil."

Smith Auditorium, Sills Hall. 7 p.m.

CONCERT

An Evening of Chamber Music

Bowdoin string ensembles directed by Professor of Music Mary Hunter and Director of Chamber Ensembles Roland Vazquez will perform.

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

CONCER

Ursus Verses Fall Invitational

The Colbyettes and MIT's Logarhythms will perform along with Bowdoin's Ursus Verses in an evening of a cappella music.

Chapel. 8 p.m.

SATURDAY

CONCER

Adrienne Watkinson

Watkinson, who will represent Maine at the 2009 Miss America Scholarship Pageant, will play "Zigeunerweisen" by Sarasate as well as other pieces for violin.

Kanbar Auditorium, Studzinski Recital Hall. 7 p.m.

FILM

"There Will Be Blood"

Smith Auditorium, Sills Hall. 7 p.m.

SUNDAY

RELIGIOUS SERVICE

Protestant Service

Chapel. 7 p.m.

MONDAY

LECTURE

"Payment For Kidneys: The Most Fundamental Concern"

Nir Eyal, Assistant Professor in Social Medicine at Harvard Medical School, will discuss organ donation issues. Room 107, Kanbar Hall. 4 p.m.

DISCUSSION

Is Bowdoin Broke? A Fireside Chat With Barry Mills

BSG will host this forum on the impact of the global economic crisis on Bowdoin.

Shannon Room, Hubbard Hall. 7:30 p.m.

TUESDAY

OFFICE HOURS

President Barry Mills

Café, Smith Union. 4 – 5 p.m.

WEDNESDAY

BLOOD DRIVE

Red Cross Blood Drive

Volunteers from the American Red Cross will be on hand to take blood.

Morrell Lounge, Smith Union, 3 - 8 p.m.

LECTUR

"Michael Oakeshott On Modern Politics and the Tower of Babel"

Timothy Fuller, the Lloyd E. Warner Distinguished Service Professor at the University of Colorado, will give this talk. Fuller is a leading expert on conservative British political philosopher Michael Oakeshott.

Lancaster Lounge, Moulton Union. 8 p.m.

DISCUSSIO

Distribution Requirements

Daniel B. Fayerweather Professor of Political Economy and Sociology and former Dean of Academic Affairs Craig McEwen will discuss the rationale behind the current distribution requirements.

Quinby House. 8 p.m.

THURSDAY

LECTURE

"What New Testament Studies Could Be Doing, But Isn't"

Lecturer James Crossley, from the University of Sheffield's Department of Biblical Studies, will discuss the impact of political situations on New Testament scholarship. Room 315, Searles Science Building. 4 p.m.

OFFICE HOLIRS

Dean of Student Affairs Tim Foster Information Desk, Smith Union. 4 - 5 p.m.

PERFORMANCE

Festival of New Plays

The students of Theater 305 will put on several plays that they have written.

Wish Theater, Memorial Hall. 7 p.m.

WORKSHOP

"Atlantica Resist: The Struggle Of Diversity vs. Homogenization in the Americas"

This workshop will draw parallels between Atlantica, the proposed free trade zone involving parts of New England, New York, and Atlantic Canada, with Mesoamerican free trade. Sponsored by the Latin American Student Organization (LASO).

Beam Classroom, VAC. 7 p.m.

LECTURI

"Clean: Reading Samuel Delany's Stars In My Pocket Like Grains of Sand"

In the first installment of the Gay and Lesbian Identities Across Cultures lecture series, CUNY Graduate Center Professor of English Robert Reid-Pharr will speak. Room 315, Searles Science Building. 7:30 p.m.

Maddie McQueeney '09 drives down the field during Bowdoin's 3-1 victory over Middlebury in Sunday's NCAA Regional Championship final. The Bears will challenge Ursinus College in a semifinal match-up at Ursinus' home field, with the winner of the game playing for the national championship.

Field hockey competes in NCAA Final Four

STAFE WRITER

The Bowdoin Field Hockey Team punched its ticket to the 2008 NCAA Final Four Tournament after two exciting victories over Stevens Institute of Tech-nology and Middlebury last weekend. The team will look to defend its 2007 title at Ursinus College in Pennsylvania, this year's site of the final four.

"We entered [last] weekend with the goal of going 2-0, and it took a complete team effort to achieve this," tri-captain Kristen Veiga '09 said. "Our one-on-one defense was a huge part of our success this past weekend, from the forwards all the way down

to the goalkeepers."

Middlebury tested Bowdoin early in Sunday's NCAA Regional Cham pionship game as Polar Bear goal-keeper, Emileigh Mercer '09, was called upon to make five acrobatic saves in the first half.

ECONOMY

Fitness center on track, but \$3.6m short of funds

BY NICK DANIELS

Despite a considerable shortage of raised funds for the new Fitness, Health and Wellness Center, College officials said they expect the center to open its doors next fall.

According to Senior Vice President for Finance and Administration and Treasurer Katy Longley, as of September 30, the College still needs to raise more than \$3.6 million for the \$15.5 million project. Approximately \$5.6 million has already been either given or pledged to fund the building. Most of the remaining difference between the project cost and raised funds-a little more than \$6 million-will be paid for through debt financing.

Senior Vice President for Planning and Development Bill Torrey said that regardless of the state of the economy, construction of the center will continue as planned.

"If we don't raise what we want to, which is about \$10 million, we have borrowing capacity, and we also have unrestricted funds that have already been donated, that we could apply to the project," he said.

"However," Torrey added, "we would prefer to raise the money and that is one of the things we are working on right now."

Though the fitness center was originally budgeted at \$14.75 million and slated to open in August 2009, there was one surprise that altered planning on the project.

"We found asbestos," said Longley. "We had a seven-week delay because we discovered asbestos (and) had to have it removed from the site.

Because of the delay, Longley said, "[the center] will probably open now in late September, early October."

Though the new fitness center will have some new equipment, other pieces will be moved from the Watson Fitness Center.

Right now we have about a third of the new equipment [for the fitness center] and we're hoping we can increase the amount of new equip-ment," Longley said. "All the pieces from Watson are coming over, but if more money is raised then we will be able to replace them sooner."

According to Torrey, annual giving has grown significantly over the last five years, increasing anywhere from 5 to 7 percent each year.

"Fifty-seven percent of our alumni give annually," he said. "That puts us with the top schools in the country."

However, with what appears to

Early apps rise 7.9 percent despite struggling economy

BY ZOË LESCAZE ORIENT STAFF

The country's economic downturn has hit everything from gas prices to college endowments, and many speculated that the number of early decision applicants would be no exception.

The contractual obligation of applying early was expected to de-ter families who would rather wait and weigh financial aid offers than commit to Bowdoin without knowing how much aid they were going to receive. Much to the surprise of many colleges, however, early decision rates increased this fall.

Bowdoin's has received 480 early decision applications so far, a 7.9 percent increase since this time last

"People are scratching their heads and saying 'oh, we're not down," said Interim Dean of Admissions Scott Meikleiohn

Peer schools have reported similar increases. Colby College admission counselor Jamie Brewster said that Colby's early decision numbers are up 13 percent from last year. Haverford's early decision numbers are also up 13 percent, while Dartmouth's are up 10 percent and Hamilton's have increased by 8 percent, according to the article "The Bubble That Didn't Burst" from w.insidehighered.com

Meiklejohn said that Bowdoin's increases are due in part to two spe-

The College has worked especially hard in recent years to spread information about the College-and how to pronounce its name-in areas where it is not well known, according to Meiklejohn. These regions include the Midwest, West, South, and Southeast; essentially, Meiklejohn said, "anywhere outside New England and the Mid-Atlantic." States with recent population growth including Florida, Texas, Nevada, and California are especially important to these efforts.

A second factor which may have attracted students to Bowdoin this year is the College's recent replacement of student loans with grants. This change was largely motivated by a desire to reduce the debt with Bowdoin

Mono infects high number of students

be a painful recession on the horizon, Torrey said he was sure that the College would no longer be posting such glowing numbers. "Are people hurting? Yes," he said. "Are we going to be impacted? Sure. Do we know how yet? No."

"I can tell you that we are not going to be ahead of our [annual fundraising] goals," he said. "We are a little bit behind right now, maybe one percent at the moment. We are certainly not going to be able to grow the fund."

Torrey did indicate, however, that he was pleased with the success of The Bowdoin Campaign. This fundraising effort, launched nearly five years ago, aims to raise \$250 million for the College. More than \$238 million has already been raised, with the campaign set to end on June 30, 2009.

"That is a tremendous amount of money," he said. "It was been a tremendously successful campaign. The economy has been good, people have been generous, they have been loyal."

With lean times ahead, Torrey said that the school would be putting a whole range of projects on hold. He remained certain, however, that the school would weather any financial difficulties.

"We have great people on the ground here, very generous trustees, and a very smart president, who understands finance," he said. "I think that our position is as strong as it could possibly be."

-Nick Day contributed to this report.

Streamlined card system to require new OneCards

BY ANYA COHEN ORIENT STAFF

Bowdoin will see the installation of a long-awaited new ID card system this Winter Break. Operations Manager of Residential Life Lisa Rendall announced in an e-mail to the campus last Friday that all faculty, staff and students will receive new, redesigned ID cards and that card readers in 22 buildings will be replaced as part of an effort to move toward one door access system.

Currently, two door access software

Currently, two door access software systems run simultaneously: Millenium, which operates "proximity" readers (where the card is placed next to the machine) and CS Gold, which operates all "swipe" readers. However, the Millenium system is near the end of its useful life and "requires a tremendous amount of campus resources to maintain it," said Rendall.

In order to discontinue use of the Millenium software, all Millenium readers will be moved to CS Gold, a system that several hundred colleges and universities use, according to Rendall. The readers will function in the same way, but will be significantly smaller.

"We want to be proactive and make the change before we experience any real problems," Rendall said. "The CS Gold system will allow us much more flexibility on the back end for programming door access and effectively managing access. Additionally, consolidating card-related functions into one office that can assist with door access, vending, laundry and various account balance issues just makes sense."

The systems are now managed by both Residential Life and the OneCard Office, but following their consolidation into one system, the OneCard Office will administer all ID card affairs.

Buildings affected by the change include all College houses, upperclassmen dorms, Thorne Hall and various computer labs.

Each residence hall receiving a new reader will also have at least one "prox/swipe" reader because the swipe portion of an ID card continues to work even when the proximity chip stops functioning. This way, when the OneCard Office is closed, students will still be able to enter buildings by using the swipe portion of the reader.

Additionally, visitors who need temporary cards to enter residence halls for on-campus events, such as Admissions invitationals, Reunion and summer programs, can be issued more economical ID cards without proximity reader capabilities. These cards will be able to open doors with the swipe reader instead.

All access systems have the ability to track when an individual's card is used. A history of all activity is archived on an IT server and only accessed in response to a specific concern, according to Rendall. Such information has been used in the past to assist Security in the case of a theft or vandalism.

Rendall cited a specific instance when a large Thorne Hall window was smashed. Security asked Residential Life for the records of the lobby door of Coles Tower so that it could contact recent passers-by about the damage.

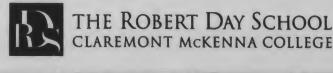

New cards will continue to function the same way, but will carry a new design.

"Communications has been interested in creating a new look for the ID card for some time," said Rendall. "It made sense to incorporate the new design when, as a result of this project, we are required to reissue ID cards to all students, faculty and staff on campus."

Despite the slumping economy, costs for the new readers are not a

"This project has been planned for several years with a high priority as we knew that Millenium was nearing its end of life. We are now at the implementation phase of the project which includes the recent communications to the campus community."

Students, faculty and staff can exchange their old cards for new ones at the OneCard Office on the first floor of Coles Tower beginning Monday, December 22.

A new approach, a new program.

graduate, especially that of students interested in traditionally low-paying fields such as teaching or social

"[Over the summer] the number of interviews, people on tours and people attending info sessions was up," said Meiklejohn.

He said that in July, the number of prospective students visiting campus was up 15 percent in July and about 18 percent in August. Nevertheless, the Admissions Office was not convinced that this would translate into a high number of early decision applications in the fall.

"Even though we were up in the summer, I think a lot of deans were bracing themselves for ED numbers to be flat or down. We were all wondering how changes in the financial environment would affect numbers this year," said Meiklejohn.

Mills' pay increases for '07, lags behind peer presidents'

As highest-paid College employee, Volent received \$649,347 in total compensation

> BY MARY HELEN MILLER ORIENT STAFF

For the 2007 fiscal year, Senior Vice President for Investments Paula Volent surpassed President Barry Mills as the highest-paid employee at Bowdoin. While Mills' salary increased, it remained lower than that of all but one other NES-CAC college presidents.

Information concerning Bowdoin employee salaries was obtained from Form 990, a report that non-profits must file with the Internal Revenue Service. The latest report reflects Bowdoin's spending for the 2007 fiscal year, which began on July 1, 2006, and ended on June 30, 2007.

Volent, who manages the endowment, received \$602,853 in compensation and \$46,494 in contributions to employee benefit plans, which comes to \$649,347 in total compensation. This number represents an increase of \$302,510 in total compensation from the previous year.

Mills' \$388,144 in total compensation represents an \$18,630 increase from the previous year and just over a \$100,000 increase over the past five years. His total compensation comprised \$340,000 in compensation and \$48,144 in benefits, which include health and pension plans. This figure is determined each year by the Board of Trustees.

Though it has not been the case in recent years, Mills' pay was less than that of presidents of both Colby and Bates for the 2007 fiscal year. On Monday, the Chronicle of Higher Education published a compilation of executive pay at all public and private institutions. According to the report, President of Colby William D. Adams received \$397,033 in total compensation, while President of Bates Elaine T. Hansen received \$404,151. Among NESCAC schools. Mills' pay topped only that of Connecticut College President Leo Higdon Jr.,

who received \$365,000 in pay and

President of Amherst Anthony Marx and President of Williams Morton Schapiro received \$475,026 and \$514,744, respectively. President of Middlebury Ronald Liebowitz's pay totaled \$465,715.

The Chronicle report listed Bowdoin in the category "baccalau-reate colleges—arts & sciences." The category includes all "institutions where bachelor's degrees represent at least half of all undergraduate degrees, those with at least half of bachelor's-degree majors in arts and sciences are included in the 'Arts & Sciences' group." Among the 208 institutions listed in that category, Mills' total compensation is ranked No. 52, down from No. 50 the previous year.

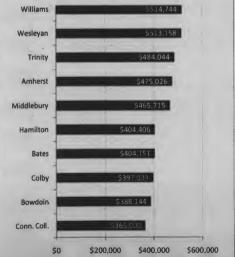

Six additional top-paid employees are listed on Form 990. After Mills, Senior Vice President for Planning and Administration William Torrey received \$217,395 in compensation and \$45,696 in benefits, which represents a \$7,679 increase in total compensation from the previous year.

The fourth-highest paid employee, Senior Vice President for Finance and Administration Katy Longley, earned \$217,395 in compensation and \$43,166 in benefits, which represents an \$8,858 raise in total compensation from the year hefore.

William Shain, who was the dean of admissions for the 2006-2007 and 2007-2008 academic years and is no longer employed by the College, ranked fifth. He received \$230,437 in compensation and \$11,916 in benefits for his first year on the job.

Cristle Collins Judd, the dean for academic affairs, and Tim Foster, the dean of student affairs, were the sixth-and seventh-highest paid employees. Judd earned \$185,000 in compensation and \$12,152 in benefits, while Foster earned \$145,000 in compensation and \$30,044 in benefits. These figures reflect the pay received by both deans during the first year in their respective positions at the College.

SECURITY REPORT: 11/14 to 11/19

Friday, November 14

 A local woman fell and injured herself in the women's locker room at Farley Field House. Brunswick Rescue transported the woman to Mid Coast Hospital.

 Lost and found items gathered at the Smith Union information desk were turned over to Security and placed in the property room. A complete list of items is posted on the student and faculty/staff digests.

 An unregistered event on the third floor of Baxter House was dispersed. Two students accepted responsibility for the alcohol policy violation.

Saturday, November 15

 A student broke his arm while playing in a hockey league game in Portland that was not affiliated with the College. The student was treated at Maine Medical Center and then transported back to campus by a security officer.

 An intoxicated student took a beer keg from MacMillan House following a registered event. The student was apprehended by a security officer as he carried the tapped keg out behind the house and attempted to hide it behind a tree. The officer returned the keg to the alcohol host. The matter was referred to the dean of student affairs.

 Students at Baxter House reported fresh spray-painted graffiti on the wall inside the southeast entrance.
 Later that day, a first-year student came forward and claimed responsibility for the damage.

 Security checked on the welfare of two intoxicated students outside Osher Hall.

 Dining reported that an employee at Thorne Hall received an eye injury. Brunswick Rescue treated the person on scene.

 A staff member reported seeing a group of youths throwing rocks at Banister Hall. When the officer arrived, the youths were gone and a window on the south side of the chapel was found broken by a small thrown pumpkin. Sunday, November 16

 A student tripped and fell on the wooded path between Pickard Fields and Brunswick Apartments.
 The injured student was treated and released at Parkview Hospital.

 Brunswick Police detained two intoxicated students on Pleasant Street at 1:15 a.m. after one of the students was seen urinating on property owned by Saint John's Catholic Church. The police turned the students over to Bowdoin Security. No court charges were filed and the matter was referred to the dean of student affairs.

Students at Quinby House reported a drunk and disorderly house resident. Security responded and calmed the situation. The student was relocated for the evening. The matter was referred to dean of student affairs.

 Dining reported that several students attending Super Snack entered without having their cards swiped.
 Super Snack scofflaws are reminded that all transactions at the front desk at Thorne are monitored by a security camera.

A student parking scofflaw with multiple violations was re-

ported to the dean of student affairs for disciplinary action.

Monday, November 17

 A student using a hair straightener in Chamberlain Hall set off a room smoke detector.

 A student that was stuck in the elevator at Pickard Theater was freed.

Tuesday, November 18

A staff member reported that students were trying to trap squirrels between Moulton Union and Moore Hall. An officer spoke with the students and the squirrels slipped away in the confusion.

Wednesday, November 19

 A steam pipe malfunction at Hawthorne-Longfellow Library activated a fire alarm. The building was evacuated and the fire department and Facilities staff responded.

 A fire alarm at 75 Federal Street was caused by faulty smoke detectors.

 A student received a cut to his wrist while playing hockey at Dayton Arena. A security officer transported the student to Parkview Hospital.

-Compiled by the Office of Safety and Security.

CORRECTION

An article in last week's Orient, "Endowments fall among peer schools," quoted Trinity Vice President for College Advancement Ron Joyce saying that the Trinity endowment fell "approximately 16 percent"

between July 1 and October 30. Joyce revised that number to 18 percent in post-publication correspondence with the Orient.

The Orient strives to be accurate in all of its reporting. If you believe a correction or clarification is needed, please email the editors at orient@bowdoin.edu.

MONO CONTINUED FROM PAGE 1

Hayes said that the protocol regarding students with mono depends on the specific situation of the student.

"If symptoms and the clinical picture look like mono, we usually test them," she said.

She added that if the blood test is positive, "we bring them back and talk to them about mono."

Hayes cautioned against consuming alcohol while infected with mono because the disease enlarges the liver. No matter the severity of the case, "we do pull [students] from any contact activities" in order to prevent the spleen from rupturing.

As for academic concerns, Hayes said that "it depends if they're sick enough to be out of school or not" and that most of those decisions are left to the deans.

Student cases have ranged drastically in severity. Some students seen by Dudley Coe have only been "moderately sick," Hayes said, and have been able "to attend class but nothing else." Others have not been so lucky.

Edward Gottfried '11 suspected something was wrong when his neck swelled up two weeks ago like "one of Jafar's guards in Aladdin," he said. It was not until a full week later, when he was in Greek class, that he knew he must have mono.

"I was translating aloud and got to the end of a sentence and realized I had no idea what I had said in the previous minute and a half. That sort of lack of cognitive function is somewhat unique, and led me to believe that something was seriously wrong with me," he said.

Gottfried spent two nights at Parkview Hospital. Hayes said that "people who get very sick get put in the hospital" so that they can get IV fluids and the medication they need to combat the swelling of the 'tonsile

Gottfried is now at home in Nashville, Tennessee, where he will remain until the end of Thanksgiving Break. "The kind folks over at Dudley Coe

thought that it wasn't likely I'd be able to go to class between now and then, so I was more than happy to come back home," he said.

He praised the heath center staff for their quick diagnosis and "help on the road to recovery," but was frustrated by the limited weekend hours and one staff member's attempt to have him ingest pills when he was physically unable.

Flu season

As the temperature begins falling below freezing, an increasing number of Bowdoin students are making appointments at Dudley Coe Health Center. November is the beginning of flu season, and according to Hayes, "there is always an increase in appointments from fall break to Thanksgiving,"

So far, Dudley Coe has seen only

one student with the flu.

"Usually, we see the flu after
Thanksgiving and in January," Hayes
said, citing December and January as
the months when the health center
plays its biggest role on campus.

These busy periods generally include the days subsequent to the students' return from winter or spring break. Hayes said that many students "bring things back from home after breaks."

Once infected students resettle on campus, the foreign diseases start to spread. This is a hardly a surprise in the college environment where stu-

MARGOT D. MILLER, THE BOWDOIN ORIENT

FLU FIGHTERS: Dudley Coe health staff encourage students to receive flu shots during today's clinic. According to Director of Health Services Sandra Hayes, students who are vaccinated are 60 percent more likely to be protected against the flu than those who are not.

dents live in such close proximity.

Hayes advised that students get flu shots, which will be available from 9 a.m. to 4 p.m. today, free of charge, at Dudley Coe Health Center.

Hayes estimated that it is the fifth flu shot clinic that Dudley Coe has sponsored.

According to the Centers for Disease Control and Prevention (CDC), last season was one of only three seasons in the past 20 years during which there was low cross-

reaction between the viruses in the vaccine and the predominating circulating viruses. This failure, along with pharmaceutical companies' struggle in recent years to produce a sufficient amount of flu vaccine, may have deterred some from considering vaccination.

Hayes anticipates this year's vaccine to have "really good coverage" and said that there is no shortage expected. She explained that those with the flu vaccine are 60 percent more likely to be protected against the flu than those without it. She added that those who have received the vaccine and still contract the flu "will end up less sick."

Hayes estimated that 600 students received the shot last year, a number she cited as considerably larger than that of Bowdoin's peer schools.

"I think one of the reasons we get such a large number [vaccinated] is because we try to make it as easy as possible for students," she said.

BSG assesses Dudley Coe student evaluation survey

It was back to business as usual for Bowdoin Student Government (BSG) Wednesday night, as representatives completed their first meeting in several weeks without a visit from College official. Discussion centered largely on a proposal, initially introduced last week, which called for reform of the Judicial and Sexual Assault and Misconduct Boards' information dissemination process.

To reinforce the significance of both the Honor and Social Codes, the BSG Affairs Committee made five core proposals: that the boards provide a report nnually, that they provide more specific detail of the circumstances and consequences of each case, that they send the report to the Orient, that they publish the report online and that they better educate incoming students about the codes.

Some debate occurred over a proposed amendment offering students returning from a suspension the opportunity to present their case to incoming first-years. Most members, however, seemed to concur with Vice President for Academic Affairs Sam Dinning '09, who said, "I don't think that putting students in more uncomfortable positions should be something we're doing." The opinion, without the proposed amendent, went on to pass unanimously

BSG discussed several other items during its meeting, including its ongo-ing investigation of the Health Center. During the past week, President So-phia Seifert '09 and Vice President for Student Affairs Carly Berman '11 met

with Senior Associate Dean of Student Affairs Margaret Hazlett and Director of Health Services Sandra Haves to disstudent complaints surrounding

"Sandra and Dean Hazlett have never heard many negative complaints about the Health Center so far," said Berman.

Yet, as results of a recent BSG survey show, respondents recorded 54 cases of misdiagnosis and 21 cases of wrong prescription administered. Seifert stated that both Hazlett and Hayes were "disturbed" by these reports

Representatives also turned their attention Wednesday to issues reported during and after the last two course selection processes. Members discussed a resolution asking that College committees involved with course selection make every effort possible to place students in their first-choice classes, particularly when space is available in those course This measure came in response to 23 incidences last year of students being placed into undersubscribed secondchoice courses when their first-choice courses still had space available.

On a similar note, BSG introduced a resolution asking that the College reinstate the ability of first-years to rank their seminar choices. Members will vote on these resolutions after Thanksgiving Break.

Two funding proposals rounded out the evening. Members approved up to \$1,500 for a "Social Issues Event" to occur early in the spring semester. Additionally, the body appropriated \$400 for student massages during reading period. With this service, BSG and Counseling Services hope to reduce student stress at the end of the semester

Mills: 'Now is a good time to be frugal'

MONEY MATTERS: President Barry Mills addressed the impact of the failing economy on Bowdoin's finances at a "fireside chat" on Monday. Mills discussed college affordability, construction, and alumni giving.

BY PETER GRIESMER

President Barry Mills answered the question, "Is Bowdoin Broke?," at fireside chat" hosted by the BSG in the Shannon Room of Hubbard Hall on Monday. Mills discussed a wide range of issues-from how middle class families will pay for college, to the status of current construction on the fitness center-during the hour and a half discussion

Mills said during the talk that applicants from the middle class will nave the hardest time paying for college. These students are normally less likely than lower-class students to receive financial aid, and they are also less likely than upper-class students to be able to afford the cost of tuition. Therefore, the impending financial crisis will probably make it more difficult for such students to pay for a college education.

low is a good time to be frugal,"

Mills said during the chat.

Mills said that construction will continue as planned on the Fitness, Health and Wellness Center, which is now scheduled to be completed in September or October 2009. How ever, it is unlikely that there will be any more significant additions to the Bowdoin campus over the next few years. Nevertheless, the College's plans to acquire land from Brunswick Naval Air Station should not be affected since that project is well into

Mills said during the discussion that Bowdoin will not make public the current state of the endowment because the number fluctuates each day. Recently, a number of other schools have reported significant decreases in their endowments, including Amherst and Colby, which have reported a 25 percent decrease since June 30, and Williams, which has "The real issue is our response to [the decrease in endowment] and how it will affect us, especially three, four or five years from now.

BARRY MILLS PRESIDENT OF THE COLLEGE

reported a 28 percent decrease since

June 30.
"The real issue is our response to (the decrease in endowment) and how it will affect us, especially three, four or five years from now," Mills

Because Bowdoin draws a significant portion of its budget from the endowment. Mills said that at some point in the next several months, the College will organize at least one group of faculty, staff and students to discuss how Bowdoin can alter its spending. Last year, 24 percent of the College's entire operating budget was from the endowment.

Near the end of his talk, Mills made reference to the country's 2001-2002 recession. Although it was not as bad as the current financial situation, Mills said that a few layoffs were made on campus during that time. He said that one of the worst possible outcomes of the financial crisis for employees of the College is that they may have a more difficult time

retiring.

Mills added that if the College's financial situation becomes dire, cuts could be made to the College's programs, including academics, athletics and residential life.

According to Mills, the College will continue to look to alumni for significant contributions. He emphasized that alumni donations currently allow the College to spend more on str than tuition can cover alone.

BSG Programming Co-Chair Der-ek Brooks '12, who helped organize the event, said, "The general direction that the economy is going makes me wonder if the alumni will donate with the same generosity that they have in the past.".

However, Mills stated that contributions do not appear to have decreased since the financial crisis worsened in October.

In order to face this situation successfully, Mills stressed that members of the Bowdoin community will need to become more sensitive to the financial situations of those around them. Nonetheless, it is important that students do not lose their confidence in the school

BSG President Sofia Seifert '09 said that she thought the event went well.

"People asked really interesting questions," she said. "It's a good sign when you hear Mills or students respond to the other's point by saying, 'Oh, I hadn't thought of that.' It's good when students understand the decisions the other side will have to make in situations like these."

"Mills was responsive to the specific concerns of students but also showed how the things we don't normally think of as being financially important really are important," added BSG Vice President for Academic Affairs Sam Dinning. "This was a good opportunity to get the full picture."

Other students said they were surprised by the depth of information Mills was able to offer, despite the tentative state of the financial

"It obviously can be frustrating when there are so few answers, but I think President Mills did a good job explaining that," said Eamonn

BOWDOIN BRIEF

The Dining Service adds Thanksgiving meal plan

For the first time, Bowdoin Dining Service is offering a formal meal plan for students staying at the College

over Thanksgiving Break.

According to Kennedy, some
Thanksgiving break meals have been offered in the past, but not on a con-

'We've been offering some Thanksgiving services for a number of years, but it's been sporadic," said Mary Lou Kennedy, Director of Dining and Bookstore Services. "This is the first time it's been more or less continuous through the break, with the exception of Thanksgiving [Day]."

est from the Dean's

office asking whether the Dining Service could hold more consistent hours over break, Kennedy said she found employees willing to work over the holidays.

Kennedy said she did not know whether more students would be remaining on campus than usual this Thanksgiving, but that the number of students who sign up for the board plan will help the College gauge how many students remain at

"In the past, we haven't really known who is on campus other than the athletes," she said.

Students who want to sign up for the plan, which includes three dinners and two brunch meals should e-mail Dining Service Business Manager Steve Cole by November 24.

FEATURES

A 'dead language' that's alive and well at Bowdoin

Latin is not a dead language at Bowdoin. In fact, for all intents and purposes, it's alive and kicking.

accordance with national trends, enrollment in Latin at Bowdoin has spiked in recent years. A Modern Language Association (MLA) study from 2002 to 2006 revealed that Latin enrollments at the collegiate level increased by 7.9 percent.

According to a recent New Times article, secondary school enrollment numbers also reflect increased interest in Classical Studies. And as of last year, Latin had surpassed German as the third-most popular non-English language studied in American classrooms. This phenomenon, in turn, feeds into the upward trend in language enrollment at colleges

Associate Dean for Faculty Development James Higginbotham, who has spent considerable time at Bowdoin as an associate professor of Classics, cites the cultural relevance of the language today as a reason for the sudden increase in study of a language that has been considered dead for centuries.

"Interest in Latin has always reflected students' broader interests in ancient culture," he said. "Studying the language is a gateway for appreciating a particular part of the past."

Currently, the Bowdoin Classics Department includes 22 declared majors over a span of three different programs: Classics, Classical Archaeology and Classical Studies. The department employs four faculty positions: one specializing in Latin language, literature and culture; a second concentrating on Greek language; a third focusing on classical archaeology and a fourth specializing in ancient history.

According to Associate Profes sor of Classics Jennifer Kosak, the department has long existed at Bowdoin as a cornerstone of the liberal arts curriculum.

"Latin and Greek have had a long history here as Classics was central to liberal arts education in the 19th and early 20th centuries," said Kosak. "It is no surprise to see that these languages have maintained a profound influence on education at Bowdoin today."

Kosak attributed the continuing strength of the department at Bowdoin to its interdisciplinary focus as well as the strength of the ancient Mediterranean collection at the Bowdoin College Museum of Art.

"Classics here is truly an interdisciplinary field in that language, literature, social and political history and material culture are all essential pieces in the study of the ancient world," she said.

Traditionally, student interest in 100-level classics and classical archaeology courses has remained strong over the years. Likewise, 200-level Greek and Roman history courses also enjoy consistently high enrollment numbers.

Over the past few years, the department has seen the majority of enrollment increases in the language sector, in parallel with na-tional enrollment increases cited

"Classics here is truly an interdisciplinary field in that language, literature. social and politicial history and material cultural are all essential pieces in the study of the ancient world."

JENNIFER KOSAK

ASSOCIATE PROFESSOR OF CLASSICS

by the MLA

"If I were to note an upsurge in any particular area of our enrollments in the past few years, it would probably be in elementary Latin," said Kosak. "Many students are eager to take a year of Latin in order to provide a base for their understanding of linguistic systems and of the impact of Latin on the development of English."

Visiting Assistant Professor Classics Ryan Ricciardi noted a similar increase with enrollment in advanced Latin courses. Students with previous classical training often elect to enroll in advanced courses upon arrival at the College. Ricciardi noted that this phenomenon was similar at the University of Cincinnati, where she previously worked.

The upward trend in enrollment is remarkably similar at Cincinnati," she said.

This increased student motivation to take Classics courses at the college level can be traced to a number of sources. Kosak noted that many students enroll in courses with hopes of furthering initial interests in classical mythology and history. Others have read reek and Latin literature in trans-

lation and hope to learn more. For Mary Kelly '10, it was the multi-faceted focus of Classics that piqued her interest. Kelly began taking Latin during her freshman year of high school and has continued to pursue the field at Bowdoin

"My decision to major in Classics was pretty much made when I came to Bowdoin," she said. "I met with [Henry Winkley Professor of Latin and Greek] Barbara Boyd as a pre-frosh, and the department as a whole really influenced my decision to come here."

"I like Classics as a major because it is inherently interdisci-plinary," she added.

Like Kelly, many other Bowdoin students have elected to pursue studies in Classics, and Latin in particular, as a result of forays into the language during high school.

While the instruction of Latin has long been relegated to the halls of preparatory institutions and established public schools such as Boston Latin School, high schools across America have more recently continued to bolster their classical language curricula.

Taking Latin serves as incredibly good preparation for the verbal sections of standardized tests," said Higginbotham. "Many secondary schools have begun to realize this.

In regards to secondary school instruction, Higginbotham noted that the number of students taking the Advanced Placement Latin examination has doubled over the past

MARGOT D. MILLER THE BOWDOIN ORIEN

A DATE WITH HISTORY: Associate Dean of Faculty Development James Higginbotham poses here in front of the Mediterranean collection at the Bowdoin Museum of Art. Higginbotham said growing enrollment in Latin classes at Bowdoin reflects an increasing interest in the ancient world among students

five years. He attributes this overall upswing in Classical education to "a new generation of teachers."

These teachers don't have the stodgy reputation of the typical Classicist," Higginbotham said. "As Latin is taught increasingly as a living, dynamic language, students will become more interested."

It is this shift in focus, which regards Classics as a naturally dynamic and interdisciplinary field, that Higginbotham, Kosak and Kelly see as one of the major factors in the recent surge in enrollment, both across the country and at Bowdoin.

Back at Bowdoin, students in Ricciardi's Roman Archaeology course meet in the Zuckert seminar room of the Walker Art Building to examine ancient artifacts.

They crouch over small boxes, each containing a coin from antiquity. Using magnifying aids, they identify various coins as products of the reigns of Vespasian, Caesar and Marcus Aurelius.

It is firsthand experience such as this, says Higginbotham, which keeps student interest in Classics at Bowdoin thriving. He regularly takes students on excavations, giv ing them the opportunity for field experience at sites such as Pompeii and Paestum.

"I think that the curriculum here opens up a lot of possibilities to students," Higginbotham said. "Once they get past the grammar and fundamentals, there is a beau ty inherent in Classical Studies that will carry many students forward."

Athletes follow a different path, run marathons

ORIENT STAFF

Some of Bowdoin's most avid athletes are not competing on varsity teams. Instead, they are busy training for and running marathons.

Rachel Munzig '10 has run a handful of 5Ks, participated in the San Francisco half marathon the past two summers, ran a full marathon in Philadelphia last fall and completed the Maine Marathon on October 4 in Portland. She has never participated in a varsity sport at Bowdoin.

"I played team sports pretty competitively my whole life until I got to Bowdoin, which is when I think running became an even bigger part of who I am," said Munzig. "I never enjoyed the competitiveness of running and am much happier just doing it on my own time and at my own pace."

According to Munzig, she has

According to Munzig, she has always loved running because it offers her a chance to clear her mind and is something she does "for [herself] that is [her] own." Munzig said that being in a family full of marathon runners motivates her to compete as well.

"My mom has run 13 marathons and my sister has run two, so I've kind of always been surrounded by runners and always wanted to run a marathon myself," Munzig said.

Munzig describes her training program for the marathons as a "cram" program loosely based off of programs she found online. "For the Maine Marathon, my

"For the Maine Marathon, my first long run was seven [miles], then 10, then 15, then 20, then the race. I gave myself more time to train for the Philadelphia run," she said.

Munzig said the conditions for the Maine Marathon were ideal.

"Running the Maine Marathon was pretty amazing," said Munzig. "The weather was great, and half of the race was winding through these beautiful neighborhoods with the fall leaves everywhere and families on the street cheering you on."

"(Running marathons) gives you this goal that is so personal and different from just working to get the ball in the back of the net."

MOLLY RANDALL'10

Birgitta Polson '09 ran the Maine Half Marathon, and she has completed the Camden 10K and Beach to Beacon races three times each. She said the Maine Half Marathon held particular significance for her because it was her first half marathon and marked her running comeback after a serious injury.

"I had retrocalcaneal bursitis, which is a heel injury and the first legitimate running injury I had ever had," said Polson. "I couldn't really run for about four months, which was a huge bummer and helped me appreciate running so much more."

Polson said she trained for the race by following a nine-week program that she got off of runnersworld.com, which included running four times a week in conjunction with cross-training for a total of up to 33 miles of running a week.

"After all that training, I finished the half marathon in one hour and 45 minutes, so an average of eightminute miles, which was my goal," said Polson. "I just ran and had fun and that was it. And I didn't really feel any pain until I stopped, and then I had trouble walking for a while."

Amelia Lanier '10, who ran track and cross country in high school, and Molly Randall '10, who competed in cross country, track and lacrosse in high school, decided to run the Maine Half Marathon last spring and trained separately throughout the summer.

"To me, the most incredible part about running marathons is having a goal and setting out to accomplish it," said Randall. "It gives you this goal that is so personal and different from just working to

MAKING STRIDES: Cory Elowe '10 crosses the finish line at the Pineland 50K Trail Challenge in New Gloucester, Maine, last May. Elowe has completed several races, including the Maine Marathon in Portland and the Maine Track Club Ultra 50-mile run around Simpson's Point.

get the ball in the back of the net."
"Finishing a marathon is defi-

nitely empowering," added Lanier.
Lanier and Randall said they
found the Maine Marathon course,
which loops around Black Cove
Bay, "perfect," and they hope to
complete a half marathon in the
spring and a full marathon at some
point in the future.

Elisa Gutierrez '10 plans to join Randall and Lanier in the half marathon this spring before running the Chicago Marathon for the second time on October 12, 2009. This year, Gutierrez "ran-walked" the Chicago Marathon with her family, including her dad, three sisters and two brothers.

Gutierrez, who ran cross country and track in high school, said her father has always been a big runner and inspired the rest of the family to "slowly come around" to doing the marathon together. She said that training for and completing the Chicago marathon was meaningful because her entire family worked toward the goal together and was able to run in their home city of Chicago.

"It's really great to be able to say that I did it, and it was great running with my family and in Chicago," Gutierrez said. "My mom insisted that we all start the race holding hands."

According to Gutierrez, the race started and ended in Grant Park and passed through many distinct neighborhoods, giving the experience a strong cultural feel that other courses might not have.

"Chicago is a really great city to run a marathon in, because so many groups come together," said Gutierrez. "There were millions of people watching us and cheering—it was a great feeling."

Cory Elowe '10 ran his first marathon in his home state of Maine after reading Dean Karnazes' book, "Ultra Marathon Man". He was so inspired by the book that he ran alongside the author when Karnazes ventured to Portland during his "50 marathons in 50 states in 50 days" tour.

"The marathon was right before cross-country regionals my senior year [of high school], so my coach wasn't too happy with me," said Elowe, who joined cross country is sophomore year of high school to stay in shape for lacrosse. "That experience is what really got me hooked on long-distance."

Since that day, running has become a huge focus of Elowe's life, and he runs daily, using marathon-length runs as training for ultra-marathons (courses longer than 26 miles). Among other races, Elowe has completed the Pineland Farms 50K Challenge in New Gloucester, Maine, in May of this year, and he ran a 50-mile course around Simpson's Point on October.18.

Elowe's hardest training week before the Simpson's Point run included running a minimum of 12 miles Monday through Wednesday and runs of up to 35 miles on both Friday and Saturday. He would take Sunday off. According to Elowe, he tapered his training so that he was only running 50 miles a week just before the race.

"The course took about sevenand-a-half hours and was hard but a total blast," said Elowe of the Simpson's Point run. "Only 10 of us finished, but I met a lot of people throughout the race and had a really enjoyable time."

According to Elowe, ultramarathon running has a specific appeal to him because it provides a special outlet for his introverted nature.

"Running, especially ultramarathons, is a way for me to let out my introverted side," he said. "It's also about enjoying the experience, pushing your own physical limits, and enduring the ups and downs of doubt and pain during the run."

For Elowe, as for the other runners, running has become more than a way to stay fit. It has become a crucial component of life that he cannot imagine doing without.

"Running satisfies an addiction, it helps keep me healthy, gives me energy and vitality and helps me concentrate while also helping me to cope emotionally," said Elowe. "I've realized over time that I absolutely need running."

AT THE FINISH: Juniors Molly Randall and Amelia Lanier pose at the finish line of the Maine Half Marathon on October 4 in Portland. The women plan to complete another half marathon this spring.

Let's talk turkey: Coping with family gatherings

SUGGESTIVE

BY ALANNA BEROIZA

My nose is stuffy, my lips are chapped, I'm eating dinner at 5 o'clock and my professors have been taunting me all week about preparing for final papers and exams. At least there's one thing that I can look forward to as the semester comes to a close-Thanksgiving.

Oh yes, that wonderful five-day reprieve from the stresses of undergraduate life when my sole responsibility consists of lounging around the house, eating copious amounts of sweet potatoes and stuffing and catching up on the TV shows and movies that I haven't had time to watch this fall. Wait a minute, what am I thinking? Isn't it more like five days of hectic travel? The time when you try to balance work and family and friends at the same time you attempt to catch up on sleep, get your hair cut and go to, like, three doctors appointments in one day because you were too lazy to schedule them while

Well, whatever it is, I think we can agree that, for most of us, Thanksgiving is a change in scene. Many of us will be seeing our family for the first time in months (perhaps even years), and with reunion often comes confrontation and interrogation.

I know, I know. I'm making a potentially wonderful family gathering sound pretty daunting, but bear with me because I think I have a pretty valid message. We've been at Bowdoin this semester for about two and a half months now, and certainly things are not the same as they were back in September. When we return home, the rules are different. Staying up late drinking coffee (or maybe other beverages with a little more kick), smoking cigarettes or whatever other little habits we have picked up over the course of the semester may not go over so well with Mom, Dad and Grandma. We've been talking, dating, kissing, crushing, feeling, thinking, crying, laugh ing and everything else under the sun for over two months and now we're going back to our families who may remember us as someone

a little different than the person we are now. Sexually speaking, when we present our "new" selves to our parents, we may run into a few obstacles along the way.

Let me take you back to Thanksgiving Break 2005, my first year. In past columns, I've hopefully al-ready established that the first few months of my freshman year were a pretty monumental time in my life. Between coming out, going out and making out, my life had become pretty chaotic. I remember wondering how could I ever explain to my family what was going on if even I didn't know what to make of it all. Sitting on the plane down to Florida, I tried to prepare myself for what I thought would be the inevitable questions:

How's school? What are your friends like?

Do you have a boyfriend? It was frustrating. How could I give my family an honest answer when school was interesting because I was learning about sexuality in English literature and most of the people I felt closest to weren't straight?

And, no, I didn't have a hovfriend-Because I wasn't interested in boys anymore.

Thanksgiving is a change in scene. Many of us will be seeing our families for the first time in months (perhaps even years), and with reunion often comes confrontation and interrogation.

I was just a bundle of nerves. I felt that I had changed so much in two months that no one in my famwould recognize me anymore. I fully expected an interrogation from my entire family regarding the minute specifics of my sexual life to occur at Thanksgiving dinner. I thought my family would demand an explanation. The truth is, I was the one who needed the explanation. I was desperate for some label or category that would describe me to the world in a very neat and tidy way. To this day, I haven't found that magic label. When I went home for Thanksgiving my freshman year, I was still the same person then that I had been in September-Alanna-the

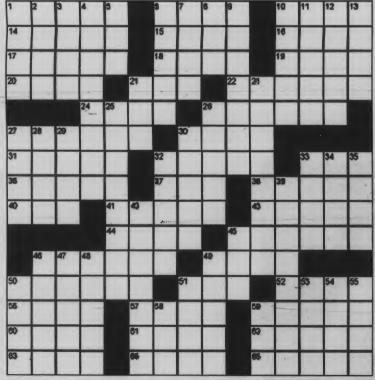

only person I'll ever be.

Undoubtedly, my first two months at Bowdoin were revelatory in terms of my sexuality and

sexual experience, but certainly that was not all I had to offer in life. Unfortunately it was very dif-ficult for me, as a freshman in my particular situation, to see past the changes that I'd experienced sexually-and I think that's okay. None of us are perfect and it can be extremely difficult to see clearly in the midst of major changes and transitions. Regardless of what your sexual experiences have been thus far in the semester, the only person who's really looking for an explanation, and the only person who really needs an explanation, is you. The most important thing to remember is that no matter where you go, there you are—so try to make the most of this Thanksgiving and don't fret too much about what your relatives are thinking.

ARTS & ENTERTAINMENT

Bowdoin professor premieres solo exhibit at ICON

BY CAROLYN WILLIAMS ORIENT STAFF

Anna Hepler carved out the world as she saw it for her latest exhibit, "Woodcuts," at ICON Contemporary Art Gallery in Bruns-

Hepler, a visiting assistant professor of art at Bowdoin, currently has 17 woodcuts hanging at the gallery that depict reductive images of real life objects, a theme prevalent throughout Hepler's work, woodcut and otherwise.

"My work looks abstract but is in fact a kind of reductive realism." Hepler said. "That is, the images are based on real things and real observations in the world."

The inspiration for the wood-cuts included fireworks, augers, and bone structures, in addition to "irregular structures or patterns found both microscopically and macroscopically," according to He-

In each cut, something is distilled in the final product.

"The feeling they share is spare, spontaneous, and translucent," she said. "Though they each take a long time to make, I wanted to capture something fleeting and fresh in the final image

Although Hepler shared a show with painter Martha Groome in the fall of 2006 at ICON in which she included paintings and drawings, this is her first solo exhibit at the gallery as well as her first exhibition of woodcuts.

Hepler made the woodcuts included in this exhibit over the past two years, although most of them vere made in the past six months

The process of making a woodcut involves carving the surface of a piece of wood (usually plywood

"Everything you do in life-all circumstances-contributes to the creative process. I began making woodcuts while I was living in Cyprus. I'm not sure why, but maybe because of the harsh dry environment. There is something hard-edged and harsh about a woodcut as well. It is a bold and uncompromising medium."

ANNA HEPLER **VISITING ASSISTANT PROFESSOR OF ART**

for Hepler) so that all the wood is cut away except the image the artist wants to print.

"For example, if I wanted to print a pink circle, I would cut away everything but the circle, then ink the top surface using a brayer, and print onto a piece of paper using an etching press, letterpress or a wooden spoon," Hepler said.

Hepler started the woodcuts in this exhibit by using a brush and India ink to make a simple drawing on the surface of a block. After it dried, she cut everything away but the drawing.

Hepler has lived abroad, and she is currently in her fifth year of teaching at Bowdoin. The international and local perspectives she's gained contributed to the creative process for these woodcuts and her

"Everything you do in life-all circumstances-contributes to the creative process," she said. "I began making woodcuts while I was living in Cyprus. I'm not sure why, but maybe because of the harsh dry environment. There is something hard-edged and harsh about woodcut as well. It is a bold and

CONTEMPORARY CARVING: Above, Visiting Assistant Professor of Art Anna Hepfer's exhibit at ICON Contemporary Art Gallery in Brunswick. "I am ested in getting around all sides of an idea to see it from different angles," Hepler said of her work.

uncompromising medium."

She continued making woodcuts when David Wolfe, of Wolfe Editions Incorporated, invited her to use his studio in Portland. She used the space to maximize her creative potential

"I thought I would make five or six, but instead I made 17," she

Hepler draws inspiration from other places she's traveled, including South Korea, New Mexico, and Washington state, as well as her current surroundings in Maine.

"I think the environment does affect the work, and sometimes in substantial ways," she said.

Although woodcuts exclusively comprise her current exhibit at ICON, Hepler works with a variety

"I work in whatever medium helps to achieve the desired outcome," she said. "Each material and process communicates differently, and so my ongoing experimentation is one way I can broaden my vocabulary as an artist."

Hepler continues to discover

new ways to express her ideas.
"What is still unknown to me may be the most interesting and powerful form yet," she said. "I strive to remain open to these possibilities and to cultivate this attitude of risk-taking."

A manifestation of Hepler's risks "Arrest, Array," a large (55 feet by 30 feet by 20 feet) site-specific sculptural installation she created during a residency in Seattle last summer. It is made up of aluminum and steel rods connected by black PVC discs.

"The idea was to freeze a con-stellation of black dots mid-flight, as if to stop a flock of birds and then create a fixed geometry from the frozen form," she said.

Hepler works in both two-dimensional and three-dimensional

space and in a variety of media.
"My work is conceptually linked

whether it manifests [itself] as two dimensional or three dimensional artwork," she said. "I am interested in getting around all sides of an idea to see it from different angles,"

Norah Maki '08 is working on an independent study involving pri-intmaking and bookbinding with Hepler and has taken two of her printmaking classes.

"I think that it has an interesting tension between the precision of geometric forms and the abstract," Maki said of Hepler's work.

According to Maki, Hepler is equally as successful at inspiring students in the classroom as she is at creating her art.
"She's great," Maki said. "She's

very enthusiastic and very efficient. She's excited about what she's doing and she's good at what she does."

Just as she pushes herself, Hepler encourages her students to take

"Generally her project guide-lines are pretty loose. We'll get a certain size plate and sort of general assignment and she'll work with every person individually to develop an idea that they're personally excited about," Maki said "I think that she would be supportive of trying something new instead of doing something safe and familiar"

Woodcuts" will be on display until December 13 at ICON Contemporary Art Gallery in Brunswick, located at 19 Mason Street. The gallery is open 1-5 p.m. Monday-Friday and 1-4 p.m. on Saturdays. Hepler also has a sculptural installation opening at the Center for Maine Contemporary Art in Rockport on January 10.

WORK IN PRINT: Hepler stands in front of one of her woodcuts on display at ICON Contemporary Art Gallery. In addition to woodcuts, Hepler also works in other media, including sculpture, drawing, photography, digital animation, installation and printmaking.

Peucinian society debates pop music's effect on culture

STAFF WRITER

Does popular music inspire

This was the question debated by the Peucinian Society, Bowdoin's literary debating organization, at its most recent meeting on November 13

Members of the Peucinian Society spend their meetings debating or preparing orations and hosting

guest speakers. Last Thursday, Ross Jacobs '10, co-president of the society, in-troduced Mike Corbelle '10, who argued that popular music could inspire good, and Hassan Muhammad '10 who argued it couldn't.

Corbelle and Muhammad agreed on certain tenets of mu-

"Music is man's common language," said Corbelle, a government major and archaeology mi-

"Regardless of race or creed, music gives all who listen an equal opportunity to be inspired for good," said Muhammad, an English major and music minor.

Though the two agreed that most music can have a positive influence, they disagreed as to whether so much could be said

for popular music in particular. Corbelle used Woodstock as proof of popular music inspiring

"Woodstock gave a genuine sense of love and togetherness that none of the participants had ever experienced before," he said. "During a turbulent period, 1.5 million people of different ages, genders, beliefs and orientations were able to come together harmoniously under the one belief in the power of music."

He then cited the Live 8 concert in 2005 as a second example of music's impact.

"Popular music has the ability to inspire the mind and to lift the spirit, but also to bring us together as one. Popular music has the ability to unite people under the common goals of bettering ourselves and the world around us, and I challenge any of you to tell me what is more inspirational than that," Corbelle added.

Muhammad argued that pop music degrades American cul-

"We live in the age of music. Music is like the air we breathe. Therefore, we must ask ourselves, for our own good, are we breath-

HEATED DISCUSSION: Peucinian Society members gather to discuss and debate pop music

ing air pollution?" he said. "I am not concerned with the old, overworked, and conventional rebuttal of popular music, which passionately exclaims that it leads to sex, violence and drugs.

Corbelle dismissed this argu-

ment as irrelevant to the ques-

"Others might say that popular music glorifies our society's vices, as many of our best-known songs glorify sex, drugs, and a criminal lifestyle. This is not the question

Both debaters focused on music's larger implications, such as its effects on education and home life. Muhammad argued that popular music directly affects these two spheres but Corbelle argued that popular music is only a reflection of what already exists in society.

Corbelle argued that music is not the only reason why such problems exist.

While it is true that many rappers espouse a lifestyle that most would not consider virtuous, one cannot place blame for the violence and depravity existing in urban America solely on a musi-cal genre," he said. "It is my belief that these conditions existed in these areas long before rap music, due to economic and educational injustices, among others."

Muhammad insisted that popular music not only perpetuates but instills problems in youth.

"Pop stars rarely ever affirm, much less even mention, the importance of education, the benefits of hard work, the significance of virtue, and the value of family Show me a popular music that af-

DJs OF THE WEEK

Alex Colby '10 and Will Bleakley '10

If you could only listen to one album for the rest of your life, what would it be?

AC: I have to go with Bruce Springsteen's "The Rising."

WB: "Achtung Baby" by U2. Say what you will about U2, but looking at this album, no one can say they lack courage.

Favorite song to dance/rock out to when you think no one's AC: "Gimme! Gimme! Gimme!" by ABBA.

WB: "Space Jam" by the Quad City DJs. I've actually been a court to listen to this alone, my dance moves are literally blinding.

If you were in a band, what would it be called and what kind of music would you play?

AC: Meat Truck, rocking anything you can gyrate your hips to.

WB: The Prudential Insurance Band. I'd definitely be corporate sell-out, and would play whatever helped sell the product.

Theme song during Ivies?

AG. "Live Your Life (Ft. Rihanna)" by T.I.

WB: "Turn Me On" by Kevin Lyttle. Because really, he should play Ivies every year so we can hear that song another

If you could meet any musician, dead or alive, who would it

AC: Uncle Kracker so I could give him a good junk punch for singing such a lame, catchy song that infiltrated my head all of middle school: "... Swim through your veins like a fish in the sea, I'm singin'..." Puke

WB: Chris Martin because he can then introduce me to his friends Ricky Gervais and Simon Pegg, and then we'll all have a dance party.

Best new music vou've heard lately!

AC: Actually a band that just came to Bowdoin and played at Mac House this past weekend called The Gregory Brothers. A fusion of smooth, soulful, and bluesy tunes, and the band puts

WB: None, I'm too scared to download songs illegally at Bowdoin, and too broke otherwise

If you could time travel back to any musical period, where would you go and why?

AC: The '70s, the Golden Era. I missed out.

WB: The '60s just to see what it's like for the world to come together on the genius of one band-The Beatles

uns who have most influenced your musical

AC: Tom Petty, Red Hot Chili Peppers, The Band, Blink 182, Bruce Springsteen, Coldplay, The Who, Bob Dylan, The Strokes, The Rolling Stones, Ben Folds, The Offspring, Atmosphere, Van Morrison, The Beatles, Muse, and U2.

WB: U2. They're like the "Lord of the Rings" of music. They're not hip, and you don't really want to like them, but you

"Snack Time with Will and Alex" airs Tuesdays from 4:30-5:30 p.m. on WBOR 91.1 FM. or online at www.wbor.org.

Professional trombonist makes appearance with Bowdoin group

Heard all across the globe, from Munich to Montreal, trombonist Ron Barron will perform in Studzinski Recital Hall on Friday night.

Barron was the principal trombonist for the Boston Symphony Orchestra (BSO) from 1975 until his retirement last August. He has performed with numerous brass ensembles as well as with the Montreal Symphony Orchestra, the Bavarian State Radio Orchestra, the Boston Pops, and the American Wind

Symphony.

In 1974, just before joining the BSO, Barron won the most prestigious prize awarded at the Munich International Competition. He also received the 2005 ITA Award from the International Trombone Association in recognition of his distinguished career and in acknowledgement of his impact on the world of mbone performance

Barron currently teaches at the New England Conservatory of Music and the Tanglewood Music Center

Although Mr. Barron's program on Friday won't be accompanied by a 100person orchestra, he will be performing with Bridget Convey, a pianist re-nowned for her ability to perform music of diverse periods and styles

Convey, originally from New York, has performed as both a soloist and an ensemble musician throughout the United States over the course of her career. She has performed at well-known venues including New York's Lincoln Center and the Dorothy Chandler Pavilion in Los Angeles. After finishing her Masters at the Cal-

ifornia Institute of the Arts, she founded, directed, and played in "ensemble GREEN," an 11 piece ensemble

Although this will be Ron Barron's first time performing at Bowdoin, Convey has appeared here twice before as a guest artist: once in the spring of 2003, and again in the fall of 2006.

On Friday, Barron and Convey will

sic, including works written specifically for Barron by composers Eric Ewazen, Norman Bolter, and Larry Wolfe, as well orks by Charles Ives and Herbert Clarke

While his performance on Friday headlines Barron's visit, it will not be his only appearance of the weekend. On Sunday, he will appear again with the Bowdoin College Concert Band in the second installment of their theme of the season: "Friends." Barron will perform during three of the eight pieces in the

Barron and Convey perform on Fri-day at 7:30 p.m. at Kanbar Auditorium in Studzinski Recital Hall. Barron's performance with the Bowdoin College Concert Band is on Sunday at 2 p.m., also in Studzinski. Both concerts are free and open to the public

MUSIC MAN: Ron Barron was the principal trombonist for the Boston Symphony Orchestra.

ARTS & ENTERTAINMENT

Bowdoin professor premieres solo exhibit at ICON

Anna Hepler carved out the world as she saw it for her latest exhibit, "Woodcuts," at ICON Contemporary Art Gallery in Bruns-

Hepler, a visiting assistant professor of art at Bowdoin, currently has 17 woodcuts hanging at the gallery that depict reductive images of real life objects, a theme prevalent throughout Hepler's work, woodcut and otherwise.

"My work looks abstract but is in fact a kind of reductive realism," Hepler said. "That is, the images are based on real things and real observations in the world."

The inspiration for the woodcuts included fireworks, augers, and bone structures, in addition to "irregular structures or patterns found both microscopically and macroscopically," according to He-

In each cut, something is distilled in the final product.

"The feeling they share is spare, spontaneous, and translucent," she said. "Though they each take a long time to make, I wanted to capture something fleeting and fresh in the final image.

Although Hepler shared a show with painter Martha Groome in the fall of 2006 at ICON in which she included paintings and drawings, this is her first solo exhibit at the gallery as well as her first exhibition of woodcuts.

Hepler made the woodcuts included in this exhibit over the past two years, although most of them were made in the past six months

The process of making a woodcut involves carving the surface of a piece of wood (usually plywood

"Everything you do in life-all circumstances—contributes to the creative process. I began making woodcuts while I was living in Cyprus. I'm not sure why, but maybe because of the harsh dry environment. There is something hard-edged and harsh about a woodcut as well. It is a bold and uncompromising medium."

ANNA HEPLER **VISITING ASSISTANT PROFESSOR OF ART**

for Hepler) so that all the wood is cut away except the image the art-

"For example, if I wanted to print a pink circle, I would cut away everything but the circle, then ink the top surface using a brayer, and print onto a piece of paper using an etching press, letterpress or a wooden spoon," Hepler said.

Hepler started the woodcuts in this exhibit by using a brush and India ink to make a simple drawing on the surface of a block. After it dried, she cut everything away but the drawing.

Hepler has lived abroad, and she is currently in her fifth year of teaching at Bowdoin. The international and local perspectives she's gained contributed to the creative process for these woodcuts and her other work

"Everything you do in life-all circumstances—contributes to the creative process," she said. "I began making woodcuts while I was living in Cyprus. I'm not sure why, but maybe because of the harsh dry environment. There is something hard-edged and harsh about

CONTEMPORARY CARVING: Above, Visiting Assistant Professor of Art Anna Hepler's exhibit at ICON Contemporary Art Gallery in Brunswick." I am rested in getting around all sides of an idea to see it from different angles," Hepler said of her work.

uncompromising medium."

She continued making woodcuts when David Wolfe, of Wolfe Editions Incorporated, invited her to use his studio in Portland. She used the space to maximize her creative potential

"I thought I would make five or six, but instead I made 17," she

Hepler draws inspiration from other places she's traveled, including South Korea, New Mexico, and Washington state, as well as her current surroundings in Maine.

"I think the environment does affect the work, and sometimes in substantial ways," she said.

Although woodcuts exclusively comprise her current exhibit at ICON, Hepler works with a variety of mediums ...

"I work in whatever medium helps to achieve the desired outcome," she said. "Each material and process communicates differently, and so my ongoing experimentation is one way I can broaden my vocabulary as an artist."

Hepler continues to discover new ways to express her ideas.

"What is still unknown to me may be the most interesting and powerful form yet," she said. "I strive to remain open to these possibilities and to cultivate this attitude of risk-taking."

A manifestation of Hepler's risks is "Arrest, Array," a large (55 feet by 30 feet by 20 feet) site-specific sculptural installation she created during a residency in Seattle last summer. It is made up of aluminum and steel rods connected by black PVC discs.

"The idea was to freeze a con-stellation of black dots mid-flight, as if to stop a flock of birds and then create a fixed geometry from the frozen form," she said.

Hepler works in both two-dimensional and three-dimensional

space and in a variety of media.
"My work is conceptually lin work is conceptually linked

whether it manifests [itself] as two dimensional or three dimensional artwork," she said. "I am interested in getting around all sides of an idea to see it from different angles," she said.

Norah Maki '08 is working on an independent study involving priintmaking and bookbinding v Hepler and has taken two of her printmaking classes.

"I think that it has an interesting tension between the precision of geometric forms and the abstract," Maki said of Hepler's work.

According to Maki, Hepler is equally as successful at inspiring students in the classroom as she is at creating her art.
"She's great," Maki said. "She's

very enthusiastic and very efficient. She's excited about what she's doing and she's good at what she does."

Just as she pushes herself, Hepler encourages her students to take risks as well.

"Generally her project guide-lines are pretty loose. We'll get a certain size plate and sort of general assignment and she'll work with every person individually to develop an idea that they're personally excited about," Maki said.
"I think that she would be supportive of trying something new instead of doing something safe and familiar."

"Woodcuts" will be on display until December 13 at ICON Contemporary Art Gallery in Brunswick, located at 19 Mason Street. The gallery is open 1-5 p.m. Monday-Friday and 1-4 p.m. on Saturdays. Hepler also has a sculptural installation opening at the Center for Maine Contemporary Art in Rockport on January 10.

WORK IN PRINT: Hepler stands in front of one of her woodcuts on display at ICON Contemporary Art Gallery. In addition to woodcuts, Hepler also works in other media, including sculpture, drawing, photography, digital animation, installation and printmaking.

Peucinian society debates pop music's effect on culture

BY LYDIA DEUTSCH STAFF WRITER

Does popular music inspire

This was the question debated by the Peucinian Society, Bowdoin's literary debating organization, at its most recent meeting on November 13

Members of the Peucinian Society spend their meetings debating or preparing orations and hosting

guest speakers.

Last Thursday, Ross Jacobs '10, co-president of the society, introduced Mike Corbelle '10, who argued that popular music could inspire good, and Hassan Muhammad '10 who argued it couldn't.

Corbelle and Muhammad agreed on certain tenets of mu-

"Music is man's common language," said Corbelle, a government major and archaeology mi-

"Regardless of race or creed, music gives all who listen an equal opportunity to be inspired for good," said Muhammad, an English major and music minor.

Though the two agreed that most music can have a positive influence, they disagreed as to

for popular music in particular.

Corbelle used Woodstock as proof of popular music inspiring

"Woodstock gave a genuine sense of love and togetherness that none of the participants had ever experienced before," he said. "During a turbulent period, 1.5 million people of different ages, genders, beliefs and orientations were able to come together harmoniously under the one belief in the power of music."

He then cited the Live 8 concert in 2005 as a second example of music's impact.

Popular music has the ability to inspire the mind and to lift the spirit, but also to bring us together as one. Popular music has the ability to unite people under the common goals of bettering ourselves and the world around us, and I challenge any of you to tell me what is more inspirational than that," Corbelle added.

Muhammad argued that pop music degrades American cul-

We live in the age of music. Music is like the air we breathe. Therefore, we must ask ourselves, for our own good, are we breath-

HEATED DISCUSSION: Peucinian Society members gather to discuss and debate pop music.

ing air pollution?" he said. "I am not concerned with the old, overworked, and conventional rebuttal of popular music, which passionately exclaims that it leads to sex, violence and drugs."

Corbelle dismissed this argu-

ment as irrelevant to the ques-

"Others might say that popular music glorifies our society's vices, as many of our best-known songs glorify sex, drugs, and a criminal lifestyle. This is not the question

Both debaters focused on music's larger implications, such as its effects on education and home life. Muhammad argued that popular music directly affects these two spheres but Corbelle argued that popular music is only a reflection of what already exists in

Corbelle argued that music is not the only reason why such problems exist.

While it is true that many rappers espouse a lifestyle that most would not consider virtuous, one cannot place blame for the vio-lence and depravity existing in urban America solely on a musi-cal genre," he said. "It is my belief that these conditions existed in these areas long before rap music, due to economic and educational injustices, among others."

Muhammad insisted that popular music not only perpetuates but instills problems in youth.

Barron and Convey perform on Friday at 7:30 p.m. at Kanbar Auditorium in Studzinski Recital Hall. Barron's performance with the Bowdoin College Concert Band is on Sunday at 2 p.m., also in Studzinski. Both concerts are free and open to the public.

MUSIC MAN: Ron Barron was the principal trombonist for the Boston Symphony Orchestra.

Stormin' Norman and Suzy's chemistry to light up Studzinski

A duo that serenades listeners with jazzy blues piano and soaring vocals reminiscent of Janis Joplin and Billie Holiday is taking

Bowdoin by storm this weekend. When Stormin' Norman & Suzy met in the 1970s through an ad in the Boston Phoenix, they immediately began to gain a notoriety that ranged from New England college campuses to The New York Times.

Three decades later, they are returning to their colleigate fan base during their performance at Kanbar Auditorium in Studzinski Recital Hall on Saturday.

A graduate of Yale, "Stormin"

Norman Zamcheck has been mak-

ing music since he was a kid.

"I have been creating music since I was 10," he said. "I always experienced everything in terms of songs. I think I first picked up boogie woogie piano from my dad, who was a good pianist in his youth, and collected transcriptions of early '30s boogie woogie-style

This influence is clear in Zamcheck's songs, as is a prominent

"Of course, I was heavily involved with the folk music thing, and then rock, which was the cen ter of everything in the '60s and '70s," Zamcheck said. "I think those times encouraged you to think of songs and singing as something greater than entertain-ment, and closer to those African griots who sing history, or closer to epic even."

While Zamcheck relies heavily on his musical partner, Suzy Williams, for inspiration and her vo-cal prowess, the two cooperate on every level to produce their individual sound.

"We have lots of respect for each other, though rehearsals can get very emotional when one is more attached to an idea than the other.'

TAKEN BY STORM: "Stormin' Norman & Suzy," a rock duo that started in New York, will play in Studzinski Recital Hall on Saturday. They have performed their vast repertoire all over the world for more than 30 years and continue to collaborate on new music. "Things are funny and whimsical, but also kind of dark and scary. We always try to balance both sides. In a sense, the songs are a little of a trick," Zamcheck said.

he said. "Basically, we sit down at the piano, she or I will sing an idea for a song, and then we fuss and fume about how the lyric should go, where the choruses should go, and whether or not it should say something totally different."

Williams, who is originally from the West Coast but hitchhiked to New England when she was 17, is a dedicated performer.

"Suzy is fantastically profes-

sional about her work and how and what she sings. We can rehearse for 15 hours without stopping," Zamcheck said. This dedication contributes to the duo's musical chemistry.

Despite 30 years in the music business, Zamcheck and Williams maintain a sense of humor about

"If you listen to Stormin' Nor-man & Suzy, you may see that there is serious stuff involved, but clev-erly masked," Zamcheck said

Things are funny and whimsical, but also kind of dark and scary. We always try to balance both sides. In a sense, the show and songs are little of a trick. They are something that seems giddy, vaudeville and light, but are actually the opposite," he added.

This whimsy has been recognized by performances in Carn-egie Hall and ecstatic reviews by publications such as The New York Times and Rolling Stone.

Although he has been perform-ing for most of his life, Zamcheck ntinues to find inspiration for new music everywhere.

"The hard part is realizing the potential of an idea. I have taken 20 years to write a song," Zam-check said. "I am pretty compulsive about recording first ideas. I listen to them, re-work them. Sometimes you can overly formalize a song and lose the magic."

That magic sometimes appears in unexpected of places.

According to Zamcheck, two months spent in the Canary Islands were the source of some of his and

Williams' greatest songs.
"We were billed as "'Suzy y su
Power Band," Zamcheck said.

"Almost two months on Gran Canaria, in a vast disco, surrounded by wives of Scandinavian whal-30 miles off the coast of Mo

rocco," he added.

Zamcheck's experiences have also taught him lessons about how to become a successful musician.

"Try to be both totally true to your dreams and talent, but totally realistic. If you have the dream, hone your skills, get better at your instrument, listen to everything," he said.

"And try to get yourself a circuit where folks are hearing you," he added.

"Stormin' Norman & Suzy" will erform on Saturday at 8 p.m. Kanbar Auditorium in Studzinski Recital Hall. The show is free and open to the public. Visit www.zamcheck.com for more information about "Stormin' Norman & Suzy"

PEUCINIAN

CONTINUED FROM PAGE 11

firms these things and I will show you a popular music that has ceased to be popular," Muhammad said.

Muhammad also argued that although the theme of individuality is present in much pop music, the music itself inspires conformity.

"Pop music constantly reminds us to 'be ourselves.' It screams the language of individuality. Yet, how individualistic is it for one third of America's youth to wish to be Kanye West, another third to wish to be Kid Rock, and yet another third to wish to be Brit-ney Spears?" he said.

He also condemned the industry responsible for popular mu-

sic.
"With its purely commercial focus, it exploits the disposable income of so many young Americans. The pop music industry gladly provides what Allan Bloom so aptly considered 'a commercially prepackaged masturbation-al fantasy," he said.

Muhammad concluded with a warning:

"Our vision is obscured, and our lungs offended by a haze of smoke that is popular music. For the sake of education, for the sake of society, for our own sake, we

must take control of this pollution before it is too late. Before we know it, the sun will be hidden behind a wall of smog, and we as a nation will be left gasping for clean air," he said.

The discussion that followed lasted longer than the orations themselves and closed with a vote of 12-8 that popular music does not inspire good.

This was Muhammad's first oration at a meeting. Both he and Corbelle enjoyed the experience and plan on doing it again.

The chance to argue in a tie? I'm there," said Corbelle, who has participated at almost every de-

bate since joining last spring.
"I wanted a place to debate passionately with others who are interested in politics, society, and the direction in which our culture is headed," he added

"It is a unique opportunity, and though not for a grade, I still feel compelled to give a lot of my time and energy to shaping my ideas, because that is very much the Peucinian spirit," Muhammad

"The disputation between Mike and Hassan was an outstanding example of how the heat from contemporary issues can give discussion about perennial questions significance," said Ross Jacobs '10, who organized the group with friends in 2007.

'Peels' inspires thanksgiving

THE BOOK NOOK **BY FRANCES MILLIKEN**

COLUMNIST

In a world increasingly reliant on communication e-mail, or Skype, the art of the letter is becoming obsolete. Despite decreasing use today, letters remain a treasured part of our past. While a division of the publishing industry is dedicated to printing written exchanges between historical figures such as Elizabeth Bishop and Robert Lowell, it is hard to imagine that e-mails will have the same longevity. In "The Guernsey Literary and Potato Peel Society," the authors Mary Ann Shaffer and Annie Barrows team up to create a story that is revealed entirely through change of letters.

The novel takes place in the wake of World War II. The protagonist, Juliet, is an author who is contacted by Dawsey, a survivor of a German occupation of Guernsey Island. She strikes up a friendly correspondence with him, and as she learns more about him and his friends on the island, the number of people with whom she communicates increases.

She learns that when the German troops occupied the island, they imposed harsh restrictions on the residents and corralled the best food for themselves. There are stories of the inhabitatns that detail how their bravery and cleverness allowed them to resist the brutal hands of their oppressors.

One of the Guernsian methods of evasion included the creation of a literary group, called The Guernsey Literary and Potato Peel Society. Each member of the society would read a different novel and presented his or her understanding

of it to the rest of the group.

Juliet eventually meets all the mem-

decides to travel to Guernsey to meet

A fine web of detail is spun around each of the novel's characters. Juliet is independent, smart and warm. Dawsey is steady and cautious. Elizabeth, the heroine of the novel, is entirely created through the words of others, because she is taken prisoner by the Nazis. Juliet begins writing a book about Guernsey centered around the story of Elizabeth's bravery. As Juliet's visit to the isle lengthens, she develops a deep connection with her daughter and with the other inhabitants of the isle.

A love story is related in the novel. with the usual pitfalls and triumphs, though there is something a little su ficial in the telling of that story. Its delivery is sincere but all the characters feel newhat unreal; it is difficult to imagine them outside of the book. This might be a symptom of the novel's structure, as it is difficult to create real people in letters. But I do not think that is the case Rather. I think the authors chose to approach the subject in a straightforward,

ess investigatory manner. "Potato Peel Society" is an easy read. The story runs rapidly along and the reader is engaged by each person's quirks and country charm. I knew nothing about the German occupation of Guernsey, or the existence of the isle for that matter. The authors do a fine job of illuminating a piece of history that might otherwise find its way between floorboards. The book serves as a perfect diversion on the trip home for a Thanksgiving turkey. You will count your blessings that you are not forced to subsist on rotting vegetables and the occasional dog. Though it may not serve as the centerpiece of lively dinner conversation, it will provide entertainment during the holiday of comfort food.

Oasis tries to relive glory days on 'Soul'

REVIEW BY LOUIS WEEKS COLUMNIST

For the past five years, Oasis has been the punchline of many a pop culture joke. Liam and Noel's brotherly antics have landed them on countless VH1 countdowns, and they are even satirized in one of the world's hippest TV shows. Liam Gallagher is the not-so-subtle inspiration for LOST's Charlie Pace, from Driveshaft ("You All Everybody"). Charlie Pace and Liam Gallagher represent what we all love and look for in our rock gods: a healthy appetite for self-destruction and a fiery British temperament. But if there one thing we all crave more, it is the comeback album.

Although they have recorded steadily over the past decade, Oasis feels trapped in their 1995 master-piece "(What's the Story) Morning Glory." The album's mega hit, "Wonderwall," has reached an eternal spot in guitar history. It's like "Blackbird," "Sweet Home Alabama" or "Free Falling"-anyone who owns a guitar plays it. But even with tens of thousands of "Joe the Strummers" (Palin, I hold a copyright on that) massacring it all over the world, the song never gets old. Furthermore, that gem of a song managed to get us to sing something that doesn't mean anything. What the hell is a wonderwall? The album has other instant hits as well: "Champagne Su-pernova," "Some Might Say," "Don't Look Back in Anger"... The list goes on. Needless to say, it seems almost impossible to top that album. Oasis'

newest release, "Dig Out Your Soul," proves just how true this is.
"Dig Out Your Soul" is not a bad

album; it's just confused. There are very good parts and there are very weak parts of this release. The album has one crucial and unforgivable flaw: It's trying too hard. The first half of the albi m attempts to prove through hard-hitting, loud-playing and face-melting rock songs that Oasis is back. But the songs themselves are not interesting enough to win over even the most ardent Oasis fan. They lack the singability or the sweet simplicity of the songs of old. It seems that Oasis became preoccupied with the process of recording rather than writing solid songs. Each track is loaded with sound, blanketing the hard truth that none of these ngs could have an acoustic version. Furthermore, the last 20 seconds of each track contains a recording of ambient noise. For example, one track's ending features an ambulance siren, while another has feet scuffling across a wooden floor. This feeble attempt at creating a unified album is ultimately unsuccessful.

The album does have some very redeeming qualities. Songs like "Shock "(Get Off Your) High Horse Lady," remind us of the old Oasis, an Oasis obsessed with melodies that made you want to sing as loud as you could. These songs are smaller and more intimate; the unnecessary layers of sound were stripped away, allowing the lyrics and vocals to step into the forefront.

"Dig Out Your Soul" feels unsuccessful because Oasis has abandoned what it did so well. Albums like "Morning Glory" were effective because each ong was crafted to perfection, and they didn't let extraneous production cloud the intent of the song. Oasis of the '90s was successful, essentially, because they adopted a modern Beatles sound. Their punchy piano riffs, bold and simple drum beats and natural harmonies could easily have been written by McCartney or Harrison. Because the Beatles' influence exists over such a vast expanse of rock music, it's hard to depart from their style. That is not to say that Oasis is a notefor-note carbon copy of the Beatles But once you sound like them, you're in, and once you stop, you're out. I never thought I'd say this, but the Beatles ruined everything

Men's basketball downs Colby in season opener

BY DAVID SHAEFFER

Entering the 2008-2009 season, questions remained unanswered for the men's basketball team. How would the team replace arguably the most successful senior class in school history? Could the team, with six new players, gel quickly enough to effectively compete in one of the toughest Division III conferences in the country?

But the Polar Bears put to rest any doubts about the team's inexperience last Saturday against Colby

In the home opener for the squad, the men defeated the Mules, 67-60. In the win, Bowdoin used a balanced offensive attack, led by junior Mark Phillips with 15 points.

Bowdoin found contributions from nine players in a back-and forth contest that produced 12 lead changes. Bowdoin entered the locker room after the first half with a 31-30 advantage.

However, it was Colby who found life early in the second stanza. After a 12-2 run, the Mules grabbed their biggest lead of the gam

Despite the deficit, the Bears continued to claw away at their opponents. Leading the comeback was senior tri-captain Darian Reid-Sturgis and first year Will Hanley. Both players provided tremendous firepower off the bench, which collectively outscored the Mules' bench

The Polar Bears used the final five minutes of the contest to put the game out of Colby's reach. Led by Reid-Sturgis, Bowdoin finished on a 14-2 run to put the game away.

In addition to 15 points from Phillips, Kyle Jackson '09 added 12 and Hanley scored 11, while Reid-Sturgis also finished in double digits with 10. Bowdoin played well defensively, drawing 14 Colby turnovers while collecting 12 blocks.

Though only the first game of the season, Reid-Sturgis believes much can be taken from the victory against

"[The Colby game] showed the tough character of this team," he said. "Being so early in the season, obviously neither team was as polished as they would hope to be later in the season; however, the game was won with grit and heart. Beating such a quality opponent gives us incredible momentum, and more importantly, confidence going into the Salem State tournament."

Bowdoin hopes to continue the winning momentum this weekend as they compete in the Salem State Tournament in Salem, Mass. The Bears will play Western New England today at 4 p.m, with a game Saturday pending the result.

FINDING A LANE: Senior forward Tim Lane drives to the basket and attempts a lay up during the Bears' 67-60 home win over Colby last Saturday.

Coaches Shibles and Smith take the helm as women's basketball gears up for season

Shibles emphasizes defense and transition offense

in new scheme

RY SETH WALDER ORIENT STAFF

There will be two fresh faces on the sidelines of the women's basketball games this winter: Coach Adrienne Shibles and Assistant Coach Alison Smith '05.

In June, the College announced the hiring of Adrienne Shibles as the new head coach of the women's basketball team, after former coach Stephanie Pemper unexpectedly accepted the head coaching job at the Naval Academy, a Division I school.

Shibles, a 1991 Bates graduate, was the head coach at Swarthmore College from 1996 to 2005, though most recently served as the Athletic Director at Gould Academy in Bethel, Maine.

"She was very successful at Swarthmore," Director of Athletics leff Ward said

Shibles said that the transition to Bowdoin has been smooth thus

"It's been wonderful, everyone in the community has been fantastic," Shibles said.

Joining Shibles as assistant coach is Smith, a former women's basketball standout for the Polar Bears who captained the team her

senior year and appeared in the 2004 Division III National Championship game.
"For me, it's been great to have

Alison to get me up to speed on Bowdoin and the rich basketball tradition here," she said.

Smith also said she thought her past experience as a Polar Bear would help the team

"I think some of the girls were a little more nervous about [tradition] because Coach Pemper em-bodied that," Smith said. "I think being someone who has been a part of that has helped the transi-

Shibles indicated that she and Smith are changing the team's style of play fairly significantly.
"Alison and I are defensive-

minded coaches; the focus is on defense and rebounding," she

Shibles also said that she is encouraging more of a transition offense and more fast breaks.

Smith added that she felt the team has a lot of individual talent, so they are hoping to give players more liberties, with less of a regimented offense than under Pem-

"We're working really hard at emphasizing these things but being disciplined at the same time," she said. "We don't want it to be sloppy, it's about finding that bal-

Tri-captain Maria Noucas '09

have been very pleased with their new coaches and have noticed a difference in both the style of play and coaching.

"She has a completely different style of coaching from Steph," she said. "She has really made basketball fun for us.

Smith, who played under Pemper, is a strong believer in Shibles' coaching philosophy.

"She's a very family-oriented person, and I think that shows in her coaching style," she said.

In terms of the upcoming season, Shibles was optimistic, but did not want to get ahead of her-

"I'm not going to make any pre-dictions," she said. "I really believe in this team. [But] we're focused on the process of winning."

However, Shibles and Smith both spoke volumes about the women that comprise their team.
"They look great," Smith said.

"A really great group of women. The senior leadership is great."

No matter how the season turns out, as the team heads into its first game against Western Connecticut State on Saturday, it seems that ev

eryone is happy.

"I'm probably even more thrilled about her now than when we hired her," Ward said.

Noucas agreed.

"She's the perfect person for the job," she said.

Women's XC places 7th, misses berth to NCAAs

BY ANNIE MONJAR STAFF WRITER

Just a few minutes after the men's race had ended, and just 15 minutes before the start of the women's, a rain shower fell on Mt. Greylock High School-the site of Williams home

The shower was brief, but it was just enough to soak an already wet course, giving the runners in the 2008 NCAA Division III New England Regional Championships this past Saturday an arduous run, full of soggy, rolling terrain, and a painfully steep hill with 1,000 meters to go in the 6K race.

But the mud proved no match for the Polar Bears, who took seventh out of the 49 teams, a field that included nationally ranked teams such as Middlebury, Williams and MIT.

Before the Regional meet, Bowdoin had been seeded eighth in the regional poll, and ninth in the pre-season poll Though the team came two spots short of an at-large bid to compete in the NCAA Division JII Championships, the race was a testament to the hard work and breakthrough performances that improved their New England standing this season.

Annie Monjar '09 crossed the finish line first for the Bears, taking sixth place overall and earning an individual bid to the NCAA DIII Championship on November 22. Courtney Martin '09 finished second for Bowdoin—good for 36th place overall—in what head Coach Peter Slovenski called her "best race of the season."

"It was a good course for someone who is good in bad conditions, and Courtney is a tough runner on hills on muddy courses," Slovenski said.

Following Martin, the Bowdoin scorers were Christina Argueta '11 in 48th place, Grace Kerr '11 in 65th and Anna Ackerman' 12 in 69th. Rounding off the line-up were Lindsey Schickner '09 in 77th and Holly Jacobson '11 in

The race brought an end to a long cross-country season, one that cocaptain Courtney Martin '09 called 'really phenomenal."

"After graduating so many seniors last year, I think a lot of people thought we wouldn't be very competi-tive," she said. "But we had so many people come through with their hard work and dedication, and I think the fact that we improved from our pre-season ranking really shows that." Slovenski agreed.

"The seniors improved so much this year," he said. "Last year, only one runner from the class of 2009 was in the top seven, and this year, we had Courtney, Lindsey and Annie in the top six. The seniors worked hard and provided outstanding leadership. They carried the team this year."

Though the Bears graduate three of their top seven, the return of Argueta, Kerr, Ackerman, Jacobson and other promising underclassmen bodes well for the 2009 season.

Men's XC 5th at regionals

Ogilvie heads to NCAAs

BY KEATON LORA

The Bowdoin Men's Cross Country Team ended its season with a degree of disappointment, finishing fifth at the New England NCAA Regional meet last Saturday. Although the team performed above the expectations accompanying their eighth seeding, the team failed to qualify for the NCAA championships.

The Polar Bears were led by Thompson Ogilvie '10, who earned an individual spot in the NCAA Division III Championship race and finished eighth

Colman Hatton '10 finished close behind in 19th place, while Scot McFarlane '09 finished 34th. Bowdoin did improve upon its performance at the NESCAC Championships, finishing ahead of the teams from Middlebury, Connecticut College and Tufts, each of whom beat the Polar Bears on November 1 at Bates.

"It was an awesome experience to take fifth place at Regionals considering we hadn't even been ranked," said Mc-Farlane.

Following last Saturday's meet, the NCAA announced the teams that will compete at the NCAA Division III Championships at Hanover College in Hanover, Indiana. Four NESCAC schools were among those selected, including Trinity and Brandeis, who finished third and fourth, respectively, and just ahead of Bowdoin at NCAA Regionals. They will join Williams and Amherst at the Championships on Nowember 22.

Though Bowdoin failed to advance to the Championships, the team performed admirably in what coach Peter Slovenski had earlier called a possible rebuilding year. In spite of this, Bowdoin matched its showing at last year's NCAA Regionals.

"We faced a lot of challenges this year with a whole range of injuries...and what just felt like a lot of bad luck at times, but I think that also made it that much more satisfying when we did so well at regionals," McFarlane said.

Next season, the Polar Bears return two of their top three runners, and current juniors Ogilvie and Hatton will probably anchor the Bowdoin team.

They will look to improve upon this seasons strong showings, while young runners, such as sophomore Stan Berkow and first years Colin Ogilvie and Scott Longwell will likely rise in importance for the Polar Bears. McFarlane is the lone departing senior among the group Bowdoin sent to last Saturday's regional meet.

MARGOT D. MILLER, THE BOWDOIN ORIENT

THANK THE LORD: Junior Shavonne Lord carries the ball downfield against Stevens Institute of Technology last Saturday. The Bears won the game 3-0.

Sports Short

Sailing weekend cut short due to inclement weather

The Bowdoin Sailing team competed in its final regatta of the fall season last Saturday at the Atlantic Coast Tournament in Cambridge, Mass.

Boston University played host to this 16-boat championship intersectional held in FJs on the Charles River. The Polar Bears finished 11th over the course of the two-day event.

Racing early Saturday was delayed due to light winds, but breeze filled in midday, enabling five races to be completed in the A-division and four in the B-division. On Sunday, the Race Committee was forced to suspend competition due to heavy winds and impending boat damage.

impending boat damage.

The team of Alex Takata '12 and Meredith Steck '09 placed eighth in the A-division, while Pete Wadden '09 and Coco Sprague '11 finished in thirteenth in the B-division.

Bowdoin Sailing completed the fall campaign with a No. 16 spot in the 35school New England Intercollegiate Sailing Association rankings, finishing narrowly ahead of inter-state competitors Bates and Maine Maritime.

-Compiled by Caitlin Beach

NCAA CONTINUED FROM PAGE 1

Also early in the half, Kate Gormley '09 chased down a two-man Middlebury rush from midfield to extinguish a scoring opportunity and keep the game scoreless.

The confidence stemming from their solid play on defense helped Bowdoin to strike first.

Gormley blasted a shot from

the left of the net into a crowd of Middlebury defenders. The ball bounced off a stick and landed in the possession of Lindsay McNamara '09 for the turn-around shot to the opposite post at 15:23 in the first half.

However, the lead was short-

However, the lead was shortlived as the Panthers were able to answer with a goal of their own just three minutes later, as Chase Delano converted on a pass from Dana Heritage.

With the Polar Bears determined to regain the lead before halftime, Madeleine McQueeney '199 gathered the rebound off a shot from Julia King '199 under heavy pressure from the Panthers, and stuffed it behind Middlebury goalie Caitlin Pentifallo with 6:36 remaining in the first half

Another tally 20 minutes into the second half from McQueeney gave the Polar Bears the 3-1 advantage. Again, McQueeney found herself with the ball in a mass of defenders and was able to find open space on the goalmouth for her second score of the game.

The 3-1 win marks the third Bowdoin victory over Middlebury this season, and it earned the Polar Bears a spot in their fourth consecutive NCAA Final Four Tournament

Prior to Sunday's game, the team played 70 hard minutes in last Saturday's match-up against the Stevens Institute of Technology Ducks.

The Ducks brought a 19-3 record and the Empire 8 conference title to Brunswick, Maine for their first ever NCAA tournament appearance.

"Going into the game against Stevens, we did not know what kind of team they would be but we knew what was at stake," McQueeney said. "They're a young program, and obviously very successful, but I think our experience and determination gave us the edge."

Resulting from a quick offenseto-defense transition, the Polar Bears were able to make their first dent in back of the SIT cage 15 minutes into the game.

McNamara fed a long ball to McQueeney charging up the field and Ingrid Oelschlager '11 was on the receiving end of the McQueeney pass for the redirect shot into the net.

Starting off the scoring in the second half, McNamara made her presence known with a spectacular between-the-legs midair deflection off a bullet sent by King at 18:08.

A heroic defensive play on the goal line by Kara Kelley '10 saved Bowdoin's two-goal advantage. The Ducks rang a hard shot off the post, which fell at the stick of a Stevens forward for a quick shot on the open net. However, Kelley was able to hold strong along the goal line and keep the net empty.

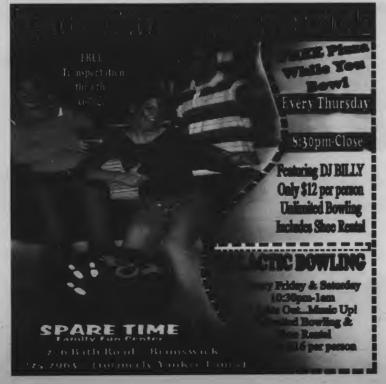

Katie Herter '12 scored the first goal of her college career at 25:48 of the second half. McQueeney sent a pass across the scoring circle to Herter positioned off to the left of the goalmouth for the shot past the SIT netmind er, Stephanie Smith.

The Polar Bears left Thursday morning for Ursinus, located in Collegeville, PA.

Bowdoin will have to face the hometown favorite, the Ursinus Bears (19-2), Saturday afternoon in the semifinal game.

With a victory, Bowdoin will have the opportunity to defend its national title on Saturday against the winner of the Tufts (18-1)-Messiah College (17-1) semifinal

"We are awfully pleased to be returning to the Final Four, it is truly a reflection of this team's ability and their dedication to the program," said Head Coach Nicky Pearson.

Clash of the Joilers

COLUMN LIKE I

BY CHRIS ADAMS-WALL
COLUMNIST

If only we had a time machine. Then we could elope back to September to revise our predictions through Week 11: The Patriots would be undefeated, the Jaguars atop the AFC South, Chargers the AFC West, Matt Hasselbeck would be making mincemeat of the NFL's worst division, Tony Romo the NFL's best division, and the Lions, well, not to call them cowardly but...aw, shucks folks, I'm speechless.

Of course, none of these popular predictions have come to fruition—far from it. The Patriots are behind the Dolphins, the Chargers the Broncos, Matt Hasselbeck has been made mincemeat, Romo as well and the Lions are WHO WE THOUGHT THEY WERE (where is Denny Green, by the way?)!

Going into Week 12, one might have been enticed by a Pittsburgh/ Cincinnati Thursday nighter (brought to you by the best broadcasters around, of course), a possible Super Bowl preview featuring the Jaguars and Vikings, or an AFC Title preview in San Diego versus Indianapolis.

But stunningly, none of these games mean very much with respect to what each team strives to contribute to at the end of every season: the playoff picture.

No, I seriously mean to tell you that none of those games has much relevance, and that the most intriguing game of the year will take place at the anticlimactic timeslot of 1 p.m. at the anticlimactic venue of LP Field (formerly known as Adelphia Coliseum), where the AFC East-leading/tied for second in the AFC New York Jets, fresh off their dramatic overtime vic-

tory over New England (in New England), will square off against the undefeated (10-0!) Tennessee Titans, in what is probably the most unlikely of significant match-ups—or so you think.

Every summer when the Jets schedule is released to the public, I take it, examine it, and then dissect it, breaking down every game and predicting to the best of my ability New York's record at the regular season's conclusion.

An automatic two losses versus the Patriots, one against the Bills (sometimes two), and a sweep of the Dolphins tends to be the beginning to my usual formula. Then, I will combine that record with that against the other teams from different divisions, and for whatever reason, almost every single year I peg them to finish 9-7. This year was no different.

But they've already split with the always affable Belichick & Co.—
it's like they're missing something this year— and dropped Buffalo and Miami separately on the road with one more to come against each club at home.

And at 7-3, I can't remember a time in recent memory where it actually felt good to be a Jets fan. But it gets even better.

I was speaking to a friend of mine on Skype just the other day, who happens to be a diehard Pats fan, and we were chatting about the Titans' improbable run to perfection thus far, and how incredible it would be if they went undefeated merely a year after New England did it (at least in the regular season, that is. Thank's again, Eli!)

My friend was not amused:
"That would just be exactly like
when Bonds broke McGwire's record 10 seconds after he had shattered Maris'; I really don't want
something like that to happen
again."

Of course he doesn't. Which is exactly why this match-up is even

I was speaking to a friend of mine on Skype just the other day, who happens to be a diehard Pats fan, and we were chatting about the Titans' improbable run to perfection thus far, and how incredible it would be if they went undefeated merely a year after New England did it (at least in the regular season, that is. Thanks again, Eli!)

NFC Title Game 41-0, only to bow

out to the mighty Ravens in the

memorable Super Bowl XXXV, now with the undefeated Titans,

and back in 1996 with the sopho-

moric Panthers, leading them to the NFC Title Game in just their

second year of existence, only to

And who was under center that

year for Green Bay? Hmmm...oh,

It was Brett Favre; the same

guy who will be under center this Sunday, trying to spoil everything

Who knew that when the Jets

first began play back in 1960, they

were known as the New York Titans (and the Titans the Oilers

for Collins once again. But wait.

lose to the Packers 30-13.

that's right!

there's more!

more intriguing: who will my arch-nemeses root for this Sun-

If the Jets win and Patriots lose to Joey "Popcorn-muscles" Porter, the gap will double between the two division rivals, and if the Titans win, their next three games feature Detroit, Cleveland and Houston—a trifecta of winnable fixtures which could catapult them over Pittsburgh and Indianapolis to close out the year, and a perfect season for only the third time in league history—second in Iwo years.

No, New England fans would want that about as much as a Dustin Pedroia trade (I'm sorry, but how did he win MVP again?), let alone it to happen to a team that represents the near antithesis of last year's 18-1 Patriots. That is to say, this year's Titans are a team full of nobodies.

Chris Johnson? Dave Ball? Justin Gage? Who ARE these guys? Oh, Kerry Collins. That sounds kind of familiar.

After Week One when the franchise's only marquee player Vince Young succumbed to injury and heavy criticism of the whereabouts of his head, the 35-year old Collins stepped in and hasn't lost in 2008. The Daniel Day-Lewis/ Britney Spears of the NFL, Collins seems to disappear on end for seasons at a time, only to reemerge every five to eight years and step back into the spotlight.

back into the spotlight.

I think we all remember when
he single-handedly dismantled
the Minnesota Vikings in the 2001

before establishing themselves in Nashville)?

The only reason I knew that is because it seems like every other Sunday they don their putrid retro navy blue and gold Titan uniforms, which makes me cringe every time.

But of course, exceptions can always be made, and if the Jets opt not to mirror their unbeaten foes Sunday under the same exact name, then I will be disappointed in Jets' management and life in general. How could anybody pass up a literal clash of Titans?

Whatever happens though, I have no doubts that it will be a highly entertaining affair between two of the league's best (a nd perhaps even the top AFC elite).

But most of you will miss it because of the Patriots-Dolphins game that will be broadcasted at the exact same time on the exact same network; either that or you'd rather watch mediocre football than get up off your lazy butt, drive to the nearest sports bar, and seize the opportunity to remember the Titans. I know I will.

WHAT NOW?

THE BRYANT MBA One-Year Program

Do you have what you need to get the job you want? With the Bryant MBA one-year program, you will gain both the skills and experience to launch a successful career.

This accelerated one-year program is designed to build upon undergraduate programs in all academic areas – liberal arts, science, technology, and business – to name a few.

- Begin the program directly after you graduate from college.
- · No professional experience is required.
- Gain hands-on experience, and build mentor relationships with corporate executives through the Business Practicum program.

COOL AS ICE: The women's ice hockey team practices at Dayton Arena on Thursday. The team will travel to Connecticut College and Amherst this weekend.

Women's ice hockey wins first game

STAFF WRITER

The Bowdoin Women's Ice Hockey Team started the season on a high note, defeating University of Southern Maine 2-0 on Tuesday.

The team's first years led the way to victory, as two rookies scored firstperiod goals to put the Bears on the hoard

In their first game for Bowdoin, Alexandra Chlebeck '12 and Dominique Lozzi '12 scored goals just one minute and 28 seconds apart.
Lozzi, Shelagh Merrill '12 and

ly Keebler '10 also proved sensational between the pipes, stopping 20 shots.

"It felt great to start the season by defeating USM," Lozzi said. "We had all been working really hard at captain's practice and practice since October and were dying to finally play a real game."

Scooter Walsh '09 noted that the win gave the team the confidence they needed in the beginning of the sea-

"It was nice to get the first-game jitters out of the way in a non-NESCAC game, and winning definitely boosted team morale and confidence," Walsh

Keebler attributed the success against USM to the team's devotion to teamwork and the strength of this year's first-year class.

Our team strives to play with confidence and as a unit," Keebler said. "We have a really solid freshman class that will help us achieve these goals."

Walsh also commented on the re markable performance of the first

The first years showed that they are ready to play at the collegiate level," Walsh said. "Especially the all-freshman line with Lozzi. Chlebeck and Merrill that scored both of our goals."

Chlebeck, too, was ecstatic about the goals.

"My whole line worked really hard for those goals and throughout the game," Chlebeck said. "I'm just working hard and hoping to continue to contribute any way I can.

Seven of the 14 skaters on the ice against USM were members of the Class of 2012.

Also noteworthy, however, was the

fact that they were missing key players due to field hockey. Seniors Lindsay McNamara, Julia King and Emileigh Mercer will play at Ursinus this week end in the Field Hockey NCAA Final

"We are missing a few key players, but there's nothing we can do about it, because obviously the field hockey team is amazing," Keebler said.

With some of their seniors playing field hockey, the team has had to make adjustments.

"We had a few individuals step up to take the leadership role while our captains are gone, and coach has been getting us ready for these first few games so that we are prepared to skate with 14 players," Keebler said.

"Not having our full team has been difficult, but we have a solid group of upperclassmen and returning players who have led this team. We just have to work together and support each other," Chlebeck added.

The Polar Bears are excited about their win as they look ahead to Connecticut College and Amherst this

"Starting off our season with a win is everything we could have asked for," Keebler said. "Now that we have shaken out the loose screws, we're ready to face Conn and Amherst."

Starting strong with this first vicory, the Polar Bears are confident as they look to the future.

"Looking ahead, we will have the chance to meet each of our NESCAC opponents twice and, once we are back to our full numbers, we will have a large and deeply talented roster,"

OPINION

BOWDOIN ORIENT

Giving thanks

t is easy to feel gloomy as we approach the end of the semester-the days are becoming darker, school work is getting more difficult and the economy is in a downward spiral. However, despite all that, we have much to be thankful for. As the temperature drops, we all have warm dorm rooms to go home to every night. Many of us will take a break from classes next week to spend time with loved ones. And, every day, we are treated to some of the best college food in the country, clearly evidenced by last night's spectacular Thanksgiving feast.

As we left the dining hall yesterday, though, we noticed something familiar-countless trays in the carousel with piles of leftover food. Though it's easy on Thanksgiving to be tempted by all the delicious options, food waste is something we've observed on a regular basis: half-eaten burgers, unfinished salads, even whole muffins and bagels.

This week, EcoReps for Sustainable Bowdoin conducted a food waste audit at Thorne, and they found that those who participated threw away almost 40 pounds of food. Though this number is relatively low, food waste is an ongoing problem on our campus.

For those of us on meal plans, plentiful food can be taken for granted. As we return to the serving line for seconds and thirds, it's easy to forget that there are thousands of people around the state that have to rely on others' good will for their firsts. According to a recent study by the Kennebec Journal, Maine has the highest level of household-level food insecurity in New England, at about 3.5 percent—and the problem is getting worse. Between 2002 and 2005, according to the same study, the number of food stamps issued to Maine families jumped by almost 50 percent.

This isn't just a problem in the state's poorest counties up north and Downeast-it affects Brunswick as well. The Mid Coast Hunger Prevention Program-where Bowdoin sends some of its leftover food-serves well over one hundred lunches each day. And with the souring economy, those numbers are likely to grow in the near future. While cleaning your plate may not directly solve the problem of hunger, it's a good way for us to show that we are truly thankful for our nourishment on a daily basis.

Finally, if you wish, go beyond symbolism. Educate yourself about hunger in Maine. Contact the McKeen Center for the Common Good and arrange to volunteer at the Brunswick Soup Kitchen. Perhaps the only thing better than being truly thankful is to be thanked by someone else.

LETTER TO THE EDITOR

Article captured both sides of Miss Maine

To the Editors

I read the article about Miss Maine 2008, Adrienne Watkinson ("Miss Maine 2008 to showcase musical tal-ent in Studzinski," November 14), that was written by Rachel Gold-man and would like to commend Ms. Goldman on how she portrayed both sides of Adrienne.

Participating in the Miss America program is an opportunity for all young women to create leadership roles, learn and perfect public speak ing skills and to bring their passions

and community service to the public. Miss Maine serves as a very supportive platform for all young wo en, not just those who win the title. Some things that are not well known: The Miss America Organization is the largest scholarship organization for young women in the world, and any student at a Maine institution can run for Miss Maine, regardless of what state they come from. Miss Maine 2007 was from Massachusetts, Tara Allain, and she was senior at Colby College during the year of service to Miss Maine 2008.

Any one interested should feel free to contact Adrienne for more information about running and the opportunities that are available.

Sincerely, Margaret Watkinson Adrienne Watinson's mother

Republicans need to be resilient

On election night, I walked somberly through the Quad coming to terms with the results when I happened upon a mob of Obama support ers shouting and parading through campus. I appreciate the excitement; however, these energies must be directed not in a quasi-religious fervor but toward a better understanding of American government.

Interest in the political process is a virtue; hero-worship is not. The former allows for intelligent decision making and compror the latter polarizes the electorate and distorts reason. In a time when the average voter's political knowledge is little more than the regurgitation of 30-second ads, an informed electorwill be the greatest component of America's continued superiority in the world: Our elected officials provide easy scapegoats when gov ernment goes wrong but ultimately its failures lie in our unwillingness to become active components of the political process.

The forces in America that seek to transform our elections into propaganda-filled popularity contests are the foremost obstacle to pros-perity. Though I adamantly oppose the policies of Barack Obama, years witnessing the self-destructive and downright ridiculous behavior of Bush-haters has galvanized me against such ignorant presidential resentment. No president can be successful in such a hateful and un-

I encourage all Republicans who witnessed the character assassination of George W. Bush by the media and liberal elites to engage in intelligent criticism of President-elect Obama while supporting him whole-heart-edly as the Commander in Chief of the United States.

As for those of you who believe this election signals a mandate to our government, you are wrong. The financial crisis, the loving adoration of Obama by the "objective" media and the failures of previous Republican administrations created an environment in which America uld elect a far-left candidate about whom they knew very little. A per-fect storm if you will. This election in no way represents America's newfound desire to become a European-style socialist nation.

st alarming is that Democrats will likely increase the capital gains tax to fund their increased spending. What they fail to realize is any increased revenue generated by raising the capital gains tax will be off-

Though I adamantly oppose the policies of Barack Obama, years of witnessing the self-destructive and downright ridiculous behavior of Bushhaters has galvanized me against such ignorant presidential resentment.

set by decreases in growth and production. Why? Put yourself in the shoes of an investor who is deciding whether to sell or ride it out. Under the Bush tax cuts, your capital gains will be subject to just a 15 percent tax rate while under Obama the rate could easily exceed 30 percent. Even a green-horn investor can see that Obama's proposed tax plan will have adverse effects on investment and slow economic growth.

We may have already seen this effect in the form of mass selling in the stock market after it became very likely Obama would win. Investors are thinking, "Get out now, before Obama starts spreading your wealth around," and sadly, their fears are legitimate.

Obama must show restraint in raising the capital gains tax if the United States is to successfully endure this financial crisis. This will be the great test of his presidency and an indicator of his ability to accept common sense over pressure from his party, the demands of interest groups and the ideological dogma of

Although the monolithic campaign spending of Obama's campaign certainly represents an attempt buy the election, the effectiveness of this method is debatable. However, Obama's campaign promises represent a more serious effort to buy the election by promising 95 percent Americans less taxes. The basic flaw of our democracy is that individuals, when faced with the choice between money and national well-being, will always choose money.

During the Revolutionary War the battle cry of the colonies rang, *No taxation without representation." More than 200 years later we have elected a president whose idea of fairness is to punish a minority of Americans by giving their money to people who pay no taxes. So now our battle cry should be, "No representation without taxation." Would you pay for a car so that someone else could drive it for free? No. If you're not paying for government services, should you be allowed to determine how government operates? I guess that's up to you to decide.

Otto von Bismarck once suggested that political genius lies in hearing the distant hoof beats of history and rising to catch the coat tails of the galloping horseman. So I ask

my conservative brothers and sisters, do you hear the hoof beats? If the Republican party can effectively communicate free market economic ideas to voters it can rise anew. In the wake of Democratic policies that will encourage class warfare and the expansion of our inefficient government, Republicans will be the beacon of truth and common sense.

Stand behind us, stand with us and God bless you if you stand against us, for I promise that reason and freedom will always triumph over those who wish to subjugate personal liberty for their own ske perception of fairness...or national. security for that matter.

Bottled water should remain available to students

BY DEWEY CROWLEY

Local environment groups often attack bottled water and its effect on the environment. However, many of these claims are often misconceptions that are incorrectly researched. Polar Beverages, a business that has been in my family for four generations, has been in the bottled water industry for 126 years. We were one of the first distributors of Fiji Water and have considerable respect for our competitors in the bottled water industry.

We hear a lot of complaints against the bottled water industry. However, we rarely hear about the thousands of cases of water sent from Polar Beverages to help victims of Katrina, the hundreds of cases sent to UMass Amherst when their public water supply was contaminated and the numerous cases donated to Bowdoin's Relay For Life.

We rarely hear of the money invested by Fiji Waters to save the largest rainforest in Fiji or that they are one of the few consumer goods' companies that is carbon negative. The truth is Poland Springs, Polar

Beverages and Fiji Water recycle well over 90 percent of all the waste they produce or sell here in Maine.

The recession is causing unemployment to rise, yet Poland Springs alone created 800 jobs and invested half a billion dollars of capital in Maine since 1992. In the end, bottled water contributes a mere 0.33 percent of the U.S. municipal waste stream and serves important roles in our everyday lives.

Some even make baseless claims about the safety of plastic in water bottles. Those single-serve water bottles that you buy (just like the soda bottles that you buy) from the cooler case are made out of PET. PET is a very stable, safe, and highly recyclable material. It was argued that it takes three liters of water to produce one liter of bottled water. The truth is it takes 1.3 gallons of water to make one gallon of finished product. For perspective, beer takes six gallons of water to create one gallon of beer.

We live in an on-the-go culture; since most of what America-drinks comes in bottles—including juice, soda and sport drinks—bottled water is a much healthier alternative. With such huge health issues like diabetes and obesity, encouraging people to drink more water in general is a good idea. If people are at the C-Store, they should be able to choose water.

Some environmental groups state that "less than one" person at the FDA regulates the bottled water industry. This suggests that the bottled water industry has no oversight. In reality, the bottled water industry comes under significant federal, state and local regulation, oversight, and permit review. Water companies must report to the Department of Health & Human Services, Department of Environmental Protection, Maine Geological Survey municipalities and many more.

Poland Springs has also been at-

Poland Springs has also been attacked for its impact in Maine. Poland Springs is an icon in Maine and has been so for more than 160 years. They have spring sources in eight towns with three bottling plants across Maine. Those towns are proud of their association with Poland Springs because the company protects the local water resource and respects local control of it. There are a lot of rumors online about places like

With such huge health issues like diabetes and obesity, encouraging people to drink more water in general is a good idea.

If people are at the C-Store, they should be able to choose water.

Fryeburg, but we should all learn to do our research before passing those rumors along as fact. Poland Springs has invested in Maine in good and bad economic times. As mentioned earlier, they employ 800 Maine residents with good job benefits and have invested almost half a billion dollars of capital in Maine since 1992. They pay \$40 million annually in payroll and \$65 million to Maine vendors.

Poland Springs is known for its commitment to the environment. Its half-liter bottle uses 30 percent less plastic and is the lightest bottle ever produced. All new construction has been built to green or LEED certification. They have the largest biodiesel fuel truck fleet in Maine; this will reduce their greenhouse gas emissions by 20 percent, or more than 21 tons per year.

Fiji Water has also been accused of buying carbon credits to offset the carbon emissions. In reality, Fiji

Water has partnered with Conservation International to become the first carbon-negative product in the beverage industry and has saved the largest rainforest in Fiji. They are also reducing the amount of packaging in their products and leading the charge to expand recycling programs and incentives. Anti-bottled water activists, who are using scare tactics to spread misinformation about water resource, have unfairly targeted the bottled water industry.

I do respect their interest in our environment but encourage the Bowdoin community to understand the value of the bottled water industry. In order to have an educated opinion, I ask that everyone receive the proper facts before making their decisions. I personally would not like to see this campus deprived of bottled water.

OPINION

BOWDOIN ORIENT

Giving thanks

t is easy to feel gloomy as we approach the end of the semester—the days are becoming darker, school work is getting more difficult and the economy is in a downward spiral. However, despite all that, we have much to be thankful for. As the temperature drops, we all have warm dorm rooms to go home to every night. Many of us will take a break from classes next week to spend time with loved ones. And, every day, we are treated to some of the best college food in the country, clearly evidenced by last night's spectacular Thanksgiving feast.

As we left the dining hall yesterday, though, we noticed something familiar-countless trays in the carousel with piles of leftover food. Though it's easy on Thanksgiving to be tempted by all the delicious options, food waste is something we've observed on a regular basis: half-eaten burgers, unfinished salads, even whole muffins and bagels.

This week, EcoReps for Sustainable Bowdoin conducted a food waste audit at Thorne, and they found that those who participated threw away almost 40 pounds of food. Though this number is relatively low, food waste is an ongoing problem on our campus.

For those of us on meal plans, plentiful food can be taken for granted. As we return to the serving line for seconds and thirds, it's easy to forget that there are thousands of people around the state that have to rely on others' good will for their firsts. According to a recent study by the Kennebec Journal, Maine has the highest level of household-level food insecurity in New England, at about 3.5 percent—and the problem is getting worse. Between 2002 and 2005, according to the same study, the number of food stamps issued to Maine families jumped by almost 50 percent.

This isn't just a problem in the state's poorest counties up north and Downeast-it affects Brunswick as well. The Mid Coast Hunger Prevention Program-where Bowdoin sends some of its leftover food-serves well over one hundred lunches each day. And with the souring economy, those numbers are likely to grow in the near future. While cleaning your plate may not directly solve the problem of hunger, it's a good way for us to show that we are truly thankful for our nourishment on a daily basis.

Finally, if you wish, go beyond symbolism. Educate yourself about hunger in Maine. Contact the McKeen Center for the Common Good and arrange to volunteer at the Brunswick Soup Kitchen. Perhaps the only thing better than being truly thankful is to be thanked by someone else.

WEEKLY CALENDAR

NOVEMBER 21 - NOVEMBER 26

FRIDAY

CAMPUS CONVERSATION

"Balancing Academics and Extracurriculars"

Students, faculty and staff will discuss the impact of extracurricular activities on student and academic life in this conversation sponsored by BSG. Lunch will be served and is free for faculty and staff attendees (student board will transfer).

Daggett Lounge, Thorne Hall. 12:30 p.m.

PERFORMANCE

Sukalis

This all-female drum group will perform Penobscot and Wabanaki music. The event is sponsored by the Native American Student Association (NASA) in commemoration of American Indian Heritage Month. Main Lounge, Moulton Union. 1:30 p.m.

RECITAL

Piano Students of Joyce Moulton

This recital will feature the music of Schubert, Strauss, Mozart, Chopin and others. Tillotson Room, Gibson Hall. 4 p.m.

PERFORMANCE

Festival of New Plays

Students of Theater 305 will perform several plays that they have written.

Wish Theater, Memorial Hall. 7 p.m.

FILM

Sixth Annual Maine Telemark Film Festival

This festival, sponsored by the Bowdoin Outing Club and New England Telemark, will feature the National Amateur Telemark Film Competition. Refreshments and ski-related merchandise will be available for sale.

Kresge Auditorium, Visual Arts Center. 7 p.m.

FILM

"The Doe Boy"

This film tells the story of a young Cherokee Nation tribe member suffering from hemophilia. The Native American Student Association (NASA) and the Bowdoin Film Society will sponsor the screening of this award-winning movie.

Smith Auditorium, Sills Hall. 7 p.m.

CONCERT

Ron Barron

Barron, principal trombonist of the Boston Symphony Orchestra, will perform a program of American music with pianist Bridget Convey.

Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

CONCERT

Racer-X

This classic rock cover band, which features Assistant Professor of English Aaron Kitch and Assistant Professor of Music Vin Shende, will perform.

Morrell Lounge, Smith Union. 9 p.m.

WAT SERITRAKUL FOR THE BOWDOIN ORIENT

HOLIDAY REVELRY: Students serve themselves Thursday evening during the Dining Service's Thanksgiving Dinner, a perennial culinary favorite on campus.

SATURDAY

CONCED

"Landscapes and Moonlight"

This concert will focus on human perceptions of nature's moods through the performance of music from Spain, America and

Kanbar Auditorium, Studzinski Recital Hall. 3 p.m.

FILM

"Touch Of Evil"

This 1958 black-and-white movie stars Charlton Heston and Orson Welles in one of the last examples of classic film noir. The film, presented by the Bowdoin Film Society, is loosely based on Whit Masterson's novel, "The Badge of Evil." Smith Auditorium, Sills Hall. 7 p.m.

CONCER

Stormin' Norman and Suzy

This band, dubbed "The best bar act in Cambridge" by The Boston Globe, features singer Suzy Williams.

Kanbar Auditorium, Studzinski Recital Hall. 8 p.m.

BABY, IT'S COLD OUTSIDE: The trees surrounding Massachusetts Hall are bare as wintery temperatures arrive.

SUNDAY

CONCERT

"Friends-Part 2"

The Bowdoin College Concert Band will welcome soloist and Boston Symphony Orchestra Principal Trombonist Ron Barron in a concert that will feature the music of Arthur Pryor. Kanbar Auditorium, Studzinski Recital Hall. 2 p.m.

TRADITIONAL MEAL

Passamaguoddy Dinner

The Native American Student Association will hold its second annual Passamaguody Dinner.

Multicultural Center. 7 p.m.

MONDAY

DISCUSSION

A Forum On The European Union

Consuls General from France, Germany, Spain and Greece will talk about the future of the European Union in a forum moderated by Assistant Professor of Government Laura Henry. Main Lounge, Moulton Union. 4 p.m.

TUESDAY

REMINDE

Classes End for Break

Courses will resume Monday, December 1 at 8 a.m.

WEDNESDAY

DINING SERVICE REMINDER

Regular board plans end after lunch on Wednesday. Students may purchase a discounted Thanksgiving Break meal plan for \$34.55. Otherwise, brunch will be available Friday through Sunday for \$10 per meal and dinner will be available for \$11.50 per meal. All dining halls are closed for the holiday on Thursday.

BRUNSWICK, MAINE

THE NATION'S OLDEST CONTINUOUSLY PUBLISHED COLLEGE WEEKLY

DECEMBER 5, 2008

Requirements inconsistent, some notice

MARY HELEN MILLER

With Phase II of spring course registration ending Thursday, students have finalized their schedules for next semester. However, some students have expressed confusion about why certain courses do not count toward the distribution requirements that they might expect them to.

"Economy of Latin America does not fulfill my [International Perspectives requirement]," said Kate Ransohoff'11. "I do have a problem with that."

Because the system of distribution requirements was revamped in 2006, there are currently two systems in place at the College. The Class of 2009 is the last class subject to the older system, which designates every single course as counting toward at least one of four distribution requirements. In the newer system, professors may decide to nominate their courses to count toward any of five distribution requirements.

Some departments have few or no courses that count toward the newer system of distribution requirements. For example, for the spring semester, only one of 29 courses offered in the government department and only one of 11 courses offered in anthropology

Please see REQUIREMENTS, page 2

EARLY BIRDS

Approximately 25 students spent Monday night in Moulton Union, in preparation for Phase II registration on Tuesday morning at 7:30. Two-hundred and fifteen students registered for Phase II classes in the first hour and a half after it opened, according to Registrar Christine Cote.

Students camp out for Phase II classes

ORIENT STAFF

Armed with sleeping bags and course catalogues, about 25 students spent the night in Moulton Union on Monday to get the choice spots in line for Tuesday's 7:30 a.m. Phase II

There were about 25 students who brought blankets and pillows and slept here so they'd be first in line

for Phase II," said Registrar Christine

According to Alex Jeanty '11, some students were there well before mid-

night on Monday.

"Some kids showered and got ready and went over there at 10 p.m."

Tanu Kumar, a first year trying to enroll in an English class and a gov-ernment class, said that she decided to sleep over after hearing that a

group of students were already lined up for the morning.

"What my roommate said was that [she] wouldn't go normally but the problem is that if some people sleep there, then people think that every-one's sleeping there, and everyone

While waiting for the 7:30 a.m. start of registration, students mostly

ECONOMY

Mills forms committee on finances

President Barry Mills announced on Monday a new committee that will look into the College's finances and make cost-cutting recommendations for next year's operating budget.

The announcement, first made by Mills at Monday's faculty meeting, was sent via e-mail on Tuesday after noon to all students, employees and

Trustees of the College.
"I have established a committee of faculty, students, and staff to work with me and the other senior officers to consider our financial situation over the next few years," Mills wrote in the e-mail.

The committee, which Mills called the "Blue Tarp Committee" at the faculty meeting, plans to meet at least once before Winter Break, according to committee member and Career Planning Center (CPC) Administrative Assistant Laurie Sweetman. The committee plans to work through early February, when Mills presents next year's preliminary budget to the Board of Trustees.

With an endowment on the decline and a national economic crisis that shows no signs of abating, the

Successfully defending its title in double overtime, the Bowdoin Field Hockey Team became the fourth team in DIII history to win back-to-back national championships. The Polar Bears collided with Ursinus College on November 22 and then stepped up against Tufts University on November 23 on their path to victory.

The Polar Bears' opponent in the

NCAA championship game was a fa-miliar one, facing Tufts for the third time this season.

The Jumbos came out strong and put Bowdoin down a goal just 1:13 into the game when Tamara Brown tipped in a shot from Margi Scholtes '10.

The Polar Bears answered the Tufts challenge immediately when Madeleine McQueeney '09 stuffed in a re-bound in front of the net-at 2:38.

Shavonne Lord '10 added to Bowdoin's momentum eight min-utes later. Kara Kelley '10 blasted a shot toward the goal and Lord slipped the rebound past the Tufts netminder.

The Polar Bears controlled the play for the remainder of the half, but the lumbos came out in the second half with a newfound intensity that put Bowdoin on the defensive.

Emileigh Mercer '09 put up a wall in front of the Bowdoin goal and made six saves in the second half to maintain the Polar Bears' lead.

However, Tufts applied a tremen-dous amount of pressure to the Polar Bears, and Brown again was able to find the back of the cage to tie the game at 49:54 and keep the Jumbos' title dreams alive.

The end of regulation found the score still knotted at two and therefore the game would have to be decided within the dramatics of overtime. The Polar Bears outshot Tufts four to one in the first overtime period and Lindsay McNamara '09 rang the post in the final 14 seconds, but Bowdoin was unab past Marianna Zak '12.

EDITORIAL: Distribution requirements

CAMPUS OUESTION, Moulton or Thorne?

FINANCES CONTINUED FROM PAGE 1

College will almost certainly have to reduce next year's operating bud-get. This fiscal year's budget stands at

\$140,848,000, including financial aid. Though Mills said that the new committee will look to reduce operating costs at the College, he declined to discuss specifics.

"It really is a bit premature to talk publicly about the various alternatives" the College is looking into, he said.

There are a menu of things that [other colleges] are considering," he added. "You've got hiring freezes, you've got layoffs, you have salary freezes, reductions in operating budgets. All of that's on the table [for Bowdoin]. But no one should infer from the fact that everything is on the table that any one of those things are things we're going to do."

Though the College has an-nounced it will not undertake any new construction projects in the near future, Mills said he was hesitant to implement change that might affect the school in more substantial, long-

"I view [the economic crisis] as a short-term to medium-term prob-lem," he said. "And I'm not eager to think about modifications that would change fundamentally what we do, in ways that aren't reversible. I don't want fundamentally change the place for what I believe is a short to mediumterm problem?

'Blue tarp' committee

The 10-member "Blue Tarp" committee is composed of students, facul-ty, staff and Mills. Students are: President of Bowdoin Student Government (BSG) Sophia Seifert '09, along with Jeremy Bernfeld '09 and Joelinda Coichy '11. Mills said in his e-mail that the students had been selected "in consultation with the leadership of the Bowdoin Student Government.

The four faculty members who will sit on the committee are Associate Professor of Biology and Biochemistry Anne McBride, Associate Professor of English Ann Kibbie, Assistant Professor of English Aaron Kitch and Professor of Anthropology Scott MacEachern. These faculty were chosen from the Committee on Governance and Faculty Affairs (GFA), which Mills said in the e-mail "has responsibility for review of budget matters under the recently adopted faculty governance policy of the College."

Associate Director of Operations in the Dining Service Michele Gaillard and Sweetman comprise the staff on the committee, who were recommended, according to Mills' e-mail, by the Bowdoin Administrative Staff (BAS) and the Support Staff Advocacy Committee (SSAC).

The committee does not include a faculty or staff member with expertise in economics or finance, and none of the students on the committee are economics majors. However, Mills said he thought this would not be problematic.

"It's arithmetic," he said. "This is not high finance, it's a little bit more

"I would suspect that we'll have a number of open meetings around campus...l believe that with the right kind of conversation people will come to a consensus about what's the right thing to do."

BARRY MILLS PRESIDENT OF THE COLLEGE

complicated than balancing a checkbook... I think people who are more accustomed to playing with numbers and thinking about budgets may feel a little bit more at ease, but this is a learning institution too, so it's a great learning moment for the people on the committee."

"I'm sure the students will catch on real quick," Mills added. "And the faculty and staff who have signed up to do this are really serious people who I'm sure will delve into this.

Mills also wrote in the campuswide e-mail that the committee be assisted on these matters by Senior Vice President for Finance and Administration & Treasurer Katy Longley, Controller Matt Orlando, Director of Finance and Campus Services Del Wilson, and the senior staff of the

Mills said he expects the Bowdoin community to also participate in the

'I would suspect that we'll have a number of open meetings around campus," he said. "[This committee] will reach out and reach out and reach out, and hopefully we'll build a consensus. I believe that with the right kind of conversation people will come to a consensus about what's the right thing to do," Mills said.

The [economic] issues are too big for someone to decree the answer," he added. "We're really going to have to have a shared sense of future."

Several other NESCAC schools have established committees that serve a similar function to the one Mills proposed this week. Since 2003, Bates has had a Budget and Finance Advisory Committee, consisting of three students, four faculty members, four staff members, the President of Bates, the Dean of Faculty and the Treasurer.

Tufts also has a 20-member Committee on Budget and Univer-sity Priorities, which is composed of six students, four of whom are undergraduates. According to the Tufts Web site, the committee, among other things, "review[s] and make[s] budgetary recommenda-tions on proposals for new pro-grams and for reductions in existing programs.

Connecticut College also has a Planning and Budget Committee. Comprised of senior administrators, faculty members and students, this committee prepares a budget that goes for approval directly to the president of the school and its board of trustees.

REOUIREMENTS CONTINUED FROM PAGE 1

will qualify. No courses in either the Italian or Japanese departments count toward a distribution requirement.

Associate Professor of Sociology and Anthropology and department chair Pamela Ballinger said she could not give "a very clear answer at the moment" as to why none of her courses qualify for distribution requirements.
"We [the department] are actually

in the process of revisiting distribution requirements in our curriculum," she wrote in an e-mail to the Orient.

Certain courses, such as Physics 093, do not fulfill any distribution requirements "mostly because the course is still in development... It's really hard to go through the approval process in the abstract," said Associate Professor of Physics and Astronomy Madeleine Msall, who is teaching the course for the first time this semester.

Associate Professor of Romance Languages and department chair Char-lotte Daniels said that certain courses in her department had been approved for a distribution requirement but then subsequently altered. These courses automatically lost their qualification after the changes were made, even though they would have continued to meet the requirements. They have not been nominated for reconsideration.

'Up to the professors'

Under the new system, it is solely the professors' responsibility, rather than that of the department or any committee, to steer a course through the approval process. There is currently no requirem that professors put their courses up for approval. For some professors, the process can be an unwanted burden.

"The teacher has to do all the paper-work," Ransohoff said. "They have to... argue their case, and I don't know why a teacher would want to do that."

In an e-mail sent from Italy, Associate Professor of Romance Languages Arielle Saiber wrote, "Getting courses approved for the distribution requirements is more complicated than one would expect."

"Ultimately, it's up to the profes as to whether or not they want their course to count as a distribution requirement," said Associate Dean for

arch: Spring 200 ther | Course Number | Coy & Time | Departments and/or Designations

COURTESY OF BOWDOIN FOU

GRIN AND BEAR IT: In order for a class to qualify for a distribution requirement, a professor must present his or her curriculum to a committee for evaluation.

Curriculum Steve Cornish.

Cornish said that whenever a new course is proposed, the New Course Subcommittee considers if it should count toward a distribution requirement, whether or not the professo has nominated it to. In cases where the committee believes a course that has not een nominated would be a good candidate for counting toward a distribution requirement, they will encourage the professor to nominate the course.

To offer a course up for consideration to count toward a distribution requirement, the professor must respond to two or three questions about the nature of the course, according to Cornish.

"It's a quite simple process, really," said Cornish.

With no outside pressure to get their courses approved, however, there is sometimes little impetus for professors to embark on the process Msall called somewhat lengthy."

"If you're going to have a course that's a 'cool and fun intro-level course' but don't want to deal with all of those 'I hate science' people, then you might decide not to meet the distribution requirement," said Msall.

Msall said that she did not think it was common for professors to abstain from nominating a course in order to avoid filling a class with uninterested students, but noted, "There is definitely a sense that there are students for whom having a distribution requirement makes them recalcitrant."

Professor of Sociology and Senior Faculty Fellow in the McKeen Center for the Common Good Craig McEwen vas the dean for academic affairs dur ing the development of the new system. He said that professors may choose to nominate a course either to "help contribute to the College" or to encourage students to enroll in a course. The second reason, he said, is "also potentially a disincentive," because it is not attractive to teach a course that might be filled with students who are there simply to fulfill a requirement.
"I think students tend to think of

distribution requirements imposing only on them," McEwen said.

However, McEwen explained that the faculty has "imposed on ourselves a collective obligation to deliver" enough courses at the College that count ward distribution requirements.

Students have expressed discontent with the current system, pointing out that the limited number of courses qualifying for distribution requirements can be problematic.

"Overall, I feel that the system forces you into choosing classes you're not really interested in," said Christian Ebersol '11.

On the other hand, students like Nandini Vijayakumar '10 are pleased with the current system.
"I feel that [distribution require-

ments are] actually kind of open-end-ed," she said. "Exploring Social Differences can cover so many topics."

McEwen noted that the more choic-

es there are for students within the system, the more interested students will be in the courses they take.

The system, which is in its third year, is due for evaluation, according to Cor-

"We'll be looking at this very much because we're at the point where we need to assess the new distribution requirements," he said.

PHASE II

studied or slept.

"I tried to sleep," Kumar added. "Some people were feverishly rifling through the course book trying to figure out what they wanted to do

Some students, however, tried to keep the atmosphere more entertaining.
"I brought a board game," said Tay-

lor Vozniak '12. "Me and my friends played 'Risk,' until one my friends stormed away in disgust."

Students who did not spend the night in Moulton but attended Phase II still had an early wake-up call.

Sophomore Ben Johnson said that when he arrived at Moulton at 6:15 a.m., the line had already spiraled into the Maine Lounge, and continued to get longer as he waited.

"I was actually auctioning off my spot and I got some girl up to 75 bucks," he said. "If I had sold my spot, I probably would have felt better about being there."

Students who slept over said that because they were at the beginning of the line, most of them left Phase II just shortly after it began.

"I was out by 7:50," said Kumar. "I

went back to my room, and definitely slept through my 11:30 class."

According to Cote, Phase II becomes significantly less chaotic a few hours after it begins.

"It seems to me that somehow a mentality or a culture has developed that makes students believe that they have to be here at the crack of dawn to get the courses they want," she "For the vast majority of cases, this simply isn't the case. Once students walked in the door, most were amazed how quickly we were able to get them out of the door."

Of the 600 to 700 hundred students that register for classes during Phase II. Cote said that more than two hundred of those students were in line on Monday morning.

"We moved 215 students through in the first hour and a half on Tuesday morning. That's when we reached the end of the line," she said. "By the time we reached the last 20 or 30 students, I was talking with students who said they had arrived around 8:30 [a.m.]. At the beginning of the line, of course, were those that spent the night and then those who arrived at 5:00 a.m. and after."

Students had different impressions of their night-long vigil. According to leanty, the experience of sleeping over was not as fun or amusing as it might sound.

"I would compare it to a night writ-ing a paper you're clueless about— you just sit there wondering what's

your next move," he said. Vozniak said that while some parts of the night were enjoyable, other

"When we were camped out there it was more of a fun atmosphere," he said. "When people start arriving at 6:30 or 7 and you start to see the line grow, there's more of a stressed-out atmosphere and people are more discontent."

However, Vozniak, who was ab 15th in line, said it was ultimately un-necessary to spend the night.

"If I'd gotten up at 6:30 and gone then instead, it would have been the same result," he said.

While students admit that they went to extreme measures, for some, one sleepless night seemed a bet-ter option than being locked out of

"It's embarrassing that I slept in Moulton Union to get the classes I want, but if I pay the tuition to go here I don't want to take classes that I don't necessarily want to take just be-cause they're leftover," said Kumar.

BSG debates first-year seminar selection

MARGOT D. MILLER, THE BOWDOIN ORIEN

WRAPPING UP: BSG President Sophia Seifert'09 speaks with At-Large Representative Kristen Gunther'09 and Class of 2011 Representive Greg Tabak following Wednesday night's meeting in Daggett Lounge.

BY ALEX PORTER ORIENT STAFF

Bowdoin Student Government (BSG) President Sophia Seifert '09 offered an accurate description of BSG's meeting on Wednesday evening when she announced that members would "have a pretty light meeting." When she called BSG to order, Seifert suggested that someone "call a friend," a reference to the lack of initial attendance which left the body without a quorum. More representatives soon arrived, allowing the Government to get to work.

Most of Wednesday's debate centered on a proposal recommending that the Curric lum Implementation Committee (CIC) allow first-year students, beginning with the Class of 2013, to rank their first-year seminar choices. This proposal was in response to the seminar selection process instituted this year, which do not allow prioritization. Discussion began with several anecdotes from BSG representatives regarding their personal experiences with first-year

seminars, but quickly turned the conversation back toward specific elements of the pending measure.

Not all representatives agreed that returning to the previous system would lead to greater satisfaction among students with the seminars that they receive. Indeed, Representative-at-Large Rashá Harvey 12 stated his belief that "the system we have now is the lesser of two evils." Representatives brought up the idea of a hybrid system allowing students to either rank their seminar choices or continue with the current manner of seminar selection. This measure soon died due to a belief that it would not be technologically feasible.

Referring to the regular course selection process, Class of 2011 Representative Greg Tabak summed up the general attitude in support of prioritization

"This is the way everything else works—why shouldn't first-year seminars work the same way?" he asked.

Adding Tabak's sentiments in an amendment to the original bill, BSG passed the measure with three mem bers opposed and two abstentions.

BSG moved on three other resolutions Wednesday in its penultimate meeting of the fall semester. Following through on a promise it made earlier this fall to pay for a massage to a randomly selected Health Center survey respondent, the Government approved \$70 for this service. Members will choose the massage recipi-ent later this week.

Representatives also approved funding for more discounted movie tickets. Vice President for Facilities Mike Dooley '09 announced a plan to limit ticket purchases to two per student at any one time. He hopes that this measure will regulate ticket purchases for larger groups and suggests that clubs seeking to purchase large numbers of tickets "request money through the SAFC so that other students can have tickets." Quickly put to a vote, this funding proposal passed unanimously.

Due to previous debate on most is sues presented Wednesday, BSG adjourned its meeting after one hour. The body will meet for the final time this ster next Wednesday at 8:30 p.m.

FEATURES

Meredith Segal '08 helps Obama clinch win in Philly

BY CAROLYN WILLIAMS ORIENT STAFF

For more than two years, Bowdoin alumna Meredith Segal '08 has worked alongside President-elect Barack Obama to inspire millions of Americans to believe that yes, they can.

Segal has been involved in Obama's campaign from the beginning, serving as one of the youngest onal co-chairs of Obama For America and, after starting the Students for Barack Obama Facebook group, directing the largest grassroots movement of the campaign involving college students. After Obama clinched the Democratic party nomination last June, Segal, after graduating from Bowdoin in May, took yet another active position in the campaign: She became the office manager of the Obama campaign in Philadelphia.

"I knew I wanted to be in a battleground state and, growing up in a small town in Maine, I wanted to organize in an urban area, so Philadelphia seemed like a natural choice," Segal said. "It's the only one of the ten major cities in the country that's in a

battleground state."
Although Segal is only 22, the Obama mpaign was ripe with opportunities

for her and other young supporters.
"One of the things that's really fun about campaigns is that even if, as a young person, you may not have a whole lot of experience, if you devote yourself heart and soul to them, there will be opportunities open to you," she said.

Segal said that in some ways,

campaigns are especially suited to younger workers.

"You're working at least 100 hours a week, from 9 a.m. to 1 or 2 in the morning. It's not the most practical lifestyle if you have a family," Segal said. "And it's not a job that anyone takes to get rich.

I think that most people have the attitude that if you can break even at the end of the campaign it hasn't been too bad financially."

Segal was primarily in charge of organizing the more than 100 volun-teers who filtered through the several campaign offices in Philadelphia each day. Segal said organizing volunteers gave her a new outlook. "Up until that point, I'd worked

primarily with students and young people," she said. "It was an incredible change to work with people of all ages and backgrounds." Segal worked with a variety

of Pennsylvanians, ranging from wealthy city attorneys who spent a few hours each week volunteering, to homeless people who volunteering to homeless people who volunteered all day several times a week. In ad-dition, she organized Obama sup-porters from other countries. People came from nations such as England, Australia, Belgium and Denmark, according to Segal.

was interesting and exciting to work with such a broad array of people," Segal said. "There are not many efforts in life that bring to-gether such a coalition of people."

During the final days of the cam-

paign, so many people volunteered that the number was "too high for any of us to count," she added. Holding 'a position of author-ity over many older volunteers was

"I've always been someone who's an organizer and active in making an event happen... For one time it was nice to be a part of the moment and

not worry about anything."

MEREDITH SEGAL '08

"interesting," according to Segal, "but it was a culture of mutual respect. It was really a true team."

In addition to working with volun-

teers, Segal was responsible for most of the logistics of running a campaign in a major city, which involved paying close attention to details.

For example, the week before the election, Segal spent long nights putting door hangers on hundreds of thousands of doors in Philadelphia telling people in each district where to vote

"Throughout the past four months we had to determine who was registered to vote and who were supporters of Obama. Every registered voter who we had reason to believe would support Barack Obama got a door hanger," she said. 'It involved a lot of math.'

At one point during the summer, Segal had the opportunity to hone her crowd control skills at an Obama event in western Philadelphia. Obama had planned to appear at four different events in four different neighborhoods.

We had prepared all night, and we finished just in time for the event," she said. "I stopped by the west Philly event to drop some things off and what I saw was the most massive sea of incredibly excited, perhaps not the most controlled, group of folks."

Segal spent the next few hours

standing on a table with a megaphone directing the "massive seas of people we were not expecting," she said. "I was basically the crowd control."

"There were a lot of fun, challenging moments like that," she added.

Segal's most memorable day of the campaign was the last day of voter registration in Philadelphia, October 4.

"At the very end of the day we were driving down streets at 11:45 p.m. with megaphones telling people that it was their last chance to register to vote," she said.

Segal and her co-workers were able to register voters even in the final 15 nutes of the day, and overall, 10,000 ter registrations came through her office on October 15.

One of the biggest challenges for the Obama team in Philadelphia was working to reach its goals within the political framework of the city.

"One of the things that is always a challenge is coming in as an outsider to the community and making sure that there isn't a feeling that we're trying to tell people what to do," Segal said. "Philadelphia is a very demo-cratic city with a well-established order, and we learned to work within that political establishment."

As election day drew nearer, Bowdoin alumni J. Patrick Brown '08, Anna Karass '08, and Hande Ozergin '08 joined Segal in Phila-delphia to volunteer during the final days. In additon, the night before the campaign, 17 college

WINNING BIG: Segal '08 stands with Barack Obama during a speech he gave at George Mason University in February 2008 that Segal helped organize. Segal has been highly involved in the Obama presidential campaign from the beginning and served as office manager for the campaign in Philadelphia.

students from Vermont called Segal's office at 4 a.m. looking for volunteer work.

"Five minutes later we had 17 college students come into the of-fice," she said. "They painted signs and were out on the road early that. morning letting everyone know it was Election Day."

Segal, founder of Students for Barack Obama, enjoyed ringing in Election Day with college students.

"It was nice because in a lot of ways, my heart in this campaign has always been with the students," she said.

Although the campaign was a flurry of 16 to 20-hour days for Segal, November 4 was comparatively calm.

"One of the things that I loved about this campaign was that it's pretty much been the same plan and the same approach from the beginning. By the time Election Day came, it was a matter of watching the plan that we had been busy

enacting," she said.

Invited by a fellow Obama for America co-chair, Segal flew to Chicago and was in the front row at Grant Park on Election Night to hear Obama's acceptance speech.

"I've always been someone who's an organizer and active in making an event happen," she said. "For one time it was nice to be a part of the moment

and not worry about anything."

Segal was amazed and inspired by the reaction to Obama's victory in Grant Park. Shortly after she arrived at the park, she heard a "jumbo cheer" as Obama was announced the president-elect.

"I don't think I've seen as many happy people in one place as I did that night. There were random people hugging each other," she said. "Probably one of the cool-est moments of the campaign was standing there and hearing them announce the president-elect's family. I smiled and thought that it's all

been worth it. This is what it's all about," she said.

"Overall as a nation, I don't think there's been any event, at least in my lifetime, that's made so many people so happy," she added.

Segal, who has met Obama several times, has no doubts that he will live up to the country's expectations.

"He starts with a deep under-

standing of the challenges that are confronting Americans, and he has the compassion to care about those challenges. He's deeply committed to making sure that the lives of the people he's serving will improve," said. "He complements that with the intelligence and the ability to bring people together to make that change happen."

COLUMNIST

Out there in the world, the economic crisis looms bleaker every day. Both Wall Street and Maine Street are feeling the effects of our Titanic-esque economy. Even Bowdoin is beginning to bend under the pressure: our foundation of a fitness center is suddenly short on funds and athletic teams can't have overnight stays anymore. There's one thing that hasn't changed, however: condoms are still free.

During times of economic downturn or societal stress, sex can be something that people use as an inexpensive alternative to going to the movies or taking a road trip. A recent poll published in BBC News showed that 45 percent of Brits rated sex above both window shopping and gossiping as their favorite way to pass the time during the current economic crisis. Though I havent found a comparable American study yet, I would bet that the numbers are similar. Though the objective of this poll is slightly murky, it still has some implications for the way we think about sex.

Though American culture is far from being the most sexually liberal, we are still becoming more and more conditioned to sex and sexual images. We see sexually suggestive ads everywhere trying to sell everything from beer to gum to television shows. Most movies can't even hold the attention of a teenage audience without at least a semblance of sex scene (I mean, sparks were flying even in "Wall-E"). Sex is all around us, and now, apparently, it's on its way to becoming America's favorite free pastime.

I am personally all for a more sexually liberated society, but it does make me nervous: I'm not concerned about any loss of innocence, but rather a loss of intimacy.

When sex begins to be treated as something that's marketable or solely for fun, we risk losing one of the best parts of sex. You can read all the guidebooks you want (I would recommend "The Guide to Getting it On") but nothing will compare to a partner who you like and who cares about you. Intimacy doesn't necessarily mean a relationship, but rather a real connection with your partner. Having lots of sex doesn't equate to having good sex, and sleeping with someone who you're not into or who isn't into you can

be a pretty lackluster experience. Having sex also doesn't create intimacy. Sleeping with someone can make you more attached to them, but it won't necessarily make you like them more. And you can be incredibly intimate with someone without ever sleeping with them.

This doesn't mean that sex with someone random or someone who you're not that into doesn't have its place. It can be really frustrating to be single, and if you can't find Mr. or Ms. Right, sometimes your best move is to make do with Mr. or Ms. Right Now. Constantly settling for so-so experiences, however, can make it difficult to remember what it's like when things really click with someone. We should be allowed to sleep with or not sleep with whomever we want whenever we want—but we should also be allowed to ask for more than just sex. We should be allowed to ask for great sex, which comes with being seriously intimate with a partner.

intimate with a partner.

So as we go through college seeking ways to entertain ourselves, I hope that Bowdoin students keep in mind that sex is even more fun with someone you really care about. Physical connections are only bolstered by emotional connections. Have all the sexual experiences that you want, but when you think about really, really excellent sex, don't forsake the intimacy of it. It's hard to take intimacy into leration when we're busy watching hot people fall into bed over bottles of er Lime on TV, but in real life it's an important part of good sex. And if sex is on its way to becoming America's new pastime, I hope that we can all think of it with the passion with which true Red Sox fans hate the Yankees. Put that much feeling into a relationship, and it's bound to be earth-shattering.

GARDENER CONTINUED FROM PAGE 1

According to Olds, the gardens are often associated solely with Zen Buddhism, but they are not inherently religiously affiliated.

"It's important to take these gardens for what they are—a continuous process that has elements that grow and die and move and change," said Olds. "To the extent that they're always changing, they are Zen-like, but people who think the gardens are all sorts of symbols and mystical Zen stuff are imagining it."

Olds decided to focus the garden portion of his class on Japanese gardens and traveled back and forth to Japan five times, taking pictures of some 35 gardens. He decided the images could be used to bring the Japanese garden experience closer to home for students and connoisseurs.

"There's a real advantage to an Internet site, because you can multiply the images forever," said Olds. "You can't understand what a garden is like on the basis of two photographs, so the site really gives people the opportunity to 'walk through the gardens,' so to speak."

According to the Web site, its purpose is "to provide the visitor with an opportunity to visit each garden, to move through or around it, to experience it through the medium of high-quality color images, and to learn something of its history." The site features a total of 29 gardens with multiple images of each. A subsequent garden map allows users to click to be transported to an image of that place in the sarden.

To create and maintain the site,

Olds has worked closely with Bowdoin's Information Technology Center, especially with Associate Director of Communications for Production and Multimedia Kevin Travers, who Olds said is responsible for the "really technical stuff" on the site. Olds said he updates the site about once every two months and hopes to make it more interactive in the future.

"We'd love to make the site more interactive, so that students can make their own gardens," said Olds. "We would present the student with a virtual plot of land and present them with elements like rocks and trees and so forth so that they can place these elements on the plot."

Olds said Bowdoin has its very own Japanese Garden, which was conceived and created by Nate Cormier '95 and is located behind the Asian studies house on College Street.
Olds said Cormier studied in Japan his junior year and fell in love with Japanese gardens. Cormier returned to Bowdoin and built the garden using rocks, trees and bushes from the Bowdoin campus and Olds yard.

"[Cormier] knew so much about garden design that he was able to design it himself and did a very good job," said Olds. "He left Bowdoin and went on to study landscape architecture at Harvard and is now a successful landscape architect on the West Coast."

According to Olds, the school has failed to take care of the garden and allowed it to decay in years past. Recently, however, a group of women from Brunswick have made it their project to restore the garden and have brought it almost back to its original state. Olds said these women are one example of

the many people around the world who are interested in Japanese gardens.

"There is a huge amount of interest in Japanese gardens throughout the world," said Olds. "These groups will frequent my site to learn about the gardens and they have told me that my site is the most complete source on the subject they've found on the Internet today."

Olds said he hopes to return to Japan soon to continue photographing and acquiring material for the site, though he does not have a lot of time now as current Interim Director of the Art Museum.

"When I have more time, I'll go back," he said. "I'd love to make it back in the spring when the cherry trees are blooming, or this time next year, at the height of Japan's color season."

Olds originally retired from Bowdoin five years ago, after teaching art history 22 years at the College.

Layering: The key to comfort and sophistication this winter

KIDNAPPED BY STLYE

BY DAVID YEE COLLIMNIST

For some reason, the weather has been pretty good since returning from break. Having come back to a snowy, watery, slushy campus in the past, I expect the worst of Maine weather. Recently, however, I have been pleasantly surprised by temperatures reaching well into the 40s. So much for Bowdoir the Terrible, Horrible, No Good, Very Bad Season. But the weather forecast seems to think that this shift toward uncomfortable will occur sometime in the next few days, and what that foreeans besides the crippling realization that warmth will not come back until May (and the ensuing Seasonal Affective Disorder), is that wardrobes will shift from light summer/autumn clothes to heavier winter clothing.

For some great reason, I'm sure, evolution has left human beings with coldprotection somewhat akin to that of a Sphinx cat (look them up and tell me this is not a disadvantaged breed). For this reason, we must turn toward donning clothing that keeps the warmth on (an option, I might add, that Sphinx cats lack). The topic of this week's column is layering. The short of it? You should do it. That's the lesson. You can stop reading if you want

But for those still reading, I will now go from layer to layer, moving from innermost to outermost, considering as many possibilities as I can think of and offering the best advice I can give-that is to say, probably not that great, but I would get an "A" for effort. This is the "practical" section of the columnmore list than opinion. The "style" section is to follow. So here we go, with the topics bolded for proper emphasis:

Underwear: Not going to say much on this topic, but I'll note that, at least for me, keeping things close seems to

make things less drafty... Take that as

Socks: A nice pair of warm socks can go a long way toward keeping your feet unfrozen in the winter.

Long Underwear: Something I

didn't really consider a necessity before coming to Bowdoin. Now I know better. It's uncomfortable, but sometimes necessary. If you don't have much (or any) long underwear, paja mas make for a pretty good stand-in underneath pants

Undershirts (and the like): Short, long, thermal, whatever an undershirt is indispensable to winter warmth.

Shirts: I use this category to define any shirt more presentable than undershirts, Broad, I know.

Vests: I put this layer here because it can either be the final layer before an overcoat (a thinner dress vest) or it can be the final layer of warmth (down vest).

Sweaters/Sweatshirts: Sweaters are my favorite aspect of cold-weather wear. In fact, many who know me will say that I have a sweater "problem." Sweaters of the zip-up or button-up varieties can fill-in for jackets. in some cases. Bowdoin students like sweatshirts, too.

Blazers/Sport Coats/Pea Coats/ Wool Coats: Not all the same, but can be used for the same purpose: stylish warmth. Usually, a pea coat will be the outermost layer, while with the other two can be covered yet again.

Overcoats/Ski Jackets/Down Jackets/etc.: Usually the final layer of protection. Overcoats are dressier while ski jackets/down jackets are less so.

Gloves/Scarf/Hat: Don't forget these at home! The hands are the first to go at Bowdoin.

The greatest part about winter is the ability to combine so many different types of clothing into a single outfit. Counting each of these items as one category, and using my withering knowledge of mathematics, my online permutation calculator tells me that there should be around 200 combina-tions of clothing present here, not ac-counting for the fact that a person may own (and probably does own) multiple iterations of each category of item. We all know the common combinations in and around Bowdoin: sweaters and button up shirts beneath pea coats, sweatshirts, ski jackets, etc.

To me, the outfits that display the most care intentionally highlight the shirts are warm, they flatten the outfit, covering up all the layers beneath. A zip-up sweatshirt may reveal one more layer below, allowing the chance for something beneath, perhaps a kitschy printed tee. Using a V-neck undershirt beneath a button up shirt or sweater keeps it hidden, and though finding a matching crew-neck undershirt requires more effort, the sophisticated

to find an outfit that highlights each layer worn: it's a challenge.

But it's that challenge—the challenge of clothing—that separates us from even our closest comrade in winter suffering, the Sphinx cat. When all else fails, perhaps we can take a cue from our fellow winter victims: cuddle up close to the warmth of someone else, and wait for spring to return again.

Invest in You Invest Now

Substantial scholarships, up to full-tuition, are now being awarded to top applicants for a one-year Master's Program in Finance beginning Fall 2009.

- Acquire the expertise you will need to succeed in the market place of the future.
- Leverage a dedicated career specialist and extensive alumni network in entering the market.
- Build your leadership potential in the co-curricular program and meet with distinguished speakers.

ARTS & ENTERTAINMENT

Dance groups collaborate for 'wildly popular' show

The Department of Theater and Dance will present its biggest event of the year, the 38th annual "December Dance Concert," this weekend.

The performance will feature both class projects and extracurricular dance groups. Five dance classes and eight student-run groups will be performing.

"The performance is wildly popular

every year. Many students say it's their favorite event all year," Professor of Dance June Vail said.

Among the courses represented are the repertory classes Dance 112, 212 and 312 taught by Senior Lecturers in Dance Performance Paul Sarvis and Gwyneth Jones.

The routine performed by the introductory repertory class of Dance 112, "Morphology of a Fairy Tale," will feature numbers that include dances to the beat of drums, a "Sugar Plum Fairy's remix and Maria Muldaur's "I'm a Woman."

Dance 212's intermediate repertory class members will be dancing the "Java Jive" to music from the Bremer Kauffee haus Orchester and students in the advanced 312 class will be doing a routine called "On the Run."

The other two classes represented in the show are courses that combine the study of dance history with studio work—"Cultural Choreographies" and "Rebel Dancers, Dancing Revolutions"-both taught by Vail.

Students in "Cultural Choreogra phies" will peform a two-part suite titled "Two for Twenty-Six," which consists of

MARGOT D. MILLER, THE BOWDOIN ORIEN

TWINKLE TOES: Members of student-run troupe Arabesque dance to music from the "Amelie" soundtrack in their performance titled "L'hiver" on Thursday,

"Vlacko" and "Cimpoi," traditional Bulgarian and Romanian dances, respectively. The group will be accompanied by Beth Borgerhoff, a local musician based in Mt. Vernon, Maine.

In the style of 1930s choreography, "Rebel Dancers, Dancing Revolutions" will perform "Strike/Trio" inspired by Pablo Neruda's 1946 poem "La Huelga (The Strike)." The routine will be danced to a piece by the late American II," which includes parts for violin, piano and percussion.

Among the various clubs to perform are the Bollywood film group Anokha, the ballet troupe Arabesque, the hip-hop lyrical crew EleMental, the ethnic dance team Intersections, hip-hop and break-dancing club Obvious and the hip-hop and jazz ensemble of VAGUE.

Senior John Howard, leader of Obvious, anticipated opening night with

"I am somewhat anxious, but I'm excited to see how everyone who sees our performance will react to it," he said.

Kelsey MacEachern '10 has chore graphed for Arabesque and VAGUE since the beginning of the semester; she will also perform with the 312 group According to her, nearly all of the groups performing in the concert have been rehearsing since the beginning of the year. Like most of the routines to be performed by dance classes, most of the

clubs' performances have been practiced at least twice a week.

Howard added that all clubs that want to perform in the concert must audition successfully for the Department of Theater and Dance in order to erve a place in the show

Also to perform are the Japanese percussion group, the Taiko Drummers, a group organized by Elizabeth Jones '09 performing "Fancy Footwork" and a duet by Linzee Troubh '09 and Kate Pastorek '10 to the song "Feeling Good"

Troubh will be performing not only with Pastorek but also with Dance 312 and Arabesque.

"I think that all of the pieces, not only those that I'm in, are really strong and show all that Bowdoin has to offer," Troubh said.

According to Vail, the December Dance Concert is an end-of-semester sum of all the work that dance clubs and classes have been doing since over the past few months. Between 80 and 100 incers will showcase their talent in the entirety of the event. The event should last an hour and a half, including time for a brief intermission

While there are usually a few coursebased independent projects performed by the students at the event, Vail said ere would be no routines featured from that category this year...

The dancers will perform tomorrow and Saturday at 8 p.m. in Memorial Hall in Pickard Theater, Tickets are available at the information desk in Smith Union. Although tickets are free, they are mandatory for students, faculty and com-munity members who want to attend.

Hogarth satire complements English class | Bowdoin chorus and jazz bands

BY RACHEL GOLDMAN STAFF WRITER

Are pictures really worth a thousand words? In the Becker Gallery at the Bowdoin College Museum of Art, where professors curate shows in conjunction with their classes to expand on certain issues, the answer is yes. Currently in the Becker Gallery is the currently in the seccer Gaulery is the exhibit "Hogarth's Women Virtue and Vice in Eighteenth Century England," a show curated by Associate Professor of English Ann Kibbie in conjunction with her class, "Women and the 18th Century Novel."

Century Novel"
With the help of Bowdom Andrew
W. Mellon Curatorial Fellow, Diana
Tuite, Kibbie selected prints of the major 18th-century English artist William Hogarth. Hogarth, a painter, printmak er, satirist and social critic, created many series of prints that questioned and explored issues of modern morality.

"In the past, I have used some Hog-arth prints in conjunction with other classes," Kibbie said. "But I've never been able to use him to this extent. In the current exhibit, two complete Hogarth series are on display: "Harlot's Progress" and "Marriage à-la-Mode." There is also a smaller series titled "Times of the Day," as well as individual pieces from larger series including one from "Rake's Progress," and one from "Progress of Cruelty." As in other Becker Rogards and the pieces were se-lected from Bowdoin's own collection. Hogarth's images are particularly useful for Kibbie's class because they focus on similar subject matter. Throughout the

variety of novels by both male and fe male authors that focus on the female character and the development of fe male characters throughout the 18th century. Hogarth's images seamlessly fit into this exploration, most obviously in their portrayal of women. Many of his series are satirical narratives showing scenarios and characters lacking virtue, thus highlighting what virtue should

In all of these narratives, women play a central role, prodding the view and the reader of the 18th-century novel-to wonder why there was such an intense fixation on the female char acter. For Kibbie, this interest lies in the fact that "female characters allow authors to explore certain threats to the self. They are often seen as the vessels of societal virtue, and thus what is at the center of both the novels and the prints are questions regarding the threat to female virtue

Kibbie also wanted her class to see the 18th-century world in detail.
"These beautiful clear prints with

their astonishing detail give us incredible access to the past," she said. "Hogarth had a keen eye for the objects of the 18th-century world. It is not just the people in the prints that are characters here, rather the objects in the prints are just as important."

According to Kibbie, this sort of ac-

cess is very important for students in order to completely understand the

"It's important for students to literally see what the 18th-century world

was full of," Kibbie said, mentioning the snuff boxes and the highly articulated forms of fashion. "This type of visual access really brings the world alive."

Many of these prints could be illustrations of the characters students been reading throughout Kibbie's class. This speaks to the pervasiveness of the questions of female character and the status of women throughout the century. In fact, many of the paperback versions of the novels have Hogarth prints on the

"They are not really a true representation of that particular novel, but rather a moment and an intersection of common themes and questions," Kib-

Using the Becker Gallery has been successful experience, according to

"It gives everyone a different kind of access to the past. We are all really used to accessing the past through photographs, but of course we don't have photographic evidence of the 18thcentury world. This is the way we can access this past, and it's really quite dif-ferent than photography," she said. Kibbie's students echoed Kibbie's

ranous students echoed Kibbie's enthusiasm for the show Junior Daniel Lorberbaum particularly enjoyed the opportunity to visually interact with their period of study.

their period of study.

"As Professor Kibbie explained, many scholars see the origins of the graphic scholars see the origins of the graphic novel in these narrative sequences. I think it's really interesting to view them as archetypal when Hogarth himself probably had no idea of their impact on future art and literature," he said.

to perform diverse repertoire

BY ERIN MCAULIFFE

As the Bowdoin community emerge from its Thanksgiving food coma and the reality of finals sets in, two musical performances provide an opportunity to take a break from the stressful prospect of papers and tests this weeken

The Bowdoin Chorus, directed by Senior Lecturer Anthony Antolini '63, and the Bowdoin Jazz Ensemble and Polar Jazz Big Band, directed by Applied Music Instructor Frank Mauceri, will unleash their holiday spirit at the Studzinski Recital Hall this weekend and next week.

The Bowdoin Chorus, comprised of

idents, faculty and members of the Brunswick community, will perform Bach's "Magnificat in D." The concert cated to Joel Cartwright '06 who passed away last summer.

"Joel was not a member of the chorus but was very active in other music de partment events," Antolini said. "Joel is best remembered as having started the organic gardens that provide produce for the Bowdoin Food Service and offor the Bowdoin Food Service and of-fer students an introduction to organic gardening methods. Gordon Bok's 'Oh I Am Calling' is especially dedicated to Joel as it is an evocation of the Maine landscape that he loved so much" The featured work on the program is J.S. Bach's "Magnificat in D" with solo-ists Christina Astrachan, soprano, Ruth Barnett, ålto, Martin Lescault, tenor, and Peter Allen, bass. The Bowdoin

Chorus will be joined by visiting group the Lincolnaires, from Lincoln Acad-Christmas songs. Later in the show, they will sing with the Bowdoin Chorus accompanied by the Bowdoin Orches tra. The concert will take place tonight and Saturday at 6:45 p.m. at Kanbar Auditorium in Studzinski Recital Hall.

The Bowdoin Jazz Ensemble and the Polar Jazz Big Band will perform on Tuesday at 7:30 p.m. Led by Mauc-eri, the jazz ensembles are made up of small groups of students who focus on improvisation. The groups employ a variety of different styles such as swing. bossa nova and funk.

"These groups perform in concert at the end of each semester," Mauceri said. "In addition, they play occasionally for campus events such as the parents weekend brunch."

The Polar Jazz Big Band wa nally a student organization that has since branched out into the community and now includes many Brunswick

Big band jazz, which was widely popular in the 1930s and 1940s, sail has its place in the Bowdoin and Brunswick music community today. Typically consisting of 12-25 members, instruments usually include trumpets, saxophones, trombones and a percus-

"The group focuses on class big band arrangements leaders such as Ellington, Basie, Kenton and Oliver Nelson,"

Beroiza '09 'deviates' from the norm for Q art opening

True to its name, the new BOSA and Q Magazine-sponsored exhibit "Deviation" highlights sexual difference, using Bowdoin's own students as models.

The opening, featuring photos taken by Alanna Beroiza '09, is in conjunction with O's release of its second magazine.

O co-editors Isa Abney '11 and George Aumoithe '11 noted that the magazine, which also features Beroiza's photos, is the first issue to have artwork inside.

"Alanna had this idea to do a photo shoot about sexuality that deviates from the norm, so besides the photos in the magazine, some of the others we decided to blow up and do an art show as a way to release the second issue of Q and to highlight the very special pictures inside the magazine," id Aumoithe.

According to Beroiza, the photos in the show represent a collabora-tive effort between the magazine, the models and herself. When discussing this semester's issue of O in September, Beroiza found that her interests in photography and sexuality coincided with Q's goal of making the new magazine different from the first

"I had taken Photo I and II in my

MARGOT D. MILLER, THE ROWDOIN ORIENT

QUEER QUESTIONS: Alanna Beroiza '09 examines one of the photographs she took for the latest Q art exhibit, "Deviation," in the LaMarche Gallery.

sophomore year and I ended up doing a final project in Photo II that I playfully called the 'American Crotch Series'-I think it was 12 shots of women's crotches, but not all naked," she said

In addition to previously exploring sexuality through art, Beroiza is also

working on an honors project studying sexuality.

It's just something I'm really interested in-sexuality, but particularly sexual difference, and I find that I really like to explore it in a number of different ways academically and artistically," said Beroiza.

"It just sort of ended up being George and Isa pushing me to make really good photos," she added.

"The photos represent non-norma tive sex," said Abney. "They're images of what we consider queer, unusual.

When Beroiza spoke to photo subjects before a shoot, she had a conver-

sation with them to figure out how they differed from the sexual norm.

"I wanted to come up with a project with each subject that would sort of collaboratively represent what they perceived to be sexual difference said Beroiza. "That's how they all came out pretty differently.

Beroiza said that while she took the photos, she credits their successful creation to the energy of her subjects

"I'm really floored by this whole experience," she said. "It really doesn't feel like it's my photos so much as it is this collaborative effort and the models coming up with these ideas and letting me work with them, and Q be-

ing the most supportive thing ever."
"I clicked a button and did some scanning and exposing on Photoshop. but other than that, I just showed up," she added.

Abney and Beroiza both said they are looking forward to the response those who view "Deviation

"I hope that there are people who come to the opening and get to talk-ing," said Beroiza. "Maybe it will be a medium to discuss."

"It's exciting, because it's going to make some people uncomfortable," added Abney. "Being here at Bowdoin, we don't really see that a lot."

"Deviation" will open at 7 p.m. on Friday evening in the LaMarche

'El Custodio' renders the mundane moving

BY ANDY BERNARD CONTRIBUTOR

The Frontier Café is in the middle of its fall/winter international film program titled "Global Lens 2008," the most recent intstallment of which is the Argentinian film "El Custodio."

Filmed in 2006 and directed by Rodrigo Moreno, "El Custodio" reveals the

everyday life of a personal bodyguard, Ruben, as he spends his days shadowing his boss, the Min ister of Planning in Argentina. While Ruben's life is shown to be monotonous. dess and repetitive, "El Custodio" is anything but. If this film is an indicator of the quality of the rest of the films in Global Lens, Bowdoin students should start heading to the Café for more than just scones and coffee.

Moreno, born in Buenos Aires in 1972, graduated from the directing pro-gram at the Universidad del Cine in his native city and has directed many short films, but "El Custodio" is his first feature film.

Right from the beginning, "El Custo dio" puts the audience in Ruben's shoes. The camera stays with Ruben on the ide of closed doors while he waits for the minister to finish with endless meetings and as he gets in and out of cars hundreds of times per day as the minister travels. It becomes clear early in

minimer travels, in becomes ceasing the film that Ruben's professional life is his entire life, and it is dull and tedious.
Ruben's repetition of meaningless tasks day after day weighs increasingly on his mind, the only relief from which

on his mind, the only renear norm waters are regular visits to a prostitute.

Ruben also happens to be particularly talented at drawing, but his skill is taken lightly and laughed at by the minister.

After being asked to draw a portrait of one of the minister's politician friends

over lunch one day, the friend remarks, "If he uses his gun like his pen, I can sleep easy tonight." Any creativity Ruben has is ignored. He means nothing more to the minister, his wife and his family than an object that serves no purpose except to ensure the security of his employers.

Although Ruben remains in the shadows, he sees and hears everything that goes on in the minister's dysfunctional family, and the more he hears, the more he grows to secretly despise the minister and his empty life as a bodyguard.

Much of the effectiveness of "El Custodio" comes from its ability to portray an incredibly uninteresting existence in an engaging way. Ruben's solemn com-pliance with every mundane order he is assigned makes the audience sympathetic toward him, and the minister's indifference toward a man that spends his whole day waiting on him makes us anticipate and hope for Ruben's eventual revolt against the mi

The dialogue of the film is sparse and relatively insignificant, just as Ruben's life is basically void of conversation and meaningful human interaction. Moreno's cin ematography is also repre-sentative of Ruben's physical and emo-tional state: dull colors and hard, empty rooms fill the screen for the majority of the film, while the repetition of certain shots and scenery, such as the constantly repeated shot from the backseat of Ruben's car as he follows the minister, indicates that Ruben's routine is frustratingly

changing. The film effectively shows life from a rarely considered perspective, staying true to Global Lens' credo: "Every person has a voice. Every voice tells a story.
Every story reveals a world." "El Custodio" reveals Ruben's world—a world in the shadows—the troubles of which end up being too much for him to endure.

ARTS & ENTERTAINMENT

Dance groups collaborate for 'wildly popular' show

The Department of Theater and Dance will present its biggest event of the year, the 38th annual "December Dance Concert," this weekend.

The performance will feature both class projects and extracurricular dance groups. Five dance classes and eight student-run groups will be performing.

"The performance is wildly popular

every year. Many students say it's their favorite event all year," Professor of Dance June Vail said.

Among the courses represented are the repertory classes Dance 112, 212 and 312 taught by Senior Lecturers in Dance Performance Paul Sarvis and Gwyneth Jones.

The routine performed by the introductory repertory class of Dance 112, "Morphology of a Fairy Tale," will feature numbers that include dances to the beat of drums, a "Sugar Plum Fairy" remix and Maria Muldaur's "I'm

Dance 212's intermediate repertory class members will be dancing the "Java Jive" to music from the Bremer Kauffeehaus Orchester and students in the advanced 312 class will be doing a routine called "On the Run."

The other two classes represented in the show are courses that combine the study of dance history with stu-dio work—"Cultural Choreographies" and "Rebel Dancers, Dancing Revolutions"-both taught by Vail.

Students in "Cultural Choreogra phies" will peform a two-part suite titled
"Two for Twenty-Six," which consists of

TWINKLE TOES: Members of student-run troupe Arabesque dance to music from the "Amelie" soundtrack in their performance titled "L'hiver" on Thursday.

"Vlacko" and "Cimpoi," traditional Bulgarian and Romanian dances, respectively. The group will be accompanied by Beth Borgerhoff, a local musician based in Mt. Vernon, Maine.

In the style of 1930s choreography, "Rebel Dancers, Dancing Revolutions" will perform "Strike/Iho" inspired by Pablo Neruda's 1946-poem "La Huelga (The Strike)." The routine will be danced to a piece by the late American composer Lou Harrison, "Varied Trio

II." which includes parts for violin, piano and percussion.

Among the various clubs to perform are the Bollywood film group Anokha, the ballet troupe Arabesque, the hip-hop lyrical crew EleMental, the ethnic dance team Intersections, hip-hop and break-dancing club Obvious and the hip-hop and jazz ensemble of VAGUE.

Senior John Howard, leader of Obvious, anticipated opening night with

"I am somewhat anxious, but I'm excited to see how everyone who sees our

performance will react to it," he said. Kelsey MacEachern '10 has choreo graphed for Arabesque and VAGUE since the beginning of the semester; she will also perform with the 312 group. According to her, nearly all of the groups performing in the concert have been rehearsing since the beginning of the year. Like most of the routines to be performed by dance classes, most of the

clubs' performances have been prac-

Howard added that all clubs that want to perform in the concert must audition successfully for the Department of Theater and Dance in order to reserve a place in the show

Also to perform are the Japanese percussion group, the Taiko Drummers, a group organized by Elizabeth Jones '09 performing "Fancy Footwork" and a duet by Linzee Troubh '09 and Kate Pastorek '10 to the song "Feeling

Troubh will be performing not only with Pastorek but also with Dance 312 and Arabesque.
"I think that all of the pieces, not

only those that I'm in, are really strong and show all that Bowdoin has to offer," Troubh said.

According to Vail, the December Dance Concert is an end-of-semester sum of all the work that dance clubs and classes have been doing since over the past few months. Between 80 and 100 dancers will showcase their talent in the entirety of the event. The event should last an hour and a half, including time for a brief intermission.

While there are usually a few coursebased independent projects performed by the students at the event, Vail said there would be no routines featured from that category this year.

The dancers will perform tomorrow and Saturday at 8 p.m. in Memorial Hall in Pickard Theater. Tickets are available at the information desk in Smith Union. Although tickets are free, they are man datory for students, faculty and com munity members who want to attend.

Hogarth satire complements English class | Bowdoin chorus and jazz bands

BY RACHEL GOLDMAN

Are pictures really worth a thousand words? In the Becker Gallery at the Bowdoin College Museum of Art, where professors curate shows in con-junction with their classes to expand on certain issues, the answer is ves. Currently in the Becker Gallery is the carriently in the Sector Gatery is the exhibit "Hogarth's Women: Virtue and Vice in Eighteenth Century England," a show curated by Associate Professor of English Ann Kilbie in conjunction with her class, "Women and the 18th Century Novel."

Century Novel

With the help of Bowdon's Andrew
W. Mellon Curatorial Fellow, Diana
Tuite, Kibbie selected prints of the major 18th-century English artist William Hogarth. Hogarth, a painter, printmak-er, satirist and social critic, created many series of prints that questioned and explored issues of modern morality.

In the past, I have used some Hogarth prints in conjunction with other classes," Kibbie said. "But I've never been able to use him to this extent." In the current exhibit, two complete Hogarth series are on display: "Harlot's Progress" and "Marriage à-la-Mode." There is also a smaller series titled "Times of the Day," as well as individual pieces from larger series including one from "Rake's Progress," and one from "Progress of Cruelty." As in other Becker Gallery shows, all of the pieces were selected from Bowdoin's own collection.
Hogarth's images are particularly useful for Kibbie's class because they focus on similar subject matter. Throughout the

semester, Kibbie's class has read a wide variety of novels by both male and fe-male authors that focus on the female character and the development of female characters throughout the 18th century. Hogarth's images seamlessly fit into this exploration, most obviously in their portrayal of women. Many of his series are satirical narratives showing scenarios and characters lacking virtue, thus highlighting what virtue should

In all of these narratives, women play a central role, prodding the viewand the reader of the 18th-century novel-to wonder why there was such an intense fixation on the female character. For Kibbie, this interest lies in the fact that "female characters allow authors to explore certain threats to the self. They are often seen as the vessels of societal virtue, and thus what is at the center of both the novels and the prints are questions regarding the threat to female virtue."

Kibbie also wanted her class to see the 18th-century world in detail.
"These beautiful clear prints with

their astonishing detail give us incredible access to the past," she said. "Hogarth had a keen eye for the objects of the 18th-century world. It is not just the people in the prints that are characters here, rather the objects in the prints are just as important."

According to Kibbie, this sort of access is very important for students in order to completely understand the

"It's important for students to literally see what the 18th-century world

was full of," Kibbie said, mentioning the sfluff boxes and the highly articulated forms of fashion. "This type of visual access really brings the world alive."

Many of these prints could be illustrations of the characters students been reading throughout Kibbie's class. This speaks to the pervasiveness of the questions of female character and the status of women throughout the century. In fact, many of the paperback versions of the novels have Hogarth prints on the

"They are not really a true representation of that particular novel, but rather a moment and an intersection of common themes and questions," Kib-

Using the Becker Gallery has been successful experience, according to

"It gives everyone a different kind of access to the past. We are all really used to accessing the past through pho-tographs, but of course we don't have photographic evidence of the 18thworld. This is the way we can access this past, and it's really quite different than photography," she said.

Kibbie's students echoed Kibbie's

enthusiasm for the show. Junior Daniel Lorberbaum particularly enjoyed the opportunity to visually interact with eir period of study. "As Professor Kibbie explained, many

As Protessor Kubbe explained, many scholars see the origins of the graphic novel in these narrative sequences. I think it's really interesting to view them as archetypal when Hogarth himself probably had no idea of their impact on future art and literature," he said.

to perform diverse repertoire

BY ERIN McAULIFFE

As the Bowdoin community emerges from its Thanksgiving food coma and the reality of finals sets in, two musical performances provide an opportunity to take a break from the stressful prospect of papers and tests this weeken

The Bowdoin Chorus, directed by Senior Lecturer Anthony Antolini '63. and the Bowdoin Jazz Ensemble and Polar Jazz Big Band, directed by Applied Music Instructor Frank Mauceri, will unleash their holiday spirit at the Studzinski Recital Hall this weekend

and next week.

The Bowdoin Chorus, comprised of students, faculty and members of the Brunswick community, will perform Bach's "Magnificat in D." The concert is dedicated to Joel Cartwright '06 who passed away last summer.

"Joel was not a member of the chorus

Joel was not a member of the chorus but was very active in other music de-partment events. Antolini said. "Joel is best remembered as having started the organic gardens that provide produce for the Bowdoin Food Service and offer students an introduction to organic gardening methods. Gordon Bok's 'Oh I Am Calling' is especially dedicated to Joel as it is an evocation of the Maine

Joel as it is an evocation of the Maine landscape that he loved so much."

The featured work on the program is J.S. Bach's "Magnificat in D" with solo-ists Christina Astrachan, soprano, Ruth Barnett, alto, Martin Lescault, tenor, and Peter Allen, bass. The Bowdoin

Chorus will be joined by visiting group the Lincolnaires, from Lincoln Academy in Newcastle, who will sing four Christmas songs. Later in the show, they will sing with the Bowdoin Chorus accompanied by the Bowdoin Orches-tra. The concert will take place tonight and Saturday at 6:45 p.m. at Kanbar Au-ditorium in Studzinski Recital Hall. The Bowdoin Jazz Ensemble and

the Polar Jazz Big Band will perform on Tuesday at 7:30 p.m. Led by Mauceri, the jazz ensembles are made up of small groups of students who focus on improvisation. The groups employ a variety of different styles such as swing. bossa nova and funk.

"These groups perform in concert at the end of each semester," Mauceri said. "In addition, they play occasionally for campus events such as the parents weekend brunch."

The Polar Jazz Big Band was origi nally a student organization that has since branched out into the community and now includes many Brunswick

Big band jazz, which was widely pular in the 1930s and 1940s, still has its place in the Bowdoin and Brunswick music community today. Typically consisting of 12-25 members, instruments usually include trumpets, saxophones, trombones and a percus-

"The group focuses on class big band arrangements leaders such as Elling-ton, Basie, Kenton and Oliver Nelson,"

Beroiza '09 'deviates' from the norm for Q art opening

True to its name, the new BOSA and Q Magazine-sponsored exhibit "Deviation" highlights sexual difference, using Bowdoin's own students as models

The opening, featuring photos tak-en by Alanna Beroiza '09, is in conjunction with Q's release of its second magazine.

O co-editors Isa Abney '11 and George Aumoithe '11 noted that the magazine, which also features Beroiza's photos, is the first issue to have artwork inside.

"Alanna had this idea to do a photo shoot about sexuality that deviates from the norm, so besides the photos in the magazine, some of the others we decided to blow up and do an art show as a way to release the second issue of Q and to highlight the very special pictures inside the magazine,

According to Beroiza, the photos in the show represent a collaborative effort between the magazine, the models and herself. When discussing this semester's issue of O in Septem ber. Beroiza found that her interests in photography and sexuality coincided with Q's goal of making the new magazine different from the first

"I had taken Photo I and II in my

OUEER QUESTIONS: Alanna Beroiza '09 examines one of the photographs she took for the latest 0 art exhibit. "Deviation." in the LaMarche Gallery

more year and I ended up doing a final project in Photo II that I playfully called the 'American Crotch Series'—I think it was 12 shots of women's crotches, but not all naked,"

In addition to previously exploring sexuality through art, Beroiza is also working on an honors project studying sexuality.

"It's just something I'm really interested in-sexuality, but particularly sexual difference, and I find that I really like to explore it in a number of different ways academically and artistically," said Beroiza.

"It just sort of ended up being George and Isa pushing me to make really good photos," she added.

"The photos represent non-normative sex," said Abney. "They're images of what we consider queer, unusual

When Beroiza spoke to photo sub jects before a shoot, she had a conver-

WROR OI 1 FM

they differed from the sexual norm

"I wanted to come up with a project with each subject that would sort of collaboratively represent what they perceived to be sexual difference," said Beroiza. "That's how they all came out pretty differently.

Beroiza said that while she took the photos, she credits their successful creation to the energy of her

"I'm really floored by this whole experience," she said. "It really doesn't feel like it's my photos so much as it is this collaborative effort and the models coming up with these ideas and letting me work with them, and Q being the most supportive thing ever."

"I clicked a button and did some

scanning and exposing on Photoshop, but other than that, I just showed up she added.

Abney and Beroiza both said they are looking forward to the respons from those who view "Deviation."

"I hope that there are people who come to the opening and get to talk-ing," said Beroiza. "Maybe it will be a medium to discuss"

"It's exciting, because it's going to make some people uncomfortable," added Abney. "Being here at Bowdoin, we don't really see that a lot."

"Deviation" will open at 7 p.m. on Friday evening in the LaMarche

'El Custodio' renders the mundane moving

BY ANDY BERNARD CONTRIBUTOR

The Frontier Café is in the middle of its fall/winter international film program titled "Global Lens 2008," the m recent intstallment of which is the Argentinian film "El Custodio."

Filmed in 2006 and directed by Ro drigo Moreno, "El Custodio" reveals the

everyday life of a personal bodyguard, Ruben, as he spends his days shadowing his boss, the Minister of Planning in Argentina. While Ruben's life is shown to be monotonous, meaningless and repetitive, "El Custodio" is anything but. If this film is an indicator of the quality of the rest of the films in Global Lens, Bowdoin students should start heading to the Café for

Moreno, born in Buenos Aires in 1972, graduated from the directing program at the Universidad del Cine in his native city and has directed many short films, but "El Custodio" is his first feature film.

more than just scones and coffee.

Right from the beginning, "El Custodio" puts the audience in Ruben's shoes. The camera stays with Ruben on the outside of closed doors while he waits for the minister to finish with endless meetings and as he gets in and out of cars hundreds of times per day as the minister travels. It becomes clear early in the film that Ruben's professional life is his entire life, and it is dull and tedious.

Ruben's repetition of meaningless tasks day after day weighs increasingly on his mind, the only relief from which

on his mind, the only react soon was are regular visits to a prostitute.

Ruben also happens to be particularly talented at drawing, but his skill is taken lightly and laughed at by the minister.

After being asked to draw a portrait of one of the minister's politician friends

over lunch one day, the friend remarks "If he uses his gun like his pen, I can sleep easy tonight." Any creativity Ruben has is ignored. He means nothing more to the minister, his wife and his family than an object that serves no purpose except to ensure the security of his employers.

Although Ruben remains in the shadows, he sees and hears everything that oes on in the minister's dysfunctional family, and the more he hears, the more ows to secretly despise the minister and his empty life as a bodyguard.

Much of the effectiveness of "El Cus-

todio" comes from its ability to portray an incredibly uninteresting existence in an engaging way. Ruben's solemn com-pliance with every mundane order he is assigned makes the audience sympathetic toward him, and the minister's indifference toward a man that spends his whole day waiting on him makes us anticipate and hope for Ruben's eventual revolt against the minister.

The dialogue of the film is sparse and relatively insignificant, just as Ruben's life is basically void of conversation and meaningful human interaction. Moreno's cin ematography is also representative of Ruben's physical and emotional state: dull colors and hard, empty rooms fill the screen for the majority of the film, while the repetition of certain shots and scenery, such as the constantly repeated shot from the backseat of Ru-ben's car as he follows the minister, indicates that Ruben's routine is frustratingly

unchanging.
The film effectively shows life from a rarely considered perspective, staying true to Global Lens' credo: "Every person has a voice. Every voice tells a story. Every story reveals a world." "El Custo-dio" reveals Ruben's world—a world in the shadows—the troubles of which end up being too much for him to endure.

The Killers succeed on 'Day'

REVIEW BY LOUIS WEEKS

Before I begin, I'd like to get some thing out of the way. I'm sure, if they exist, my readers will be curious about Guns N' Roses' "Chinese Democracy." I will tell you what everyone else is say ing: It's not bad, it's not good, it just is. It exists, and after 17 years and 13 million dollars, that's an accomplishment in and of itself. But amid the Axle anxiety, during the last three-week frenzy over the cornrow-come back, another album made its quiet debut.

It's beginning to look like the Killers are batting one thousand; everyone knock wood. Each of their albums, three now, is a success. There really aren't any egregiously bad songs on any of them. Why is that? Brandon Flowers knows how to write the hookiest melodies and the band knows how to lay down an irresistibly foot-tapping beat. And this is why their newest al-

burn, "Day and Age," is a success.
"Day and Age" is, more than any thing, a dance album. Last year, when the Killers released "Sawdust," their collection of singles and B-Sides, they dipped their toes into the dance music pool. "Day and Age," however, is a cannonball of epic proportions. It's no surprise either. Their producer, Stuart Price, helped the Killers jump the gap from arena rock to dance-rock fusion Stuart Price is the brilliantly successful producer for Madonna, Missy Elliot, Gwen Stefani and Daft Punk, and his signature is all over "Day and Age"s rumbling bass synth and the monstrous kick drums. Everything about like all great dance songs, each track has memorable and singable choruses with swelling synthesizers that compliment Flowers' crystal clear voice.

"Day and Age" is more than just catchy; it's a mature piece of writing. While the album is best defined as a dance-rock album, stylistically, it is indefinable. The album manages to exist in multiple decades of music and still sound like it was released in 2008. The songs, collectively, are a mix of '70s disco, '80s pop anthems and '90s power chords, yet their electronic arrangements anchor them in the present (if not future). The album also exists in multiple places at once. For example, the songs of "Day and Age" boast southwestern American, Latin, Carribean and even Euro-house flavors. Even with all of these genres packed into one album, it never feels stretched too thin. Flowers' melodies are consistently engaging and his Springsteen-esque lyrics paint each song with an equal amount of detail and emotion.

The Killers have taken a giant st forward with this album. Their willingness to look out of their own genre proves that they are students of music as well as musicians. The references to Elton John, David Bowie, Bruce Springsteen, U2, MGMT and even their contemporaries Coldplay do their musical influences justice. This album proves what I have believed to be true all along: Good writing is good listening. "Day and Age" takes what it likes from the masters and says something new and extremely entertaining. The tracks to look out for are: the single "Human," the ballad "Dustland Fairytale" and the earworm "I Can't Stay." Happy listening.

'Mudbound' renders race issues with tact

COLUMNIST

In a story, as in life, there is never a single element at work. The work of an author is to weave together all the asects in play in a manner that does not feel contrived. The variety of dynamics operating in reality are indiscernible; this lends authenticity. But the writer has to work with the page upon which things gain permanence; the reader can perceive what is work all at once, and this is where battling formula becomes important. Hillary Jordan does so with incredible grace in her debut novel "Mudbound"

The setting is the delta belt of America in the 1940s. Laura McAllan has married a man who is bound to the earth in a way she didn't understand when they met, and she was slowly wooed, in Memphis. She is a woman used to the usual comforts of a city: running water, proximity to her family and friends, minor luxuries. Her abrupt removal to country is difficult in the absence of these basics and does not have a passionate love to thrive upon; her marvenience for both of them.

In the country their lives are complited despite a return to the allegedly simple pleasures of being in direct contact with the earth. Day to day life acquires unanticipated horrors for Laura, not the least of which is dealing with her cantankerous father-in-law, Pappy. He is a fearful presence in her life, assuming ailments to shirk work and burdening her with petty requests. Pappy is the

most unbearable wedge that surfaces

between the couple.

Laura bears two children and develops a dependence on the wife of one of her husband's tenants, Florence Johnson. The Johnsons are sharecroppers on the McAllan's land and they are black Florence and Laura build a cautious relationship, battling their cultivated distrust of the other race.

World War II comes to an end in Europe and its conclusion is the source of ficant changes on the farm. For the McAllan family, this means the return of Henry's brother Jamie. For the Johnsons, this means the return of their eldest son, Ronsel, also a soldier in the U.S. Army.

Jordan carefully traces the transition that Ronsel is forced to face when he returns to his native soil. The fact that whites and blacks fought side-by-side saving each other's lives and defending their country, is lost in his Atla crossing. Ronsel returns to find that his treatment is just as despicable as ever, treatment that rankles all the more because of the decency with which he has experienced in Europe

The lives of the McAllan and Johnson families become increasingly entwined Pappy is particularly rooted in his racist

disdain and the people of the delta are not rearing for a change. Lines between the ces that were previously imperme begin to waver, a development that does not sit well in the south. Jamie's return awakens an aspect of Laura presumed lost. He is the charmer, the jokester, the unsteady brother. Exhausted by the reality of life as a farm wife, Laura catches onto the new emotion that Jamie evokes and cultivates it with warmth that is unnecessary with her husband

As things mount to a boiling point in the novel, Jordan handles the additions to her fiction with a light hand. She genthy casts each of her characters in a glow that reveals their sorrow-tinged struggles and their weaknesses. Their evolutions are fragile and she is attuned to the quantity of emotions at work. The story is not told with urgency, but the weight of the conflicts and their repercussions are evident without exaggerated elabo-

"Mudbound" is incredibly well written. Jordan conveys difficulty of time, place, circumstance, gender and race without pushing their interconnections or holding forth on the intrinsic disadvantages. The result is a compelling novel and an excellent debut.

SPORTS

Men's b-ball downs USM, to play Bates Saturday

The men's basketball team con tinued its torrid pace on Tuesday, defeating the University of Southern Maine Huskies 68-52. The win was its third in a row, bringing the team to a 5-1 record.

The Bears' play was highlighted by 12 three-pointers and a bench that outscored that of the Huskies.

To close the first half, sophomore guard Randy Defeo helped lead Bowdoin on 10-0 run and connected for three consecutive three-pointers. The Bears took a 36-25 lead into the locker room at the end of the first half.

In the second half, the team saw their lead cut to 38-33 with 15:35 to go. But the team answered resoundingly; first years Ryan O'Connell Will Hanley torched the Huskies for a combined 16 points during a 23-3 run that put the game away. Hanley led the squad with 13 points and Defeo scored 12, while senior tri-captain Kyle Jackson finished in double digits with 10

lackson credits the non-conference schedule as a good opportu-nity for players to learn and work

The non-conference games we

have played so far have helped both first years and our bench players develop," he said. "Our bench has been playing very well and I'm sure it will be a huge advantage once we get into NESCAC play."

Over the Thanksgiving holiday, the Bears used their impressive depth to defeat University of New England and Kean by a combined 36 points. Mark Phillips '10 used his decisive advantage inside to post a career-high 27 points against Kean and racked up 13 against the University of New England

Phillips said he is taking his in-creased role as an opportunity to carry the Bears.

"Last year I came off the bench and tried to give the team some energy," he said. "This year as a starter I have had more opportunity to score which helps the increase in production.

While taking advantage of their veapon inside, the Polar Bears also have displayed a balanced scoring

"The way I look at it, our team is a group of scorers where in any given night anyone can step up and be the go-to-guy," Phillips said. As the Bears enter NESCAC play, this balanced scoring attack.

This Saturday, the Polar Bears vill play in-state conference rival Bates at 4 p.m. in Morrell Gym

MARGOT D. MILLER, THE BOWDOIN ORIENT

COLBY HIGH SCHOOL: Sophomore Kyle Hanson and junior Ryan Blossom push past Colby defenders to clear the puck during the Bears' 3-1 win on Tuesday.

Bears outskate, outscore Mules, undefeated entering weekend play

Despite the onset of dark and winter, men's hockey lit up campus Tuesday night as the Bears downed Colby 3-1 in the most recent installment of one of NESCAC's most passionate and heated rival-

Mike Corbelle '10 got Bowdoin on the board with 7:34 gone in the first period as he struck home following hard work from Tommy Herd '11 and Graham Sisson '12.

Colby replied in the second period with a fortuitous power play equal-izer from Billy Crinnion. First year goalie Richard Nerland could do nothing as Crinnion's whiffed shot bounced over him and into the net.

The Bowdoin comeback, however, proved too much for the Mules to weather. The Polar Bears stormed out of second intermission with a

strong two-goal response.

Junior Colin MacCormack scored what proved to be the winner after only 34 seconds had elapsed in the third period. Sisson fed MacCor-mack the puck, which he hit home without hesitatio

Brendan Reich '11 sent the home fans into delirium as he added a third goal at 9:08. The Colby netminder was helpless as Reich capped off strong build-up play from Herd and Matt Lentini '09 with a shot

Nerland saved 16 of 17 shots and

MVP of the first storied Bowdoin-

Colby game of the season.

Coach Terrence Meagher reflected on his winning team's performance.

"I thought our students were wonderful. They honored the great tradition of Dayton," Meagher said. "They made all those who have sup ported this special rivalry proud in their creative and enthusiastic ennent in the contest."

The highly anticipated rivalry was unusually scheduled on a weeknight this year.

Normally scheduled for the second weekend of December, Colby's exams are slated for the weekend that the game is traditionally played. The normally explosive atmosphere was tempered by the dearth of Colby students willing to make the trip

"Next year the games will be on Tuesdays, after that it will go back to Friday/Saturday games," said Director of Athletics Jeff Ward.

Ward said that he would vastly prefer the games to be played on a weekend, but due to Colby's finals and the league's restrictions on scheduling, the game had to be played on a Tuesday

Tuesday's win takes the Polar Bears to third place in the NESCAC standings with a 2-0-1 conference record.

Success against Colby was by no means an anomaly in Bowdoin's season as the Bears continued their

season opener 4-2 against Babson and the next day came back dra-matically against UMass-Boston to

The following weekend Bowdoin cruised through the Bowdoin-Col-by Face-Off Classic Tournament to demolish Salve Regina 10-1 Friday. Momentum continued as the follow-ing day they defeated UMass-Dartmouth 4-2.

The only sour note of the tournament was an injury to Kyle Hardy 11. Suffering a twisted ankle against UMass Dartmouth, Hardy expects to return in time for the Christ schedule. Hardy is currently tied as one of the Bears's leading scorers

this season with three goals.
Sophomore defender Kyle Hanson sees only positives going forward in the seasor

"I think we have a really strong team this year," said Hanson. have a lot of depth at all positions. I feel like our first-years have really contributed to the team and we have some great upper class leadership."

Looking forward, Hanson hopes the hard work the Bears have been putting in will continue to reap dividends. "We've been [working hard] in practice all week and hopefully that translates into wins."

Bowdoin visits Castleton tonight at 7 p.m. and will face off against Skidmore tomorrow at 4 p.m.

-Seth Walder contributed to this

Lady swimmers sweep, men split in Cambridge

Despite their best efforts, the MIT Engineers and the Babson Beavers were incapable of damming the speed of the Bowdoin Swim Teams last weekend. Last Saturday's tri-meet be-tween MIT, Babson and Bowdoin set the Polar Bears on the right track, with the women sweeping the competition and the men coming home 1-1.

The Bears were particularly plea with their performance, especially given the fact that both Babson and MIT swimmers had been in the pool practicing almost two months more than Bowdoin, due to NESCAC regu

On the men's side, Bowdoin's only first place finish went to Zach Perez '12 in the 100-yard breaststroke. However, strong finishes by both talented first years and seasoned veterans propelled

the men to a victory over Babson.

The 200-yard medley relay team of Josh Kimball '09, Nathan Mecray '12, Mac Routh '12 and David Sw '09 finished less than a second behind the first-place MIT relay team. Mecray also finished second in the 50- and 100-yard freestyle races, and Routh finished second in the 100-yard butterfly and third in the 100-yard back-stroke. Christian Hurst '11, Max Goldstein '09, and Ian Wandner '09 swept the second, third and fourth places in the 200-yard butterfly

Despite losing to the MIT delega-

to returning to Cambridge this week end to "finish what we have started," said Hurst.

However, the show last Saturday beonged to the Bowdoin women. Battering Babson and edging out MIT by a three-point margin, the female swim-mers asserted their dominance across the board. With individual victories from Allen Garner '12 (200-yard free-style), Molly Homoki '11 (200-yard individual medley), Erin McAuliffe '11 (100- and 200-yard backstroke), Caitlin Callahan '11 (100- and 200-yard breastroke) and Allison Palmer (50- and 100-yard freestyle) as well as team victories in the 200-yard medley relay and the 400-yard freestyle relay the women's team sent a strong message to the rest of the NESCAC.

Assistant Coach Holly Russ summed up the meet in two words. "We rocked!" she said.

This weekend, the Bowdoin swimers will return to Cambridge for the MIT Invitational, a multi-team event where the Polar Bears will face not only MIT, but also Wheaton, Tufts, NYU, Brandeis and NESCAC rival,

Colby.

Although the invitational is not scored, sophomore Roger Brothers said the match is still going to be com-

"There are going to be a ton of fast swims this weekend," he said. "We just want to make sure that most of them are coming from us."

MARIEL REALIDOIN, THE BOWDOIN ORIEN

ICE, ICE, BABY: The women's hockey team practices on Thursday, preparing for its showdown with rival Colby tomorrow in Waterville

Pair of wins for women's ice hockey

The women's hockey team dominated on the ice, crushing Mount Allison University in a pair of games last week. The Polar Bears overp ered the Canadian Mounties 3-1 in the first game, and 4-1 in the second game. The victories followed their losses to NESCAC rivals Connecticut College and Amherst.

For the Bears, their success against Mount Allison gave them confidence as they look ahead to the remainder

"Mt. A's is consistently one of the best teams in Canada, so we knew it was going to be a tough game from the start," Shana Natelson '10 said. "Earning two wins definitely gave us some confidence."

In the first game against Mount Allison, first year Dominique Lozzi '12 scored twice, leading the Polar Bears

Maria Nicolais '10 scored the third goal, giving the Bears a little extra cushion. First year Sage Santangelo also proved impressive, stopping 24 shots while in goal.

In the second game, the Bears kept up the momentum defeating unties 4-1. Lozzi again scored twice for the Bears, while Chelsea Young '11 and co-captain Julia King '09 scored the additional goals.

Lozzi reflected on her four goals.

"As a freshman, you really just want to find your role on the team and help the team win in any way you can. It was nice to score, but it wasn't with out the hard work of my linemates nd a complete team effort."

The victories against Mount Al-lison demonstrated the Bears' ability to bounce back following their losses to Connecticut College and Amherst. The Bears fell to Connecticut College 4-2, and to Amherst 6-1.

"We played really hard in our games against Connecticut and Am-herst and learned a lot about what we needed to work on over the past two weeks," Nicolais said.

The games against Mount Allison also marked the first time the team played with their full roster. Coming fresh out of the NCAA Division III Field Hockey National Championship, King, Lindsay McNamara '09, Emileigh Mercer '09, Emily Neilson

'11 and Katie Herter '12 skated on the ice for the first time this season. King led the way for the Bears in the sec ond game, scoring one of the team's four goals.

was the first game back for the field hockey girls, but by the second period of the first game, everyone was clicking with each other and executing the systems really well," Natelson said.

Having the field hockey players back will certainly help the Bears as

they head into future games Now that we have a full roster we are learning to play with one another so that we will be able to capitalize on all the opportunities," Nicolais said.

The Bears are excited to maintain

their energy as they prepare to play Colby this Saturday.

"We brought a lot of intensity to these games, so it will be great to bring that same intensity this week-end," Lozzi said.

"Everyone gets pumped up for the Colby game," Natelson added. "After gaining a bit of momentum from last weekend's wins and a great week of practice, I think it will be quite the game up in Waterville on Saturday."

Women's b-ball gears up for Colby after USM loss

Anelauskas out for season after ACL and MCL tears

BY JEREMY BERNFELD

Just five games into its season, the women's basketball team has already had its fair share of ups and downs. The team stands at a 3-2 mark, but has lost one of its marquee players for the season.

Senior forward Jill Anelauskas suffered ACL and MCL tears last week and will be unable to return to the court for her final season this year. Anelauskas became just the 11th player in Bowdoin history to score 1,000 points in a career in the tea opening win against Western Connecticut State. Her injury will be a tough one for the team to cope with

Anelauskas reached the 1,000 point milestone in just over three seasons

was an incredible moment for her that reflected so well on her career at Bowdoin," said senior tri-captain Maria Noucas. "The fact that only 11 Polar Bears in our program have scored 1,000 points and that Jill is one of them is such a great honor for her?

Noucas described Anelauskas' injury as "a huge loss" for the team, but ex-pressed hope that the team's depth will help to overcome it.

The thing is that Jill is an incredible leader and her presence will never leave the team," Noucas said. "She will still have a large impact on how successful we are fless of whether she is playing or

Even without Anelauskas, the Polar Bears will be a formidable threat to op-ponents this year. They reached the finals of the Brandeis Tip-off Tournament in the season's opening weekend by beating Western Connecticut State, and have logged wins against University of New England and Salve Regina.

After a second-half comeback saw the

Polar Bears tie the game with under two minutes to go, Bowdoin fell to rival University of Southern Maine on Tuesday,

Bowdoin was down by as much as 15 points early in the second half, but Nouas' five three-pointers helped the Polar Bears battle back, though the rally fell just short. Noucas finished with a team-high 18 points while Sabrina Cote '10 added 13 points and forward Leah Rubega '10 chipped in nine rebounds.

The two early losses have definitely been tough, but we have learned so much from them," Noucas said. "Scoring 53 points in the second half against USM gave us a lot of confidence and we know nat we have a lot of offensive We have incredible potential and I think we are beginning to realize that."

Fellow tri-captain Alexa Kaubris '09 believes that suffering two tough defeats early in the season may actually help better prepare the team for success when it

"Playing in a tough game like that [against USM] just makes you want it that much more the next time you step on the floor," Kaubris said. "Having these experiences so early in the season is definitely not a bad thing."

The team is counting on the resurgence of Rubega.

Last week, Rubega helped lead the

consecutive double-doubles and netted NESCAC Player of the Week honors. Against Salve Regina, Rubega posted 18 ints and rebounds to lead the team in

"Leah is a great post player," Noucas said. "She has great hands and a great feel around the basket. When she gets the ball inside, you just know good things are going to happen." Rubega always works hard and "never gives up on the boardhard and "never gives up on the boards and I think that her rebounding statistics reflect that," she added.

After suffering two tough losses and an even tougher injury, the team will have to rely on its depth going forward. "We have so many offensive threats," Aneluaskas, a tri-captain, said. "Almost everyone on the team can shoot the three, dribble, and drive... We take every practice one at a time and focus on improving a little

Monjar and Ogilvie exceed expectations, both finish in top 20 at XC nationals

Bowdoin Cross Country stars Annie Monjar '09 and Thompson Ogilvie '10 both finished in the top 20 at the NCAA Division III National Championships on Saturday, November 22 at Hanover College in Hanover, Ind .

Both athletes surpassed their own expectations for their respective seasons and both runners were named All-Americans for

"My goal was to race well at the regionals meet so the team could make it to nationals," said Ogilvie, who finished 17th overall in the men's race. "I was seeded to finish in about 50th place, so my goal was to break the top 50. I got a great start and I was able to maintain my place near the front of the pack," he added.

Ogilvie posted his best time of the season at nationals, traversing

the 8K course in just 24:48.

Monjar also took a simple ap roach to the season that even tually paid off. After facing several seasons of injury, "all I really vanted was to be able to race var sity and make it through the season healthy," Monjar said. Monjar said she also tried to stay particularly focused for this race

"I remembered that I just had o what I'd done in past races," Monjar said. "I knew what I wanted to do: Go out fast, get a good position, and try to move up throughout the race," she said. It worked, as Monjar finished 18th

Both runners credited solid train ing regimens for their success.

I put a lot of focus into smart training over this past summer, and I think that really helped me succeed this year" said Monjar. "In the end, consistency, discipline and intelligence are always the most important things in training," she explained.

Ogilvie concurred with Monjar. To improve, I would focus on strengthening my core more and run more miles over the summer," he said.

According to their two top runners, the men's and women's teams should both expect to do well next

Ogilvie hopes he can help the team improve on this season's pos-

"We want to be one of the top programs in the NESCAC and also qualify as a team for the na-tional championship," he said. The women's team, which will be losing Monjar to graduation, seems likely, at least in Monjar's view, to rebound quickly.

"We have a lot of girls with very positive attitudes who take the sport and their performances real-ly seriously, and I know they'll be able to accomplish great things,"

Squash splits in Hanover

The squash teams went into Thanks-giving Break after a split-decision weekend for the men and women. Both teams defeated Connecticut College before fall-ing to host Dartmouth in Hanover, NH.

On Saturday, the men faced the Cam els at 2 p.m., securing a solid 6-3 victory. The Bears' lineup dominated the opponents at the no. 2 through 7 spots, with Andy Bernard '11, Rahul Madan-Mohai '11, Rob Stanley '10, Arun Makhija '10, Peter Cipriano '10 and Robert Lynn '09 all winning their matches. Just two hours later, however, the Bears lost their mo m to a powerful Dartmouth tear with the Green winning all nine matches to sweep the Bowdoin men.

Dartmouth was unbeatable against the Bowdoin women as well, winning 9-0. The women fared far better against NE-Ine women nared nar better against Nis-SCAC opponent Connecticut College. With Elena Laird '11, Alex Franchesci '09, Biz Gillespie '09, Elizabeth Warner '12 and Katie Boyce '11 winning at the No. 1 through 5 spots and Megan Mc-Farland '11, Isabel Nassief '12 and Aileen Tschiderer '12 controlling Nos. 7, 8 and 9,

Inchorer 12 communing Note 7, 6 and 9, the Bears cruised to an easy 8-1 victory.

On Saturday, the Bears will travel to Williams College, where both teams will play the rival Ephs as well as Princeton University. Bowdoin will look to challenge Williams' 0-1 men's team and 1-1 women's team. The Princeton teams are both undefeated at 3-0.

Quarter-Life Crisis

JEREMY IS
BERNING
BY JEREMY BERNFELD
COLUMNIST

In less than a month I'll celebrate my 22nd birthday on the streets of Boston, probably all-too-literally, with some friends. I don't know what Matt Forte will be up to next week when he turns 22, but I'm fairly sure that it'll be cooler than heading to the Brookline Applebee's with two guy friends who will each eat their own appetizer sampler.

But that makes sense. After all, Forte can run the 40-yard dash in four seconds and it takes me five seconds to drive it in my beat-up 1998 Chrysler Concorde. Plus, Forte is currently averaging over four yards a carry as the Chicago Bears rookie running back. Believe it or not, the 10 NFL touchdowns Forte has re-

corded through 12 games this year makes him slightly more attractive to the ladies than my sweet semi-weekly sports column in the Orient.

Forte is only one of the many young NFL stars to emerge this year that make me question the direction my life has taken. The 2008 NFL draft class is already one of the best in recent memory and will go down as one of the best of all time if the same players contribute in future years. Many of this season's rookies have already played bigger roles than anyone had ever expected of them.

No one thought 22-year old Boston College grad Matt Ryan would lead the Atlanta Falcons to an 8-4 record in his first 12 games at quarterback, at least not anyone whose last name isn't Fitzpatrick, Fitzgerald, O'Hanrahan or the like. And no one without an affinity for Joe Biden and the Fighting Blue Hens of Delaware believed in 22-year old Baltimore Ravens signal-caller Joe Flacco—not even Orioles fans. Yet, Flacco has thrown for 12 touchdowns and has led the Ravens to eight wins thus far.

Denver Broncos wideout Eddie Royal may hit 1,000 receiving yards and he was a second-round draft pick. Though he's only seven months and eight days older, he has 757 yards and seven touchdowns more than me. I thought this year's crop of Bowdoin first years were young, being born in the '90s and all, but firstround draft pick and Carolina running back Jonathan Stewart was born in 1987. At least when (if) I get my first real job I'll be able to celebrate at a bar!

I'm a senior looking for a job and I can see that some of my peers have had success in (and on) the field of football. Maybe I'll give the Career Planning Center a call and see if they can hook me up. Maybe they have a contact with a NESCAC NFLEr.

Don't scoff, there's a Middlebury grad in the NFL right now, Ravens kicker Steve Hauschka.

Though Ryan and Flacco sounds more like a law firm than two of this year's NFL Rookie of the Year candidates, they were at least highly-anticipated draft prospects and were both drafted in the first-round. In this wacky NFL season, even un-her-alded draftees have been making me feel bad about my own lowly accomplishments.

The NFL's current Mr. Irrelevant, former Idaho (yes, Idaho) linebacker David Vobora, is even getting in on the act. Vobora was picked last in the schoolyard kickball game that was the 2008 NFL draft, and yet even he has logged meaningful NFL minutes after he got his first start against Mi-ami last weekend. Oh yeah, he's only 21 years old and he'll earn \$285,000 this season alone, recession or not.

The debate over the NFL Rookie of

the Year will be especially fierce this season and Ryan, Flacco, Royal and Forte will receive consideration.

This year's best rookie is an eyen more important honor than usual given the success of this season's rookie class. And in a year when Kurt Warner is a frontrunner for league MVP, if Matt Ryan can lead the Falcons to the playoffs he'll be in the hunt for even greater honors.

Finding a job, especially in this market, will be tough for all of us seniors, but I expected that. What I don't need is kids just out of college already making six-figures and driving Escalades to rub it in my face. I guess at least I can take some solace in the fact that even if I'm working at Burger King next year, I won't have to worry about being knocked out by Ray Lewis.

Heck, keep the crown—I'll take the hits and the Escalade. I'll even give up my sports column.

NCAA CONTINUED FROM PAGE 1

With the goalies holding strong, the game went into double overtime. Katie Herter '12 carried the ball down the left side of the field and crushed a shot that hit the goaltender's pads and fell at Mc-Namara's feet for the finish at 87:02.

McNamara and Herter were tackled to the turf by their charging teammates in celebration of the spectacular victory, and the NCAA championship trophy was presented to the pile of cheering athletes.

"Tilfs is a talented team and playing them again was definitely a challenge, but our experience and determination enabled us to go the extra mile and finish what we set out to do," said Leah Ferenc '09. "It was a total team effort and the best way to end the season. I am extremely proud to be a part of Bowdoin field hockey."

Prior to the championship game, the Polar Bears had to battle hard against a tenacious Ursinus College team to pull out a 3-2 win

Julia King '09, McNamara and Herter all found the back of the net for Bowdoin. Mercer was called on to make eight saves and the Bowdoin defense played a disciplined and smart game to keep Ursinus to two.

In addition to the 2008 NCAA title, Ferenc, Mercer, McNamara and Kelley earned All-Tournament honors. Ferenc, King and McNamara also added All-American honors to their already impressive field hockey resumes.

"We are absolutely delighted to win the national championship," said Coach Nicky Pearson. "We had a massive target on our backs this, year, every team wanted to beat us. We had a few bumps along the way but rebounding ultimateby showed the talent, determination and resilience that this team possesses."

Pearson has guided the Polar Bears to four straight NCAA Final Four appearances and she has been the only Bowdoin coach to bring back the title.

"I feel so lucky to have played for Nicky for the past four years," King said.

WHAT NOW?

THE BRYANT MBA One-Year Program

Do you have what you need to get the job you want? With the Bryant MBA one-year program, you will gain both the skills and experience to launch a successful career.

This accelerated one-year program is designed to build upon undergraduate programs in all academic areas – liberal arts, science, technology, and business – to name a few.

- Begin the program directly after you graduate from college.
- No professional experience is required.
- Gain hands-on experience, and build mentor relationships with corporate executives through the Business Practicum program.

OPINION

BOWDOIN ORIENT

Distribution Requirements

nder the current system of distribution requirements, implemented in 2006, already busy professors must take on an additional burden: submitting an online form if they want their course to be considered for a distribution requirement. Applying for such approval takes time and energy-professors told the Orient that the process is "lengthy" and "more complicated than one would expect." This system has been problematic not only for professors, but for students as well.

This spring, the government department is offering 29 courses, but only one counts toward any of the five distribution requirements. Though the courses "International Security," "International Environmental Policy" and 'Post-Communist Russian Policy" will be offered, none fulfill the International Perspectives requirement. Though many courses across departments have been designated fairly, too many classes remain uncategorized.

While we understand the rationale behind distribution requirements, the system for designating requirements needs to be re-evaluated. When some courses are left out of the system-for whatever reason-it closes down the very academic universe the requirements were intended to open. In order to engage students in a broader range of academic options, all courses should be considered for distribution requirements.

As it stands now, while students are obligated to enroll in classes that fulfill distribution requirements, professors are not obligated to teach such courses. We encourage professors to take the time to nominate courses they teach for the appropriate distribution requirement. Professors have raised concerns that listing a course as fulfilling a requirement may increase the number of students who enroll out of necessity. However, the more options students have, the more likely they are to find a course that suits their interests. The system of distribution requirements, which helps to cultivate a well-rounded liberal arts education, will work best when all professors are on board.

The system has been in place for three years, and it is time for reflection. Though we are hopeful professors will take the initiative to designate their own courses, there are a number of other possible ideas for improvement. Departments could meet before each semester to evaluate the course offerings and nominate qualified courses for requirements. Or, the College could centralize the system, evaluating every course for the appropriate designation. A revised process would be in everyone's best interests.

LETTERS TO THE EDITOR

Robinson's view of **Obama supporters** is narrow-minded

To the editors:

cans need to be resilient," November 21), presented the recent election of Barack Obama in an unfair manner. Robinson talked of "hero-worship," implying that Obama was elected "the average voter's political knowledge is little more than the regurgitation of 30-second ads." For Robinson to suggest that the election of Obama was the result of distorted reason is narrow-minded and unmerited.

To place one candidate under the realm of reason and the other in the realm of foolishness is as polarized as it gets. This blind categorization of the candidates is biased and it fails to take into account the reasonable and foolish qualities of both.

Furthermore, Robinson's implication that opposition to a president is "unpatriotic" is also unfair. Does Robinson realize that his rabid distaste, then, for President-elect Obama would make him unpatriotic, by his own standards?

I am tired of this right-wing twaddle. Although I disagree with Republicans who oppose Obama, I accept and am glad that they are free, just as I am, to have their own views. But Robinson's piece is prejudiced. To fully express my disdain for his op-ed, I would need much more than these required 200 words.

Sincerely, Jamie Thompson Portsmouth, New Hampshire

Crowley provides smart counterpoint to bottled water issue

To the editors: Cheers to Dewey Crowley for his eye-opening op-ed on bottled wa-ter ("Bottled water should remain available to students," November 21). His piece should be mandatory reading for students on campuses around the nations where bottled water is being essentially banned.

Similarly, bottled water is being taxed and regulated in many cities because politically correct environmental activists are spreading misinformation about its impacts. My organization has done some research akin to Mr. Crowley's, which is available at www.enjoy-bottledwater.org. We also have a consumer petition to support freedom of choice in this area. I have linked to Mr. Crowley's article on www.enjoybottledwater.org

www.openmarket.org. Sincerely, Angela Logomasini, Ph.D. Director of Risk and

Environmental Policy - Competitive Enterprise Institute Washington, D.C.

Republicans also deserve criticism

Recently, some Bowdoin Republicans have asked for "intelligent criticism" in the national political debate. I couldn't agree more. So why not start with some intelligent criticism of the Republicans?

1) Democrats have been accused of having a "quasi-religious fervor" for Barack Obama. Frankly, I don't see how a Republican can accuse anyone else of having a "quasi" religious fervor for anything. I know ost Bowdoin Republicans tend to be socially liberal, but the fact the matter is that their party deliberately and routinely exploits real—not "quasi"—religious fervor for political gain.

While I appreciate the point being made, and I agree completely that cults of personality are a bad thing, I feel that Republicans really have no right to talk here.

After all, there were actually

many conservatives in America who believed George W. Bush when he claimed that God had selected him to be president

2) Economics: Barack Obama is not leading America towards "European-style socialism." For one, even the most egalitarian Scandinavian countries are not more than a 50/50 capitalism/socialism mix.

For another, I'm sure you have noticed by now that pure capital-ism—just like pure socialism— does not work. In the real world, you need a little bit of both. Left to its own devices, socialism stifles innovation, and left to its own devices capitalism is prone to instability.

The solution, of course, is capitalism with a low-pass filter (ask a science major). Government regulation and government spending, financed by government taxation, are that low-pass filter.

Next time Republicans start grumbling about paying their taxes, they should remember that, as Chief Justice Earl Warren said, they're buying civilization.

Democrats have been accused of having a "guasi-religious fervor" for Barack Obama. Frankly, I don't see how a Republican can accuse anyone else of having a "quasi" religious fervor for anything. I know most Bowdoin Republicans tend to be socially liberal, but the fact of the matter is that their party deliberately and routinely exploits real—not "quasi"—religious fervor for political gain.

3) More economics: Free markets are not a divine force. They are a powerful tool but they are only a tool. Used without control, the free market produces many harmful externalities, which can only be combated by a government; that is basic economics. One of those externalities is poverty, and the crime, hunger, desperation and general social instability it produces.

A progressive tax scheme is a simple means to correct this externality. It is not a means to overturn capitalism. In economic terms, it is a means to maximize

the social utility of capitalism.

Ever since the Great Depression, America has had consis--not runaway, like China, but consistent-economic growth and only mild recessions, as a result of regulations put in place by FDR. Over the last 27 years these have been eroded slowly, and over the last eight years these have been eroded rapidly and the result has been instability. Capitalism needs its low-pass filter again, for its

Mike Wolovick is a member of the Class of 2009.

Obama's cabinet selections more moderate than anticipated

This just in: We are in a recession. Shocking, I know, but the government says it is official now and this announce ment has coincided with the equally startling revelation that Obama is a closervative. By concealing his true political orientation Obama was able to infiltrate the Democratic Party and earn the support of powerful leftists.

Knowing that he did not have to keep any election promises gave Obama the freedom to receive money from any and all interests. Sarah Palin said Obama was "palling around with terrorists," no dummy, he was spying! Now that he has usurped the presidency he will anchor country firmly to the middle and if the far lefters don't like it, tough. He's your only viable option for 2012. It may be upsetting for Democrats to learn this about their candidate but, I can assure it's probably not true. However, if I were an Obamanite I would be pulling my hair out right now!

What is true is that Obama's cabinet harkens one back to Abraham Lincoln's team of rivals and just like honest Abe's advisors, this group of differed interests will be charged with the task of leading

sors seem growth oriented and he has acknowledged the necessity of confer-ring with military commanders regard-ing troop withdrawal from Iraq.

While several of his appointments are questionable, Obarna has exhibited more centrist behavior than any Republican could have hoped for. Although I have been a critic of the president-elect I must give credit where credit is due. Finally I have seen some change I can

However, Obama's team does have some weak links. One of Obama's earliest appointments was Eric Holder as Attorney General. Anyone familiar with Bill Clinton's final days in office knows that Holder was the Deputy Attorney General and Clinton's yes-man for several controversial pardons. In a shocking display of pre-9/11 thinking Holder somehow found nothing wrong in advising Clinton to pardon several of the FALN terrorists who carried out bombings in New York City and the sonous mega-criminal Marc Rich. Both of these actions were carried out for political reasons and Eric Holder is representative of the same old mainstream Washington BS that Obama ran against. but, always savvy Hill-dog. As an outsider looking in on the Democratic primary I assumed Democrats choose Barack over Hillary because of their differences in foreign policy. But now, a candidate who was elected with much support from the anti-war zealots has adopted the pro-war foreign policy of his rival by appointing Sen. Clinton as secretary of state. What's next, John McCain as economic advisor? I never thought I would find myself rooting for Hillary, however, she is experienced and savvy. I hope she can win more than a few battles with the president.

Another admirable move was to keep Robert Gates on board. The current de fense secretary and surge supporter has commanded the most successful operations in the war and as the old adage goes, never change horses mid-stream. This is especially true when that horse is leading you to a successful victory.

In a recent press conference Obama said he would be sticking with his 16month plan but did not rule out residual forces or compromise with the military commanders. The president-elect is poised to preside over a successful end to Operation Iraqi Freedom and he would

What is true is that Obama's cabinet harkens one back to Abraham Lincoln's team of rivals and just like honset Abe's advisors, this group of differed interests will be charged with the task of leading a divided nation. His economic advisors seem growth oriented and he has acknowledged the necessity of conferring with military commanders regarding troop withdrawal from Iraq.

be foolish to hastily withdraw and risk creating further instability in the area. His great legacy may indeed depend on the successful conclusion of this war.

The appointment I most respect is that of James Jones, a former Marine General and NATO commander, as national security advisor. When it was rumored that Jones might be vetted as Obama's vice president, lones' promptly held a joint press conference with McCain to dispel any such rumors Jones will be the conservative voice in Obama's national security policy, and his experience will prove invaluable. I feel safer already.

Although moderate cabinet appointments may soothe some Republican woes, conservatives and Obarna supporters alike should not overlook the multitude of recycled Clinton advisors now employed by Obama. Here's a

short list; Rahm Emanuel, Larry Summers, Robert Reich, William Daley, Eric Holder, Laura D'Andrea Tyson and of course Mrs. Clinton. Hmm, where's the change?

Throughout his career Obama has portrayed himself in the most politically expedient way. When he didn't vote "present" he rarely went against his own party. Through the deep pockets of his favorite lobbyists and private donors Obama propelled himself into the limelight and now that its time to make decisions of great consequence he must not yield to those interests that are not America's interests. The true intentions of the president-elect remain unknown. However, if his cabinet selections are any indication of the way he will govern, than there might just be some hope after all.

Steve Robinson is a member of the

Thanksgiving Break a mirage of calm before stressful finals

A SOJOURN IN CIVILIZED LIFÉ

BY ANNIE MONJAR COLUMNIST

sweeping snowstorm that clogged airport schedules and kept college students across the nation waiting for release until the wee hours of the morning made a fitting inauguration for the terrifying pre-finals weeks at Bowdoin.

Because as I sat in the back of my parents' car on the way to O'Hare Airport this past weekend, I looked over a newspaper whose headlines should have scared me senseless in and of themselves: The economy (surprise) still tanks steadily, Black Friday's profits gave no indication otherwise jobs are scarce, war continues, the Bears lost, etc.

The only thing that was able to

wrench my stomach into knots and break a sweat on my forehead, how-ever, was thought of the enormously vast amount of work to be done in the upcoming days. As the trillions of pages of writing and reading that awaited me fogged my brain, I felt a distinct drowning sensation. My heart raced, my head pounded, and I immediately turned in my seat to look at my house shrinking in the

"STOP THE CAR!" I wanted to shout. "I can't do it."

But they managed to pry me out of my seat belt at the terminal, and here

I'm not sure what it is about Thanksgiving Break that in the weeks before its arrival make us feel like it's going to be a month-long oasis from academia's November drear. All I know is that now, it seems absolutely ludicrous that a week ago at this time, a three-day break made the 40 pages

of writing due in the next week seem inconsequential.

"I have a lot of stuff due in a few weeks," I told a friend via G-Chat only 24 hours before I flew home. "But it's tots n.b.d. I have 4-evz."

"4-evz," I now realize, was not even close to "a few weeks." Days don't expand because we're not at school.

The only relief, really, from the painful prospect of the next week or o, is the almost universal collegiate truth: Everyone is swamped, all the time. Suffering only becomes bearable in the presence of solidarity, and then, to a degree, it becomes comical.

What is fondly amusing about these times is that in so many situations, there's really no need for "communication" per se:

"Hey."

"Hey."

"How's it going?"

Followed only by sighs and nods and murmurs of "yeah..." If the plan-

et is ever informed of an approaching meteor that will wipe out the Earth and all its inhabitants as we know it. I imagine the social atmosphere being akin to that of Bowdoin's pre-finals weeks: a silent but extraordinary remorse covering up useless panic.

I remember when the time to panic in high school was during finals. Reading period was crunch time, of course, but the due dates and exam dates didn't pile up until that established "exam period" arrived.

Ironically, for most people I've talked to, exam period is a piece of cake. Once reading period ends, everyone seems to be kicking around until the one final they have toward the end of exams. Somehow, over the years, professors have made their semesterend workload very front-heavy. In what I'm sure was an act of kindness, a professor many moons ago decided that it would make his students lives easier during exam period to have

their final due date be a week earlier Academia caught wind of the fad, and soon everyone was giving students their exam periods "off."

But over the three and a half years I've been at Bowdoin, I've noticed only one pattern-it ends. Every semester, during the first week of December, I run around gasping for breath and bidding my "adieus" to close friends. But every semester, in what seems like an impossible test of human will and physical ability, I survive. In fact, pretty much everyone I know does.

I'm not saying it's not going to hurt. In fact, the panic you feel now will probably be with you until New Year's, by which time you might have caught up on sleep and revived your neurological pathways. But I do promise you'll get through it-more or less unscathed, and that you'll recover. At least in time for next Thanksgiving...

CAMPUS QUESTION

Moulton or Thorne?

In the November 21 issue of the Orient, the Bowdoin community was asked to respond to the question, "Moulton or Thorne?" The following replies were submitted.

Casey Freedman '09

I have always been and will always be a die-hard Thorne fan, no matter what they serve, no matter what Moulton is serving, no matter that Moulton serves Lucky Charms and has allegedly more variety in their salad bar.

I don't know if it's due to the fact that I lived in East (Osher) Hall as a first year, or that I worked at Thorne's bake shop for a year and am thus more familiar with the Thorne staff, but I love eating any meal at Thorne. I have been known to eat meals alone there if my friends cannot be convinced to join me, due to the apparently superior Moulton menu. Thorne is airy and spacious in every aspect while Moulton is dark, claustrophobia-inducing and reminiscent of a dungeon

It is much easier to find space to eat at Thorne than at Moulton, whether you are dining alone or

with a group of 15. At Thorne it is also easier to run into friends at meals, or perhaps it is just easier for me to run into my friends. I personally love the peaceful emp tiness of Thorne breakfasts and have been known to wake up early to make it to breakfast at Thorne. go back to sleep and wake up an hour later for class, even though I could have slept later and gone to Moulton.

While I occasionally do appreciate that Moulton has longer breakfast hours on weekdays, I have never met a Bowdoin student

who prefers brunch at Moulton over brunch at Thorne. Without Thorne, I don't know if Bowdoin's legendary culinary prowess would ve felt like such an integral part of my Bowdoin experience.

Chase Taylor '12 and Martin Wikoff '12

Though Thorne may satisfy our stomachs with fine food, Moulton satiates our souls. Right from the card-swipe, the Moulton experience is joyous.

There is no greater start to a meal than a nice warm greeting (and if you are lucky...a hug) from the sweetest woman on Bowdoin campus, Patty. If your day has at all been a downer, Patty is sure to brighten your mood and then swipe your card.

The dining hall itself is the ideal place for a meal. If want to enjoy a turally lit, open meal, then the Light Room is the way to go. But if you want nice ambience and a more intimate dining experience, then the Dark Room is the place to be.

And, if you have a whole group of people, or a team for that matter, then Moulton provides two rooms just for you! The food ain't half bad either

SHOULD PROFESSORS SCHEDULE FINAL EXAMS AND DEADLINES WHILE CLASSES ARE STILL IN SESSION?

Send responses, not exceeding 400 words, that address this question to orientopinion@bowdoin.edu. Several submissions will be selected and published in the December 12 issue.

WEEKLY CALENDAR

DECEMBER 5-DECEMBER 11

FRIDAY

SYMPOSIUM

"Transnational Africa and Globalization"

This symposium, which will draw some of the leading Africana studies scholars from the U.S. and Canada, will focus on the effect of interplay between religious, political, economic and social forces on transnational populations in Africa.

Nixon Lounge, H-L Library. 8:30 a.m. — 4 p.m.

COMMON HOUR

Student Chamber Ensemble Concert

This performance will feature works by Brahms. Kanbar Auditorium, Studzinski Recital Hall. 12:30 p.m.

CONVERSATION

"Innovative Solutions to the Problem of Affordable Housing in New York City"

Andy Reicher '72, Executive Director of the Urban Homesteading Assistance Board, past recipient of Bowdoin's Common Good Award and President Barry Mills' former roommate will lead this discussion.

McKeen Center, Banister Hall. 3 – 4 p.m.

CONCER

Bowdoin Chorus

The chorus will perform J.S. Bach's "Magnificat in D" as well as works by Kastalsky, Lvovsky and Hogan. The Lincolnaires, a choral group from Lincoln Academy in Damariscotta, Maine, will also perform. Both ensembles will sing the same program Saturday evening.

Kanbar Auditorium, Studzinski Recital Hall. 6:45 p.m.

HOEDOWN

Contra Dance

Local musician Greg Boardman will call steps in this classic New England folk dance.

Schwartz Outdoor Leadership Center. 7 p.m.

FILM

"Philadelphia"

This film, which stars Tom Hanks and Denzel Washington, focuses on a wrongful dismissal suit brought by an AIDS victim against his employer, which fired him due to his condition. The Bowdoin Film Society will co-sponsor this screening with the Student Global AIDS Campaign.

Smith Auditorium, Sills Hall. 7 p.m.

PERFORMANCE

December Dance Show

Students will present independent work and class projects in the 38th annual fall semester dance show. Pickard Theater, Memorial Hall. 8 p.m.

CONCERT

Bellamafia Winter Invitational

Bellamafia will host a night of a cappella music, including performances by the Bowdoin Longfellows and the Colby Eight.

Atrium, Druckenmiller Hall. 9 p.m.

PAWAT SERITRAKUL FOR THE BOWDOIN ORIENT

A VIEW FROM THE TOP: The fading afternoon sunlight illuminates Hubbard Hall and the treetops of Brunswick.

SATURDAY

CONCED

Bowdoin Chorus

Kanbar Auditorium, Studzinski Recital Hall. 6:45 p.m.

FILM

"For A Few Dollars More"

Clint Eastwood stars in this Western, presented by the Bowdoin Film Society, in which two bounty hunters team up to track down an outlaw.

Smith Auditorium, Sills Hall. 7 p.m.

SUNDAY

CONCERT

Lydia Yeh '09 Voice Recital

Yeh will perform works by Mozart, Webber, Handel, Faure

Tillotson Room, Gibson Hall. 7:30 p.m.

FOOTBAL

Patriots Game

Jack McGee's Pub will show the Patriots game on a bigscreen projector. Food specials will be available for purchase. Jack McGee's Pub. 7 p.m.

MONDAY

PERFORMANCE

Directing Class Projects

The students of Theater 270 will showcase their knowledge of directing theories and techniques in this public performance.

Wish Theater, Memorial Hall. 8 p.m.

TUESDAY

OFFICE HOURS

President Barry Mills

Café, Smith Union. 3 - 4 p.m.

CONCERT

Jazz Ensembles and Polar Big Band

Bowdoin's jazz groups will give a holiday performance. Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

CONVERSATION

"Yes We Can! Right?"

Professors from the Economics Department will lead a discussion and will welcome debate about the effects of the economic crisis on President-elect Obama's proposed initiatives.

Lancaster Lounge, Moulton Union. 7:30 p.m.

WEDNESDAY

PERFORMANCE

Casev Latter '09

Latter will perform blues guitar music and provide background information about the origins of blues music. Kanbar Auditorium, Studzinski Recital Hall. 7:30 p.m.

THURSDAY

CONCERT

Brass Night

The Bowdoin Brass Quintet will perform a selection of music including the "Malcolm Arnold Quintet for Brass." The Bowdoin Tracktet will also play holiday music.

Kanbar Auditorium, Studzinski Recital Hall. 8 p.m.

BOWDOIN ORIENT

BRUNSWICK, MAINE

ECONOMY

A look back: **Budget cuts** in '90s slump

The Orient examines College actions during economic contractions in the early 1990s

BY NAT HERZ

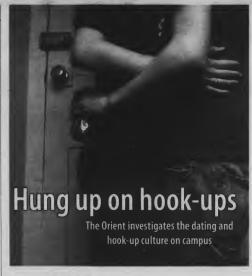

In his first semester at Bowdoin in 1990, President Robert Edwards wrote a memorandum to the school's financial planning committee detailing the status of budget.

"Very simply, Bowdoin is spend-ing at a higher level than its revenues ill support," he wrote

As a result, Edwards, his administrative team and the College's overseers undertook the process of balancing the budget. This process had wide-ranging impacts: Bowdoin briefly abandoned its commitment to need-blind admissions, cuts were made to athletics and student life programs, and reductions and revisions were made to staff and faculty

As Bowdoin confronts similar— though not identical—challenges during the current economic downturn,

Please see CUTS, page 2

RY FMILY GUERIN AND MARY HELEN MILLER **ORIENT STAFF**

If you want to date, don't come to

At a school where hook-ups out number dates more than three to one. students looking for a dating scene may be sorely disappointed. First year Branden Asemah expected to come to Bowdoin and date a lot of people, but so far "it's just not happening." From what he has seen, the drunken hook-up has taken the place of the date.

Thirty-four percent of Bowdoin students, or 583 people, responded to a survey conducted by the Orient about dating and relationship experiences. The poll was advertised through e-mail and on the student digest. In addition, the Orient interviewed 15 students of various backgrounds and experiences.

Seventy-five percent of students that have hooked up at Bowdoin reported that alcohol at least sometimes significantly influenced their decision, according to the poll.

Please see DATING, page 5

Watson Arena to host first game in January

On January 18, the puck drops In a little over a month, Watson Ice Arena will officially replace Dayton Arena as the venue for Bowdoin hockey teams

"I'll have fond memories of [Dayton] but, honestly, it's fallen down," Director of Athletics Jeff Ward said. "If we didn't open this new rink, we'd be in big trouble in a real hurry. Day ton is a great place to watch a game but Watson is going to make people forget it awfully quickly.

The new arena, named for former men's hockey coach and Director of Athletics Emeritus Sid Watson, will serve the same groups that have used Dayton in the past, in addition to a few others. The rink itself will be used by the Bowdoin Men's and Women's Hockey Teams, Intramurals, local high school teams, and community skating and hockey programs. The arena's facilities, which include larger locker rooms, will also be used by men's and women's soccer, women's lacrosse and softball.

Both men's and women's hockey will begin practicing in the new building upon their return from

According to Capital Projects Manager John Simoneau, who was

- Watson Ice Arena will open on January 18, with women's ice hockey taking on Hamilton, and men's ice hockey competing against

· The final game played in Dayton Arena will take place on January 17.

• Though the rinks have nearly the same seating capacity, Watson will seat spectators on all four sides of the arena.

largely responsible for collaboration between Bowdoin and contractors who worked on the building, Watson will be much improved in comparison to Dayton Arena. Larger locker rooms will now allow all hockey players their own locker, and an athletic training room will provide more space for treatment. The new arena will also include a surround sound system, a press box with better visibility and improved ice with additional refrigeration and dehumidification abilities.

Although the seating capacities in the two arenas are nearly identi-cal, Watson will have seating on all four sides, including stadium chairs along the sides of the rink. An upper concourse will also provide standing room for the stadium's best sight-

Please see WATSON, page 12

BSG health center survey inadequate, members say

AND SETH WALDER

Bowdoin Student Government (BSG), in conjunction with the Dean's office and Dudley Coe Health Center, has decided to conduct a second poll to measure student opinion about the

health care provided on campus.

BSG President Sophia Seifert '09
and Vice President of Student Affairs Carly Berman '11 conducted the original survey, composed of questions compiled by the BSG Assembly.

Seifert said that BSG's interest in conducting a survey stemmed from her observation of "a perception among the student body that our health ser-

vices could be improved."

"The point of the survey was to gauge student opinion," added Berman.

The questions on the survey included, "What is your general opinion of the Health Center? How confident are you in the Health Center? Have you purposefully avoided the Health Center? When do you use the Health Center? Have you heard any stories about the Health Center?"

BSG members sat at a table in Smith Union on November 3-5, according to

Berman, and administered the original pen-and-paper survey to 266 students. Berman said that other opinions were also solicited by placing surveys in the common areas of College Houses, dorms and outside of Thorne Dining

Of the 266 students who took the survey, 77 had a positive opinion, 116 a neutral opinion and 70 a negative one

The results also included 61 claimed cases of misdiagnosis, 22 cases of a wrong prescription and 19 indications of poor treatment. Berman and Director of Health Services Sandra Hayes felt that these numbers could easily be misleading.

"The [BSG] Assembly agreed overall that some of the results are problematic," Berman said, and cited the relatively small sample size as a possible issue. "In terms of the whole student body, [266 students is] a pretty small fraction," she said.

Hayes said that she felt the questions in the initial BSG survey were "vague" and that a second poll was needed.

"The questions and then the re-sponses didn't give us great data," Hayes said.

Hayes pointed out that the question

Please see SURVEY, page 3

Student-faculty ratio decreases to 9:1

ORIENT STAFF

The steady increase of Bowdoin faculty in recent years has shifted the student to faculty ratio from 10:1 to 9:1, a change that impacts interactions between students and teachers as well as the scope of Bowdoin's offerings.

Every fall, the ratio of students to professors is tallied according to very specific definitions of "faculty" set forth by the Common Data Set (CDS). The CDS reflects a collaboration between higher education institutions and the

According to the CDS Web site, "The combined goal of this collaboration is to improve the quality and accuracy of information...attained by the development of clear, standard

· A student reported seeing a suspicious man loitering in the Coles Tower lobby. The man turned out to be a dining service employee.

· A student reported that there was an intoxicated man walking on College Street. Officers checked the area and could not locate the

· An officer responded to a noise • An officer responded to a

noise complaint at Brunswick Apartments.

· A student's vehicle collided with another student's vehicle in the Russwurm parking lot, causing minor damage

A faculty member fell and re-ceived a facial cut outside Morrell

· A black Magna Catapult 15speed bicycle was recovered in woods off of Harpswell Road, near the observatory access road. The owner may claim the bike at the Security Office.

· An intoxicated Moore Hall student was transported to Parkview Hospital by Brunswick Rescue.

In an unrelated incident, a second intoxicated Moore Hall student was transported to Parkview Hospital by a security officer.

An unregistered event with hard alcohol was dispersed in West Hall. Two students took responsibility for the alcohol policy violation

· A student attending the Junior/Senior Ball at Thorne Hall fell against a wall while dancing, cutting his head on a light switch security officer transported the student to Parkview Hospital where he was treated and released.

Sunday, December 7

· A student reported loud voices coming from a Brunswick Apartments unit. An officer responded and discovered that two students, who were roommates, were having a disagreement. The matter was resolved.

· An officer reported a safety hazard at Ladd House. A Christ mas tree was on display without water or a safety tag.

Monday, December 8

· A Facilities staff member report striking a lamp post with a College vehicle, causing minor vehicle damage.

 Brunswick Rescue transported an ill female ice hockey player from the training room to Parkview Hospital.

Tuesday, December 9

· Two students were stuck in elevator at Searles Hall. The students were freed by a College electrician and the Brunswick Fire Department.

· A student purchased alcohol using a false identification card and furnished hard alcohol to a minor. A report was submitted to the dean of student affairs.

• A student reported that a black and charcoal Navy style pea coat was taken from the coat rack at Thorne Hall during the Junior/Senior Ball on Saturday night.

A student's vehicle that was parked in the south side lot at Brunswick Apartments received damage to the left rear light and quarter panel.

· Two kegs and a tap were reported missing from the basement of Quinby House.

Winter Break Parking

Any student who plans to leave a vehicle on campus during winter break must fill out a permission form with Safety and Security. Student vehicles left behind during break must be moved to the Stanwood Street lot to allow for campus snow removal.

Please complete a Winter Break Parking Registration Form and bring it to the Communications Center prior to relocating your vehicle to Stanwood Street. Forms are available at www.bowdoin.edu/ security or at the Safety and Security Office, Rhodes Hall. There is no charge for winter break park-

You are leaving your vehicle at your own risk, so please remove all valuables and lock it.

For further information, contact Ien at 725-3458.

From all of us at Safety and Security, have a safe and enjoyable Winter Break.

-Compiled by the Department of Safety and Security.

Publication will resume on January 23. Happy holidays from the Orient.

CUTS CONTINUED FROM PAGE 1

findings from how the College dealt with previous periods of economic turbulence may shed light on strategies Bowdoin could consider in the coming months.

In fiscal years 1988-1989, 1989-1990, and 1990-1991, the College ran budget deficits of \$1.9 million, \$3.1 million, and \$2.4 million, respectively.

Bowdoin was facing rising costs, especially for employee health care, coupled with slow rates of donations, according to archival Orient reports. Budget oversight was not particularly stringent, and administrators of various programs were able to use funds not specifically allocated to them. Additionally, the College also was paying off \$15 million in debt for the construction of Farley Field House and Hatch Science Library.

Inaugurated in October of 1990, Edwards confronted Bowdoin's financial problems head on. Within one year of his inauguration, he had two committees to aid him, made up of faculty, students and staff. Edwards also created a strategic planning task force to "do what is necessary to identify the priorities of the institution, to propose measures to rebalance programs, and to suggest strategies to generate income and contain expenditures so as to reflect those priorities."

Edwards also named another body-the financial planning committee-specifically charged balancing the budget by 1993-1994.

According to former Vice President for Finance and Administration and Treasurer Kent John Chabotar, the financial planning committee would create the first draft of the budget every year, which his office would evaluate, then pass it on to the governing boards. Once these committees were in place, the College began the process

of making cuts and revising policies.

"It was very painful—everything was scrutinized," said Senior Vice President for Planning and Development and Secretary of the College Bill Torrey, who was director of development and vice president for development and College relations during this period.

We looked at every single thing we were spending, and said, 'Can

we do without it?' and that's not unlike what we're doing today," Torrey continued. "[Edwards and President Barry Mills] both thought it was important for the community to be well-informed."

Chabotar said that ultimately, Bowdoin was forced to reduce its work force by 70 positions. Several of these employees were simply laid off. Major cuts included positions in the safety and security department, incluthe Director, as well as 24-hour staffing in Dudley Coe Health Center.

However, most of the cutbacks were implemented by offering employees early retirement, which occurred in two different cycles. In 1992, the first year of the program, employees ages 55 and older with 15 years of service at the College could retire early and receive six months of salary. In 1993, the second year, employees that met the same standard received six months of pay, as well as an extra week of pay for every year spent at the College up to 26 weeks.

According to Chabotar, some of these employees were simply not re-placed. However, even the positions that were replaced resulted in significant savings, since most of the individuals that took early retirement had been at the College for a long time and were making larger salaries than their replacements.

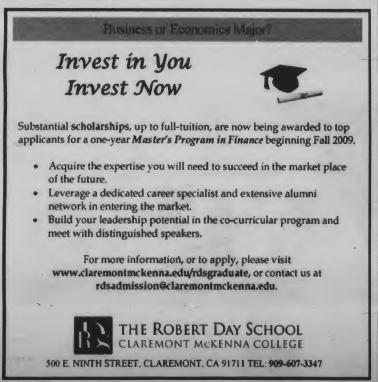

While early retirement was an effective strategy, Chabotar said, it was

"One of the dangers of early retirement is you can't control who goes, but it's also one of the more humane ways to reduce the staff because nobody gets fired," he said.

Another area of the College affected was the admissions policy. According to an Orient article in fall 1992, 40 students in 1991 and 26 in 1992 were not accepted to Bowdoin due to a lack of financial aid—a break from the College's previous commit-ment to need-blind admissions.

According to Chabotar, the key when making cutbacks is identify ing "the untouchables-the stuff that can't be reduced a lot for Bowdoin to stay Bowdoin."

As Mills has created a committee to grapple with the challenges posed by the current recession, Chabotar added, that body "has to be clear on the extent to which their recommendations and priorities protect the prod-uct—and remember that every college in the country is going through this."

RSG

BSG discusses health survey in final meeting of semester

ORIENT STAFF

Returning to a topic of concern for many Bowdoin students, Bowdoin Student Sovernment (BSG) members discussed fielding a new Health Center survey in conjunction with the College administration on Wednesday. Members were presented with a draft survey compiled by Director of Health Services Sandra Hayes and Senior Associate Dean of Student Affairs Margaret Hazlett, BSG President Sophia Seifert '09 reported that some questions on the draft survey were taken from the Health Center's existing general satisfaction survey (see related survey, page 1).

BSG Vice President for Student

BSG Vice President for Student Affairs Carly Berman '11, who is heading BSG's inquiry into student opinion of the Health Center, asked all BSG members for additional questions that should be included in the new survey. Representatives offered a number of questions and opinions.

Vice President for Academic Affairs Sam Dinning '09 said, "Some of these questions are dancing around the issue. My impression is that we were not trying to get average experiences; we were trying to minimize the existence of negative experiences."

Class representative Greg Tabak '11 added, "We're here to make it better, not to compliment them. We should be asking what is needed."

Several members offered additional questions to help achieve this goal. Inter House Council President Lindsey Bruett '09 offered, "Was the care I got at Dudley Coe similar to the care I would get with my own doctor?"

Representative-at-Large Kristen Gun-

ther '09 suggested asking, "Did you feel you were treated in a timely manner?"

In an interview after the meeting, Seifert said, 'One of the most important messages I got tonight was that the survey questions need to be straightforward and concise. We will be able to do this by working with Dudley Coe and the Dean's office to come up with clear priorities, which will undoubtedly include student confidence and quality of care."

In her president's report, Seifert announced that Dean of Student Affairs Tim Foster met for over an hour with faculty and students involved with the Judicial Board to discuss BSG's recent resolution regarding that body's information sharing methods. The resolution proposed to make information on Judicial Board cases more accessible through a number of avenues, including more specific semi-annual reports as well as publishing the information online and in the Orient According to Seifert, the committee responded positively to the resolution and will discuss its implementation.

Additionally, according to Dinning, recent resolutions regarding class placement and first-year seminar choice were well received in the Academic Affairs office. Dinning noted that the Academic Affairs Committee discussed issues included in last week's Orient, including lines at Phase II and distribution requirements. With these and other items on its agenda, BSG is planning a busy spring semester during which Seifert believes it is "well positioned" for "a major success in each of lists! divisions".

First-year black enrollment at 8.4 percent

BY ANYA COHEN ORIENT STAFF

With black students comprising 8.4 percent of the class of 2012, Bowdoin continues to rank among the highest in an annual survey of black enrollment at the nation's top liberal arts colleges.

Moving down the list two spots from last year, Bowdoin now has the seventh-highest percentage of African-American first years. The poll draws on information from the nation's top 30 liberal arts schools—two of which did not provide data—collected by the Journal of Blacks in Higher Education (IBHE).

The 489-student first-year class includes 41 black students, while last year's first-year class included 42 African-Americans out of 476 total students, or 8.8 percent.

Associate Dean of Multicultural Student Programs Wil Smith did not think the decrease of only one black student in the first-year class was any cause for concern, especially in light of the progress the College has made ower the last 10 years. Bowdoin's demographics have changed substantially since 1998, when only 12 black first years enrolled in the College. When it arrived at Bowdoin, the first-year class of 2009 included only 3.2 percent black students, less than half (percentage-wise) of today's total.

"It's a sign that Bowdoin is broadening its perspective on who might add to the diversity on campus," Smith said. "In doing so, they've broadened their reach further south and west than in 1998."

Though he was proud of Bowdoin for "practicing what it has preached adout a diverse social and intellectual environment," Smith acknowledged that Bowdoin could increase efforts

to attract impressive black students.

Amherst led the pack again with a

Amherst led the pack again with a first year class composition that was 11.2 percent black, while Wellesley and Swarthmore moved up in the ranks.

"I'd like to see us be the leader,"
Smith said. "But not at the expense of just bringing people in, not just playing the numbers game." More important to him is implementing creative ways to find "the most talented students who happen to be black."

The black student yield, 36.3 percent, also fell short of last year's 40 percent.

The College attracts many of its black students through two weekends organized by admissions. The Bowdoin Invitational in November targets talented prospective students and The Bowdoin Experience in April gives accepted minority students a last look at the school.

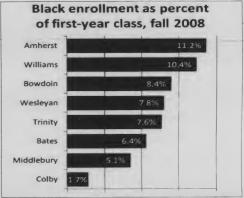

Smith said the most impres-

sive "evolution" of these programs came about several years ago, when the College asked all students, not only those of color, to host minority students for these weekends, thereby creating a more realistic college experience.

"Students are our best recruiters," said Smith. The College now has a diverse group of students who can speak from their own experiences to potential students.

Smith acknowledged that America still has a long way to go in terms of the number of black students, especially black men, in college. He also expressed hope that Bowdoin would increase its enrollment of other minorities, such as Hispanics and Native Americans, the most historically underrepresented groups at the College.

The Office of Admissions was unavailable for comment.

ADAM KOMMEL, THE BOWDOIN ORIEN

DEMOGRAPHICALLY DIVERSE: Among top NESCAC liberal arts schools, Bowdoin ranks near the top for black enrollment in first-year classes in fall 2008.

HEALTH CONTINUED EDOM PACE 1

in the original survey about misdiagnoses was particularly problematic.

"What constitutes a misdiagnosis?" asked Hayes. "Because you can come in and present with a cough and we do all of the evaluation and send you on [your] way, and indeed it really was probably a viral illness when you came in but you got sicker and came down with pneumonia. So did students [filling out the survey] call that a misdiagnosis? Because I wouldn't."

"It was a pretty unscientific survey," added Seifert.

Both Seifert and Berman expressed their feelings that a second survey was needed to determine the significance of the initial results.

After the results of the original survey were received, Seifert said that the consensus among the BSG was that the issues at hand needed to be investigated further.

Seifert questioned whether the negative opinions of the health center were influenced by the general view of the Dudley Coe on campus.

"We have to figure out, what of this is perception and what of this is actual fact?" said Seifert. "If these things are actual fact, why did these things happen? If these things are perception, why does that perception exist?"

Seifert called the results of the first survey, "very much a preliminary step, and just signals to us that yes, [investigating the student body's opinion of campus health services] is something that we want to continue working on, that we want to go the administration and collaborate with them to figure out "There seems to be a lot of misinformation about things that students want."

MARGARET HAZLETT SENIOR ASSOCIATE DEAN OF STUDENT AFFAIRS

Senior Associate Dean of Student-Affairs Margaret Hazlett, who oversees the health care on campus, outlined long-term goals for the Health Center, including increased visibility on campus and greater education in the

community about the services offered

just what the terrain of this issue is.

at the center.

"There seems to be a lot of misinformation about things that students

formation about things that students want and yet, [the Health Center] offers it, but we're clearly not doing a good enough job about getting that information out to students," Hazlett said.

Seifert echoed Hazlett's sentiments.
"Education is something we've been

talking about the entire time...educating the student body about what services are [at the Health Center] and how they can best use them," she said.

Hayes indicated that the new survey will be distributed at the end of this semester or the beginning of the spring semester.

Hazlett said that among other revised questions, the new survey will also ask students what health services they would like to see added to the new health, fitness and wellness center when it opens next fall.

"[The] key piece is asking the right questions to get the information we want," said Hazlett.

INTIMATE SETTINGS: Maine Social Research, or Interdisciplinary 240, is taught by sociology and anthropology professor Craig McEwen and has eight students enrolled. This fall, Bowdoin has reported a 9 to 1 student to faculty ratio.

FACULTY CONTINUED FROM PAGE 1

data items and definitions..."

The section of the survey devoted to class and faculty size states the criteria for considering a person faculty. The definition addresses specific situations, such as whether or not an institution should count a part-time teacher on sabbatical without pay, or an administrator who teaches one or more classes.

Bowdoin's fall 2007 numbers, which were reported this year (there is a one year gap between the data collection and when it is published), showed a 9.7 student to faculty ratio based on 1,712 and 177 faculty, that was rounded to and reported as 10 to 1.

According to Dean for Academic Affairs Cristle Collins Judd, Bowdoin's numbers for fall 2008, which will be published next year, show a new 9 to 1 student to faculty ratio (rounded down from 9.4).

"The size of the faculty has been increasing over the past few years," said ludd.

The Capital Campaign funded eight new positions out of the projected 12, and five of these have been filled.

"One [reason] is that we believe that close student-faculty interactions are essential to the Bowdoin experience," said Judd, as is small class size. Referencing the 2007 CDS, Judd stated that over 65 percent of Bowdoins classes contain less than 20 students and that "out of 374 classes, 74 were for two to nine students. One-hun-

dred and eighty-three classes were 10' to 19 students."

The CDS further reports that Bowdoin offers no courses with enrollment exceeding 100 people and only nine classes have over 50 students. In addition to small class size, a low student to faculty ratio enables students to pursue independent studies much more easily, said Judd.

The ratio also "allows us to bring breadth and depth to the curriculum," she added.

Recent expansions of Bowdoin's academic scope include the offer of Islamic studies as well the enrichment of the environmental studies department through faculty from multidisciplinary backgrounds.

"New positions bring us new areas of study," said Judd.

FEATURES

The Report on Kinsey: The sexologist's time at Bowdoin

When the editors of the Bowdoin Bugle suggested that Alfred Kinsey '16 "loosen up," they had no idea that their classmate would become one of the most controversial and comprehensive sex researchers in American history.

Born in 1894, Kinsey is most well-known for his extensive research on human sexuality. In 1948, he published a report titled 'Sexual Behavior in the Human Male,' and followed in 1953 with a volume on female sexual behavior. Kinsey's findings, which focused on numerical data collected from interviews, were both significant and controversial. The conclusions drawn from Kinsey's research are still highly relevant today, espe-cially the Kinsey scale. The scale describes human sexual orientation as a continuum going from 0 (exclusively heterosexual), to 6 (exclusively homosexual).

Kinsey did not begin his college career at Bowdoin, but rather at the Stevens Institute of Technology in Hoboken, N.J. He wrote Bowdo President Kenneth C.M. Sills in July of 1914-on Boy Scouts of America stationary, no less-expressing his wish to come to Bowdon

"As a student at the Stevens Institute of Technology, I have finished two years, but in preference for a more general course I wish to enter as a junior at Bowdoin this fall," Kinsey wrote.

According to biographer Wardell B. Pomeroy, Kinsey's interest in biology drew him to the College.

Biology was his real interest, and for reasons not entirely clear he wanted to go to Bowdoin to study it," wrote Pomeroy in his book, "Dr. Kinsey and the Institute for Sex Research."

According to Pomeroy, Kinsey's decision was met with staunch opposition from his father.

"He confronted his father, who was outraged by the idea and told his son bluntly that he could expect no financial help if he carried out his plan,"

Luckily for Kinsey, however, Bowdoin was supportive where his

"Kinsey wrote to President Kenneth Sills at Bowdoin, explaining that he wanted to attend and asking for scholarship help, which he got, wrote Pomeroy. "His father bought him a twenty-five dollar suit and, carrying out his threat never helped him financially again."

Admitting Kinsey to Bowdoin ved to be a good decision. In 1945 Paul Nixon, who was a professor and dean at Bowdoin from 1918 until 1947, wrote to Kinsey to congratulate him on his accomplishments. The letter also makes reference to Vincent Nowlis '35, who worked with Kinsey on "Sexual Behavior in the Human Male"

"A letter from Vin Nowlis reminds me that I have not written you, stating how proud we are at Bowdoin of the extraordinary work you have been doing in your field," wrote Nixon. "I recently asked Alfred Gross who his best Biology students of all time were. Al Kinsey headed the list."

Dr. Alfred Gross, Kinsey's professor of biology at the College, held his student in high esteem even before he achieved scientific fame. According to Pomeroy, "Dr. Alfred Gross, with whom [Kinsey] did his major work, considered him the brightest student he had ever known in his long teaching career at the College."

A speech given at Bowdoin by Fernandus Payne, a professor of biology at Indiana University, revealed that Kinsey's love for biology began prior to his undergraduate education, but was nurtured while at Bowdoin.

"While at Bowdoin and also in earlier years he worked in boys camps during the summer and acquired an interest in the out-of-doors and in living things," Payne said.

In addition to studying biology, Kinsey also participated in several campus organizations. He was a fraternity member of Zeta Psi, the building of which is now Ladd House. According to Pomeroy, Kinsey was a cherished member of his fraternity debating team, due to his "natural talent for verbal communication.

After graduation, however, Kinsey declined to continue his involvement

volve him in its alumni activities after he became a celebrity, he resisted firmly," wrote Pomeroy.

Kinsey was also musically talented. His description in his graduation year's Bowdoin Bugle remarked that we have...discovered that he is a professional at the piano.

According to Pomeroy, playing the piano was a way for Kinsey to unwind after working in the biology laboratory all day.

A friend of Kinsey's "sometimes saw Kinsey, from the vantage point of his dormitory window, slipping through the side door of the Music Department, which was in the rear section of the chapel," wrote Pomeroy. "Kinsey had a key to this door and permission to use the grand piano in the department, which he did late in the afternoon when there were no classes.

In addition to performing m sic, Kinsey also wrote for the Quill while at Bowdoin. One of his pieces, entitled "Scientific Love," expresses Kinsey's view that love is above science and cannot be measured.

"It is enough that we never do approach love in mathematical terms!" he wrote. "My essay needs not be an essay, for ages have already written all concerning love. My essay on scientific love is unscientific as it needs must be, you see, when love has no science!"

Though this piece reveals that the biologist might have believed that love was in no way mathematical, his later research on human sexuality as entirely based on numbers.

The numbers are the important part historically," said current Professor of History David Hecht. "The fact that he had all these numbers impact-

ed what people thought.

"He's challenging the norms, but he's doing so in a number-based way,"

According to Pomeroy, during his years at Bowdoin Kinsey still retained some of the innocence of his churchgoing Boy Scout childhood.

"He was still unbelievably innocent, an innocent that amused Kinsey when he realized it years later," wrote Pomerov.

COURTESY OF THE GEORGE J. MITCHELL SPECIAL COLLECTION S & ARCHIVES

BUGLE BOY: Alfred Kinsey '16, shown here in a yearbook photo, came to Bowdoin his junior year to study biology at the College. Kinsey graduated magna cum laude and went on to study gall wasps at Harvard.

'The Kinsey that's become the public figure was in many ways a different person than the Kinsey that went to Bowdoin," said Hecht.

Kinsey's blurb in the Bowdoin Bugle remarked that "when Alfred Charles Kinsey entered college last fall, he was a dignified, non-commit-tal individual, who stalked about the campus with little to say to anyone."

"Since then he has come out of his shell to some extent," it added. "If you loosen up a bit more, Al, you will make quite a man."

After delivering Bowdoin's 1916 commencement address and graduating magna cum laude, Kinsey attended Harvard University and began his research on gall wasps, a project which led to his formal research on

human sexuality.

Though he did not begin to study sexuality while at Bowdoin, the College expressed its pride in Kinsey's accomplishments. In a letter to Kinsey, Nixon commented on the tremendous scope of Kinsey's research.

"I also judge...that eventually you'll remake the world, or thereabouts.

More power to you," Nixon wrote.

According to Hecht, the importance of Kinsey's work is reflected in his discovery of a discrepancy between sexual discussion and behavior.

"He provided information that

suggested to Americans that the way they talked about sex and what they actually did were two different things," said Hecht.

'On the first day of (se)xmas, my true love gave to me...

SUGGESTIVE BY ALANNA BEROIZA

Despite the fact that most of us have less than 12 days left on campus, i.e., less than 12 days to get all of our work done, confirm travel plans, pack up our stuff and say goodbye to friends, I thought it might be cute, in the spirit of the holidays, to give some suggestions for end of semester sex relations—that is, if you can even find the time to hook up in this strom of papers and exams

Then again, knowing Bowdoin students, exam period is apt to be rife with sex. Students will probably file it under their "stress relief" file and begin to actively seek out titillating experiences to provide an escape from the onslaught of work. So then, without further ado, here are my 12 days of (se)x-mas:

On the first day of (se)x-mas my

that I never called. If you're looking for someone to hook up with, it may actually be advisable to dredge up the old phone numbers. But calling that onenight-stand you haven't talked to since the first week of the semester and asking if they want to come over to watch a movie may just read as a thinly veiled

On the second day...an old pair of underpants. People forget where they flung things in the heat of the moment, and as you reach underneath your bed to get your suitcase you might enter a ghost of hook-ups past. You should probably give whatever you have back to the person it belongs to, but remember to be discreet—no one likes their dirty underwear paraded around the Union.

On the third day...three erotic films. A low maintenance alternative to sexu-

al relations in pairs or more.

On the fourth day...crushes on four

different people. Happens all the time, end of the semester it can get a little hectic. Try to remain calm and be honest; don't start a double or triple life because you'll never be able to finish your work with all that social juggling. We'll talk more about polynory next semester.

On the fifth day...five different sex ual orientations! We've talked about this, but if you're still struggling, try not to let your confusion interfere with your work. If you need to talk to some one, come to Out Peers drop-in hours in the Queer-Trans Resource Center.

On the sixth day... six forms of contraception. Condoms, dental dams, the Pill, diaphragms, spermi-Condoms, dental cide, abstinence.

On the seventh day...seven fits of sardonic laughter. Remember Thumper, from the Disney movie Bambi? "If you can't say something nice, don't say anything at all." You may feel like it now, but it's probably not the best idea

to get bitter or resentful about past ok-ups now. What you say no the last thing people remember and, if it's mean enough, they'll carry it with try and stay out of trouble.

On the eighth day...eight aching orifices. So, there's a couple of reasons you might be a little sore. We talked about the STD thing, so you know that the Health Center is always there to get you tested and help clear things up the est it can. Lubricants are something we haven't talked about, but they can be infinitely helpful to avoid irritation and discomfort when inserting foreign objects into bodily orifices.

On the ninth day...nine necrophiliacs. When I say necrophiliac, I mean a person who is obsessed with dead relationships. It's the end of the sernestensionships. Its tile ento the series-ter, just let it go. Even if you and this person did get back together, you'd be going away for four weeks, so its prob-ably best to leave it on the back burner

On the 10th day...10 different sex positions. If you do end up getting it on during an intense organic chemis-try cram session, think about switching things up. Trying something new might just get the adrenaline flowing enough to see you through the rest of the week (see Julia Bond's "Your Body is a Wonderland" column for more details).

On the 11th day...hickies in 11 dif-ferent places. We haven't talked about this yet, but it's a real concern especially around holiday time. In my experience, it always seems like a good idea it's going to look like in the morning A little rowdy neck action is hot, but what'll Grandma think?

On the 12th day...12 pubic hairs, in my teeth. Gross. Well, maybe it's just relative, but we'll talk about grooming

For now, happy holidays and I'll see you next year!

Krohn said.

out of class."

HOOK-UPS

Hooking up was defined as "anything from kissing to having sex.

The poll also showed that more Bowdoin students engage in onenight hook-ups than any other type of romantic or sexual interaction, including going on dates and being involved in a committed or casual relationship. The second most common type of interaction was hooking up with the same person multiple times, without a relationship.

The respondents were divided almost evenly between the four classes. Sixty-three percent of respondents were female and 37 percent male. Ninety-three percent of those who took the survey iden-tified as exclusively or predominantly heterosexual. Four percent of respondents said they were exclusively or predominantly homo-sexual, while three percent of students said they were bisexual.

Hook-ups

According to first year Chris Fung, students at Bowdoin expect to go out, get drunk and hook up.

A lot of people come to college thinking they're going to be hook ing up with a lot of people."

"It's a matter of convenience," ex-

plained Barrett Brown '09. "[Drunk en hook-ups] are a quick fix with more limited commitment [than being in a relationship]." Brown said he thought Bowdoin students were too busy to date and sought out hook-ups because they are easier than relationships both in terms of time and emotional investment.

Following a drunken hook-up, the students involved tend to avoid each other, said Erin York '09. York said that she has rarely been approached by someone she has hooked up with, and the avoidance can "hurt a lot."

Margot Farrell Clark '09 attributed the prevalence of drunken hook-ups to the fact that there are not oppotunities for men and women to form intimate relationships. She explained that drunken hook-ups are the "only outlet for

interacting with the opposite sex."
On the other hand, George Aumoithe '11 said that he thought that queer students were left out of the hook-up scene. "The general hookup culture doesn't allow for someone who's just come out to safely develop their sexuality," he said.

"There's a feeling of not wanting to overstep your boundaries," Aumoithe said, referring to approaching someone whose sexuality he is unsure of. "You don't want to ostracize them."

A junior, who requested that her sexual orientation not be made public, said that "the fear of being rejected is amplified when you're

not even sure if that person is interested in whatever sex you are.

For Hayley McHugh '09, there are both positive and negative sides to the hook-up culture. "I think it's almost liberating now that both men and women can make the choice to just hook up," she said.

However, she added, "I have seen people cry the next day or the next week when they are not contacted by somebody they just spent the night with, and that's unhealthy because it can have lasting consequences on your self-esteem.

By the time they are seniors, many students grow out of the hook-up scene, according to Lind-sey Schickner '09. Schickner said that she thought hook-ups were more common among younger students, but that people become "dissatisfied with hooking up by the time you get to senior year.

Satisfaction

According to the poll, only 17 percent of respondents were satisfied or very satisfied with the dating scene at Bowdoin, which was defined as all romantic or sexual interactions. Thirtyfour percent of students polled were unsatisfied and 14 percent were very satisfied. The remainder were indifferent.

Students that identified themselves as predominantly or exclusively ho exual were the least satisfied with the dating scene at Bowdoin, with 40 percent reporting they were "unsatisfied" and 32 percent reporting they were "very unsatisfied."

"As a gay black man, it doubly sucks," said Aumoithe. "There's only so many gay students."

Thirty-five percent of predomi-nantly or exclusively heterosexual students were "unsatisfied" and 13 percent were "very unsatisfied."

Aliyah Sabharwal '09 said that she was dissatisfied with how little dating happened at Bowdoin. "It feels like it's not really plausible [to go on a date] unless you really put yourself out there," she said. "We're not comfortable enough just to ac-knowledge that 'Yeah, I'd like to go on a date.

Of students who identified as single, 54 percent said they wished they were in a relationship, while eight percent said they did not wish they were in a relationship. Thirty-eight percent said they were unsure

Asking Out

Last year on "Date Day," Mike rohn '09 tried an unusual approach for getting a date. On the day that a number of student organizations encouraged Bowdoin o ask other students out on dates, Krohn posted a message on the Student Digest that said he was

"I got a text at two in the morn-

Day, on December 3, was to encourage people not to "wait until Saturday night to make a move" if they are interested in someone.

Natelson said that hooking up "is fine" if both parties are inter ested, "but if you're into someone and you want to put in the time, that's where the date can come in.

Julia Bond '09 said that Bowdoin students "haven't been presented with many opportunities to ask people on dates

But she added that "when given the opportunity, people are pretty excited to go on a date."

Bond explained that "every once in a while there is a wave for pushing dating." Still, 63 per-cent of students said that they had never asked anyone out on a date at Bowdoin. Seventy-two percent of women and 46 percent of men had never asked another Bowdoin student out. Of the senior class, 47 percent had asked someone on a

Farrell Clark was in the minority of women who had asked someone out on a date. "It's like, just ask someone!" she said. "It's more awkward to have weird tensions with someone, better to ask them out.

Bond said, "I'm just disenchanted with the fact that it's considered awkward to be a little bit more honest about your intentions or your feelings."

Brown said that asking someone out is perceived as being serious. "It's more than 'Hey I'd like to get to know you," he said.

"Why wouldn't you want to get to know people? I think life is about getting to know people and about having interesting relationships, friendships and I just wanted to get out there and get to know some people that I didn't know."

MIKE KROHN'09

Reasons for Not Dating

For many students, asking someone out is just too intimidating. Half of the respondents indicated that they have refrained from asking someone out because they were too nervous.

Bond said for most students "asking someone out on a date is scary and there's no need to do that because you'll probably see them tomorrow at lunch."

"The sooner you learn that you're not going to die if someone rejects you the better off you'll be," Bond added.

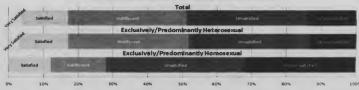

However, Schickner said she has never felt comfortable asking someone out and has never needed to because of how small Bowdoin is. "If you want to see someone out you don't have to make an effort, you'll see them around."

Aumoithe said that the queer community is even smaller and that he knows everyone who is openly gay. "It's the same old, same old," he said.

"When you have 1600 kids it

Intelligent design: Students create their own majors

It's almost that time of year againno, not the holiday season.

When sophomores return back to campus from winter break, they will receive cards in their mailboxes instructing them on the major declaration process. Some will pursue double major others will elect to complete an interdisciplinary concentration and others will be devising their own path of study.

The student-designed major, a part of the Bowdoin academic curriculum since 1978, allows for students to pursue interdisciplinary concentration of their own construction. Minutes from a faculty meeting in the fall of 1978 reveal that the original intention of the studentdesigned major program was to both "diversify the curriculum" and "offer an opportunity for student originality."

On a national scale, the face of university curriculums underwent a number of transformations in the late 70s as higher education took on a more liberal nature. Student-led movements, such as the Third World Liberation Front at the University of California at Berkeley, pushed for more interdisciplinary academic programs that encompassed previously neglected classroom topics such as non-Eurocentric studies.

Likewise, one of the initial intents of the student-designed major program at Bowdoin was to allow for the pursuit of interdisciplinary studies.

"This was a big deal in 1978, as the College didn't have as many interdisciplinary programs as we do now," said Registrar Christine Cote. "The student-designed major allowed people to pursue majors in Women's studies, Asian studies, Gay and Lesbian studies, et cetera.

Today, the interdisciplinary goals of the student-designed major remain the same as they were with the inception of the program in the late 70s. However, the nature of the program has since inged over the years. The expansion of the Bowdoin curriculum-which now encompasses 33 academic departments-has made designing a major increasingly complex.

Given that there are so many major and minor options at Bowdoin today, as opposed to in 1978, it is often very hard r students to show that their proposed major cannot be done within the normal curricular structures," said Cote.

The proposal of the student-designed major includes a written statement explaining the goals of the desired major program and why the proposed goals cannot be met with standard major options.

It is the nature of this initial proposal

process that discourages many Bowdoin students from pursuing a student-de-signed major. A number of students described the declaration process, which begins in the fall of sophomore year, as

"frustrating" and "complicated."

A complete proposal, submitted to

the Curriculum Implementation Committee (CIC), consi sts of a complete list of courses, an outline of a capstone synthesizing project to be completed senior year and letters written by faculty sponsors in support of the student's agenda The CIC then evaluates the proposal, and sends it back to the student for further honing and modification.

"More often than not, proposals are not approved on the first pass," said Cote.

This aspect of the process deterred Julia Littlefield '11, who was considering pursuing a student-designed major in Urban Studies

"Designing a proposal seemed like a huge hassle," she said. "I can understand why the process seems as complicated as it is, so that students have to put in the time and effort to show that they have enough motivation to create the proposal, but it is still an intimidating and lengthy process.

Nora Krulwich '11, who submitted a proposal for a major in Socialization and Human Development earlier this month, admitted that the procedure was lengthy and complicated. Krulwich also noted that the intricacies of the procedure, however bothersome they may be,

"The proposal process is good for making sure students are really serious and passionate about their topic."

Krulwich's proposed major, which is currently under consideration by the CIC, would combine the fields of sociology, psychology and education to study how

people integrate into their own culture.

Krulwich has been developing her own curriculum this fall, working closely with Professor of Sociology Nancy Riley, Assistant Professor of Education Charles Dorn and Associate Professor of Psychology Samuel Putnam.

As a part of the proposal, Krulwich devised a list of specific courses to create a curriculum she would follow for the rest of her time at Bowdoin. According to Cote, creating this list of proposed courses represents a diffi-culty for many students who consider self-designed majors.

Zac Skipp '11 spoke to this potentially restrictive factor, saying, "I would hope the self-designed major would be a liberating experience, but being limited to a path of specific courses I've planned two years in advance is worrisome.

Skipp is in the process of submitting a proposal for a major that would com-

bine film studies and art history.

Like many other students, Skipp lamented about the complexity of the procedure but noted that the overall process has had a valuable aspect of

"Overall, this has really given me a greater perspective on what I want to do, both at Bowdoin and in the future,"

Krulwich agreed, saying, "Developing my proposal for the major helped me understand exactly what I was interested in and what I was hoping to get out of my education here."

Rachel Bryan-Auker '10, who is pur-suing a major in Native American Studies, is studying native peoples in the con-text of economics and anthropology.

"I decided to design my own major to study what I learned to be truly relevant to my life and education," she said.

It is this development and articulation of academic goals that Associate Professor of Film Studies Tricia Welsch sees as the most valuable aspect of the self-designed concentration.

The self-designed major encourages students to be very dynamic in articulating and understanding their educational goals and interests," said Welsch. "The proposal process encourages students to take an active role of their education in a very unique way."

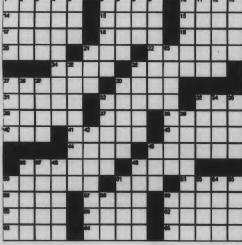

Welsch acknowledged the difficulty and complexity of the proposal process, saying. "The College makes it difficult, but that is appropriate for the nature of the major."

There are a lot of hurdles along the way, but these are hurdles that guarantee the coherence of an undergraduate education," she added.

But for those who clear these hurdles, the proposal and completion of the student-designed major is ultimately rewarding.
"It's a great way to take owner-

ship of your own ideas, to think about your goals and ambitions," Welsch said.

DATING CONTINUED FROM PAGE 5

feels like everyone is in your business," Bond said. "If you ask someone out, even if you don't tell your

friends, they tell their friends. Brown said that the small size of the school meant there was "no safe-

ty of anonymity."

York said she would be uncomfortable asking someone out because "it's a big deal" and because "word would get around." In addition, she said she would be afraid of being perceived as too aggressive or confident and worried her actions would be perceived

as "weird or wrong." "I wouldn't trust him not to say

nething bad about me," she said. As busy as Bowdoin students may be, most did not indicate on the survey that dating was a scheduling is sue. Only 18 percent of students have ever chosen not to pursue someone or ended a relationship because it was too much of a time commitment. Even so, the students that spoke with the Orient said they viewed relation-ships or dating as a significant time

"My friends and I have joked that if you're in a serious relationship it's like taking a fifth class," McHugh

Natelson said that she does not have enough time to be in a relationship. "A relationship is just one more commitment, not that it's not a great

commitment. "Everyone at Bowdoin is so busy that it's really hard to spend a lot of time dating if you aren't in a committed relationship," Krohn said.

Relationships

Having more than one committed relationship in college is unusual for most Bowdoin students. Of students who have been involved in a com-23 percent have had more than one. For seniors who have had relationships at Bowdoin, only 32 percent

have been in more than one

A student who wished to remain anonymous to avoid upsetting her boyfriend said that "it's detrimental to devote yourself to one person."

"Unless you want your relationship to be a significant part of your experience [at Bowdoin] you can't have it be serious," she said. "All I want is that one night stand and I can't get it."

Several of the students the Orient spoke with said their relationships started with drunken hook-ups Still, a few others were skeptical that hooking up was the best way to start

"If [a relationship] starts out with a hook-up I'm not really choosing that person for who they are," said

Becca Spiro '09. Similarly, Brown said he was "suspicious that substantive relationships

can start from drunken hook-ups." One student who requested ano-nymity said that while her current relationship began with a series of drunken hook-ups, after a while she "got sick of having it be nothing, just hook-ups." She told her now boyfriend that she did not want to hook up anymore, and then he asked her

out on a date. "No one had ever asked me out on

a date before," she said. They started spending time to-gether sober, and ended up in a com-

mitted relationship. But students who are in a relationship are a minority on campus. Sixty-one percent of students who responded to the survey said that they are not currently in a relationship The most commonly given reason why students were single is because they had not pursued the person

they were interested in.
For Thomas Blaber '10, changing the dating scene at Bowdoin is a mat-

ter of personal initiative. "Either you're celibate, a slut, or married, and in a lot of ways that's true, but I feel like it's not hard to break that if people just want to," he

ARTS & ENTERTAINMENT

Art students incorporate diverse media in final shows

STAFF WRITER

visual arts students are gearing up to present their final projects this weekend in mediums that include everything from chicken wire to paper leaves.

Art Lecturer John Bisbee's Sculpture I and II classes, as well as Visiting Assistant Professor of Art Anna Hepler's Advanced Studies in Visual Arts course, will hold shows in Fort Andross. Visiting Assistant Professor of Art Meggan Gould's Photo I and II classes will display their final projects in the McLellan Building. The different courses present a variety of interesting mediums, and the different assignments provided some challenging constraints within which students worked.

Bisbee's Sculpture I class will exhibit three projects. For the first project, the 24 students in the class each sculpted a body-sized version of a small object with chicken wire and plaster. In the second project, students created wire drawings of electrical appliances. The final project is somewhat of a mystery—Bisbee would only say that it involved a masking tape installation and that those who attend the show will participate in some way.

Bisbee's Sculpture II class has been working on its final projects

CREATIVE LICENSE: Colin Matthews '10 created 125 photo cubes, "53 Cubes," for his final project in Advanced Studies in Visual Arts. Matthews built a table and wooden benches on which to display the work and made the exhibit interactive by encouraging viewers to handle the art

all semester, and the results are creative and elaborate sculptures. Bisbee told the 10 students in the course to pick a material of their choice during the first week of class in September, and they have been working with those materials

"It's been a long process, but we've all come a long way. It's been really interesting to explore something as deeply as you can. I think everyone's projects have turned out really awesome." Sara Griffin

'09 said. "They are different from how they expected them to be.

Hepler's Advanced Studies in Visual Arts course contains the widest range of media of all the shows. The assignment was self-designed, which gave students a great deal

of creative freedom. Some of the projects include a large paper skirt, indreds of paper leaves suspended in the space, and a collage of disassembled clothing. According to Hepler, one major constraint for the students has been the venue.

The greatest challenge with this show has been the space. It is huge, and so many of the students altered the scale of the final projects to respond to the space," she saided seed

Gould's two photography courswill have shows in McLellan. Both final projects were self-designed, so students have been able to use the process and subject of their choice. Bryant Dossman '11, a student in Photo I, noted that the freedom of the assignment produced interesting results among the students in the course.

We're allowed the freedom to pursue any interest or style within photography," he said. "A lot of the projects are turning out nicely. People's styles are emerging from their work from a range of different approaches."

Sculpture I and II shows open from 6-9 p.m. tonight in Fort Andross. The show for Advanced Studies in Visual Arts will open from 5-8 p.m. tonight in Fort Andross. Photo I and II, Architecture and Landscape Painting will hold open studios of their work on the third floor of the McLellan Building from 5-7 p.m. tonight

Musicians display talents at Note Book Café

FRIN MANULIFFE STAFF WRITER

Gibson Hall is alive with the sound of music this afternoon as a group of Bowdoin students showcase their musical talents at the Note Book Café. Initially a way for Polar Bears enrolled in music lessons to exhibit their semesterlong endeavors, the Note Book Café ures vocalists, pianists and violinists, as well as finger puppets.

Abriel Ferreira '10 will perform

Mozart's "Variations on the Carnival of Venice" with a twist. Her solo will feature a two-minute interlude into which she will integrate a lobster finger

Puppet.

"The Note Book Café is a chance for students who've been taking music lessons through Bowdoin to perform in a low-key environment," Julia Bond '09 said of the show. "We practice a couple of pieces each over the course of the semester. It's a great way to get experience in a performance setting, and it's a fun way to end a semester's worth of

Bond, who will be performing three vocal pieces she has been perfecting throughout first semester, expressed excitement about the upcoming show.

"It's always fun performing in front

Jake Levin '10, who will be singing three songs from the Soviet era, looked to Russian culture for his individual vocal style.
"My inspiration to sing these songs

was a previous performance with Dmitri Hvorostovsky, a famous Rus-sian baritone," Levin said. "Additionally, this semester I have been taking a course on Stalinist culture in Rus

which also served to pique my interest

anew in the country and its music." Levin explained the intricacies of

Russian repertoire and the work it took to extract the true meaning of the

"Each song conveys a different mes-sage or image, and the singer's job is to project that message to his audience," he said. "The emotions guide the voice. Once you discover how the song is speaking to you and can help someone else in seeing it as well, then you're

truly singing."

In addition to these vocal performances, Kimberly Ayers '10 will perform a violin solo. Ayers, who will be playing the first movement of Men

delssohn's "Violin Concerto in E minor," practiced extensively to prepare her piece for the show

It's a really technical piece and it really did take a lot of preparation," she said. "I practiced the piece all summer and, of course, all semester and re-

hearsed with the accompanist."

Ayers noted the benefits of Friday's

"I'm really looking forward to seeing what they've been working on all semester, because there are some really great musicians in this group," she said

of her fellow students.

The Note Book Café will take place in Gibson 101 at 4 p.m. today. It is free and open to the public.

Choristers offer new spin en holiday tradition at 'Lessons'

Bowdoin offers its students many holiday traditions including the Junior Senior Ball, the final a cappella concert, and countless holiday parties, but what many students may not know is that the College also offers a traditional Festival of Lessons and Carols service for students, staff, and community members.

service, unlike some other Bowdoin traditions, has an easily traceable history, with roots in Anglican Church traditions of the 1800s. The service consists of nine lessons-readings taken from traditional worshippunctuated by a collection of carols and hymns performed by a choir and an organist. The most famous modern rendition of Lessons and Carols, performed by the King's College Choir of Cambridge, England, is broadcast on

BBC every Christmas Eve.

Though the service itself may not be familiar to some, the songs are often unavoidable in the mall during the holi-days: "O Come All Ye Faithful," "Hark the Herald Angels Sing" and "The Holly and the Ivy," to name a few. The service also contains a collection of lesser known carols and hymns, such as "Personent Hodie," and the song that often begins the celebration, "Once in Royal David's City.

Since the creation of the Lessons and Carols format, many groups, religious and not, have adopted and tailored the celebration to their tastes. For the past few years, Bowdoin's celebration has closely mirrored the traditional format in completions and structure.

However, Lessons and Carols also presents a creative opportunity to those organizing the performance. Chris Li 10, this year's coordinator of the event, introduced some new ideas to the traditional lessons and carols. The service will still start with the obligatory "Once in Royal David's City" and continue with many other traditional melodies, but will also include songs more traditionally performed on campus by the Bowdoin Chamber Choir: "O Nata Lux" by Morten Lauridsen and "Ave Maria" by Franz Biebl.

"These pieces are hard-and we'll have to spend lots of practice on them— but I hope they'll be worth it,".Li'said.

Li has also worked to include as ma people in the service as possible. This year, faculty and staff interest has been unusually overwhelming. For the first time in recent Bowdoin history, President Barry Mills will not only attend the service-he will also serve as a reader. Director of Safety and Security Randy Nichols will also make his debut as a reader, Professors Shannon Chase, Bill Watterson and Denis Corish will also read, among others.

Student involvement has been strong as well. Li calls his group of singers "the a cappella all-stars". The service has brought together the a cappella com-munity as members of all six groups and the Bowdoin Chamber Choir have evoted their time and energy to weekly

"I just want people to have fun and love it," Li said.

The Festival of Lessons and Carols will be in the Bowdoin Chapel on Sun-

Brews provide an enjoyable study companion for finals week

RY MAC EVANS

Classes are done, the dance show is danced, course cards are in, and my last paper has been turned in. My only obligation now is to buckle down with the books once more and get ready for

I need a drink.

Unfortunately, my trip to Bootleg-gers is only further reminding me of my classes, and I think they had a much more subconscious influence on my ases than I had imagined. Each of these beers is dedicated to my classes for my final fall semester, and any relation to their reviews and course evaluation cards is wholly unintentional and acci-

Advanced Topics in Applied Mathematics #9 Not Quite Pale Ale is Magic Hat's flagship brew, and there's no surprise -it's delicious. Considered in some circles a fruity beer, it has correct apricot flavoring, which complements the beer. Each sip is both welcome to the previous, and not regrettable as you go to the next. This beer is highly recommended if you are just getting into the realm of "good beer," and is affordable and acces-

ELIXIR OF LIFE: #9 Not Quite Pale Ale, made by Magic Hat Brewery, is a refreshing ale flavored with apricots—ideal after a long night of studying.

sible almost everywhere for any party Truthfully, math left the option open for any beer, given that the focus of my final project in the class was optimal control of beer fermentation. Yeah, I would

Independent Study in Engineering Physics

"Viscous, Chocolatey, Roasty" is what reads on the bottle of Harviestoun Brewery's Old Engine Oil. Its name is obvious; it pours a solid black into a

glass with little to no head or carbonation at a slow pace. It tastes a little bit like drinking a chocolate bar, but a chocolate bar that's secretly made out of roasted wood. I've heard that "Old Engine Oil" is something like the Moxie of beers-it has a small audience of those who call it an acquired taste. I like Engine Oil and Moxie, but that really isn't saying anything, and bringing out Old Engine Oil at a party is sure to make one lose some friends...or gain

the best friends you'll ever know

Ancient Philos

I love my Belgians, and Three Philosophers is a good step-up to the plate. It is a quadruple ale, meaning it's been brewed four times, and it's reasonably strong but not too overpowering. It has hazing with some sediment on the bottom (it's typical for Belgian beers, in particular, to not screen all the haze in order to produce a fuller tasting beer). It has the essence of

dessert, tasting either like sweet cherry fruit cake or like sweet cherry cough syrup; I can't exactly decide. The beer is a borderline lambic, and I'm not entirely sure how I feel about that, but the reas surance of a malty aftertaste is nice.

War and Society

"This Premium dark beer honours the brave soldiers of the Carignan-Salières Regiment and their traditional black hats..." Chambly Noire is a fancylooking beer from Unibroue Brewery in Québec, which is known for making beers with labels that look like they could be the cover of a Meatloaf album Unibroue also specializes in Belgian styles, and has several beers that I par ticularly like (like Maudite). Noire the like it came from the same brewery, but with a coppery tasting twist on a Bel-gian. I've definitely had more interesting brews, and nothing in particular stands out aside from the darker color and more carbonation... so I'm going to do a saké bomb

Whos wait really?

Saké is Japanese rice wine, although the process includes making alcohol by using sugars produced by starch—simi-lar to the way beer is made. Although saké undergoes a "parallel fermenta-tion," it is closer to beer in brethren.

This was a terrible idea. Wake me up

Christmas reads ideal for creative stocking stuffers

NOOK

BY FRANCES MILLIKEN **COLUMNIST**

'Tis the season for festive sweaters, twinkling lights, hot drinks and the inevitable and sometimes painful Christmas carols. It's the season for mistletoe and stocking stuffers, latkes and sleigh rides, and if you're on the brink of a secret Santa exchange or have time for shopping between finals and roasting chestnuts, here are

a few holiday suggestions. "Shantaram" by Gregory David Rob erts is an ideal book for the adventurer and the traveler. Lin, a New Zealander imprisoned in Australia for armed rob bery, escapes to Bombay and begins again. Lin is absorbed into the society of the slums, opening a free clinic and befriending the Indians who reside derworld of the black market, making important friendships and repeatedly putting his life in jeopardy. Lin's love for the mysterious Karla drives a good portion of the narrative, but she feels like the least compelling part of the story At times, I disagreed with Lin, but ultimately the book is a fast-paced tour of life in Mumbai. The colors of India and the struggles are arresting and intricately observed. "Shantaram" is based on the author's own experiences, a fact that compels the reader to fly through

Lin's unlikely life story.

Another option for the free spirit is the work of Annie Proulx. Her short stories are usually startling. Something of a New Yorker darling, Proulx's pieces appear frequently in the magazine's fic-tion section. The few seen there this year prove to be the best of her most rec published work, "Fine Just the Way It Is," which features familiar characters from Proulx's two earlier Wyoming collections. Despite the rough edges on the cowboys Prouks describes, there is an characters that speaks to the reader with some charm. Proulx's delivery is cut and dried. She lays the meat of the story on the table and the beauty that lies in her prose appears as it might in the bareness of the vast Wyoming terrain. Your heart will break for her characters and, like them, you will breathe in and ride on.

For the soon-to-be college gradu or the aspiring New Yorker, Min Jin Lee's "Free Food for Millionaires" is a treat. Casey, a recent graduate of Princeton, is kicked out of her parents' house by her traditional Korean father. Her intrusion upon her boyfriend's raunchy encounter with two coeds leaves her at loose ends. Casey attempts to find her way through the rat race of young professionals in New York City, but her career aspirations are often hampered by her love for fashion and her romantic catastrophes. Her picture-perfect friend Ella, who does all the correct things but does not wind up happily ever after, counters Casey's irre ensibility. Lee maneuvers the terrain of wealth, education, youth, tradition and foreignness with a fresh, keen eye. Her tale is not particularly unusual, but it is certainly not rudimentary

Finally, "Llama, Llama Red Pajama," by Anna Dewdney, is a must-have, even for those who don't know anyone between the prescribed ages of four and eight. The book was a huge hit during the story hour I held in Philadelphia over the summer. Baby Llama waits in his bed for his Mama to perform the familiar bedtime ritual. As the length of her absence increases. Baby Llama goes through a wide range of emotions. These are endearing because they unfold in two dimensions across the colorful pages, and because it's a llama, not a screaming baby. I sent my oneand-a-half-year-old cousin Clyde the book earlier this year and his father assures me I am way ahead in the running for best cousin ever. Buy this treasure to win the same affection from a friend, or from a partner beneath the mistle

Coviello reflects on sabbatical work, travel

"What have I been up to?" Associate Professor of English Peter Coviello smiled as he repeated the question "Well, like all faculty members on leave, I've been drinking wine in exotic cities and dancing in night clubs across Europe," he joked. "No, no. Well, I have

While away from Bowdoin, Coviello traveled throughout Europe to Naples, Berlin, Sussex, Madrid, Paris and London. He plotted his travels to accommodate several academic talks at European universities and also budgeted some time with his family in Naple

"The funny thing about being on leave, perhaps the best thing about being on leave, is not being bound to a schedule. Not having to have this be done by now," he said. Liberating himself from the restraints of a tight schedule has given Coviello the needed space to focus on larger projects, including his book "Untimely Passions: Sexuality in 19th Century American Literature.

"At Bowdoin, you're consistently doing all this research and doing all of this teaching. What you then need is time to turn it into a book," he said. "Having this time away has just given me the time to pause and think about it. A lot of the writing process is simply that, time spent thinking."

As the title of Coviello's project im-

ies, he is working on a study of the history of sexuality in literature. He is reading authors from the mid to late 19th century who were writing prior to when modern taxonomies of s hardened into the categories of hetero-sexuality and homosexuality.

"I am examining how people imag-ined what sexuality could be and what it was like before such rigid, categorical terms came into existence," Coviello

Coviello is focusing on authors Hen-ry James, Henry David Thoreau, Sara Orne Jewett, Emily Dickinson, Freder-ick Douglass, Joseph Smith and Oscar

"Working on the book feels like mid-

GOING WILDE: Associate Professor of English Peter Coviello at Oscar Wilde's tomb in Pans, France.

stream rowing," Coviello said about his project. "It has its own kind of

Being away, however, has also planted the seeds for a new, distinctly different project as well.

Tentatively, his new project is a book of essays titled "How To Do Things With Joy." It began as an essay that he wrote for a journal last summer. After giving the essay as a talk while in Sussex, England, Coviello realized that the ideas of the essay deserved a whole new project.

"This is something quite different than my project on the history of sexuality. It's a different kind of writing," Coviello said. "When I gave it as a talk, I thought "There's much more to this." And that's the great thing about being on leave, your thought can be errant. You can give yourself room to imagine

Although Coviello has returned from Europe to the Bowdoin campus for a few weeks, he will soon go to Chicago for the spring semester, where he will teach graduate classes at Northwestern

University.
"Having this opportunity to teach at ern is really exciting for number of reasons." Coviello said. "For one, I have never formally taught graduate students before, and second, teaching there will resonate very personally with me because I was a student at Northwestern. I really have no idea what to expect with graduate students, but it's a wonderful opportunity to be able to have as colagues the professors that I once had as

Teaching is another way to kindle ideas; you teach something, and then it always seems different after you teach it," he added.

That is what has been at the heart of Coviello's time away from Bowdoincarving out time for new thoughts.

"I am intensely, intensely grateful to have this time away," he said. "To be completely free of all of the college bureaucracy is a special kind of joy because imagination takes time and requires just this type of pausing.

Whether this pause will affect a change in his teaching when he returns Bowdoin remains to be seen.
"Well, I'll be older," he said. "And,

you like to think you'll be rejuvenated, overwhelmed with the excitement to

ARTS & ENTERTAINMENT

Art students incorporate diverse media in final shows

STAFF WRITER

As the semester winds down visual arts students are gearing up to present their final projects this weekend in mediums that include everything from chicken wire to paper leaves.

Art Lecturer John Bisbee's Sculpture I and II classes, as well as Visiting Assistant Professor of Art Anna Hepler's Advanced Studies in Visual Arts course, will hold shows in Fort Andross. Visiting Assistant Professor of Art Meggan Gould's Photo I and II classes will display their final projects in the McLellan Building. The different courses present a variety of interesting mediums, and the different assignments provided some challenging constraints within which students worked.

Bisbee's Sculpture I class will exhibit three projects. For the first project, the 24 students in the class each sculpted a body-sized version of a small object with chicken wire and plaster. In the second project, students created wire drawings of electrical appliances. The fi nal project is somewhat of a mys-tery—Bisbee would only say that it involved a masking tape installation and that those who attend the show will participate in some way.

Bisbee's Sculpture II class has been working on its final projects

CREATIVE LICENSE: Colin Matthews '10 created 125 photo cubes, "53 Cubes," for his final project in Advanced Studies in Visual Arts. Matthews built a table and wooden benches on which to display the work and made the exhibit interactive by encouraging viewers to handle the art.

all semester, and the results are creative and elaborate sculptures. Bisbee told the 10 students in the course to pick a material of their choice during the first week of class in September, and they have been working with those materials

"It's been a long process, but we've all come a long way. It's been really interesting to explore some thing as deeply as you can. I think everyone's projects have turned out really awesome," Sara Griffin

'09 said. "They are different from how they expected them to be.

Hepler's Advanced Studies in Visual Arts course contains the widest range of media of all the shows. The assignment was self-designed, which gave students a great deal

and so many of the students altered the scale of the final projects to respond to the space," she saided seen

Gould's two photography tours-es, will have shows in McLellan. Both final projects were self-de-signed, so students have been able use the process and subject of their choice. Bryant Dossman '11, a student in Photo I, noted that the freedom of the assignment produced interesting results among the students in the course.

We're allowed the freedom to pursue any interest or style within photography," he said. "A lot of the projects are turning out nicely. People's styles are emerging from their work from a range of differ-ent approaches."

Sculpture I and II shows open

from 6-9 p.m. tonight in Fort Andross. The show for Advanced Studies in Visual Arts will open from 5-8 p.m. tonight in Fort Andross. Photo I and II, Architecture and Landscape Painting will hold, open studios of their work on the third floor of the McLellan Building from 5-7 p.m. tonight

Musicians display talents at Note Book Café

FRIN MA ATTITIEF STAFF WRITER

Gibson Hall is alive with the sound of music this afternoon as a group of Bowdoin students showcase their musical talents at the Note Book Café. Initially a way for Polar Bears enrolled in music lessons to exhibit their semesterlong endeavors, the Note Book Café tures vocalists, pianists and violin-

ists, as well as finger puppets.

Abriel Ferreira '10 will perform Mozart's "Variations on the Carnival of Venice" with a twist. Her solo will feature a two-minute interlude into which she will integrate a lobster finger

puppet.
"The Note Book Café is a chance for students who've been taking music lessons through Bowdoin to perform in a low-key environment," Julia Bond '09 said of the show. "We practice a couple of pieces each over the course of the semester. It's a great way to get experience in a performance setting, and it's a fun way to end a semester's worth of

Bond, who will be performing three vocal pieces she has been perfecting throughout first semester, expressed

ment about the upcoming show. "It's always fun performing in front

Jake Levin '10, who will be singing three songs from the Soviet era, looked to Russian culture for his individual

"My inspiration to sing these songs was a previous performance with Dmitri Hvorostovsky, a famous Rus-sian baritone," Levin said. "Additionally, this semester I have been taking a course on Stalinist culture in Russia,

MARGOT D. MILLER, THE BOWDOIN ORIEN MAINE MUSIC: Abriel Ferriera '10 is using a lobster puppet during her trumpet solo today.

which also served to pique my interest anew in the country and its music."

Levin explained the intricacies of

Russian repertoire and the work it took to extract the true meaning of the

"Each song conveys a different mes-sage or image, and the singer's job is to project that message to his audience," he said. "The emotions guide the voice. Once you discover how the song is speaking to you and can help so one else in seeing it as well, then you're

truly singing."

In addition to these vocal performances, Kimberly Ayers '10 will perform a violin solo. Ayers, who will be playing the first movement of Men

delssohn's "Violin Concerto in E minor," practiced extensively to prepare her piece for the show

"It's a really technical piece and it really did take a lot of preparation," she said. "I practiced the piece all summer and, of course, all semester and rehearsed with the accompanist

Avers noted the benefits of Friday's

"I'm really looking forward to seeing what they've been working on all semester, because there are some really great musicians in this group," she said of her fellow students.

The Note Book Café will take place in Gibson 101 at 4 p.m. today. It is free and open to the public.

Choristers offer new spin on holiday tradition at 'Lessons'

BY DAVID YEE STAFF WRITER

Bowdoin offers its students many holiday traditions including the Junior/ Senior Ball, the final a cappella concert, and countless holiday parties, but what many students may not know is that the College also offers a traditional Festival of Lessons and Carols service for students, staff, and community members.

The service, unlike some other Bowdoin traditions, has an easily traceable history, with roots in Anglican Church traditions of the 1800s. The service consists of nine lessons—readings taken from traditional worship punctuated by a collection of carols and hymns performed by a choir and an organist. The most famous modern rendition of Lessons and Carols, performed by the King's College Choir of Cambridge, England, is broadcast on BBC every Christmas Eve.

Though the service itself may not be to some, the songs are often unavoidable in the mall during the holi-days: "O Come All Ye Faithful," "Hark the Herald Angels Sing" and "The Holly and the Ivy," to name a few. The ser-vice also contains a collection of lesser known carols and hymns, such as "Personent Hodie," and the song that often begins the celebration, "Once in Royal David's City."

Carols format, many groups, religious and not, have adopted and tailored the celebration to their tastes. For the past few years, Bowdoin's celebration has closely mirrored the traditional format presents a creative opportunity to those organizing the performance. Chris Li '10, this year's coordinator of the event, introduced some new ideas to the tra-ditional lessons and carols. The service will still start with the obligatory "Once in Royal David's City" and continue with many other traditional melodies, but will also include songs more traditionally performed on campus by the Bowdoin Chamber Choir: "O Nata Lux" by Morten Lauridsen and "Ave Maria" by Franz Biebl.

"These pieces are hard-and we'll have to spend lots of practice on them-but I hope they'll be worth it," Lisaid.

Li has also worked to include as ma people in the service as possible. This year, faculty and staff interest has been unusually overwhelming. For the first time in recent Bowdoin history, President Barry Mills will not only attend the service-he will also serve as a reader. Director of Safety and Security Randy Nichols will also make his debut as a reader. Professors Shannon Chase, Bill Watterson and Denis Corish will also read, among others.

read, among otners.
Student involvement has been strong
as well. Li calls his group of singers "the
a cappella all-stars". The service has
brought together the a cappella community as .members of all six groups
and the Bowdoin Chamber Choir have devoted their time and energy to weekly

practices.
"I just want people to have fun and love it," Li said.

The Festival of Lessons and Carols will be in the Bowdoin Chapel on Sun-

Brews provide an enjoyable study companion for finals week

RY MAC EVANS

Classes are done, the dance show is danced, course cards are in, and my last paper has been turned in. My only obligation now is to buckle down with the books once more and get ready for

I need a drink

Unfortunately, my trip to Bootleggers is only further reminding me of my classes, and I think they had a much more subconscious influence on my purchases than I had imagined. Each of these beers in dedicated to my classes for my final fall semester, and any relation to their reviews and course evaluation cards is wholly unintentional and acci-

#9 Not Quite Pale Ale is Magic Hat's flagship brew, and there's no surprise it's delicious. Considered in some circles a fruity beer, it has correct apricot flavoring, which complements the beer. Each sip is both welcome to the previ ous, and not regrettable as you go to the next. This beer is highly recommended if you are just getting into the realm of "good beer," and is affordable and acces-

ELIXIR OF LIFE: #9 Not Quite Pale Ale, made by Magic Hat Brewery, is a refreshing ale flavored with apricots—ideal after a long night of studying.

sible almost everywhere for any party Truthfully, math left the option open for any beer, given that the focus of my final project in the class was optimal control of beer fermentation. Yeah, I would.

Independent Study in Engineering Physics

"Viscous, Chocolatey, Roasty" is what reads on the bottle of Harviestoun Brewery's Old Engine Oil. Its name is obvious; it pours a solid black into a

glass with little to no head or carbonation at a slow pace. It tastes a little bit like drinking a chocolate bar, but a chocolate bar that's secretly made out of roasted wood. I've heard that "Old Engine Oil" is something like the Moxie of beers-it has a small audience of those who call it an acquired taste. I like Engine Oil and Moxie, but that really isn't saying anything, and bringing out Old Engine Oil at a party is sure t make one lose some friends...or gain

the best friends you'll ever know.

Ancient Philosophy

I love my Belgians, and Three Philoso phers is a good step-up to the plate. It is a quadruple ale, meaning it's been brewed four times, and it's reasonably strong but not too overpowering. It has hazing with some sediment on the bottom (it's typical for Belgian beers, in particular, to not screen all the haze in order to produce a fuller tasting beer). It has the essence of

dessert, tasting either like sweet cherry fruit cake or like sweet cherry cough syrup; I can't exactly decide. The beer is a borderline lambic, and I'm not entirely sure how I feel about that, but the reas surance of a malty aftertaste is nice.

"This Premium dark beer honours the brave soldiers of the Carignan-Salières Regiment and their traditional black hats..." Chambly Noire is a fancylooking beer from Unibroue Brewery in Québec, which is known for making beers with labels that look like they could be the cover of a Meatloaf albu Unibroue also specializes in Belgian styles, and has several beers that I particularly like (like Maudite). Noire th like it came from the same brewery. but with a coppery tasting twist on a Bel-gian. I've definitely had more interesting rews, and nothing in particular stands out aside from the darker color and more carbonation... so I'm going to do a saké bomb

Whoa, wait, really?

Saké is Japanese rice wine, although the process includes making alcohol by using sugars produced by starch—si lar to the way beer is made. Although saké undergoes a "parallel fermentation," it is closer to beer in brethren.

This was a terrible idea. Wake me up

Christmas reads ideal for creative stocking stuffers

NOOK

BY FRANCES MILLIKEN COLUMNIST

'Tis the season for festive sweaters, twinkling lights, hot drinks and the inevitable and sometimes painful Christmas carols. It's the season for mistletoe and stocking stuffers, latkes and sleigh rides, and if you're on the brink of a secret Santa exchange or have time for shopping between finals and roasting chestnuts, here are

a few holiday suggestions.

"Shantaram" by Gregory David Roberts is an ideal book for the adventurer and the traveler. Lin, a New Zealander imprisoned in Australia for armed robbery, escapes to Bombay and begins again. Lin is absorbed into the society of the slums, opening a free clinic and befriending the Indians who reside there. Soon he is invited into the underworld of the black market, making important friendships and repeatedly putting his life in jeopardy. Lin's love for the mysterious Karla drives a good portion of the narrative, but she feels like the least compelling part of the story.
At times, I disagreed with Lin, but ultimately the book is a fast-paced tour of life in Mumbai. The colors of India and the struggles are arresting and intricately observed. "Shantaram" is based on the author's own experiences, a fact that compels the reader to fly through Lin's unlikely life story. Another option for the free spirit is

the work of Annie Proulx. Her short stories are usually startling. Something of a New Yorker darling, Proulx's piece appear frequently in the magazine's fic-tion section. The few seen there this year prove to be the best of her most recen published work, "Fine Just the Way It Is," which features familiar characters from Proulx's two earlier Wyoming collect tions. Despite the rough edges on the cowboys Proulx describes, there is an characters that speaks to the reader with some charm. Proulx's delivery is cut and dried. She lays the meat of the story on the table and the beauty that lies in her prose appears as it might in the bareness of the vast Wyoming terrain. Your h will break for her characters and, like them, you will breathe in and ride on.

For the soon-to-be college graduate or the aspiring New Yorker, Min Jin Lee's "Free Food for Millionaires" is a treat. Casey, a recent graduate of Princeton, is kicked out of her parents' house by her traditional Korean father. Her intrusion upon her boyfriend's raunchy encounter with two coeds leaves her at loose ends. Casey attempts to find her way through the rat race of young professionals in New York City, but her career aspirations are often hampered by her love for fash ion and her romantic catastrophes. Her picture-perfect friend Ella, who does all the correct things but does not wind up happily ever after, counters Casey's irre sibility. Lee maneuvers the terrain of wealth, education, youth, tradition and foreignness with a fresh, keen eye. Her tale is not particularly unusual, but

it is certainly not rudimentary. Finally, "Llama, Llama Red Pajama," by Anna Dewdney, is a must-have, even for those who don't know anyone be-tween the prescribed ages of four and eight. The book was a huge hit during the story hour I held in Philadelphia over the summer. Baby Llama waits in his bed for his Mama to perform the familiar bedtime ritual. As the length of her absence increases. Baby Llama goes through a wide range of emo tions. These are endearing because they unfold in two dimensions across the colorful pages, and because it's a llama, not a screaming baby. I sent my oneand-a-half-year-old cousin Clyde the book earlier this year and his father as-sures me I am way ahead in the running for best cousin ever. Buy this treasure to win the same affection from a friend, or from a partner beneath the mistle

Coviello reflects on sabbatical work, travel

RY RACHEL GOLDMAN

"What have I been up to?" Associate Professor of English Peter Coviello smiled as he repeated the question. Well, like all faculty members on leave, I've been drinking wine in exotic cities and dancing in night clubs across Europe," he joked. "No, no. Well, I have

While away from Bowdoin, Coviello traveled throughout Europe to Naples, Berlin, Sussex, Madrid, Paris and London. He plotted his travels to accommodate several academic talks at European universities and also budgeted some time with his family in Naples.

"The funny thing about being on leave, perhaps the best thing about being on leave, is not being bound to a schedule. Not having to have this be done by now," he said. Liberating himself from the restraints of a tight schedule has given Coviello the needed space to focus on larger projects, including his book "Untimely Passions: Sexuality in 19th Century American Literature.

"At Bowdoin, you're consistently do-ing all this research and doing all of this teaching. What you then need is time to turn it into a book," he said. "Having this time away has just given me the time to pause and think about it. A lot of the writing process is simply that, time spent thinking."

As the title of Coviello's project im-

ies, he is working on a study of the history of sexuality in literature. He is reading authors from the mid to late 19th century who were writing prior to when modern taxonomies of s hardened into the categories of hetero-sexuality and homosexuality.

"I am examining how people imag-ined what sexuality could be and what it was like before such rigid, categorical terms came into existence," Coviello

Coviello is focusing on authors Hen-ry James, Henry David Thoreau, Sara Orne Jewett, Emily Dickinson, Frederick Douglass, Joseph Smith and Oscar

"Working on the book feels like mid-

GOING WILDE: Associate Professor of English Peter Coviello at Oscar Wilde's tomb in Paris, France.

stream rowing," Coviello said about his project. "It has its own kind of

Being away, however, has also planted the seeds for a new, distinctly different

Tentatively, his new project is a book of essays titled "How To Do Things With Joy." It began as an essay that he wrote for a journal last summer. After giving the essay as a talk while in Sussex, England, Coviello realized that the ideas of the essay deserved a whole new project.

"This is something quite different than my project on the history of sexuality. It's a different kind of writing, Coviello said. "When I gave it as a talk I thought 'There's much more to this. And that's the great thing about being on leave, your thought can be errant. You can give yourself room to imagine

Although Coviello has returned from Although Covieuo has recurred for a few weeks, he will soon go to Chicago for the spring semester, where he w teach graduate classes at Northwestern

University.
"Having this opportunity to teach at tern is really exciting for number of reasons," Coviello said. "For one, I ave never formally taught graduate students before, and second, teaching there will resonate very personally with me because I was a student at Northwestern. I really have no idea what to expect with graduate students, but it's a wonderful opportunity to be able to have as coleagues the professors that I once had as

"Teaching is another way to kindle ideas; you teach something, and then it always seems different after you teach it," he added.

That is what has been at the heart of Coviello's time away from Bowdoincarving out time for new thoughts.

"I am intensely, intensely grateful to have this time away," he said. "To be completely free of all of the college bureaucracy is a special kind of joy because imagination takes time and

requires just this type of pausing."

Whether this pause will affect a change in his teaching when he returns Bowdoin remains to be seen.
"Well, I'll be older," he said. "And,

overwhelmed with the excitement to get back." you like to think you'll be rejuvened

Bowdoin graduates travel to Ghana to film 'Mango'

Three Bowdoin graduates flew to Ghana last summer to film "Un-der the Mango Tree," a documentary about the life and activities of the Maine-Ghana Youth Network (MGYN).

Steven Bartus '08 (editor), Anna Karass '08 (writer), and Aisha Woodward '08 (editor and writer) received the Davis Project for Peace Grant to indertake the project, which lasted three weeks. Woodward first volunteered for the MGYN when she studied abroad the spring of her junior year in Ghana. The same spring, the MGYN visited Bowdoin, and Karass met two of its leaders: Co-Director and Co-Founder Mollishmael Kwame Gabah and President Erin Rhoda.

wanted to use the Davis Project for Peace Grant to benefit the Maine-Ghana Youth Network, and decided that a film would represent what the organization wants and the needs of Kissehman," said Karass, referring to the community where the MGYN was founded.

When we went to Kissehman, I didn't know what to expect either from the place or from the project. It's difficult to know when the news here in the United States is mostly dismal. While hunger and health are acute problems in Kissehman, the people themselves were ex-tremely welcoming and friendly. It was a lot of fun," she said.

"The project taught me a lot about how people portray others, especially in the developing world," Woodward said. Although Woodward had been to Ghana before, filming the country was a new experience for her.

Seeing a country and population through a different lens is en-tirely a new experience for me," she

The film opens a window into the daily life of the organization from scenes of cultural drumming and dancing, reflections of com-munity members and organization staff, and a classroom where students sit at desks under the eponymous mango tree.

The trio spent the first week getting to know the children in the organization and different people in

"We wanted to make sure every one new us before we began working on the film with them," Karass

The film was made as a fundraising and publicity tool. It has been online since late September and has helped raise money in the United States for the MCYN.

Gabah began the organization as a youth group in the Kissehman community in Accra, Ghana. The aims of the organization are to provide food, drum and dance coach-

ing and academic tutoring.
"The majority of the kids don't have food to eat when they wake up in the morning," said Frank Frimpong, an instructor for the organization, during the film. "The only thing to do is to come to Mollishmael's house, because that is the best way they can survive. Their parents can't support them because they don't have a job. They don't have anything, so the kids don't even approach their parents."

The motivation to help the youth is the driving force of the organization. "This is my life. I love it. I love doing this, because I want to be there for them," Gabah said. "I want them to feel loved. I don't want them to feel left out. Ever."

The film also incorporates voices from students in Kissehman.

"If I was not in the group, my life would have been miserable," said Joshua Abalo, 15. "Mollishmael is like dad and mom for me or other kids. He helps us for food and everything that we need. He has been doing this for us."

Godfred Agbonu, 16, has been a part of the group since it began in

"Culture is this thing: culture is how people behave in a society. We are doing this group for people outside to know that culture in Africa is not just a stupid thing, but rather a good thing in Africa," he said.

'I love my family. I also thank God for blessing me with a happy family," said Aaron Chorbor, 11. "Mollishmael has been helping us a lot. Even though when our parents can't afford our needs, he tries his best to afford our needs for us. This group has helped us a lot. Not even only me, but other kids in the

The Maine-Ghana Youth Network provides a venue for recreation and education for children in the Kissehman community in an organized manner that was not available before.

"Most people from other communities see them and think maybe they are nothing, that they are hopeless or something," Ernestina Owusu-Attah, an instructor, said. "We try to bring out, to help them see the good that is in them."

The film can be viewed at mgndavisproject.wordpress.com. learn more about the Maine-Ghana Youth Network or to make a donation, visit maineghanayouth.org.

Men's ice hockey splits, now 3-1-1 in conference

BY ANDREW OTTON CONTRIBUTOR

The high-flying men's hockey team was brought down to Earth following a weekend of difficult away games. The Polar Bears defeated Castleton Friday night 5-3 before slipping Saturday in Saratoga Springs, N.Y., in a 6-4 loss against Skidmore, their first loss of the season.

The Bears were quick to establish a first period lead against Castleton as Brunswick native Kit Smith '11 notched the game's first goal at

Ryan Blossom '10 then stuck one just three minutes later with a goal at 15:45. The Polar Bears' offense could not be contained, and co-captain Matt Smith '09 scored his second of the season just 23 seconds later.

The Spartans mounted a Herculean comeback in the second period to notch three successive goals. Three different players struck within eight minutes to bring the game level.

The Bears, however, mounted a precise and immediate response. Graham Sisson '12 scored at 11:06 in the second, giving Bowdoin the lead.

With the game poised at 4-3, the Bears kept their cool to contain the Spartans until Blossom scored his second of the game. His third of the season. Blossom struck home an empty-netter with 27 seconds remaining in the game.

Currently boasting a .914 save percentage, goalie Richard Nerland '12 recorded 24 saves in the win.

Two-goal hero Blossom was happy with the team's performance.

We kinda grinded a win out on the road, it was a pretty good win for the team," he said

Blossom was quick to cite oth-

cess. "Offensively we did pretty well. [Trent Blossom and Aaron O'Callahan] play[ed] really well up

Saturday proved to be quite different as the Skidmore Thoroughbreds raced out of the blocks to deliver Bowdoin their first defeat of

Skidmore's players put their team

up 3-0 with 3:53 gone in the second. However, the Bears clawed their way back into the game as Matt Smith scored with 5:40 elapsed in the second. Collins scored again just 13 seconds later. Sophomore Jeff Fanning then pulled the Bears level

Following a second period Skidmore goal, Blossom scored Bowdoin's last of the night to tie the game for a second time after 4:24 in the third.

With 11:23 gone in the frame, Skidmore went ahead again and then iced the game for Skidmore with an empty-net goal at 19:16.

Goalie Chris Rossi '10 rebuffed 19 of 23 shots in his second appearance of the season

Despite the loss, Blossom remained positive about the performance of the team in the tricky away

"To go into winter break 5-1-1 is awesome," he said. "A lot of teams would love to have a record like

However, he was quick to emphasize that despite its stellar record, complacency would not creep into the squad.

"Being 5-1-1 and not happy with the way we're playing in general is pretty good," said Blossom.

doin currently sits fourth in NESCAC rankings.

MARIEL BEAUDOIN, THE BOWDOIN ORIEN

BOBCAT BASHING: Junior Mark Phillips dunks over a Bates defender during the Bears' overtime win against the Bobcats

Men's basketball has streak snapped

The Bowdoin Men's Basketball Team will enter the Winter Break on a sour note following its 63-57 loss to the Colby-Sawyer Chargers on Thursday night. The loss snaps the Bears five-game winning streak as they fall to 7-2 on the season. Senior Kyle Jackson led all scorers with 16 points. The Bears fell victim to poor three-point shooting, going 4-18 from beyond the arc, including only 1-10 in the second

Last Saturday in Morrell Gym, the Bears notched an impressive overtime victory against instate foe Bates College 71-62. The two conference rivals went back and forth throughout the contest, with each team sharing leads. Bates held a 28-24 advantage at the half, and would later extend the lead to 11, 35-24, with 15:11 to play. However,

Rallying the Bears were seniors Kyle Jackson and Tim Lane. Bowdoin regained the lead with 11:13 to go, on a three-point play by first year Will Hanley. Both teams exchanged leads in the final 10 minutes, and at the end of regulation, the score was tied 56-56.

The Bobcats quickly jumped out to a four-point advantage in the overtime period, as a three-pointer by Chris Wilson gave Bates a 60-56 lead with 3:30. Once again, Bowdoin responded. Led by Jackson and leading scorer Hanley, the Bears finished overtime on a 14-2 run. Hanley finished with 21 points and 12 rebounds for Bowdoin, while Jackson put in 20 points and five assists. In the victory, the Bears continued their trend of timely shooting, stout defense and impressive bench

On Tuesday night in Morrell Gym, the Bears improved their record to 7-

time, 74-50. The 7-1 start to the season is the program's best since the 1999-2000 season, an impressive feat following a season heralded as the most successful in program history. Hanley led the Bears with 14 points. Despite 20 turnovers, the Bears were able to dominate the contest with their impressive defense. Junior Mark Phillips commented on the defense as being the key to a successful campaign.

"Last year our team was one of the best defensive teams in the league," he said. "This year our team understands that in order for us to be successful and win games, we need to continue to play great defense. I think we are at our best when we are playing great defense," he said.

The Bears take a well-deserved holiday break until January 3, with a game at St. Joseph College. Their first conference game is January 17 at Colby.

Squash hit hard with losses

BY ANDY BERNARD STAFF WRITER

The men's and women's squash teams endured a tough couple of days last weekend as they faced two of the top-ranked teams in the nation. On Saturday, both teams made the drive down to Williamstown, Mass., to take on Williams and Princeton.

The men and women both entered the weekend with a 1-1 record, with both teams defeating Connecticut College but falling to Dartmouth in matches before Thanksgiving.

The first match for both teams came against Williams, which boasts a men's team ranked No. 7 in the nation and a women's side ranked No. 9.

Both teams turned in a good effort, but the strong Williams pro gram proved too much for the Polar Bears as both teams fell 9-0 to the

omen's No. 1 player Elena Laird '11 put forth a particularly strong effort against Williams, battling but eventually falling in the fifth game to Williams' No. 1 Jenni-

The teams spent the night in Williamstown in preparation for a Sunday match-up against squash powerhouse Princeton. The No. 2 nationally ranked Tiger men downed the Bowdoin men, 9-0. The women defending national champions also took care of business against the Polar Bears with a 9-0 victory.

Despite the tough losses, both the en and the women looked at the weekend as an enlightening experience, since playing against national champion-caliber teams provided a reality check and a reminder of the type of talent the Bears might encounter over the course of the

"I think we showed perseverance in the face of tough competitors," women's co-captain Biz Gillespie '09 said. "The positive mindset and enthusiasm we showed this weekend will help us in close matches against teams such as Bates and Colby later this season.'

Going up against two very talented teams, Williams and Princeto lets us know that we can play with some of the best and to never be neryous," added men's co-captain David Funk '10.

Both teams will train in Mexico and at Bowdoin over Winter Break before competing at Yale in a round robin tournament that includes the Yale, Wesleyan, Rochester and Cornell teams on January 10.

Swimming places 5th, 6th at MIT Invite

CONTRIBUTOR

Despite scientific claims to the contrary, it seems Polar Bears can thrive in warm waters.

At least that's what the Bowdoin swim ams showed last weekend during their successful meet in Cambridge, Mass. Amid steep competition from six other teams (NYU, MIT, Colby, Brandeis, Tufts and Wheaton) the Bowdoin's male and female delegations managed to te their collective roar heard.

The standout performance of the reekend came from first year Nathan Mecray's victory in the 100-yard breast With a blisteringly fast time of 59.85, Mecray blew the competition out of the water to give Bowdoin its only individual event victory. Mecray, for his standout performances at the meet, was also honored with the NESCAC swimmer of the week award

"His three lifetime bests at the MIT

meet were very solid swims, and they earned him the honor on a very busy weekend," said Coach Brad Burnham.

The women's team also put up a strong showing, winning the 200 medley relay. Swimmers Erin McAuliffe '11, Caitlin Callahan '11, Megan Sullivan '11 and Allison Palmer '11 edged out an NYU

team on the last leg to take the victory.

"It is a team effort," said Palmer. knew when I stepped up on the block that Erin, Caitlin and Meg had given everything they had, and that was the level of intensity I needed to show

included second place finishes from Palmer (50-yard freestyle), Callahan (100-yard breastroke) and the aforementioned foursome in the 400-yard

Additionally, first year Allen Garner took home a third place finish in the

tled in the no-man's time between

Saturday morning and afternoon sessions, distance freestylers from all seven teams pilled into the pool to compete in the weekend's longest event, the 1650yard "mile."

Henry Berghoff '11 put up a strong showing in this event, shaving more than 90 seconds off his personal record.

"I was there mentally," Berghoff said. "I just knew that this was going to be a big swim for me... It was the drop of the

"Everyone is focused on improving daily and that kind of atmosphere can have a big impact on individuals," Burn-ham said of Berghoff's mile swim.

The swim team now gears up for their winter training camp, which lasts from December 29 to January 19. Senior Blake Wheale '09 said that the upcor ing training camp will be important for both teams

"It's when we see who's going to raise the bar and make this season big, Wheale said.

Bowdoin graduates travel to Ghana to film 'Mango'

Three Bowdoin graduates flew to Ghana last summer to film "Un-der the Mango Tree," a documentary about the life and activities of the Maine-Ghana Youth Network (MGYN).

Steven Bartus '08 (editor), Anna Karass '08 (writer), and Aisha Woodward '08 (editor and writer) received the Davis Project for Peace Grant to undertake the project, which lasted three weeks. Woodward first volunteered for the MGYN when she studied abroad the spring of her junior year in Ghana. The same spring, the MGYN visited Bowdoin, and Karass met two of its lead-Co-Director and Co-Founder Mollishmael Kwame Gabah and President Erin Rhoda.

We wanted to use the Davis Project for Peace Grant to benefit the Maine-Ghana Youth Network, and decided that a film would represent what the organization wants and the needs of Kissehman," said Karass, referring to the community where the MGYN was founded.

"When we went to Kissehman, I didn't know what to expect either from the place or from the project. It's difficult to know when the news here in the United States is mostly dismal. While hunger and health are acute problems in Kissehman, the people themselves were ex-tremely welcoming and friendly. It was a lot of fun," she said.

"The project taught me a lot about how people portray others, especially in the developing world," Woodward said. Although Woodward had been to Ghana before, filming the country was a new experience for her.

Seeing a country and population through a different lens is entirely a new experience for me," she

The film opens a window into the daily life of the organization from scenes of cultural drumming and dancing, reflections of com-munity members and organization staff, and a classroom where students sit at desks under the eponymous mango tree.

The trio spent the first week getting to know the children in the organization and different people in Kissehman.

"We wanted to make sure everyone new us before we began work-ing on the film with them," Karass said.

The film was made as a fundraising and publicity tool. It has been online since late September and has helped raise money in the United States for the MCYN.

Gabah began the organization as a youth group in the Kissehman community in Accra, Ghana. The aims of the organization are to provide food, drum and dance coaching and academic tutoring.

The majority of the kids don't have food to eat when they wake up in the morning," said Frank Frimpong, an instructor for the organization, during the film. "The only thing to do is to come to Mollishmael's house, because that is the best way they can survive. Their parents can't support them because they don't have a job. They don't have anything, so the kids don't even approach their parents."

The motivation to help the youth is the driving force of the organiI love doing this, because I want to be there for them," Gabah said. "I want them to feel loved. I don't want them to feel left out. Ever."

The film also incorporates voices students in Kissehman

"If I was not in the group, my life would have been miserable," said Joshua Abalo, 15. "Mollishmael is like dad and mom for me or other kids. He helps us for food and everything that we need. He has been doing this for us."

Godfred Agbonu, 16, has been a part of the group since it began in

"Culture is this thing: culture is how people behave in a society. We are doing this group for people outside to know that culture in Africa is not just a stupid thing, but rather a good thing in Africa," he said.

love my family. I also thank God for blessing me with a happy family," said Aaron Chorbor, 11. "Mollishmael has been helping us a lot. Even though when our parents can't afford our needs, he tries his best to afford our needs for us. This group has helped us a lot. Not even only me, but other kids in the group.

The Maine-Ghana Youth Network provides a venue for recreation and education for children in the Kissehman community in an organized manner that was not available before.

"Most people from other communities see them and think maybe they are nothing, that they are hopeless or something," Ernestina Owusu-Attah, an instructor, said. "We try to bring out, to help them

see the good that is in them."

The film can be viewed at mgyndavisproject.wordpress.com. To learn more about the Maine-Ghana Youth Network or to make a donation, visit maineghanayouth.org.

DJs OF THE WEEK

Frances Milliken '09 and Matt Eshelman '09

If you could only listen to one album for the rest of your life, what would it be?

FM: "The White Album" by the

ME: "Don't You Fake It" by The Red Jumpsuit Apparatus. I want to thank A-Board or I would have never discovered this incredibly talented band.

Favorite song to dance/rock out

FM: "Jerusalem" by Mirah. I've been caught twice on campus ME: "What's Up With You" by Ed-

die Murphy and Michael Jackson. If you were in a band, what would it be called and what kind of music

would you play? FM: Trouser. A kind of rousing

Latin tryst music.

ME: Krittersauruspussyrex and

the Revolution, we'd play elevator

Theme song during Ivies? FM: "Paper Planes" by M.I.A. I

danced on a table.

ME: "We are Your Friends" by Justice.

If you could meet any musician, dead or alive, who would it be and

why? FM: Phil Collins. He speaks to Matt in a special way.

ME: Jimmy Cliff. Best new music you've heard

FM: This dude in East Village who

sounded like Johnny Cash and the Moldy Peaches

ME: The Cool Kids, Dr. Dog, Black Keys, Ratatat, My Morning Jacket, Fleet Foxes.

If you could time travel back to any

musical period, where would you go and why?

FM: The '80s are tempting be-

cause it would be Racer X day and night, but I'm going to go with the '60s. I'd get the fab four and everything after.

EM: I'll go with the typical answer: mid '60s to mid '70s

Bands/musicans who have most influenced your musical taste?

FM: The Beatles! Elliott Smith,

Ella Fitzgerald, Weezer, Radiohead. EM: The Beatles, Notorious B.I.G., The Band, Jimi Hendrix, Jay-Z. The Roots, Led Zeppelin.

"Mixed Tapes" with Frances and Matt airs Sundays from 3:30-4:30 p.m. on WBOR 91.1 FM.

SPORTS

Men's ice hockey splits, now 3-1-1 in conference

BY ANDREW OTTON CONTRIBUTOR

The high-flying men's hockey team was brought down to Earth following a weekend of difficult away games. The Polar Bears defeated Castleton Friday night 5-3 before slipping Saturday in Saratoga Springs, N.Y., in a 6-4 loss against Skidmore, their first loss of the season.

The Bears were quick to establish a first period lead against Castleton as Brunswick native Kit Smith '11 notched the game's first goal at 12-35

Ryan Blossom '10 then stuck one just three minutes later with a goal at 15:45. The Polar Bears' offense could not be contained, and co-captain Matt Smith '09 scored his second of the season just 23 seconds later.

The Spartans mounted a Herculean comeback in the second period to notch three successive goals. Three different players struck within eight' minutes to bring the game level.

The Bears, however, mounted a precise and immediate response. Graham Sisson '12 scored at 11:06 in the second, giving Bowdoin the lead.

With the game poised at 4-3, the Bears kept their cool to contain the Spartans until Blossom scored his second of the game. His third of the season, Blossom struck home an empty-netter with 27 seconds remaining in the game.

Currently boasting a .914 save percentage, goalie Richard Nerland '12 recorded 24 saves in the win.

Two-goal hero Blossom was happy with the team's performance.

"We kinda grinded a win out on the road, it was a pretty good win for the team," he said.

Blossom was quick to cite oth-

ers as the reason for the team's success. "Offensively we did pretty well. [Trent Blossom and Aaron O'Callahan] play[ed] really well up front for us," he said.

Saturday proved to be quite different as the Skidmore Thoroughbreds raced out of the blocks to deliver Bowdoin their first defeat of the season

Skidmore's players put their team up 3-0 with 3:53 gone in the second.

However, the Bears clawed their way back into the game as Matt Smith scored with 5:40 elapsed in the second. Collins scored again just 13 seconds later. Sophomore Jeff Fanning then pulled the Bears level at 11:55.

Following a second period Skidmore goal, Blossom scored Bowdoin's last of the night to tie the game for a second time after 4:24 in the third.

With 11:23 gone in the frame, Skidmore went ahead again and then iced the game for Skidmore with an empty-net goal at 19:16.

Goalie Chris Rossi '10 rebuffed 19 of 23 shots in his second appearance of the season.

Despite the loss, Blossom remained positive about the performance of the team in the tricky away game.

"To go into winter break 5-1-1 is awesome," he said. "A lot of teams would love to have a record like that."

However, he was quick to emphasize that despite its stellar record, complacency would not creep into the squad.

"Being 5-1-1 and not happy with the way we're playing in general is pretty good," said Blossom.

Bowdoin currently sits fourth in NESCAC rankings.

Men's basketball has streak snapped

STAFF WRITER

The Bowdoin Men's Basketball Team will enter the Winter Break on a sour note following it s 6-57 loss to the Colby-Sawyer Chargers on Thursday night. The loss snaps the Bears free-game winning streak as they fall to 7-2 on the season. Senior Kyle Jackson led all scorers with 16 points. The Bears fell victim to poor three-point shooting, going 4-18 from beyond the arc, including only 1-10 in the second half.

Last Saturday in Morrell Gym, the Bears notched an impressive overtime victory against instate foe Bates College 71-62. The two conference rivals went back and forth throughout the contest, with each team sharing leads. Bates held a 28-24 advantage at the half, and would later extend the lead to 11, 35-24, with 15:11 to play. However,

in typical fashion, Bowdoin responded. Rallying the Bears were seniors Kyle Jackson and Tim Lane. Bowdoin regained the lead with 11:13 to go, on a three-point play by first year Will Hanley. Both teams exchanged leads in the final 10 minutes, and at the end of regulation, the score was tied 56-56.

The Bobcats quickly jumped out to a four-point advantage in the overtime period, as a three-pointer by Chris Wilson gave Bates a 60-56 lead with 3:30. Once again, Bowdoin responded. Led by Jackson and leading scorer Hanley, the Bears finished overtime on a 14-2 run. Hanley finished with 21 points and 12 rebounds for Bowdoin, while Jackson put in 20 points and five assists. In the victory, the Bears continued their trend of timely shooting, stout defense and impressive bench

On Tuesday night in Morrell Gym, the Bears improved their record to 71 with a victory against Maine Maritime, 74-50. The 7-1 start to the season is the program's best since the 1999-2000 season, an impressive feat following a season heralded as the most successful in program history. Hanley led the Bears with 14 points. Despite 20 turnovers, the Bears were able to dominate the contest with their impressive defense. Junior Mark Phillips commented on the defense as being the key to a successful campaign.

"Last year our team was one of the best defensive teams in the league," he said. "This year our team understands that in order for us to be successful and win games, we need to continue to play great defense. I think we are at our best when we are playing great defense," he said.

The Bears take a well-deserved holiday break until January 3, with a game at St. Joseph College. Their first conference game is January 17 at Colby.

Squash hit hard with losses

BY ANDY BERNARD STAFF WRITER

The men's and women's squash teams endured a tough couple of days last weekend as they faced two of the top-ranked teams in the nation. On Saturday, both teams made the drive down to Williamstown, Mass., to take on Williams and Princeton.

The men and women both entered the weekend with a 1-1 record, with both teams defeating Connecticut College but falling to Dartmouth in matches before Thanksgiving.

The first match for both teams came against Williams, which boasts a men's team ranked No. 7 in the nation and a women's side ranked No. 9.

Both teams turned in a good effort, but the strong Williams program proved too much for the Polar Bears as both teams fell 9-0 to the Ephs.

The women's No. 1 player Elena Laird '11 put forth a particularly strong effort against Williams, battling but eventually falling in the fifth game to Williams' No. 1 Jennifer Coxe.

The teams spent the night in Williamstown in preparation for a Sunday match-up against squash powerhouse Princeton. The No. 2 na-

tionally ranked Tiger men downed the Bowdoin men, 9-0. The women defending national champions also took care of business against the Polar Bears with a 9-0 victory.

Despite the tough losses, both the men and the women looked at the weekend as an enlightening experience, since playing against national champion-caliber teams provided a reality check and a reminder of the type of talent the Bears might encounter over the course of the

"I think we showed perseverance in the face of tough competitors," women's co-captain Biz Gillespie '09 said. "The positive mindset and enthusiasm we showed this weekend will help us in close matches against teams such as Bates and Colby later this reserve."

"Going up against two very talented teams, Williams and Princeton, lets us know that we can play with some of the best and to never be nervous," added men's co-captain David Funk '10.

Both teams will train in Mexico and at Bowdoin over Winter Break before competing at Yale in a round robin tournament that includes the Yale, Wesleyan, Rochester and Cornell teams on January 10.

Swimming places 5th, 6th at MIT Invite

BY KEITH HEYDE CONTRIBUTOR

Despite scientific claims to the contrary, it seems Polar Bears can thrive in warm waters.

At least that's what the Bowdoin swim teams showed last weekend during their successful meet in Cambridge, Mass. Amid steep competition from six other teams (NYU, MIT, Colby, Brandeis, Tufts and Wheaton) the Bowdoin's male and female delegations managed to make their collective roar heard.

The standout performance of the weekend came from first year Nathan Mecray's victory in the 100-yard breast-stroke. With a blisteringly fast time of 59.85, Mecray blew the competition out of the water to give Bowdoin its only individual event victory. Mecray, for his standout performances at the meet, was also honored with the NESCAC swimmer of the week award.

"His three lifetime bests at the MIT

meet were very solid swims, and they earned him the honor on a very busy weekend," said Coach Brad Burnham.

The women's team also put up a strong showing, winning the 200 medley relay. Swimmers Erin McAuliffe '11, Caitlin Callahan '11, Megan Sullivan '11 and Allison Palmer '11 edged out an NYU team on the left has to the the strong the s

team on the last leg to take the victory.
"It is a team effort," said Palmer. "I knew when I stepped up on the block that Erin, Caitlin and Meg had given everything they had, and that was the same level of intensity I needed to show them".

Other impressive performances included second place finishes from Palmer (50-yard freestyle), Callahan (100-yard breastroke) and the aforementationed foursome in the 400-yard medley relay.

Additionally, first year Allen Garner took home a third place finish in the 200-yard freestyle.

Nestled in the no-man's time between

Saturday morning and afternoon sessions, distance freestylers from all seven teams pilled into the pool to compete in the weekend's longest event, the 1650-yard "mile."

Henry Berghoff '11 put up a strong showing in this event, shaving more than 90 seconds off his personal record. "I was there mentally," Berghoff said.

"I was there mentally," Berghoff said.
"I just knew that this was going to be a big swim for me... It was the drop of the

"Everyone is focused on improving daily and that kind of atmosphere can have a big impact on individuals," Burnham said of Berghoff's mile swim.

The swim team now gears up for their winter training camp, which lasts from December 29 to January 19. Senior Blake Wheale '09 said that the upcoming training camp will be important for both teams

"It's when we see who's going to raise the bar and make this season big," Wheale said.

Hockey teams prepare for relocation to Watson

After 52 years, hockey teams leave historic Dayton Arena

BY JEREMY BERNFELD STAFF WRITER

It is tough to imagine hockey at Bowdoin without the legendary Dayton Arena. And yet, by the time students are back on campus following Winter Break, the Bowdoin hockey program will have moved to its new, swanky home next to Farley Field House.

While the excitement is building for the beautiful new arena, Bowdoin hockey's old Quonset hut home will be

Men's hockey coach Terry Meagher compared Dayton to an old, beat-up family car with 300,000 miles on it. It's old and lovable, but broken in so many ways, and just impossible to fix without destroving it completely.

After 52 years, Dayton will be relieved of its services to the College. It may be the end of an era, but it's time to move on and to usher Dayton into the realm of legend.

While all Bowdoin hockey fans must say goodbye to their teams' old home, the hockey program's longest-standing fans are losing an old friend. The Dayton die-hards are Bowdoin hockey's superfans and have long roots with the program and the arena.

In the early 1970s, students ran the time clock and scoreboard at all hockey games. When legendary Bowdoin coach and Athletic Director for whom the new arena will be named, Sid Watson, wanted to add some adult supervision to the scorer's table, he turned to local resident Harry Warren. Twentyfive years later, Warren is still running the clock and scoreboard for men's sames.

Twenty-five years is a long time do anything, but Warren became part of the Bowdoin hockey family. And after 25 years of "watching men slam each other around," Warren and his wife Judy have switched to the "more graceful women's team games."

Watching the women from their customary perch five rows up behind the women's bench.

Moving to a new hockey home will be tough, but even superfans like the Warrens recognize that it is time to move on.

"Despite all of the wonderful memories," Warren said, "Dayton Arena's time has come. We look forward to what will be, by all accounts, a beautiful new arena."

So where will we find the Warrens on Bowdoin hockey days? They're not sure if they'll stake a claim to seats five rows behind the Bowdoin bench, but rest assured that they will be somewhere inside the new arena.

The Bowdoin Women's Hockey Team will have the honor of playing the first Bowdoin game in the newly constructed Sidney J. Watson Arena when they square-off against Hamilton on Sunday, January 18.

With any luck, the women's team will fare better than when the men

opened Dayton and got hammered by Middlebury 9-0, back on December 1,

Dayton has seen its fair share of wins and losses, blowouts and squeakers, epic overtime victories and crushing defeats. The arena has been home to a whopping 76 total seasons of hockey (52 men's seasons and 24 women's) and has seen six ECAC championship teams, two NESCAC championship teams, and six teams that have been invited to play in the NCAA Tournament. And of course, Dayton saw one of the greatest collegiate hockey games of recent history; when Bowdoin beat the arch-rival Mules in a 7-6 comeback of epic proportions in December of 2005.

Dayton's final games and the opening of the new arena will be a time for ceremony and remembrance for Bowdoin. The school has planned a weekend-long celebration for the Bowdoin hockey program and for the integral part it has played in the school's history.

"So many great players and teams have been a part of the arena," said men's co-captain Mike Collins' 09. "It will be an honor to close the arena and pay tribute to all the players that wore the jersey and made the program the elite program that it is today."

Starting Monday, students can get tickets at the Smith Union Info Desk to Watson Arena's dedication. The ceremony will be an all-day event and will include the first women's team game, a dedication led by President Mills and the Board of Trustees, the first men's

MARGOT D. MILLER. THE BOWDOIN ORIENT

HASTA LA VISTA, DAYTON: Bowdoin students pack the stands for the final Colby game at Dayton.

team game, and an introduction and celebration of the field hockey team who have won back-to-back Division III National Championships.

"The whole weekend is really a celebration for the College and for the hockey program," said Director of Athletics Jeff Ward. "Ultimately, it's all about the people and the last games in Dayton, and the dedication of Watson will bring a lot of people back to the College and that will be wonderful."

Even the Warrens agree that the hockey program is about much more than an arena.

While Dayton will always hold a

special place in any hockey fan's heart,
"it is not so much the physical facility," Warren said, "but [because of]
the great friendships we've made with
a long line of men's players and now
women athletes."

"The warmest and best memories," Warren added, "have been meeting players who still remain our close friends. Whe never there is an alumni game, I'm there to shake hands with a group of wonderful friends."

Home may be where the heart is, but Bowdoin will just have to bring its heart along to Watson. After 52 years, Dayton deserves a rest.

WATSON

CONTINUED FROM PAGE 1

Before construction began in September 2007, Bowdoin registered the arena as a Leadership in Energy d Environmental Design (LEED) building project. LEED Green Rating Systems, introduced by the United tes Green Building Council, is a voluntary approach to creating efficient and sustainable architecture. Simoneau said that the ratings focus on five main criteria: sustainable site development, water savings, energy efficiency, materials and resource selection, and indoor environmental quality. In constructing Watson Arena specifically, this has led to the incorporation of plumbing fixtures that serve water use, energy savings, a composition of 30 percent recycled content and 82 percent construction waste diverted for recycling.

As for Dayton Arena, plans have been made to raze the building to create additional parking in the near future. In the long run, the space may be used to create another academic building central to the campus.

"There's a certain generation of Bowdoin student athletes that are very fond of Dayton," said Sports Information Director Jim Caton. "There are several great memories of phenomenal games and exceptional performances by great players. However, over the past few years, it's just become less functional."
"There will be nostalgia on the

"There will be nostalgia on the night we close [Dayton] and play our last game there, but I think as soon as we drop the puck [at Watson], some of that will be forgotten."

Simoneau added that he personally felt an affinity for older rinks like Dayton. "They have a certain feel and intimacy that is hard to create in a modern facility." he said.

But the new rink will offer stateof-the-art amenities, offering a different experience for both players

WARMUP WATSON: The women's ice hockey team will be the first to compete on the ice, taking on Hamilton on January 18. Tickets for the events are available to students starting December 15.

"It's going to be one of the nicer rinks in the country," men's hockey Assistant Coach Bill Riley said. "I think the hockey players feel pretty humbled to be moving into a rink like that."

"There's a lot of history in Dayton, which we'll definitely miss, although it's time logistically for a new rink," said Leland Fidler '10. "Everyone will miss Dayton and what it has to offer."

Alex Fahey '12, a women's ice hockey player, concurred with

"It's definitely bittersweet," she

Caton also expects Watson to in-

crease publicity for Bowdoin hockey.
"Having a facility like this will definitely draw regional and local attention," he said.

The building will be christened with an Opening Ceremony at 4 p.m. on January 18 between its first featured women's hockey game against Hamilton at 2 p.m., and its first men's

hockey game against Williams at 5 p.m.

Tickets are required to attend the first events in the new arena, since large crowds are anticipated. Fivehundred tickets have been set aside for students and will be available for free beginning December 15 at the Information Desk in Smith Union.

Women's basketball steals show, takes down Colby-Sawyer 54-45

BY JEREMY BERNFELD STAFF WRITER

Defeuse is the name of the game for the women's basketball team. Bowdoin's suffocating defense led to a nine-point road win over Colby-Sawyer on Thursday.

The Polar Bears shut down the Chargers with a whopping 17 steals and five blocks in the 54-45 win. Senior tri-captain Maria Noucas scored a season-high 16 points and junior forward Leah Rubega had 10 points and 10 rebounds in her third straight double-double.

"It is really great to go into Winter Break on a high note," Noucas said. "We played so well defensively tonight, and Leah Rubega and Caitlin Hynes played good, aggressive basketball. We had great confidence in the second half, and that really sparked us."

Bowdoin held a one point halftime lead, but outscored the Chargers 31-23 in the second half. Bowdoin improves to 6-2 on the season, but has fallen out of the national Top 25 poil.

Once again sparked by their stifling defense, the Polar Bears beat Husson on the road, 77-59, on Tuesday. Bowdoin forced 24 turnovers in the contest and controlled the entire game by dominating the boards.

game by dominating the boards.
"It was a good, solid team effort,"
said Maria Noucas '09. "We weren't
shooting well at first and couldn't hit
a three, but our defense really carried

First year guard Ellery Gould exploded off of the bench to lead Bowdoin in scoring with 20 points. Gould also notched three rebounds and four steals in the win. Junior forward Leah Rubega continued to play well for the Polar Bears, notching a double-double with 12 points and 12 rebounds, while also chipping in two blocks.

Gould "played a great game," said Noucas. "She's really latched onto our defensive mentality and is a really good athlete with great instincts. She was really confident from everywhere on the court and was a huge spark plug off of the bench."

Bowdoin also relied on strong play from underclassmen to beat rival Colby 71-61 at home on Saturday. First year Jill Henrikson scored a career-high 21 points in the win to lead the Polar Bears to victory.

The rookie class is comprised of "such hard workers," according to senior tri-captain Jill Anelauskas.

"I'm not surprised that they're contributing so much," she added. "We have high expectations and they're living up to them."

The win against Colby did not count in conference standings but provided a tough early-season test for the Polar Bear squad. Bowdoin clung to a slim 30-28 at halftime, but finished with a strong 13-2 run to secure the win.

"We're definitely fired up when we play any NESCAC opponent," Anelauskas said. "In the past, Colby has been one of the weaker teams in the conference but this year they have some good talent. It was nice to beat a tougher Colby team this year."

This year's Bowdoin team prides itself on an active defense that creates turnovers to generate offense.

"We have a deep team so we can really go hard on the defensive end for the entire game, which is a challenge for a lot of teams to deal with," said senior tri-captain Alexa Kaubris.

Women's ice hockey skids to tough loss in Waterville

BY EMMA POWER

The Bowdoin Women's Ice Hockey Team suffered a tough loss last Saturday, falling short 4-2 to the Colby Mules in Waterville.

Colby senior Becky Julian got the ball rolling for the Mules when she scored her first of three goals within the first minute of the game.

Bowdoin's Lindsay McNamara '09 responded six minutes later, scoring the first goal for the Bears on an assist from Alexandra Chlebeck '12.

The Polar Bears, however, could not mantain that momentum, as Julian netted two more goals to put Colby up 3-1 after two periods. In the third period, Colby senior Collette Finley added another to put the Mules up 4-1.

Bowdoin's Jill Campbell '11 rallied, netting the Bears' second goal to cut the deficit to two. Campbell was assisted by Katherine Pokrass '10. However, the Bears were not able to score again, giving Colby its second NESCAC win of the season.

First year Bowdoin goalie Sage Santangelo was strong in the net, making 22 stops throughout the game.

Not surprisingly, the loss to Colby disappointed the Bears.

"The Colby loss was really tough and frustrating because it was a game we could have won," Scooter Walsh '09 said. "As a team, we did not play that well. We had many minutes of good hockey in which we really controlled the game, but in the end it wasn't enough."

Her teammate Pokrass agreed that the loss was hard for the team. "Losing to a NESCAC rival is a huge disappointment," Pokrass said. "Colby is an extremely fast team and applied a ton of pressure. We never really established our game plan and Colby took advantage."

In light of their loss, their third of the season, the team is regaining focus as they prepare for the remainder of the winter.

remainder of the winter.

"I think the Colby game was helpful in teaching us what we need to work on in this month before our next game," Walsh said after the game.

Specifically, the team is focusing on their aggressiveness in their defensive game. "We are working to improve our

"We are working to improve our decision. making in the defensive zone and winning the one-on-one battles, both of which are very important to our system," Pokrass said.

The Bears are prepared to work hard over break to increase their momentum.

"In practice we are focusing on playing an up-tempo game and taking care of the puck," Santangelo said. "As we head towards winter break and the rest of our season we will to focus on playing aggressively and putting together a complete game."

Building a Mystery

COLUMN LIKE I SEE 'EM

They've loitered in the league's basement for almost a decade, cycled through coaches like pairs of socks and have left a pungent, decrepit smell wherever they've played. Littered with semi-high-profiled names with semitractor-trailer-sized waists, contracts and execrable attitudes, not only were the New York Knickerbockers going here fast, but they were regres After finishing 23-59 last season for the second time in three years, few basket-ball fans had any doubts about where the team, led by the Voldemort of the NRA-then head coach and President of Basketball Operations Isiah Thomas and owner James Dolan-ranked in the field of 30. Last April, the team even sparked New York Magazine to publish a seven-page masterpiece entitled "Absolutely, Positively the Worst Team in the History of Professional Sports: A Eulogy for Isiah Thomas's New York Knickerbockers"-best sports article I've read to date. Yet, only three weeks ago, all of this pollution somehow evaporated in a mere six hours, allowing the sun to illuminate Gotham for the first time in

I can't be sure if there was inclement weather in Manhattan on November 21 (a datg that will hopefully mark what I call "The Turnaround"), but a line from Guns N' Roses' classic hit "November Rain" could have easily summed up Knicks fans' demise. "We've been through this such a long long time/Just tryin' to kill the pain", and what hap-

pened first on that Friday wouldn't help. New President Donnie Walsh pulled the trigger on a trade that would send thenleading scorer Jamal Crawford to the Warriors in exchange for the disgrunted Al Harrington. It followed Knicks tradition: Trade current talent for former talent. The longest-tenured Knick this side of Stephon Marbury was being cut loose, and right when the club was three games over .500 for the first time since the Recount I was crushed. But I was also missing the big picture.

The next morning, I awoke to read that Walsh had made yet another move during the night, this time sending the other leading scorer Zach Randolph with Mardy Collins to the Clippers for Cuttino Mobley and Tim Thomas. "Great," I thought to myself. "Not only are we trading our next most atlented player, but we're reacquiring perhaps my least favorite Knick of all-time (again, this side of Marbury) in Thomas, the same guy who was swapped for Keith Van Horn hours after I had gotten the Ute's customized Knicks jersey in the mail." Was Donnie Walsh just as compulsive and irrational if not more so than Zeke? "No" was the answer that I would soon arrive at.

As we all know by now, those trades will save the Knicks a whopping \$27.5 million in cap space, just in time for the summer of 2010, which boasts arguably the most talented free agent class in NBA history, one that could include, but most certainly would not be limited to: Dwyane Wade, Chris Bosh, Chris Paul, Deron Williams, Rip Hamilton, Steve Nash, Kobe Bryant, Amare Stoudemire, Manu Ginobili, Carlos Boozer, Yao Ming, Dirk Nowitzki, and the main prize, LeBron James (Is this a loke? Are

you registering all of these names?); and
(depending on how Walsh handles the
roster the next two years) the Knicks will
have enough money for two of them.

Something as conceivable as this previously had been so inconceivable for so long. Branding the Knicks as "bad" had become as cliché as girls captioning "love her" under Facebook photos of her friends. But now, it's different. It's different because the New York Knicks organization and all of its followers have something they haven't had in nearly a decade: hope. Hope for 2010, but probably more importantly, hope for After the trades went down, Head Coach Mike D'Antoni did his best to ensure the world that there was more to these deals than meets the eye: "I really want to dispel the notion that we're just doing it to clear cap space. It's a two-fold thing, and we're going to fight for the playoffs and we're going to have an exciting year this

Whether or not he's telling the truth is irrelevant at this point. Both deals and the resulting cap space already have

Knicks fans hallucinating championship-caliber teams beginning in 2010 led by a seemingly infinite number of duos like James & Wade, James & Bosh, James & Amare, Wade & Bosh. .the list goes on and on. But is it strange that while I'm

excited about each one of those pros-

pects, I also really like the team now?

As I write this article, the Knicks are an under-appreciated 10-12, coming off an impressive 121-109 victory against cross-Hudson rivals New Jersey—and they only played with seven players. That's right: seven. This may come as a surprise to some people, but it has been business as usual for D'Antoni ever since "The Turnaround" began.

Harrington, who is quickly becoming my favorite Knick (and not just because of his headband), played all but two minutes Wednesday night, netting 39 and bringing down 13 rebounds. Wilson Chandler played 42 minutes, Quentin Richardson 41 and Chris Duhon 38. There is almost no sign of Isiah's flops Eddy Curry, Jerome James and Marbury, and letharry is now a thins of the

past, even with just seven guys. 16 (11)

But as much as I've enjoyed this year's immediate progress, realistically these Knicks are not a championship to fact, they're far from it (again, they play with seven guys). But thanks to Walsh, who will become New York's greates hero since Aaron Boone stepped up to the plate or Eli Manning got away from the Patriots' defensive line, if he succeeds in landing two of the aforementioned marquee free agents 20 months from now, the Knicks finally appear to have a seemingly bulletproof plan. The only question that remains is how that plan will take shape. More specifically, who will be part of it? There's really no way of knowing. But maybe that's the best way for it to be. So while the Celtics continue to dominate, they should take heed and enjoy the run while it lasts. Because when July of 2010 rolls around, there very well could be a new sheriff in town. So Merry Christmas to us, New York fans. All we have to do now is sit and wait. But fear not, because in the meantime, we can always watch C.C. Sabathia.

OPINION

Bowdoin Orient

Where's the love?

hether you're a girl or guy, gay or straight, we all know how it feels to-you know-like someone. It's that simultaneous feeling of wanting to see them, talk

to them, take a long walk on the beach with them-and also wanting to scurry away and hide behind a tree whenever you run into them. In fifth grade, that's pretty much how it was. If there was a girl or guy that you liked, you'd either play with them and tease them, or give them a wedgie

Now that we're in college, we've gotten a little better at expressing ourselves-we can speak in complete sentences, and play with each other without worrying about getting cooties. These new skills seem like they should make it easier for us to convey mutual attraction: If you like someone, you can simply tell them instead of giving them a wet-willy. If they like you back, great. If not, you're no worse off than you were before.

Unfortunately, Bowdoin social norms get in the way. In the dating and relationship poll recently conducted by the Orient, students reported overwhelming dissatisfaction with the dating scene on campus. Only 37 percent of students said that they have ever asked out another Bowdoin student, and even among the senior class, students who had asked someone out were in the minority

Instead, most of our sexual encounters tend to be hook-ups-and usually when we've been drinking. In the same survey, more than three quarters of people who have hooked up with someone said that alcohol at least sometimes influenced their decisions.

The reasons for this are not entirely obvious, but for most of us, it seems that dating takes more work, is more risky, and doesn't provide instant gratification. It's also a way to get close to someone without having to be honest about our feelings-basically the college version of a wet-willy.

Some people seem to be content with this kind of interaction, but we wouldn't be writing this editorial if people were satisfied with the current situation. More than half of the survey respondents that aren't in relationships wish they were, and another 38 percent say they're unsure.

Asking someone out on a date is tough, but you might as well give it a shot. Even if you don't do it in college, most of the outside world has moved beyond the drunken hook-up, which means that if you ever want a sexual relationship aside from getting lucky at the office Christmas party, you're going to have to learn how to go on a date. It would be a true tragedy if we all reached adulthood without being able to genuinely express our feelings to others, and had to watch that perfect person walk by while we're hiding behind a tree.

So, umm...you want to go out sometime?

The editorial represents the majority view of The Bowdoin Orient's editorial board, which comprises Nick Day, Nat Herz, Mary Helen Miller and Cati Mitchell.

LETTERS TO THE EDITOR

Robinson a worthy conservative voice

To the Editors

Kudos to the Orient for continuing to publish Steve Robinson's work. His pieces offer much more than timely and thought provoking analyses. They are the voice of Bowdoin conserva tives, who are routinely ridiculed, mocked and marginalized on our campus. And, given the venom with which Steve was twice attacked on last week's opinion page, it seems his articles are successfully presenting the sort of well-reasoned arguments liberals prefer to ignore. Thus, his work also serves as a reminder to Bowdoin's liberal ideologues that conservatism hardly equates to ignorance.

Many thanks to The Orient for giving Bowdoin conservatives a rare platform from which to express our beliefs. It has greatly broadened the sociopolitical and intellectual spectrum on our campus.

Op-ed misses broader ideas about Obama

I appreciate Steve Robinson's ability to put his aside his partisan distaste for Barack Obama last week ("Obama's cabinet selections more moderate than anticipated," December 5). However, I assure him that us "Obamanites" are not "pulling our hair out". Presidentelect Obama is doing exactly what we expected him to do when he promised to assemble a team of rivals, listen to the generals and govern out of moderate pragmatism (a big change from the Bush years) during the election. If Steve had bothered to learn Obama's

ositions before the election rather than relying on Republican talking points, he would realize that liberals are getting exactly what we expected and wanted from the President-elect.

In addition, by implying that the surge is solely responsible for improvements in Iraq, Steve is displaying a profound ignorance of the nature of warfare. The situation is improving in Iraq because General Patraeus instituted classic counterinsurgency tactics—providing prison-ers with trials, keeping the utilities running, strengthening local law enforcement such as the Sunni Awakening, and generally doing everything the Bush Administration ideologues should have done at the beginning of the war. The surge was helpful, but it would've been useless without the Sunni Awakening.

Sincerely, Mike Wolovick '09

Orient provides poor field hockey coverage

To the Editors:

Your coverage of the winning of the second national field hockey title by Bowdoin is shockingly poor. Your coverage in the 5 December issue was at best pedestrian. You don't have a clue as to how great an achievement this is. Bowdoin has only won two national championships in any sportfield hockey. Yet, you didn't make it the lead article on the front page nor did you include an action, full color photo. I hope that this doesn't reflect a chauvinistic lack of appreciation of what these young women have done Please reflect as to how you would have covered a national title in men's basketball or ice hockey.

Sincerely, Robert N. Morrison '52

Letter fails to consider accessibility of water

To the Editors

The Competitive Enterprise Institute may have done research that suggests that there is absolutely nothing wrong with bottled water ("Crowley provides smart counterpoint to bottled water issue," December 5). This institute also still denies that climate change is caused by anthropogenic factors, a ridiculous assertion

Companies' efforts to donate to relief areas, marathons and people without access to clean drinking water should be applauded. But these companies have overstepped their bounds and their "place" in today's world. Do you think that a \$2.00 bottle of Fiji water reflects the environmental costs of the production, bottling, shipping (8,000 miles!), and disposal?

In almost every house in America, they can get cold, healthy water straight from the tap. This is at the expense of everyone's tax dollars and legislation that keeps water clean, pure and continually monitored. Is Fiji not manipulating the system to bring people arguably the same quality of water but for 1,500 times the cost? What about the one-third of Fiji's population without access to safe drinking water?

Bottled water should be reserved for times of need and when access to clean water does not exist. In the United States, we have one of the best, if not the best, infrastructures for clean drinking water. We have been taxed to create this water system, and we shouldn't have to pay twice for the same product.

Sincerely, Abriel Ferreira '10

STUDENT SPEAK

If the fitness center doesn't get finished, what should we do with the giant hole in the ground next to Smith Union?

Lindsey Bruett '09 "A giant ball pit!"

Elly Garrard'12 "Put in a tar pit with dinosaur skeletons."

Nate Isaacson'10 "Non-domesticated animal petting zoo."
